#### NOTE

---

Section 119 of the Loan and Trust Corporations Act (R.S.O. 1927, Chap. 223) provides as follows:—

119.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

DEPARTMENT OF INSURANCE

TO THE HONOURABLE W. H. PRICE, K.C., M.P.P.,  
*Minister in Charge of the Department.*

Sir,—

I have the honour to submit herewith the Thirty-second Annual Report of the Registrar of Loan Corporations for the year 1929 (business for the year ended 31st December, 1928.)

The statements included in this report are arranged alphabetically according to the classes of corporations defined by the Act, namely, Loan Corporations, Loaning Land Corporations and Trust Companies. In addition there are certain statistical tables, tabulated summaries and comparative statements more fully described in the Table of Contents.

The preliminary text submitted with the abstract of this report under date of June 1st, 1929, outlining registry changes during the year and important features of 1928 business is included herewith beginning on page v.

ADDITIONAL REGISTRY CHANGES

Since the publication of the Abstract I have the following registry changes to report,—

*Amalgamations*

By an agreement dated the 3rd day of July, 1929, the Huron and Erie Mortgage Corporation, of London, Ontario, purchased the assets and liabilities, business, rights, property and goodwill, etc., of the London Loan and Savings Company of Canada, with head office in London, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and subsequently received the assent of the Lieutenant-Governor in Council. The transfer became effective as of the 29th day of August, 1929.

By an agreement dated the 15th day of October, 1929, the London and Western Trusts Company, Limited, of London, Ontario, purchased the assets and liabilities, business, rights property and goodwill, etc., of the Standard Trusts Company with head office in Toronto, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and was subsequently approved by the Lieutenant-Governor in Council. The transfer became effective as of the 18th day of December, 1929. The Standard Trusts Company had, by authority of By-law number 35 moved its head office from Winnipeg to Toronto, and was granted registry in Ontario under date of October 26th, 1929.

*General*

By Order-in-Council dated the 28th day of March, 1929, the Lieutenant-Governor in Council approved that trustees be authorized to invest trust funds in the terminable debentures of the Credit Foncier Franco-Canadien.

By Order-in-Council dated the 28th day of March, 1929, the Lieutenant Governor in Council approved that trustees be authorized to invest trust funds in the terminable debentures of the Real Estate Loan Company of Canada, Limited.

By Order-in-Council dated 20th June, 1929, the Lieutenant-Governor in Council approved the Community Trusts Corporation, of Chatham, Ontario, as a trust company with which trustees may entrust trust funds for guaranteed investment.

Also, on the 28th day of June, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the acceptance by the Supreme Court of the Community Trusts Corporation as a trust company for the purposes of such courts in Ontario.

On the 21st day of August, 1929, the Lieutenant-Governor in Council approved By-law number 18 of the London and Western Trusts Company, Limited, being a by-law to increase the capital stock of the said corporation from One Million Dollars (\$1,000,000) to Five Million Dollars (\$5,000,000). This by-law was passed and approved in conformity with Section 105 of the Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

On the 10th day of September, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the removal of the head office of the London and Western Trusts Company, Limited, from the City of London to the City of Toronto.

All of which is respectfully submitted.

R. LEIGHTON FOSTER,  
*Registrar of Loan Corporations.*

Parliament Buildings,  
December 31st, 1929.

# PRELIMINARY TEXT SUBMITTING ABSTRACT REPORT, JUNE, 1929

---

TO THE HONOURABLE WILLIAM H. PRICE, K.C., M.P.P.,  
*Minister in charge of the Department.*

SIR:—

I have the honour to submit herewith an abstract of the Thirty-second Annual Report of the Registrar of Loan Corporations of Ontario upon the affairs of all registered loan corporations, loaning land corporations and trust companies doing business in Ontario for the year 1929 (business of 1928).

This report shows in tabulated summaries the financial condition of these corporations as taken from their annual statements filed with the department on or before the last day of February, 1929, in respect to their business for the preceding calendar year, subject in some cases to certain adjustments and corrections necessary to secure uniformity and comply with the provisions of the Act. It is to be distinctly understood, however, that subsequent to the annual inspection now proceeding the statements herein contained are subject to such further changes or modifications, as may, in the opinion of the Registrar, be necessary to show the true and correct financial condition of each corporation. The department does not assume responsibility for the correctness of the figures submitted or for the valuation of the securities which compose the assets of the corporations.

The report is arranged alphabetically according to the class of corporation defined by the Act, namely, loan corporations, including loaning land corporations and trust companies.

## REGISTRY CHANGES

I have the following registry changes to report:—

On the 10th day of July, 1928, the Lieutenant-Governor approved of the removal of the head office of the Fidelity Trusts Company of Ontario from the City of London to the City of Niagara Falls.

On the 18th day of February, 1929, the Lieutenant-Governor approved By-law No. 14 of the London and Western Trusts Company, Limited, being a by-law to increase the authorized capital stock of the company from \$500,000.00 to \$1,000,000.00.

The Brockville Loan and Savings Company was given trust company powers and its name changed to the Brockville Trust and Savings Company and its authorized capital stock was increased from \$500,000.00 to \$1,000,000.00 by a Special Act in 1929, Chapter 130. It will apply for registry as a Trust Company on or before June 30th, 1929.

## REVIEW OF 1928 BUSINESS

Comparative summaries of assets and liabilities for the past six years showing detailed totals of assets by classes of corporations will be found on pages 272 to 278.

As would be expected the total assets of loan corporations have fallen in amount by reason of the fact that four corporations whose assets are listed in the 1928 report are dropped from that of 1929. One such corporation became a trust company, one loaning land corporation ceased registry, one went into voluntary liquidation and the fourth was absorbed by another corporation. Where there were twenty-nine loan corporations doing business in 1927 there were only twenty-five in 1928. The total assets of loan corporations at the end of 1928 were \$227,000,000 or \$7,000,000 below the total for 1927.

While loan corporations have been gradually reducing in number and in total assets for several years the number of trust companies has increased, and the amount of their total assets has risen very rapidly. In 1928, trust companies increased from twenty-four to twenty-seven and their total company and guaranteed funds rose from \$152,000,000 to \$167,000,000. The new trust companies appearing in the trust companies' register for 1928 are the Community Trusts Corporation, incorporated by Letters Patent, April, 1928, The Industrial Mortgage and Trust Company formerly the Industrial Mortgage and Savings Company which secured trust company powers by Special Act in 1928, and the Lambton Trust Company newly incorporated in April, 1928.

Total assets of all loan and trust corporations not including estates, trusts and agency funds show an increase of \$52,000,000 in 1927 and \$8,000,000 in 1928. Trust companies have increased their estates, trusts and agency funds from \$1,040,000,000 in 1927 to \$1,267,000,000 in 1928, an increase in excess of 225 million dollars.

Funds invested in office premises by loan corporations have increased by \$850,000 and trust companies by \$677,000. Real estate held for sale shows a substantial reduction, loan corporations dropping from \$7,220,000 to \$3,860,000 due to the removal of \$2,640,000 by the Walkerville Land and Building Company ceasing its registry and \$720,000 natural reduction by companies continuing registry. Real estate held for sale by trust companies decreased from \$1,565,000 to \$1,184,000, although in the latter amount there is included \$17,000 of real estate held by a company formerly a loan corporation. Excluding loaning land corporations, real estate held for sale by loan and trust corporations reduced by over \$1,000,000 during the year 1928.

Mortgage investments of all corporations show an increase from 238 million to 256 million dollars, eastern mortgages accounting for an increase of eight millions. A year ago I was enabled to report that 1927 showed an increase in Western mortgages for the first time in several years. In 1928, they show a further slight increase. Loan corporations increased their mortgage investments from \$170,000,000 to \$176,000,000, while mortgages held by trust companies in company and guaranteed funds increased from \$68,000,000 to \$80,000,000. This class of investment continues to retain the major portion of the investment funds of the corporations. On pages 266 to 270 will be found schedules showing the mortgage investments of all corporations by provinces.

Collateral loans of trust companies have decreased during the past year from \$45,000,000 to slightly under \$42,000,000. Although company fund loans

increased by \$1,000,000, guaranteed fund loans were reduced by approximately \$4,000,000. Collateral loans of loan corporations decreased by nearly \$2,000,000 and the total of all corporations dropped from \$52,800,000 to \$47,700,000.

Bond investments of all corporations have decreased from \$52,000,000 to \$49,000,000. Although both company funds and guaranteed funds of trust companies show increases of \$500,000 and \$3,000,000, respectively, such investments of loan corporations dropped by more than \$6,000,000.

Dominion, Provincial and United Kingdom bonds held by all corporations decreased by more than \$1,600,000. Bonds guaranteed by those governments decreased by \$500,000 and the bonds of Canadian municipalities, school districts, etc., decreased by \$1,125,000. Miscellaneous bonds increased by \$475,000.

Investments in stocks by all corporations show a slight increase, loan corporations increasing by about \$700,000 and trust companies by about \$800,000, a total increase for all companies of \$1,500,000.

Cash held by all companies decreased by approximately \$2,400,000 in 1928; loan corporations decreasing by \$3,400,000, and trust companies increasing by \$1,000,000. Miscellaneous assets held by companies show little change.

The total deposits and debentures of loan corporations and guaranteed funds of trust companies increased during the year by approximately \$6,500,000. This is in contrast to an increase during the previous year of almost \$50,000,000. Loan corporations deposits increased by slightly under \$2,000,000, and those of trust companies by nearly \$6,000,000. Loan corporation debentures decreased by \$4,000,000 while the guaranteed investment certificates of trust companies increased by slightly under \$3,000,000.

Money borrowed from banks by loan corporations rose from \$175,000 to \$316,000, while trust companies borrowings declined from \$2,987,000 to \$2,518,000.

Dividends to shareholders declared and outstanding at the end of the year increased in the case of loan corporations from \$948,000 to \$1,057,000 and trust companies from \$535,000 to \$641,000.

The balance sheets of all corporations show a shareholders' net worth of \$122,146,278 at the end of 1928, as compared to \$120,025,021 at the end of 1927, although two loan corporations included in the 1927 statements with capital worth of \$3,000,000 are entirely excluded from the 1928 figures. Paid-in capital of loan corporations decreased from \$40,814,000 to \$38,875,000 while the paid-in capital of trust companies increased from \$18,947,000 to \$23,158,000. Reserve funds of all corporations have increased from \$54,834,000 to \$56,976,000.

Last year I reported an increase of more than one hundred million dollars in the estates, trusts and agency funds of trust companies bringing the total of such funds to an amount in excess of one billion dollars for the first time in the history of the companies. The past year has been no less marked inasmuch as it has contributed an increase of approximately \$227,000,000, so that the total assets of estates, trusts and agency funds under administration by trust companies now exceeds \$1,260,000,000.

The profits of both loan and trust corporations have followed their other increases. Trust companies gross revenue increased by \$1,703,000 to a total in 1928 of \$10,068,000. The increase in agency fees, and commissions earned by such companies accounts for almost \$800,000 of this amount. The increase

in agency fees and commissions of loan corporations, however, is very slight. With the increased gross revenue of trust companies, expenditure naturally rose showing an increase of \$1,383,000. The increase in net revenue for trust companies therefore was only slightly over \$320,000. The loan corporations increase of over \$1,500,000 is accounted for by the inclusion this year of the revenue account of Credit Foncier.

Loan corporations dividends shown as \$3,960,000 in 1927, are reported as \$4,406,000 in 1928. Dividends of trust companies declared in 1927 were \$1,716,000 and in 1928, \$2,061,000. The total dividends declared by all corporations in 1928, amounted to \$6,467,270.89.

The schedule shown on page 280 summarizes the revenues and expenses for all corporations.

## INVESTMENT POWERS—NEW LEGISLATION

The following is the text of an article prepared by W. K. Colin Campbell, C.A., Chief Inspector of the Department, describing investment powers of trust companies in relation to the powers of insurance and other companies, written in April, 1929, subsequent to the coming into force of the 1929 amendments to *The Loan and Trust Corporations Act*. The article was originally published in the "Monetary Times" under date of April 26th, 1929. The schedule therein referred to appears on page 306.

"The recent amendments to *The Loan and Trust Corporations Act* enlarging the investment privileges of trust companies in Ontario will have the effect of releasing many millions of dollars from strictly trustee securities to other securities of a general character which include the bonds, debentures, stocks, etc., of foreign governments and Canadian and foreign corporations. No doubt some part of this has already been reinvested in such securities since the amending Act, cited as 1929, chapter 54, became effective on March 28th last.

While this Act includes other changes in the law of Ontario covering loan and trust corporations, that section referring to the investments of trust companies is by far the most important.

In examining the new list of securities authorized for investment by trust companies it is interesting to note at the same time the general trend towards the widening of investment powers of other financial corporations of this nature. The accompanying schedule makes comparison of the classes of securities which are now authorized investments for trust companies in Ontario, loan corporations in Ontario, Ontario incorporated joint stock and cash mutual insurance companies and Dominion incorporated trust companies. The investments authorized for Dominion incorporated insurance companies and Dominion incorporated loan corporations are not, however, included, as those authorized for Dominion incorporated loan corporations are practically the same as for Dominion incorporated trust companies and those authorized for Dominion incorporated insurance companies are very similar to those authorized for the Ontario joint stock insurance companies, the latter having been patterned largely after the former. In column 1 those securities which are authorized trustee securities in Ontario are shown in italics. The schedule must not be read as giving a complete description of investments authorized for the companies in the classes mentioned. It has been prepared merely to serve the purpose of easy reference in comparison of the statutory provisions mentioned. Direct reference to the statutes is recommended.

Trust companies have in the past been required to confine the investment of their Guaranteed Funds (funds secured through the sale of guaranteed investment certificates and from deposits which are held in trust), to those securities authorized for trust funds by *The Trustee Act*. They are now required to hold only fifty per cent. of such funds in trustee securities and may enjoy the same investment privilege for the other half as they have for their own or what are commonly called 'Company Funds.' The new list of authorized securities not only includes practically all of those formerly authorized for trust companies and for the funds of loan corporations, but several others in addition thereto.

The investment privileges of loan corporations are not disturbed by this amendment. While such corporations may secure additional funds for investment by the sale of debentures and by taking deposits, they have not been required, however, to differentiate in investments between such funds and their own. They have had the same wide investment privileges for all funds as were accorded to the company funds only of trust companies.

Trust companies in Ontario, may invest in any of the securities of any bank or company incorporated in Canada or in any of the provinces if secured by mortgage or hypothec to a trust company on improved real estate, mortgages or bonds. See Section 28a (1) (c). Section 28a (1) (d) authorizes debentures and other securities of banks or companies if such banks or companies have paid regular dividends of any amount, no matter how small, upon either their preferred stocks or their common stocks. Subsection (1) (e) authorizes investment in preferred stocks of any companies or banks wherever situated which have paid regular dividends of any amount upon either their preferred or their common stocks for the preceding five years, and by subsection (1) (f) the common stocks of any such companies are authorized providing dividends of at least four per cent. per annum (or \$4.00 per share on no-par stock), have been paid regularly on such stocks for the preceding seven years. Similarly, loans may be made upon any securities of any bank or company of any nature or wherever situate, so long as a margin of safety of twenty per cent. of the market value is maintained and that the total amount loaned on the stocks of any one company does not exceed ten per cent. of the market value of the total outstanding stocks of such company.

Investments authorized for loan corporations (and which also applied to company funds of trust companies until March 28th last), other than the securities of governments and municipalities, and mortgages on real estate are confined to the securities and paid-up stocks of chartered banks and companies incorporated by the Dominion or any province of Canada. Section 28 (2), however, continues the right of corporations '*heretofore so authorized*' to invest in and lend upon securities other than those mentioned. By section 28 (4) a corporation may with the assent of a two-thirds vote of shareholders lend upon the securities and paid-up stock of any other corporation (foreign), but it is limited in amount to twenty-five per cent. of its own paid-in capital and twenty-five per cent. of that of the borrowing corporation.

Loans upon life insurance policies, specially mentioned in section 28 (1) (a) are excluded from the new section 28a.

In comparing the new list of investments authorized for trust companies in Ontario, the investments authorized for Ontario incorporated joint stock insurance companies and for Dominion incorporated trust companies, a few interesting observations may be made.

Dominion trust companies are confined to loans on *improved* real estate and limited to sixty per cent. of value, while the insurance companies are restricted

only by the limitation on value. Sections 28 (1) (a) and 28a (1) (a) applying to loan and trust corporations in Ontario, include neither of these restrictions.

Ontario insurance companies by section 317 (1) (a) of *The Companies Act* may invest in the debentures, bonds, stocks or other securities of any foreign country or state forming a part of it. Loan and trust corporations in Ontario may invest in securities of such foreign countries only if interest has been regularly paid on their securities for the preceding ten years. Dominion trust companies, however, are restricted in foreign government securities to those of federal and state governments of the United States, but without qualification as to interest paying record.

Investments in bonds, debentures, and other securities of companies not required to qualify by a dividend-paying record, are, for trust companies in Ontario, restricted to those of *Dominion or provincially incorporated* companies which are secured by mortgage or hypothec to a *trust company* upon *improved* real estate or other assets of the *classes mentioned* in 28a (1) (a) and (b). To qualify as investments for a dominion trust company they may be secured by mortgage or hypothec to *any trustees*, trust company or *otherwise*, and for an Ontario insurance company, bonds of *any company* secured by mortgage or hypothec to trustees, a trust company or *otherwise* upon *any real estate or other assets* of the company, are authorized.

Coming to the securities of companies which need not be secured, we find the provisions for investments of trust companies in Ontario and Ontario insurance companies, to be the same, that is, that the companies must have paid regular dividends of any amount on preferred or common stocks for the preceding five years, but a dominion trust company is limited to those of dominion or provincially incorporated companies and *cash* dividends of *at least four per cent.* upon their *issued* stock must have been *earned* and paid regularly for the preceding five years.

The provisions relating to investments in preferred stocks by trust companies in Ontario, Ontario insurance companies and dominion trust companies are practically identical, with the important exception that the last mentioned of the three is restricted to those of dominion and provincially incorporated companies. Note, however, that for the bonds, debentures, notes, etc., of Canadian or provincial companies to qualify as investments for dominion trust companies, the companies must have *earned* and paid regularly *cash* dividends of at least four per cent. per annum on their issued capital stock for the preceding five years, while their preferred stocks may qualify if they have (merely) paid regular dividends (no requirement as to rate) upon their preferred *or* common stocks for the previous five years.

The provisions relating to common stocks to qualify for investment are almost identical for all three classes of companies except that here again dominion trust companies are limited to dominion or provincially incorporated companies. The Dominion Trust Companies Act contains, also, a clause in this subsection, limiting purchases to thirty per cent. of the common and thirty per cent. of the total issue of the stocks of such companies.

No change has been made in the restrictions applying to both loan and trust corporations embodied in section 29, ss. 1 (a) and (b) limiting the amount which may be invested in the securities of any one corporation.

The question may now be asked as to the ability of Dominion incorporated companies doing business in Ontario to exercise the investment privileges granted by this recent legislation. Also, may an Ontario incorporated trust company

whose letters of incorporation recite the classes of securities in which it may invest its funds, invest such funds in securities other than those so recited? Or will it become necessary to secure supplementary letters patent to widen their power of investment? Companies recently incorporated in Ontario will not be disturbed by this question as their Letters of Incorporation give them the power to invest in such securities as are authorized for the investment of trust companies by *The Loan and Trust Corporations Act*. Dominion incorporated trust companies are very distinctly prohibited from investing or loaning their funds in or upon securities other than those authorized by section 66 of *The Trust Companies Act*. See sections 63 (1) (c) and 66 (10).

#### NEW LEGISLATION

It will be of interest to watch the effect of this new legislation upon the statements of trust companies at the end of the current year. Anyone with a knowledge of such companies will agree that there is little likelihood of their rushing headlong into the new fields of investment accorded them but rather may they be expected to continue largely in the same conservative investment policy as heretofore, using their new privileges only as occasion demands and sound business judgment dictates. It is upon this sound policy and sane conservative administration that the reputation of companies has been built while those of Ontario stand out as monuments to our national progress. Nevertheless it is to be hoped that all companies will follow that same conservative investment policy for which the majority are esteemed, lest they injure the high reputation already attained by trust companies as a class and, lest, also, restrictions may be found to be necessary. A good shepherd delights in wide pastures for his flock, but those that habitually wander too far afield he must of necessity corral.

The other amendments to *The Loan and Trust Corporations Act* are slight.

Guaranteed funds uninvested may now be held on deposit elsewhere than in a chartered bank of Canada.

Both loan and trust corporations may now include the securities of Canadian cities outside of Ontario as liquid securities in their quarterly return of deposits and securities available.

Any minor may now carry a deposit account in a loan or trust corporation whereas under the old provisions of section 67 of the Act, minors under the age of fifteen years were not permitted to do so and the deposit privilege of those above that age was confined to loan corporations.

The provisions of section 73, ss. 1, and section 74 authorizing a depositor with a loan corporation having on deposit a sum not exceeding \$300.00 to nominate a person to receive the money at his death has been extended to both loan and trust corporations and the limit of the deposit raised to \$600.00.

An amendment to section 77 of the Act reduces the required notice of meeting of shareholders from fifteen days to ten days and by an amendment to section 110 a copy of the statement may now be sent to shareholders ten days before such meeting where before two weeks was required."

#### INSPECTION STAFF

In March, 1929, the Lieutenant-Governor in Council appointed Mr. J. G. Gibbons, B.A., and Mr. John Edwards, C.G.A., as inspectors in the Department

of Insurance. Mr. Gibbons is a graduate of the Commerce and Finance Faculty of the University of Toronto and Mr. Edwards was formerly assistant treasurer of the Dominion of Canada Guarantee and Accident Insurance Company.

All of which is respectively submitted.

R. LEIGHTON FOSTER,

*Registrar of Loan Corporations.*

Parliament Buildings,

Toronto, Ont., June 1st, 1929.

CHAPTER 54.

# An Act to amend The Loan and Trust Corporations Act

Assented to March 28th, 1929.

**H**IS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:—

1. This Act may be cited as *The Loan and Trust Corporations Act, 1929*. Short title.

2. Subsection 1 of section 17 of *The Loan and Trust Corporations Act* is repealed, and the following substituted therefor: Rev. Stat., c. 223, s. 17, subs. 1, amended.

17.—(1) All moneys received by a trust company for guaranteed investment as set out in subsection 1 of section 16, and as deposits as set out in subsection 2 of section 16 and subsection 3 of section 18, shall be invested in or loaned upon such securities only as are authorized by section 28a of this Act; provided, however, that at all times at least fifty per centum of such moneys shall be invested in or loaned upon such securities only as are authorized by *The Trustee Act*.

3. Subsection 2 of section 17 of *The Loan and Trust Corporations Act* is amended by striking out the words "with any chartered bank of Canada" after the word "deposit" in the tenth line. Rev. Stat., c. 223, s. 17, subs. 2, amended.

4.—(1) Subsection 2 of section 18 of *The Loan and Trust Corporations Act* as amended by section 1 of *The Loan and Trust Corporations Act, 1928*, is amended by striking out the figures "28" in the third line and inserting in lieu thereof the figures and letter "28a." Rev. Stat., c. 223, s. 18, subs. 2, amended.

(2) Subsection 4 of section 18 of *The Loan and Trust Corporations Act* is amended by striking out the words "with any chartered bank of Canada" after the word "deposit" in the sixth line. Rev. Stat., c. 223, s. 18, subs. 4, amended.

Rev. Stat.,  
c. 223, s. 18,  
subs. 5,  
amended.

(3) Subsection 5 of section 18 of *The Loan and Trust Corporations Act* is amended by striking out the words "with any chartered bank of Canada" after the word "deposit" in the tenth line, and by adding the words "or of any city in Canada" after the word "Ontario" in the fifteenth line.

Rev. Stat.,  
c. 223,  
amended.

5. *The Loan and Trust Corporations Act* is further amended by adding thereto the following section:

Invest-  
ments by  
trust  
companies.

28a.—(1) Subject to the provisions of subsection 1 of section 17 a registered trust company may purchase or invest in the following:—

Real  
Estate.

(a) Mortgages, charges, or hypothecs upon real estate in Ontario or elsewhere where the company is authorized to extend its business under the provisions of section 23.

Govern-  
ment  
bonds.

(b) The debentures, bonds, stock or other securities of or guaranteed by the government of the Dominion of Canada or of or guaranteed by the government of any province of Canada, or of or guaranteed by the government of Great Britain, or of any dominion, colony or dependency thereof, or of any state forming part of such colony or dependency; or of or guaranteed by any foreign country or state forming part of such foreign country where the interest on the securities of such foreign country or state has been paid regularly for the previous ten years; or of any municipality or school corporation in Canada, or elsewhere where the company is carrying on business, or guaranteed by any municipal corporation in Canada, or secured by rates or taxes levied under the authority of the government of any province of Canada on property situated in such province and collectable by the municipalities in which such property is situated.

Bonds  
secured by  
trust deed.

(c) The bonds, debentures, debenture stock, or other securities of any company or bank incorporated by Canada, or by any province of Canada, or by any former province now forming part of Canada, which are secured by a mortgage or hypothec to a trust company either singly or jointly with another trustee upon improved real estate of such company or other assets of such company of the classes mentioned in paragraphs (a) and (b) hereof.

- (d) The debentures or other evidences of indebtedness of any company or bank which has paid regular dividends on its preferred or on its common stocks for a term of at least five years immediately preceding the date of investment in such debentures or other evidences of indebtedness. <sup>Debentures.</sup>
- (e) The preferred stocks of any company or bank which has paid regular dividends upon such stocks or upon its common stocks for not less than five years preceding the purchase of such preferred stocks, or the stocks of any company which are guaranteed by a company which has paid regular dividends upon its preferred or common stocks for not less than five years preceding the purchase of such guaranteed stocks; provided that the amount of stocks so guaranteed is not in excess of fifty per centum of the amount of the preferred or common stocks, as the case may be, of the guaranteeing company; or, <sup>Preferred stock.</sup>
- (f) The common stocks of any company, corporation or bank upon which regular dividends of at least four per centum per annum, or, in the case of stocks of no par value, of at least four dollars per share per annum, have been paid for the seven years next preceding the purchase of such stocks; provided further that if any such company or corporation has, pursuant to a voluntary reorganization of its capital account and without affecting the status or diminishing the value of its outstanding securities, including the capital stock, substituted common shares of no par value for shares of par value, then dividends declared on the said no par value stock shall be deemed to be dividends of at least four dollars per share per annum if the sum thereof is equivalent to at least four per centum of the said common stock of par value and the proceeds of any additional issue of common stock made at the time of, or subsequent to, the aforesaid substitution of shares; and in such circumstances dividends of at least four per centum per annum on the common stock of par value immediately preceding the substitution shall be regarded as dividends on the no par value stock; and if any such company or corporation has in any year paid dividends on its common stock amounting to <sup>Common stock.</sup>

not less than five hundred thousand dollars, the payment of such dividends shall be deemed to be for the purposes of this section equivalent to the payment of a dividend of four per centum for the said year.

Loans on securities.

- (2) Subject to the provisions of subsection 1 of section 17 a registered corporation may lend its funds on the security of,—

Real Estate.

- (a) Any of the securities mentioned in paragraphs (a), (b) and (c) of subsection 1 hereof, or on improved real estate or leaseholds, or,

Bonds, debentures, etc.  
Sec. R.S.C., c. 28, s. 61, 2, cl. b.

- (b) The bonds, debentures, notes, stocks, or other securities of any company or bank, other than those mentioned in paragraph (c) of subsection 1 hereof, provided that the market value of the securities on which the loan is made shall at all times exceed the amount of the loan by at least twenty per centum of such market value; and provided further that the amount loaned on the security of the stocks of any such company or bank shall not at any time exceed ten per centum of the market value of the total outstanding stocks of such company or bank.

Rev. Stat., c. 223, s. 29, subs. 1, cl. c. amended.

**6.** The clause lettered (c) in subsection 1 of section 29 of *The Loan and Trust Corporations Act* is amended by adding at the end thereof the words “Provided, however, that this clause shall not apply to investments made by a trust company in the securities prescribed in section 28a of this Act.”

Rev. Stat., c. 223, amended.

**7.** *The Loan and Trust Corporations Act* is further amended by adding thereto the following section:

Other investments authorized by Lieutenant-Governor in Council.

29a.—(1) The Lieutenant-Governor in Council may authorize the acceptance by a corporation of bonds, notes, stocks, debentures, or other assets not fulfilling the requirements of this Act,—

- (a) in payment or part payment for securities sold by such corporation; or
- (b) obtained under a *bona fide* arrangement for the reorganization of a company whose securities were previously owned by such corporation; or

- (c) for the amalgamation with another company or the company whose securities were so owned; or
- (d) obtained for the *bona fide* purpose of protecting investments previously made by the corporation; or,
- (e) obtained by virtue of the purchase by the corporation of the assets of another corporation;

but the bonds, notes, stocks or debentures or other assets whose acceptance is so authorized shall be absolutely sold and disposed of within five years after the acquisition thereof, or within such further time not exceeding one year as the Lieutenant-Governor in Council shall, on report of the Minister fix and determine unless it can be shown to the satisfaction of the Minister that the bonds, notes, stocks, debentures or other assets whose acceptance is so authorized are not inferior in status or value to the securities for which they have been substituted.

- (2) For the purpose of determining the eligibility as Stocks of reorganized companies. investments under this Act of the preferred or common stocks of any company, which has been voluntarily reorganized without the impairment of the status or value of its securities, dividends paid on the preferred and common stocks of the company before such reorganization may be counted as dividends paid on such stocks respectively of the reorganized company.

**8.** Section 45 of *The Loan and Trust Corporations Act* is Rev. Stat., c. 223, s. 45, amended. amended by striking out the words "with any chartered bank of Canada" after the word "deposit" in the sixth line, and by inserting the words "or of any city in Canada" after the word "Ontario" in the twelfth line.

**9.** Section 67 of *The Loan and Trust Corporations Act* is Rev. Stat., c. 223, s. 67, amended. amended by striking out the words "but of the age of fifteen years and upwards" after the word "years" in the first line, and by striking out the word "loan" in the third line.

**10.** Subsection 1 of section 73 and section 74 of *The Loan and Trust Corporations Act* are amended by striking out the Rev. Stat., c. 223, s. 73, subs. 1, s. 74, subs. 1, amended. word "loan" in the first line, and are further amended by striking out the figures "\$300" in the second line and inserting in lieu thereof the figures "\$600."

Rev. Stat.,  
c. 223, s. 77,  
subs 2,  
amended.

**11.** Subsection 2 of section 77 of *The Loan and Trust Corporations Act* is amended by striking out the word “fifteen” in the seventh line and inserting in lieu thereof the word “ten.”

Rev. Stat.,  
c. 223, s. 110,  
subs. 4,  
amended.

**12.** Subsection 4 of section 110 of *The Loan and Trust Corporations Act* is amended by striking out the words “two weeks” in the second line and inserting in lieu thereof the words “ten days.”

Commence-  
ment of Act.

**13.** This Act shall come into force on the day upon which it receives the Royal Assent.

## CONSTATING INSTRUMENTS

This company was incorporated under Special Act of the Dominion of Canada 62-63 Victoria (1899), c. 10, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario, 63 Victoria, 1900, c. 129. The name was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D) further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Cons. Stat. U.C., c. 53) in 1855 under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1859 under the name of the Freehold Permanent Building and Savings Society; the name being changed to the Freehold Loan and Savings Company by 36 Victoria (Ontario) (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario, 39 Victoria, 1876, c. 62.

In 1918 the company purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

In 1921, the company also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

## CANADA PERMANENT MORTGAGE CORPORATION—Continued

In 1926 the company purchased the assets and business of The Royal Loan and Savings Company, which purchase was ratified by Order-in-Council of Ontario dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

In 1927 the company purchased the assets and business of The British Columbia Permanent Loan Company, Vancouver, B.C.

In 1927 the company also purchased the assets and business of The Canada Landed and National Investment Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated December 30th, 1927, pursuant to The Loan and Trust Corporations Act.

## CONSTATING INSTRUMENTS

The former Provincial Company, incorporated 1884, 7th March, L.P. of Ontario. (Lib. 16, No. 67)

1890, 53 V, c. 129 (O), fixes the capital stock at \$5,000,000, divided into 50,000 shares of \$100 each; (sec. 1), confirms the purchase of the assets of the Peterborough Real Estate Investment Co., Limited; secs. 2-4 sanction the issue of debenture stock; secs. 5-12 authorize agencies in the United Kingdom; (13) defines the limit of borrowing powers.

1893, 8th June, Letters Patent of Ontario amending the foregoing Letters Patent.

1897, May 6th, Letters Patent of Ontario so amending the foregoing Letters Patent as to give the Company the status of a Loan Company (and not the status of a Loaning Land Company) under the Loan and Trust Corporations Act.

Dominion Company of same name incorporated by 61 V, c. 97 (D), assets of Provincial Company transferred to Dominion Company by 63 V, c. 130 (Ontario).

|   | <u>\$ 2,860,071 64</u> |

## CONSTATING INSTRUMENTS

This Company was, under the provisions of the Loan Corporations Act (R.S.O. 1897, c. 205) formed by the amalgamation of The Huron and Erie Loan and Savings Company with the Canadian Savings and Loan Company of London, Canada. See also 6 Edward VII (1906), c. 110 (D).

Of the above-mentioned constituent companies The Huron and Erie Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Consol. Stat. U.C., c. 53) with the Clerk of the Peace for the County of Middlesex, 18th March, 1864 (Dec. Book, p. 65). The original corporate name was The Huron and Erie Savings and Loan Society. Under 28 Vict., c. 41, the London Permanent Building and Savings Society, and under 29-30 Vict., c. 132, the Western Counties Permanent Building and Savings Society amalgamated with The Huron and Erie Savings and Loan Society. The corporate name was changed to The Huron and Erie Loan and Savings Company by the Act of Ontario, 39 Vict., c. 95. The lending and borrowing powers of the Company were governed by 59-60 Vict. (1896), c. 49 (D), as amended by 62-3 Vict. (1899), c. 115 (D), and by 4-5 Edw. VII (1905), c. 105 (D).

The Canadian Savings and Loan Company of London, Canada, was incorporated under the Building Society's Act (Consolidated Stat. U.C., c. 53) by declaration filed with the Clerk of the Peace for the County of Middlesex on the 2nd of September, 1875 (Decl. Book 1, p. 57). This Company's lending and borrowing powers were governed by the Loan Corporations Act, R.S.O. 1897, c. 205, and amending Acts.

The agreement for the amalgamation of these companies under the corporate name of The Huron and Erie Loan and Savings Company was executed by both companies on the 24th October, 1905; was ratified by the shareholders of the respective companies on the 7th December, 1905; and was assented to by the Lieutenant-Governor of the Province of Ontario by Order-in-Council dated 29th day of December, 1905, and was further ratified and confirmed by the Act of the Legislature of the Province of Ontario, 6 Edw. VII, chapter 130. See also Special Act of Dominion of Canada, 6 Edw. VII 1906), c. 110 (D).

See Special Acts (Dominion and Ontario), 1915.

	\$ 321,034 01
8. Amount of interest permanently capitalized during the year, \$2,551.00.
9. Maximum amount of money loaned or advanced at any time during the year to any director or his nominees, \$31,626.79. Amount owing December 31, 1928, \$31,626.79.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 9 Vict. c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The society was re-organized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

	\$	181,910	09

## CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, Consol. Stat. U.C. Chap. 53, by declaration filed with the Clerk of the Peace for the United Counties of Northumberland and Durham, 5th July, 1872. (Decl. Book, II, 127.)

The corporate name was, by Order-in-Council of Ontario, 21st June, 1876 (Ibid.), changed to the Midland Loan and Savings Company.

A by-law altering the amount of the capital stock and par value of the share was, pursuant to the Loan Corporations Act, approved by Order-in-Council of Ontario, 3rd October, 1900.

The borrowing and lending powers are governed by the Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.

## CONSTATING INSTRUMENTS

Incorporated under Building Societies Act, Con. Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by the amalgamation of The Ontario Loan and Debenture Company with the Agricultural Savings and Loan Company by virtue of Order-in-Council, dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1927, chapter 223.

## CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters patent of Canada (6th April, 1883) incorporating the Company under the Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited.—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was \$2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J.S. Co's. Act, 1877), and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V, c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from \$2,000,000 to \$1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V, c. 184, increasing capital stock to \$2,000,000 in shares of \$100 each par value.

## CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (Consol. Stat. U.C. c. 53), by declaration dated 12th March, 1870, and filed with the Clerk of the Peace for the County of Lincoln on the 21st March, 1870. The original corporate name was The Security Permanent Building and Savings Society of St. Catharines.

The corporate name was changed to The Security Loan and Savings Company, St. Catharines, in 1876 by 39 V, c. 64 (D); and also by Order-in-Council of Ontario, dated 18th August, 1876.

The lending and the borrowing powers of the Company are governed by the Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.

## THE HOME BUILDING AND SAVINGS ASSOCIATION—Continued

## CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (R.S.O. 1887, c. 169), by declaration filed with the Clerk of the Peace for the County of Carleton, on the 24th June, 1890. (Decl. Book II, 119.) The Company, for purposes of distinction, ordinarily uses the words "of Ottawa" as part of its corporate name, but these words do not appear in the declaration of incorporation.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

Also amount owing December 31st, 1928, \$305.67.

## PROVIDENT INVESTMENT COMPANY—Continued

## CONSTATING INSTRUMENTS

Incorporated on 3rd November, 1893, by Letters Patent of Ontario, issued under the Ontario Joint Stock Companies Act (R.S.O. 1887, c. 157).

For the lending and borrowing powers see the Letters Patent (which contain special limitations).

By Letters Patent of Ontario, dated January 9th, 1912, the Company renounced its borrowing powers and accepted those provided in the Loan Corporations Act (R.S.O. 1897, c. 205), and amending Acts.

By Order-in-Council dated 12th day of March, 1925, the capital stock of the Company was reduced \$400,000.00 under By-law No. 32.

## CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under the Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (29th December, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (25th September, 1889) were issued under the last mentioned Act, increasing the capital stock from \$400,000 to \$2,000,000. Further Supplementary Letters Patent of Ontario (30th March, 1891) were issued under the same Act, conferring agency powers on the Company. The corporate name was by Order-in-Council (2nd April, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, c. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184, R.S.O. 1927, chap. 223.

## THE BRITISH MORTGAGE AND TRUST CORPORATION OF ONTARIO—Continued

## CONSTATING INSTRUMENTS

The British Mortgage Loan Company of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 V, c. 38 (O), now R.S.O. 1927, c. 223.

By 16 George V, c. 121, the company was given trust company powers and its name changed to the British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the company are derived from its Letters Patent and the above public general statute.

## CHARTERED TRUST AND EXECUTOR COMPANY—Continued

## MISCELLANEOUS

1. Officers of the Corporation who are under bond for the following amounts respectively: Estates officer, \$10,000; general manager, \$10,000; secretary, \$10,000.
2. Dividends and bonuses declared during year: (a) dates declared, (b) dates payable, (c) rates: 1st January, April, July, October, 1½% at the rate of 6% per annum.
3. Date appointed for the Annual Meeting: February 21st, 1929. Date of last Annual Meeting, February 17th, 1928.
4. In the case of any company whose stocks, bonds or debentures are held by the corporation either directly or indirectly, if such company is otherwise indebted to the Corporation upon loans either secured by mortgages or other security, or unsecured, state the aggregate amount of such loans. . . . . \$ 5,950 00  
The aggregate amount of instalments of principal in arrears. . . . . 1,350 00  
The amount of interest due and unpaid, whether capitalized or not. . . . . 81 00
5. Amount of contingent liability not shown as direct debts in the foregoing statement. The company has a certain contingent liability under its guarantee of titles to land given when the company was issuing guarantee of titles. This business was discontinued 13 years ago and no claim has been made during that time, and the outstanding guarantees of titles are constantly diminishing in number through expiration. The liability at the worst is only nominal.
6. Amount of actual cash receipts during the year (excluding Guaranteed and Trust Account receipts) for:
  - (a) Interest on mortgages and agreements for sale. . . . . \$ 8,496 64
  - (b) Interest on loans on collateral security including interest on advances. . . . . 16,616 65
  - (c) Interest on bonds and debentures. . . . . 7,050 94
  - (d) Dividends on stocks. . . . . 476 87
  - (e) Agency fees and commissions. . . . . 255,174 27
7. Amount of interest permanently capitalized during the year. . . . . \$ 287,815 37  
1,089 25

## CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905, by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent 20th July, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to \$75,000 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

## CONSTATING INSTRUMENTS

The Grey and Bruce Trust and Savings Company, cited 16 Geo. V (1926), c. 123. This Act confirms the amalgamation of the Grey and Bruce Loan Company and the Owen Sound Loan and Savings Company, and constitutes the amalgamated corporation a new corporation under the name of The Grey and Bruce Trust and Savings Company, with head office in the City of Owen Sound, and empowers the new corporation to carry on the business of a trust company under The Loan and Trust Corporations Act.

The Grey and Bruce Loan Company was incorporated under the Building Societies Act, R.S.O. 1887, c. 169, as a permanent building society under the name of the Owen Sound, Grey and Bruce Loan and Savings Company, by declaration filed with the Clerk of the Peace for the County of Grey, 10th May, 1889. The corporate name was by Order-in-Council of Ontario, 15th September, 1897, changed to the Grey and Bruce Loan Company.

The Owen Sound Loan and Savings Company was incorporated under the Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Grey, on the 1st April, 1889.

Advances made in prior years but still outstanding as at December 31st, 1928..	\$	42,640 61	

## CONSTATING INSTRUMENTS

The Montreal Trust Company was incorporated on the 21st day of March, 1889, by special Act of the Province of Quebec, 52 Vic. c. 72 (Q.), and subsequent special amending Act, under the name of the Montreal Safe Deposit Company..

By special Acts the name was changed in 1895 to the Montreal Trust and Deposit Company (59 Vic. c. 70 (Q.)), and again in 1909 to the Montreal Trust Company (9 Edw. VII, c. 115 (Q.)).

Authorized by Order-in-Council to carry on business in the Province of Ontario as from the 11th day of March, 1909, subject to certain conditions and limitations.

Registered on the Trust Companies Register, 21st January, 1913.

The Company has a deposit with the Province of Ontario, amounting to \$200,000.00.

## PRUDENTIAL TRUST COMPANY, LIMITED—Continued

## CONSTATING INSTRUMENTS

The Prudential Trust Company, Limited, was incorporated in 1909 by a special Act of the Parliament of the Dominion of Canada, 8-9 Edward VII, Chapter 124.

Authorized in 1911 by special Act of the Legislature, 1 Geo. V, Chapter 139, to transact business in the Province of Ontario as specified in Section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect of all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in this Act or granted from time to time to trust companies by any Public Act or Order of the Lieutenant-Governor in Council of the said Province, and shall be subject to the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to \*\$50,000.00.

\*Under the provisions of 1 Geo. V, c. 139, as amended by 10 Geo. V, c. 158, the deposit as security to do business in Ontario may be fixed from time to time by the Lieutenant-Governor in Council. By Order-in-Council, dated June 15th, 1920, the Company's deposit of \$200,000 was exchanged for one of \$50,000.00, the public liability in Ontario being at that time \$1,123.43 on Trust Account and \$26,167.14 of assets under Administration.

## CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1895), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Edw. VII, chap. 73.

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to the Ontario Trusts Companies' Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to \$200,000.00.

CONSTATING INSTRUMENTS

The Toronto General Trusts Corporation was constituted on the 1st April, 1899, by special Act of Ontario, 62 Vict. (2), chap. 109, amalgamating into one Company under the above name: (1) The Toronto General Trusts Company, and (2) The Trusts Corporation of Ontario.

By an agreement made under the Loan Corporations Act in two indentures dated respectively 13th and 30th July, 1903, approved by Order-in-Council (Ontario), 11th September, 1903, The Toronto General Trusts Corporation acquired the assets and assumed the liabilities and duties of the Ottawa Trusts and Deposit Company. See also special Act of the Province of Quebec (2nd June, 1904), 4 Edw. VII, chap. 93.

- Amount of Company's own Guaranteed Investment Receipts and interest thereon, due and unpaid..... \$ 4,029,410 20

## CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 1887, c. 169, as amended by 56 V., c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 V., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13-14 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.)

## CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under the Loan and Trust Corporations Act, 2 George V, 1912, chap. 34, now R.S.O. 1927, chap. 223. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

### Pursuant to Sections 45 or 18 (5) of the Loan and Trust Corporations Act

Sec. 45. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon, and the amount of bonds, debentures, and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return on hand and available for depositors. 1921, c. 61, s. 8.

Sec. 18.—(5). Every trust company receiving deposits in the manner authorized by subsection 3 shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing all securities and cash ear-marked and definitely set aside as provided in subsection 4 and stating that the same were at the date mentioned in such return so ear-marked and definitely set aside and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the Government, Government guaranteed or municipal securities, hereinbefore in this sub-section mentioned, as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return, on hand and available for depositors.

 Canada  
 (not exceeding 60% of value).

#### Restrictions

- 66 (4)—Investments in or upon the bonds, debentures,  
 stocks and other securities of any one company  
 are limited to 20% of such bonds, debentures,  
 stocks, etc., issued by such company.  
 (5)—Investments in and loans upon the stocks of  
 banks and companies must not exceed 25% of  
 the trust company's unimpaired paid-up  
 capital and reserve.  
 (7)—May not lend to its own directors or their  
 families.  
 8a—May not invest in or loan upon its own stock  
 or that of another trust company.

REPORT  
OF THE  
**Minister of Public Works**

FOR THE  
PROVINCE OF ONTARIO  
FOR THE  
TWELVE MONTHS ENDING 31st OCTOBER

1928

---

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO

SESSIONAL PAPER No. 8, 1929

ONTARIO

TORONTO:  
Printed and Published by the Printer to the King's Most Excellent Majesty  
1929

TO HIS HONOUR WILLIAM D. ROSS, ESQ.,  
*Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Annual Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, the Architect and the Engineers for the twelve months ending the 31st of October, 1928.

Respectfully submitted,

GEO. S. HENRY,  
*Minister of Public Works and Highways.*

Department of Public Works, Ontario,  
Toronto, March 1st, 1929.

# REPORT

## OF THE

### Deputy Minister of Public Works

---

HONOURABLE GEORGE S. HENRY,  
*Minister of Public Works and Highways, Ontario.*

SIR,—

I have the honour to submit a summary of the works performed by the Department of Public Works during the fiscal year ending October 31st, 1928.

*Parliament and Departmental Buildings.*—Additional office accommodation of fireproof construction has been provided in the roof space of the northeast section of the East Wing of the Parliament Buildings for the Motion Picture Bureau and Board of Censors. Fireproof vaults for storing inflammable films have also been constructed in the east court yard with a tunnel connecting the vaults with the Main Building. It was found necessary to install another elevator adjoining the present one in the east wing of the Parliament Buildings, owing to overcrowding caused by traffic through the main tunnel. Plans and specifications were prepared and approved for a new green house, the old building being beyond repair. The new structure, which has now been completed, improves considerably the northeast section of the buildings.

*Maintenance and Repairs of Government Buildings.*—Repairs and renewals required on Government buildings were promptly executed together with changes made in the basement at Osgoode Hall to provide additional storerooms for the various Departments.

*Public Institution Buildings.*—At the Boys' Training School, Bowmanville, a new dormitory building has been erected and a boiler house and central heating plant completed and working satisfactorily. New cold storage plants have been installed at Ontario Hospital, Cobourg, and Ontario Hospital, London. A new siding has been laid from the C.N.R. tracks and a coal trestle erected at Ontario Hospital, Toronto.

*Educational Buildings.*—The Training College for Technical Teachers at Hamilton was erected and is now being occupied. Extensive alterations and repairs were made in remodelling the kitchen and dining room at Ontario School for the Blind, Brantford. Maintenance and repairs of schools under the authority of the Department were carefully attended to.

*Agricultural Buildings.*—Work was commenced on an addition to the Students' Residence and also the erection of a Dairy Barn at Agricultural School, Kemptville. At Horticultural Experimental Station, Vinelands, a new green house was erected. Extensive alterations and repairs were made to the buildings of Ontario Agricultural College, Guelph.

*District Buildings.*—Maintenance and repairs to the Court Houses and Gaols under the authority of the Department were carefully attended to.

*Engineer's Branch.*—Bridge construction during the year amounted to 72 structures of which nine were steel, 35 reinforced concrete and 28 of timber.

*Drainage Aid.*—Six drainage schemes were inspected and statutory grants paid.

*Navigation.*—Repairs to locks, dams and swing bridges on inland navigation under the control of the Department were carried out.

*Secretary's Report.*—The Secretary and Purchasing Agent's Report gives list of contracts for materials and works during the year.

The following is the summary of the Departmental expenditures during the fiscal year ending October 1st, 1928:

Civil Government:		
Salaries, contingencies, etc.....		\$85,960 70
Government Buildings:		
Maintenance and repairs.....		771,306 34
Public Buildings:		
Parliament Buildings, Hospitals, Schools, Court Houses, etc.....		1,080,303 89
Public Works:		
Locks, dams, bridges, etc.....		127,528 26
Drainage Aid:		
Aid to Municipalities under Drainage Act.....		16,846 00
Special Warrants:		
Purchase 43 Queens Park, Toronto.....	\$40,262 77	
"    Mowat Hospital, Kingston.....	75,000 00	
"    Property Dundas and Simcoe Streets, Toronto.....	1,218 75	
"    Part of Lot 6, 3rd Con., Sudbury.....	4,000 00	
		<u>120,481 52</u>
Statutory:		
Minister's salary and other salaries not otherwise provided for.....		8,278 86
Total expenditure, Department of Public Works.....		<u>\$2,210,705 57</u>

GEO. HOGARTH,

*Deputy Minister of Public Works.*

Toronto, February 19th, 1929.

HONOURABLE GEO. S. HENRY,

*Minister of Public Works and Highways.*

SIR,—

I have the honour to report on the work of the Engineering Branch of the Public Works Department during the fiscal year ending October 31st, 1928.

The expenditure on construction and maintenance was less than usual. On new construction, the expenditure amounted to \$108,710.54 and on maintenance, including the operation of the provincial dredge, the expenditure amounted to \$24,120.94.

Seventy-two bridges were constructed: nine steel bridges on concrete abutments, 35 bridges of reinforced concrete and 28 bridges of timber. The most important of the bridges were the South Branch Bridge at Bracebridge and the Sharbot Lake Bridge and fill.

The provincial diedge worked through the season in the Muskoka River at Bracebridge and the Indian River at Port Carling. The work in the Indian River will be continued next season. Improvement in the channel at Port Sandfield is also listed for next season.

On the storage dams to control lake levels, the Tea Lake dam, which controls Smoke Lake, Canoe Lake and Tea Lake in Algonquin Park, was rebuilt in concrete. Extensive repairs were made on the Deer Lake dam on the Magnetawan River waters. This dam was badly damaged by the unprecedented flood of the spring of 1928.

The lockmasters' reports on the traffic through the different locks was as follows:

	Steamers	Small Boats	Rafts	Scows
Magnetawan Lock.....	388	95	301	159
Huntsville Lock.....	248	504	768	34
Port Carling Lock.....	1,776	1,201	182	455

Drainage work in the different districts carried out under the direction of the Department amounted to \$15,214.50. The season was exceedingly wet and a large amount of drainage work that had been provided for had to be postponed as the work could not be done to advantage.

Under the Provincial Aid to Drainage Act, six large schemes under the Municipal Drainage Act were examined and reported on and grants amounting to \$18,853.00 were paid to the interested municipalities. The expenditure under this head next year will be very heavy as four very expensive schemes are nearing completion.

The expenditure from the maintenance fund was unusually light, the operation of the provincial dredge being the only item of importance. The classified expenditure from the fund was as follows:

MAINTENANCE EXPENDITURE IN 1928

Tools, repairs, equipment, etc.....	\$602 65	
Maintenance and operation of Provincial dredge.....	9,355 71	
	<hr/>	\$9,958 36
Operation of storehouse at Bracebridge.....		25 00

## REPAIRS AND LIGHTING OF LOCKS AND SWING BRIDGES

Port Carling lock and swing bridge.....	\$456 08	
Huntsville lock.....	166 85	
Magnetawan lock.....	84 32	
Magnetawan swing bridge.....	200 40	
Huntsville swing bridge.....	107 43	
Port Sandfield swing bridge.....	18 07	
Ryerson swing bridge.....	187 59	
		<hr/> \$1,220 74

## REPAIRS TO DAMS

Deer Lake dam.....	\$1,451 15	
Rama Canal dam.....	80 25	
Tasso Lake dam.....	75 00	
		<hr/> \$1,606 40

## REPAIRS TO BRIDGES

*Nipissing District*

Beckett Creek bridge, lot 30, con. 3, Calvin.....	\$123 75	
Beckett Creek bridge, lot 25, con. 6, Calvin.....	55 00	
Graham Creek bridge, 5 sideline, con. 10, Chisholm.....	170 05	
Moore Creek bridge, Lyell.....	55 50	
Opeongo Road bridge, Sproule.....	35 61	
Wassa bridge, Ferris.....	113 25	
Whitewater Creek bridge, Chisholm.....	39 50	
		<hr/> \$592 66

Lambert Creek bridge, Sebastapol.....	215 80	
McGarry bridge.....	290 00	
Mud Creek bridge, Stafford.....	200 00	
Prince Creek bridge, Hagarty.....	104 00	
Powers Creek bridge, Admaston.....	73 50	
Springtown Road bridge.....	85 33	
Wardsworth Creek bridge, Radcliffe.....	74 75	
		\$4,200 75

## BRIDGES CONSTRUCTED FROM THE FUND PROVIDED FOR MUNICIPAL BRIDGES

### NIPISSING BRIDGES

*Gauthier Creek Bridge, Lot 14, Con. 6, East Ferris.*—A timber bridge with a clear span of 10 feet; timber crib abutments, stone-filled. The deck, floor and stringers are of flatted cedar. Cost, \$417.70.

*Graham Creek Bridge, Lots 5 and 6, Con. 8, Chisholm.*—A timber bridge with a clear span of 18 feet; timber crib abutments, stone-filled. Floor and stringers are of flatted cedar. Cost, \$546.35.

*Lowin Creek Bridge, Lot 10, Calvin-Lauder Townline.*—A timber bridge with a clear span of 12 feet, with floor and stringers of flatted cedar; timber crib abutments stone-filled. Cost \$478.60.

*Moore Creek Bridge, Lot 2, Con. 2, Calvin.*—A timber bridge with a clear span of 10 feet; timber crib abutments, stone-filled; floor, 4-inch cedar plank; stringers of flatted cedar. Cost, \$335.50.

*Moore Creek Bridge, Lot 17, Con. 2, Calvin.*—A timber bridge with a clear span of 9 feet. The course of the creek was diverted at the bridge to protect the road. Cost, \$451.45.

*Whitewater Creek Bridge, Lot 28, Con. 2, Bonfield.*—A concrete culvert 5 feet wide and 4 feet in height and 30 feet long, reinforced with steel throughout; wire cable guards in place on each side of fill. Cost, \$868.52.

### PARRY SOUND BRIDGES

*Distress River Bridge, Lots 20 and 21, Con. 11, Chapman.*—A concrete beam bridge, with a clear span of 30 feet. The road was diverted to the east to obtain a proper crossing. The foundations are on solid rock. Cost, \$3,170.56.

*Horn Lake Creek Bridge, Lot 4, Con. 3, Strong.*—A rubble masonry culvert, 6 feet wide and 6 feet high, inside measurements. The top is a reinforced concrete

slab. The length is 52 feet. A heavy fill to bring the roadway up to grade was placed over the culvert. Cost, \$2,733.39.

*North Seguin Bridge, Lot 4, Con. 7, McKellar.*—A concrete beam bridge, with a clear span of 40 feet; roadway 16 feet in clear width. The abutments are 12 feet in height to the floor level. The railing, 62 feet long, is a concrete slab supported by 12 inch x 12 inch concrete posts. Cost, \$3,082.16.

*Turtle Creek Bridge, Lot 15, Humphrey-Christie Townline.*—A concrete beam bridge, with a clear span of 24 feet; roadway 16 feet in clear width. The bottom is soft. The abutment foundations consist of timber cribs 12 x 24 feet, filled with rock to low-water level. Concrete abutments were placed on top of the stone-filled cribs. Cost, \$2,405.33.

Work is under way on the Wolf River bridge, Hardy.

#### MUSKOKA BRIDGES

*Black Creek Bridge, Lot 10, Con. 8, Stisted.*—This work consists of filling with rock, each end of a long timber trestle. The work was started last year and was continued this season; \$398.00 was expended on the work.

*Buck Lake Bridge, Lot 25, Con. 1-1, Stisted.*—This work comprises filling with rock each end of a long timber trestle. A length of 32 feet was filled at the north end and 18 feet at the south end. The stone-fill is 30 feet wide at the bottom and 16 feet wide at the top. The remaining timber section was repaired where necessary; \$605.93 was expended on the work.

*Currans Bridge, Baysville Road, Lot 31, Con. 7, McLean.*—A concrete bridge with a clear span of 14 feet. The floor is a flat slab reinforced with  $\frac{3}{4}$ -inch square bars, set at 6-inch centres. The railing posts are 4-inch steel T sections. The guard rails are of  $\frac{1}{2}$ -inch wire cable, extending over bridge and fill. Cost, \$1,094.24.

*South Branch Bridge, Bracebridge.*—The old steel bridge over the South Branch of the Muskoka River on the Ferguson Highway, at the west boundary of the town of Bracebridge, had become too light and too narrow for present-day traffic. Provision was made for a bridge to meet the needs of traffic. The old steel was shifted to provide a temporary crossing. The old abutments were utilized and extended on the up-stream side to accommodate the new steel. An 80-foot span with a 24-foot roadway and sidewalk 6 feet in width on the down-stream side.

The new extensions of the abutments are heavy concrete sections, having a height of 20 feet to the bridge seats. The bottom is composed of boulders. Heavy wing walls 38 feet long on the east end and 28 feet long on the west end were constructed on the up-stream side of the approaches.

The steel was supplied by McGregor & McIntyre at a contract price of \$5,930.00 f.o.b. Bracebridge.

The steel was erected and all work in connection with the bridge was done by day labour, under the direction of Public Works foremen.

The cost of the bridge complete was \$10,519.42.

The town of Bracebridge contributes \$2,500.00 towards the cost of the bridge and the Department retains control of the old steel span for use elsewhere in the district.

All work in the Muskoka District was done under the direction of Wm. Lowe, Foreman of Public Works.

#### SIMCOE BRIDGES

*Jeanetts Bridge, Lot 18, 6th Line, Medonte.*—A concrete pile bridge with clear span of 25 feet and a roadway 16 feet in clear width. The concrete piles are 16 feet in length. The railing is a concrete slab, supported by 12 x 12-inch concrete posts. Approaches are rock-filled and wire cable guard rails are in place. Cost, \$1,411.08.

*Mitchell Square Bridge, 15 Sideline, Con. 9, Oro.*—This work comprised placing a new steel beam deck on the timber abutments of the old bridge. The span is 22 feet 6 inches clear and the roadway 14 feet clear. Six lines of 15-inch steel I beams at 42 lbs., 25 feet 6 inches long, were supplied, with steel T posts for railing, punched for wire cable. The  $\frac{1}{2}$ -inch wire cable for guardrail extends over bridge and approaches. The steel was supplied by McGregor & McIntyre for \$333.00. The bridge floor is of 3-inch plank. The total cost of the bridge was \$807.51.

*Marsh Drain Bridge, 2nd Line, Tiny.*—A timber truss bridge, with a clear span of 28 feet. A king truss is supported on piles. The piles were set in holes made with a post-hole auger. Cost of bridge complete, \$571.20.

*Sturgeon River Bridge, Lots 55 and 56, Con. 1, Medonte.*—A concrete beam bridge with a clear span of 17 feet, roadway 16 feet in clear width. The abutments are built on a skew to line in with the course of the stream and are 9 feet in height to the floor level. The railing consists of  $\frac{1}{2}$ -inch wire cable supported by steel posts. Cost, \$1,699.87.

The work in Simcoe was in charge of Amos Train, Public Works Foreman.

#### HALIBURTON BRIDGES

*Black Creek Bridge, Lot 26, Con. 6, Lutterworth.*—A concrete trestle with a single span 25 feet in clear width. The roadway is 16 feet in clear width. The concrete piles are 20 feet in length. The deck is 8 feet 3 inches above water level, giving a clearance of 5 feet 9 inches. The railing on the bridge is a concrete slab supported by four 12 x 12-inch concrete posts. Wire cable guard rails extend over the full length of the approaches. Cost, \$1,593.89. P. R. Switzer was foreman in charge.

*Goldman Creek Bridge, Lot 11, Con. 12, Cardiff.*—A timber bridge with a clear span of 16 feet 6 inches; the abutments are timber cribs, filled with stone. The approaches are filled with rock and top-dressed with gravel. The guard rails are of cedar and extend the full length of the bridge and approaches, 90 feet in all. A. J. Southern was foreman in charge. Cost, \$487.27.

*Halls Lake Bridge, Lot 9, Con. 7, Stanhope.*—A concrete culvert with a clear span of 10 feet and a roadway 16 feet in clear width. The abutments are 7 feet 1 inch in height to floor level. Wire cable guard rails extend over bridge and fill and are supported on the bridge with steel posts. P. R. Switzer was foreman in charge. Cost, \$1,264.37.

*Otter Creek Bridge, Lot 7, Con. 21, Monmouth.*—This work comprised rebuilding a timber bridge with a clear span of 21 feet. Some new timbers were placed

on the abutments and an entire new deck supplied. The deck is supported by a king truss. The floor, stringers and truss timbers are of hewn tamarac. The approaches are rock-filled, top-dressed with gravel. Timber guard rails extend over the full length of bridge and approaches. A. J. Southern was foreman in charge. Cost, \$250.00.

Three other concrete bridges were under construction at the end of the season.

#### NORTH HASTINGS BRIDGES

*Baalims Bridge, Lot 11, Con. 7, Madoc.*—A concrete bridge with a clear span of 12 feet. Roadway is 16 feet clear; steel posts and wire cable guard rails. Cost, \$712.91.

*Boundary Bridge, Lot 9, Con. 1, Wollaston.*—A concrete beam bridge with a clear span of 20 feet and a roadway 16 feet in clear width. The abutments are 11 feet in height to the floor level. Steel posts support the  $\frac{1}{2}$ -inch wire cable guard rail which extends over bridge and approaches. Cost, \$1,414.28.

*Church Road Bridge, Lot 17, Con. 15, Monteagle.*—A timber bridge with a clear span of 18 feet. Cost, \$188.50.

*Combermere Road Bridge, Lot 19, Con. 12, Carlow.*—A timber bridge with a clear span of 20 feet. Cost, \$299.50.

*Egan Creek Bridge, Lot 15, Con. 1, Dungannon.*—A timber bridge with a clear span of 18 feet. Cost, \$305.05.

*Hamilton Bridge, Lot 25, Con. 3, Marmora.*—A concrete bridge with a clear span of 10 feet. Cost, \$522.94.

*Jamieson Creek Bridge, Lot 5, Con. 10, Dungannon.*—A concrete culvert with a clear span of 12 feet. Roadway 16 feet in clear width. The floor is a 12-inch concrete slab, reinforced with  $\frac{3}{4}$ -inch square steel bars. The guard rails are supported by steel posts and  $\frac{1}{2}$ -inch steel wire cable guards extend over bridge and approaches. Cost, \$1,063.19.

*Lake St. Peter Bridge, Lot 10, Con. 10, McClure.*—A timber bridge with a clear span of 20 feet. Cost, \$299.88.

*Marsh Creek Bridge, Lot 18, Con. 6, Madoc.*—A concrete culvert with a clear span of 12 feet. Steel posts support wire cable guards. Cost, \$736.31.

*McArthur Mills Bridge, Lot 23, Con. 13, Mayo.*—This work consisted of constructing a new timber span 20 feet in clear width at the south end of the old bridge over the Mississippi River. The approach at the north end of the bridge was rebuilt with a heavy rock fill. Cost, \$808.00.

*McLeans Bridge, Lot 20, Con. 15, Mayo.*—A timber bridge with a clear span of 17 feet. Cost, \$564.00.

*Papineau Creek Bridge, Lot 11, Con. 3, McClure.*—A timber bridge with a clear span of 20 feet. Cost, \$602.00.

*Ravies Bridge, Lots 19 and 20, Con. 1, Elziver.*—A concrete culvert with a clear span of 10 feet. Steel posts support the  $\frac{1}{2}$ -inch wire cable guard rail. Cost, \$708.40.

*Rollins Bridge, Lot 25, Con. 9, Madoc.*—A concrete culvert with a clear span of 12 feet and 16 feet roadway. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards. Cost, \$809.72.

*Thompson Bridge, Lot 6, Con. 5, Elziver.*—A concrete bridge with a clear span of 16 feet and roadway 16 feet clear. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards. Cost, \$1,076.20.

*Wellman Bridge, Lot 5, Con. 4, Marmora.*—A concrete culvert with a clear span of 10 feet. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards. Cost, \$773.26.

All the bridge work in North Hastings was done under the direction of W. E. Wiggins, Road Inspector for the district.

#### EAST HASTINGS BRIDGES

*Douglas Bridge, Lot 19, 6th Line, Huntingdon.*—A concrete beam bridge with a clear span of 20 feet, roadway 16 feet in clear width. Steel posts support the  $\frac{1}{2}$ -inch steel wire cable guard which extends over bridge and approaches. Cost, \$1,662.04.

*Orrs Bridge, Lot 7, 6th Line, Huntingdon.*—This bridge consists of five lines of 30-inch iron ingot pipe with side walls of masonry set in cement mortar. A roadway 16 feet in top width has been provided. Cost, \$769.55.

*Trudeau Bridge over Claire River, Lot 22, 9th Line, Hungerford.*—A steel bridge with a span of 60 feet, centre to centre of bearings, with roadway 16 feet in clear width. The abutments are of concrete. The east abutment rests on solid rock and is 9 feet in height to floor level. The west abutment rests on a pile foundation and is 12 feet in height to floor level. A heavy rock fill was placed at the west end and a small fill at the east. The steel span was supplied by the McGregor & McIntyre Steel Company for a contract price of \$1,615.00. The steel was erected and all work in connection with the bridge was done by day labour under the direction of W. E. Wiggins, Road Inspector, who had charge of the work in East Hastings. The expenditure on the bridge was \$4,213.69.

#### ADDINGTON AND FRONTENAC BRIDGES

*Arden Bridge, Lot 9, Con. 15, Kennebec.*—A concrete bridge with a clear span of 11 feet 6 inches, roadway 16 feet in clear width. The floor is a 12-inch flat slab with curbs 12 inches in height. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards, which extend over bridge and approaches. Cost, \$1,054.49.

*Buckshot Creek Bridge, Lot 38, Con. 7, Clarendon.*—A steel beam bridge with a clear span of 22 feet with 6-inch concrete floor 16 feet in clear width; 6 lines of 15-inch steel I beams at 42 lbs. carry the concrete floor. The abutments are concrete 8 feet in height to floor level and resting on stone-fill foundations. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards which extend over bridge and approaches a length of 72 feet. Cost, \$1,370.26.

*Carmen Creek Bridge, Lot 47, 8th Line, Camden.*—A concrete bridge with a clear span of 16 feet; roadway 14 feet in clear width. The floor is a 16-inch slab reinforced with  $\frac{3}{4}$ -inch square steel bars. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards which extend over bridge and approaches a length of 70 feet. Cost, \$1,070.61.

*Fifth Concession Bridge, Lots 2 and 3, Loughborough.*—A concrete beam bridge with a clear span of 20 feet and roadway 16 feet clear. The abutments rest on foundations of gravel and boulders and are 8 feet in height to the floor level. Steel posts support  $\frac{1}{2}$ -inch wire cable guards which extend over bridge and approaches. Cost, \$1,970.00.

*Macumber Bridge, Lot 17, Con. 9, Hinchinbrooke.*—This work comprised placing a new concrete beam deck on the old stone abutments. The span is 20 feet clear and the roadway is 14 feet in clear width. The approaches are rock filled. Steel posts on the bridge support the  $\frac{1}{2}$ -inch wire cable guards that extend over bridge and approaches. Cost, \$1,516.44.

*Mississippi Bridge, Lot 11, Con. 10, Palmerston.*—A steel beam deck bridge with a clear span of 20 feet and roadway 16 feet in clear width. Six lines of 12-inch I beams at 31 $\frac{1}{2}$  lbs. carry a 6-inch concrete floor. The concrete abutments rest on large timber cribs filled with stone. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards that extend over bridge and approaches. Cost, \$1,746.48.

*Mud Creek Bridge, Lot 3, Con. 3, Portland.*—A steel beam bridge with a clear span of 20 feet and roadway 16 feet in clear width. Six lines of 12-inch steel I beams carry a 6-inch concrete floor slab. The abutments consist of stone fills on which is built a concrete seat to carry the steel beams. Steel posts support the  $\frac{1}{2}$ -inch wire cable guard which extends over bridge and approaches. The stone-filled approaches were the most expensive feature in construction, as the bottom was soft and a large yardage of stone was required to bring the roadway up to grade. Cost, \$2,264.87.

*Opinicon Lake Bridge, Lot 1, Con. 16, Bedford.*—A small concrete bridge with extensive approaches on each side. The east approach was widened and raised over a length of 250 feet and the west approach widened and raised over a length of 120 feet. Cost, \$1,587.00.

*Plevna Bridge, Lot 40, N.E. Range, Clarendon.*—A steel beam bridge with a clear span of 20 feet and roadway 16 feet in clear width. Six lines of 15-inch steel I beams carry a 6-inch concrete floor slab. The old stone abutments were used. The approaches were widened and raised. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards which extend over bridge and fill for a length of 160 feet. Cost, \$1,650.00.

*Rock Lake Bridge, Lot 7, Con. 13, Storrington.*—A steel beam bridge with a clear span of 22 feet; roadway 16 feet in clear width. Six lines of 15-inch steel I beams at 42 lbs. carry a 6-inch concrete floor slab. A stone fill at each end provides the foundation for standard concrete abutments. The stream is navigable for rock scows and the bridge was raised to provide 2 feet 6 inches extra head room. The floor is 3 feet above the old level and the approaches had to be raised and widened as the old approaches were too narrow for traffic. The east approach is 200 feet and the west approach 100 feet long. They were built up with rock and top-dressed with gravel. A large quantity of rock was required to widen the approaches as the bottom is soft. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards which extend over the bridge and approaches a length of 300 feet. Cost, \$3,838.54.

*Sharbot Lake Bridge, Oso.*—The old timber trestle bridge over the Narrows of Sharbot Lake, built by the Department, had become dangerous to traffic and renewal was necessary. Under an agreement with the County of Frontenac, wherein the county agreed to bear one half of the cost, it was decided to replace the timber structure with a stone fill. A steel truss bridge near the south end

of the bridge provided a passage for motorboats. This span had a roadway 12 feet wide and was too light for present traffic. The old steel was removed and was replaced with a steel beam bridge with a 24-foot 6-inch span and roadway 16 feet in clear width. Six lines of 15-inch steel I beams at 42 lbs. carry a 6-inch floor slab. Steel posts support the  $\frac{1}{2}$ -inch wire cable guards which extend over full length of bridge and fill and approaches, a total length of 720 feet.

The stone fill extends from the steel span to the north bank, a distance of 540 feet. Starting at the south end, for the first 140 feet, the fill will average about 20 feet in depth. From this point the rock bottom slopes rapidly, reaching a depth of 53 feet below water level near the middle of the Narrows. About 30 feet below water level a layer of hardpan was encountered, but below the hardpan there is a layer of soft material about 20 feet deep. No trouble was experienced until the fill had been brought to grade on the central 100-foot section. Over night this section sank from 6 to 8 feet. It was again filled to grade and again it went down. When brought to grade the third time it remained stable and very little subsidence has taken place during the last six months. A large proportion of the fill consisted of loose rock gathered up around the shores of the lake. But the largest quantity of rock was quarried from the shore adjoining the fill. About 30,000 cubic yards of rock were placed in the fill. The total cost of the work was \$34,105.36.

*Smith's Mill Bridge, Lot 14, Con. 6, Sheffield.*—A concrete beam bridge with a clear span of 40 feet and a roadway 16 feet in clear width. The abutments rest on solid rock and are 8 feet 6 inches in height to floor level. Four concrete beams 40 inches deep and 12 inches wide, reinforced with eight 1-inch square bars, carry an 8-inch floor slab, reinforced with 3-10-20 expanded metal. The railings are concrete slabs supported by 12 x 12-inch concrete posts at 10-foot 6-inch centres. The approaches are protected with guards of  $\frac{1}{2}$ -inch wire cable. This work was started in 1927 and completed this season. Total cost, \$2,627.10.

All the bridge work in the Addington-Frontenac District was done under the direction of W. W. Pringle, Road Inspector for the district.

#### RENFREW DISTRICT

*Balaclava Bridge, Consta Creek, Lot 9, Con. 2, Grattan.*—This work comprised replacing an old timber dam and bridge with a concrete structure. The structure provides an 8-foot wide waterway, a 6-foot wide log slide and an 11-foot flume for the power plant. The structure is 140 feet in length from bank to bank. A concrete wall extends from bank to bank on the up-stream side of the dam. The piers for the waterway, log slide and power flume extend 6 feet up-stream to provide for stop-log sluices. A concrete floor 16 feet in clear width extends over the sluice, log slide and flume and the intervening spaces, a total length of 50 feet. The approaches to the bridge consist of a stone fill 18 feet in top width, falling to a natural slope down stream. The guard rails are  $\frac{1}{2}$ -inch wire cables supported by steel posts. All the lumber and gravel used in the structure were supplied free of cost to the Department by the owner of the old dam. J. W. Davis was foreman in charge. Cost of structure, \$3,618.03.

*Black Bay Creek Bridge, Lot 18, Con. 1, Bagot.*—A small timber bridge with an extensive stone fill. Cost, \$255.00.

*Calabogie Bridge, Madawaska River, Bagot.*—The spring flood wrecked the old timber crib pier under the west end of the long steel span and it was decided

to replace the old pier with concrete. The new pier is 22 feet long, 7 feet wide at the bottom and 5 feet wide at the top and 12 feet high. The nose of the pier is protected with an 8-inch steel angle. Cost, \$1,926.43. J. W. Davis was foreman in charge.

*Cochrane Creek Bridge, Lot 5, Con. 8, North Algoma.*—A concrete bridge with a clear span of 16 feet and roadway 14 feet in clear width. The floor is a 16-inch concrete slab, reinforced with  $\frac{3}{4}$ -inch square steel bars. The  $\frac{1}{2}$ -inch wire cable guards are supported by steel posts and extend over the full length of bridge and approaches. Cost, \$1,116.45.

*Douglas-Caldwell Road Bridge, Lot 2, Con. 10, Bromley.*—A timber bridge with a clear span of 12 feet 6 inches, roadway 16 feet in clear width. Cost, \$199.30.

*Fiebeck Creek Bridge, Lot 12, Con. 2, Grattan.*—A timber bridge with a clear span of 18 feet, roadway 18 feet in clear width, approaches filled with stone. Cost, \$263.50.

*Green Creek Bridge, Lot 14, Con. 6, Brougham.*—A timber deck on stone-filled abutments. The waterway is 12 feet wide. Five heavy cedar stringers 30 feet long carry the floor of 6-inch flatted cedar. Cost, \$184.65.

*Halliday Creek Bridge, Lots 18 and 19, Con. 4, Bagot.*—A concrete bridge with a clear span of 16 feet, roadway 20 feet in clear width. The abutments, resting on solid rock, are 10 feet in height to the floor level. The floor is a 16-inch concrete slab, reinforced with  $\frac{3}{4}$ -inch square steel bars. The  $\frac{1}{2}$ -inch steel cable guards are supported by steel posts. This bridge was built on a new site to straighten the road and improve the grade. A heavy fill was required to provide approaches. The fill was made of rock, is 180 feet long, averages 7 feet in height and is 22 feet wide at the top. Total cost, \$2,750.26.

*Herrington Creek Bridge, Lot 1, Con. 9, Hagarty.*—A cedar box culvert 20 feet in length with waterway 8 feet wide and 5 feet deep. The stone-filled approaches to this bridge are 285 feet long. A roadway 20 feet in width has been provided. Strong guard rails extend over bridge and fill. Cost, \$500.90.

*Kitts Creek Bridge, Lot 279, S.B.R., Brudenell.*—This bridge is an extension of a long timber bridge. Three cedar piers provide two openings 15 feet in clear width. A stone fill was placed at the west end of the bridge. Cost, \$305.10.

*Laidke Creek Bridge, Lot 32, Con. 18, Raglan.*—A timber bridge with a clear span of 10 feet and roadway 16 feet in clear width. The filled approaches are 100 feet in length. Cost, \$203.00.

*Loney Creek Bridge, Lot 5, Con. 3, Raglan.*—A timber bridge with a clear span of 8 feet, roadway 16 feet in clear width. The stone-filled approaches are 40 feet in length. Cost, \$132.99.

*McArthur Bridge, Lot 6, Con. 1, Raglan.*—A timber bridge with a clear span of 8 feet and roadway 16 feet in clear width. The stone-filled approaches are 120 feet in length. Cost, \$200.37.

*McMahon Creek Bridge, Lot 14, Con. 7, Radcliffe.*—A timber bridge with a clear span of 12 feet, roadway 16 feet in clear width. Cost, \$290.00.

*McPherson Creek Bridge, Lot 10, Con. 2, Matawatchan.*—A timber bridge with a clear span of 18 feet and a roadway 18 feet in clear width. The approaches, 80 feet in length, are stone-filled. Cost, \$228.50.

*Palmer-Carlow Road Bridge, Lot 10, Con. 13, Raglan.*—A timber bridge with a clear span of 8 feet and roadway 16 feet in clear width. Cost, \$156.00.

*Scully Creek Bridge, Lot 28, Con. 1, Radcliffe.*—A timber bridge with a clear span of 14 feet and roadway 16 feet in clear width. Approaches are 60 feet in length and stone-filled. Cost, \$289.72.

*Whitefish Creek Bridge, Lot 23, Con. 3, Brougham.*—A timber bridge with a clear span of 8 feet and roadway 18 feet in clear width. Approaches are 60 feet in length, stone-filled. Cost, \$196.00.

The Jamieson Creek Bridge in Ross was under construction at the end of the season.

## DRAINAGE WORKS CONSTRUCTED BY THE DEPARTMENT OF PUBLIC WORKS IN DIFFERENT DISTRICTS

### NIPISSING DISTRICT

The following drains were opened up in this district during the season:

Bonfield Township, Lot 26, Con. 2.....	80 rods.
“ “ “ 25, “ 2.....	28 “
“ “ “ 33, “ 3.....	48 “
“ “ “ 25, “ 4.....	48 “
“ “ “ 16 and 17, Con. 6 and 7.....	9 “
“ “ “ 3, Con. 11.....	40 “
Boulter “ “ 27, “ 14.....	60 “
“ “ “ 33, “ 13.....	28 “
“ “ “ 34, “ 14.....	30 “
Cameron “ “ 8, “ A.....	30 “
Chisholm “ “ 10, “ 14.....	70 “
“ “ “ 8, “ 16.....	30 “
“ “ “ 22, “ 17 and 18.....	28 “
East Ferris “ “ 14, “ 6.....	24 “
“ “ “ 18, “ 8.....	28 “
“ “ “ 16, “ 9.....	32 “
“ “ “ 25, “ 10.....	42 “
Papineau “ “ 14, “ 8.....	17 “
“ “ “ 9, “ 11.....	35 “
Murchison “ “ 27, “ 2.....	40 “

One thousand and forty dollars and seventy-five cents (\$1,040.75) was expended on this work, which was done under the direction of J. O. Rochefort, Road Inspector for the district.

### MUSKOKA DISTRICT

The following drains were opened up in this district:

Baxter Township, Lot 32, Con. 3.....	56 rods.
Draper “ Lots 18 to 23, Con. 7.....	400 “
Morrison “ Lots 25 and 26, Con. 7.....	345 “
Stephenson “ Lot 16, Con. 12.....	240 “
Wood “ Lots 45 and 46, Con. 7 and 8.....	164 “

One thousand and forty-one dollars and sixty-two cents (\$1,041.62) was expended on this work which was done under the direction of Wm. Lowe, Public Works Foreman.

## EAST SIMCOE DISTRICT

The following drains were opened up under the direction of C. H. Jerney, Road Inspector:

Orillia Township,	Purbrooke Creek, Cons. 2 and 3.....	640 rods.
“	“ Lots 5 and 6, Con. 1.....	85 “
“	“ Lot 18, Cons. 1 and 2.....	60 “
“	“ Lots 19 and 20, Cons. 1 and 2.....	50 “
“	“ Lots 15 and 16, Con. 4.....	125 “
“	“ Lots 15 and 16, Con. 5.....	155 “
“	“ Lot 1, Cons. 5 and 6.....	48 “
“	“ Lot 14, Con. 7.....	25 “
“	“ Lots 2 and 3, Con. 8.....	137 “
“	“ Lot 14, Con. 14.....	80 “
“	“ Orillia-Medonte T. L.....	60 “
Oro	“ Lot 8, Con. 2.....	96 “
Tay	“ Lot 11, Con. 13.....	75 “

One thousand four hundred and eighty-four dollars and forty cents (\$1,484.40) was expended on this work.

## CENTRE SIMCOE DISTRICT

The following drains were opened up in this district under the direction of C. H. Jerney, Road Inspector:

Tiny Township,	Lots 99 and 100, Con. 1.....	200 rods.
“	“ “ 18 and 19, “ 2.....	120 “
“	“ “ 11 and 12, “ 16 and 17.....	112 “
Vespra,	Bear Creek, Lot 23, Cons. 9 and 10.....	325 “

Nine hundred and twenty-two dollars and twenty cents (\$922.20) was expended on this work.

## NORTH BRUCE DISTRICT

The following drains were opened up in this district under the direction of Jas. Weaver, Public Works Foreman:

*Albemarle Township, Crow Creek Drain, Cons. 1 and 2.*—This work consisted of clearing and ditching part of Crows Creek, west of the centre road to relieve a section of the road from flooding. Between the centre road and the east road, the creek was improved and some troublesome rock bars blasted out to relieve a section of the east road from flooding. Six hundred and eighty-five dollars and seventy-five cents (\$685.75) was expended on the work.

## NORTH ONTARIO DISTRICT

The following drains were opened up in this district under the direction of C. H. Jerney, Road Inspector:

Mara Township,	Lots 28, 29 and 30, Cons. 9 and 10.....	330 rods.
“	“ Lots 18, 19 and 20, Con. 10.....	230 “
“	“ Lots 23, 24 and 25, Con. 10.....	60 “
“	“ Lot 28, Con. 11.....	85 “
“	“ Lots 25, 26 and 27, Cons. 11 and 12.....	155 “
“	“ Lots 23 and 24, Con. 12.....	250 “
Rama	“ Lot 7, Con. C.....	60 “
“	“ Lot 8, Con. D.....	50 “
“	“ Lot 22, Con. 2.....	70 “
“	“ Lots 15, 16 and 17, Con. 6.....	120 “

One thousand one hundred and four dollars and seventy-five cents (\$1,104.75) was expended on this work.

## HALIBURTON-NORTH VICTORIA DISTRICT

The following drains were opened up in this district under the direction of A. J. Southern, Public Works Foreman:

Bexley Township, Lot 12, Cons. 6 and 7, 110 rods of ditch, 60 rods cleared.  
 Dalton Township, Lot 8, Cons. 2, 6 rods of ditch.  
 Dalton Township, Lots 22 to 25, Con. 9, 8 rods rock, 300 rods cleared.  
 Digby Township, Lots 30 and 31, Cons. 2, 97 rods cleared.  
 Laxton Township, Lot 9, Con. 9, 40 rods ditch, 95 rods cleared.  
 Laxton Township, Lot 5, Con. 13, 95 rods.  
 Monmouth Township, Lot 34, Con. 16, 50 rods ditch, 70 rods cleared.  
 Somerville Township, Lot 1, Con. 9, 78 rods ditch, 75 rods cleared.

One thousand three hundred and seventy-seven dollars and seventeen cents (\$1,377.17) was expended on this work.

## RENFREW DISTRICT

The following drains were opened up in this district under the direction of H. N. Moss, Road Inspector for the district:

Bagot Township, Lot 12, Con. 14.....	65 rods.
Brudenell " " 16, Con. 1.....	55 "
Grattan " " 14, Con. 6.....	55 "
" " " 2 and 3, Con. 12.....	45 "
Griffith " " 1, Con. 5.....	55 "
Hagarty " " 1 and 2, Con. 9.....	60 "
" " " 3, Con. 12.....	37 "
Head " " 26 and 27, Con. A.....	73 "
Matawachan Township, Lot 3, Con. 9.....	50 "
" " " 13, " 15.....	55 "
North Altona " " 21, " 8.....	37 "
Radcliffe " " 17, " 12.....	46 "
Raglan " " 5, " 12.....	37 "
Rolph " " 27, " 11.....	55 "
Sebastopol " " 19, " 4.....	37 "
Stafford " " 8, " 1.....	73 "
" " " 9, " 2.....	82 "
" " " 2, " 3.....	65 "
" " " 19, " 3.....	35 "
" " " 1 and 2, Con. 20.....	55 "
Wilberforce " " 10, Con. 6.....	36 "
" " " 21, " 23.....	45 "

Two thousand four hundred and seventy-eight dollars and eighty-six cents (\$2,478.86) was expended on this work.

*Mad River Clearing, Sunnidale.*—A section of the Mad River through the 5th and 6th Concessions of Sunnidale was badly obstructed by log jams, brush, etc. This section of the river was cleared and a good clear channel provided over a distance of 4 miles.

## MIMICO HOSPITAL SEWAGE DISPOSAL

In 1927 an agreement was entered into between the Province and the Township of Etobicoke, wherein the Province agreed to connect the Mimico Hospital sewer system with the township sewer system on the Government Road, west of the hospital, and to establish an automatic register or meter at the junction to measure the discharge of sewage.

The township agreed to take charge of the sewage from the junction to pass the sewage through its disposal plant at a charge of 2 cents per 1,000 gallons, to be paid quarterly according to the meter measurement.

The Province also agreed to pay to the township the sum of \$18,000 on account of the present capital cost of the disposal plant.

The Province has completed the sewer connection by tapping the old main sewer south of the hospital, extending a new 12-inch main west and south 2,300 feet to the Government Road, where connection is made with the township system. A meter house has been constructed in which is installed a Kent flow meter asked for by the township.

The township sewage disposal plant has been in satisfactory operation for some time and has been approved of by the Provincial Health Department.

On report, the Township of Etobicoke was paid the sum of \$18,000 under the terms of the agreement.

#### MIMICO HOSPITAL WATER SUPPLY

In July, 1928, the Honourable the Provincial Secretary entered into an agreement with the corporation of the Town of New Toronto and the Public Utilities Commission of New Toronto, wherein the Public Utilities Commission agreed to lay the necessary watermains to connect with the water supply system of the Mimico Hospital and to furnish an adequate supply of water for a term of ten years at a rate per 1,000 gallons similar to the rate charged to manufacturers in the town.

The Department extended the 8-inch service main to the street line and constructed a meter house where this service main connected with the town main.

In consideration of the town installing a 12-inch main on Nineteenth Street, from the 16-inch main on Birmingham Avenue to the meter house on the Hospital property, the Department agreed to pay the Public Utilities Commission of the Town of New Toronto the sum of \$2,500.00.

The terms of the contract have been fulfilled. The meter house has been constructed and properly equipped. The 12-inch main has been laid and connection made with the hospital water-service system.

On report, the Public Utilities Commission of the Town of New Toronto was paid the sum of \$2,500.00 under the terms of the agreement.

#### VINELAND EXPERIMENTAL FARM WATER SUPPLY

The water for the Experimental Fruit Farm at Vineland is taken from Lake Ontario. The intake for this supply was situated at the shore and consisted of a concrete crib extending out about 60 feet into the lake. The water entered this crib at the outer end and filtered through a bed of broken stone placed in the crib to a well from which it was pumped. The water near the shore is nearly always quite muddy and refuse from the cannery just east of the intake floated along the shore past the intake. The stone filter could not remove much of the mud and required frequent cleaning out.

Other sources of supply were investigated and several wells were drilled, but in every case the water obtained was too salty for use. Piping water from springs in the mountain to the south was also considered, but was thought to be too costly.

It was finally decided to put in mechanical filters and a chlorinator and to extend the intake by laying a 4-inch pipe 500 feet out in the lake where a depth of 6 feet was obtained at low water level.

A filter house 12 x 12 feet was built to the south of the pump house and adjoining it. This was built of brick with concrete roof and floor. Two filters, 4 feet in diameter were installed in this building. The chlorinator was placed

in the pump house. The filters and chlorinator were supplied by the General Supply Company of Toronto. The 4-inch pipe was extra heavy galvanized pipe furnished in 20-foot lengths and connected by screwed couplings with a screwed flexible joint of the Walker type at every third joint. Six-foot lengths of 80 lb. steel rail were bolted to the pipe midway between the flexible joints to hold it down. The intake was provided with a strainer which was protected by a grillage built up of 6-foot lengths of 80-lb. rail. All this material was furnished by the Taylor-Forbes Company of Toronto.

---

## DRAINAGE AID

### BIG MARSH DRAINAGE REPAIR, PELEE TOWNSHIP, SOUTH ESSEX COUNTY

This work was carried out under the provisions of the Municipal Drainage Act and in accordance with plans prepared by Alex. Baird, Civil Engineer. The engineer's report was adopted on October 18th, 1927, and the petition for aid was filed in this Department on May 19th, 1928.

The Big Marsh is situated in the northeast part of Pelee Island and comprises some 7,000 acres of submerged land and lands too low to admit of proper drainage by gravity.

Some fifty years ago the reclamation of this marsh was undertaken. Embankments were constructed along the low-lying shore and large dredge cuts were provided for internal drainage. A large dash wheel pump was installed at the northwest part of the area to drain the canals.

As the marsh was occupied and drained more pumping capacity was required and a second pumping plant was installed on the west shore. Improvements were made in the pumping plants from time to time, but the demand for more capacity persisted. The present extensive improvements resulted. The cost has been enormous. At the present time some of the marsh lands are paying as high as \$7.90 per acre annually in drainage and municipal rates.

The present improvements comprise a new water-tube boiler of 157 h.p. capacity, a new Corliss engine of 330 h.p., a new electric generator and motors, a water softener and a new water heater and feed pump. An entirely new building has been provided to house the pumping plant. The building is of wood frame with metal roof and sheeting.

I examined the plant on August 14th, 1928, and found all work and equipment completed in a satisfactory manner.

The engineer's estimate of the cost of the work was \$25,960. The township treasurer reports the full cost of the work at \$28,515.53.

This improvement is a work as described in sub.-sec. *b* of the Provincial Aid to Drainage Act and entitled to aid under the provisions of said Act.

On report a grant of 20 per cent. of the cost of the drain was paid to the Township of Pelee, \$5,703.

### BRADFORD MARSH DRAINAGE, VILLAGE OF BRADFORD, SIMCOE COUNTY

This work was carried out by the Village of Bradford, under the provisions of the Municipal Drainage Act and in accordance with plans prepared by Alex. Baird, O.L.S., C.E.

The engineer's report was adopted by the council on August 10th, 1925, and the petition for aid was filed in this Department on July 5th, 1926.

This drainage work consists of the reclamation of part of the Holland River marsh area, situated in the south part of the Village of Bradford. The Township of West Gwillimbury is reclaiming a large area of this marsh and the village scheme lies immediately north of the township scheme. The drainage is to be effected by embankment and pumping. The drainage area comprises 197 acres, farm lands, village lots and streets. The work is very expensive, amounting to \$52.48 per acre. The annual cost for 30 years, including operation, amounts to \$4.61 per acre.

The work as carried out consists of a large internal drain on the southerly side of the area. An external drain on the north and west provides for the exclusion of foreign water. The drainage is effected with a centrifugal pump driven by an electric motor that operates automatically according to the level of the water in the internal drain. The scheme is a decided success.

I examined the scheme in October, 1927, and found the work completed in a satisfactory manner.

The engineer's estimate of the cost was \$7,043, but the final cost as reported by the township treasurer was \$10,872.25.

This is a drainage work effected by embanking and pumping and costing in excess of \$10,000 and is entitled to aid under the provisions of the Provincial Aid to Drainage Act, 1921.

On report a grant of \$2,174, being 20 per cent. of the cost of the drain, was paid to the Village of Bradford.

#### CONCESSION "D" PUMPING PLANT, MERSEA TOWNSHIP, ESSEX COUNTY

This work was carried out by the Township of Mersea under the provisions of the Municipal Drainage Act, under the authority of By-law No. 149 and in accordance with report and plans prepared by Alex. Baird, O.L.S., C.E. The engineer's report was adopted on May 15th, 1922, and the petition for aid was filed in this Department on May 14th, 1923.

This work is for the drainage of a section of the submerged lands in the Point Pelee Marsh. Some years ago an embankment was constructed around this area, internal drainage provided and a pumping plant installed to discharge the water into the open marsh south of the area. The drainage was not satisfactory and improvements were demanded.

The old plant comprised a submerged centrifugal pump operated by a 50-h.p. gas and oil engine. The new work comprises a new concrete pump pit and a new pump and engine of the same size and capacity as the old outfit. A new concrete flume 150 feet long, 7 feet wide, and 6 feet in height has been provided to discharge directly into the lake. General repairs to the pump house were carried out and the whole plant placed in a serviceable condition.

The estimated cost of the work, including all incidental expenses, was \$10,753. The cost to the individual land owners is very heavy. The annual charge under the by-law amounts to \$3.08 per acre to run for 10 years. The drainage area affected comprises 535 acres.

I examined the work on November 18th, 1927, and found the work completed in a satisfactory manner.

The township treasurer reports the full cost of the work authorized by the By-law No. 149 at \$12,805.68.

This work is a drainage work within the meaning of sub-section "B" of the Provincial Aid to Drainage Act, 1921. On report a grant of \$2,561, being 20 per cent. of the cost of the drain, was paid to the Township of Mersea.

## HENRY BOLTON DRAIN ENLARGEMENT, HOWICK TOWNSHIP, NORTH HURON

This drain was constructed by the Township of Howick under the provisions of the Municipal Drainage Act and in accordance with plans prepared by Fred. A. Edgar, Civil Engineer. The engineer's report was adopted on April 27th, 1925, and the petition for aid was filed in this Department on June 23rd, 1925.

Although Howick is the lower township, the work extends up-stream into the Township of Wallace. This was done at the request of the Township of Wallace, so as to have a complete work under one report.

The work consists of two trunk channels and two lateral drains or branches. The main channel known as branch "A" commences at Lot 34 in the 7th Concession of Wallace and runs in a westerly direction through the 7th and 6th Concessions, crossing into the Township of Howick at Lot 26 in the 1st Concession. The length of this section is 20,326 feet, of which 3,064 feet is tile drain and 16,262 feet is open drain. The drain continues from the Wallace boundary along a watercourse through the 1st, 2nd, 3rd and 4th Concessions of Howick to the Maitland River, a distance of 30,300 feet. This section of the drain has a bottom width of 4 feet at the Wallace boundary and gradually widens out to 20 feet at the outlet. The depth of cut varies from 3 to 5 feet with side slopes of one to one throughout.

Branch "B" commences at Lot 47 in the 4th Concession of Wallace and runs westerly through the 4th and 5th Concessions to the Wallace-Howick boundary, a distance of 7,974 feet. Thence west along the boundary 2,326 feet. Of this section of the drain 8,385 feet is a covered drain with tile from 10 inches to 14 inches in diameter. On the boundary 1,915 feet is open drain with a bottom width of 3 feet. From the Wallace boundary branch "B" extends northerly through the 1st, 2nd and 3rd Concessions, discharging into the main or branch "A" on the west half of Lot 18. Length, 10,967 feet. On this section the bottom width runs from 3 to 4½ feet and the depth of cut from 3 to 5 feet with side slopes of one to one. The branch drains "C" and "D" are excluded from the work under consideration. As the tile drains in Wallace cannot be classed as trunk channels, the cost of the tile sections is excluded.

The estimated cost of the complete work was \$27,539.90, which was assessed by the engineer as follows:

On lands and roads in Howick.....	\$11,306 08
"        "        Wallace.....	16,217 50
"        "        Minto.....	16 32

The cost of the trunk channels in Howick and Wallace, exclusive of the branch drains in Howick and the covered drains in Wallace, was as follows:

Construction of channels in Howick.....	\$8,894 41
Construction of channel "A" branch in Wallace.....	4,827 24
Cost of Highway bridges and culverts.....	1,180 00
Incidental expenses in Howick.....	1,738 35
Incidental expenses in Wallace.....	218 00

Total cost of trunk channels in Howick and Wallace..... \$16,858 00

The treasurer, in his statement of expenditures, includes an item of \$2,280.00 for access bridges, land damages, etc. This amount was not expended, but was an allowance made by the engineer to the different land owners and was deducted from the individual assessments. This does not enter into the expenditure on the drain and cannot be included in the cost of the work.

I examined the drain in November, 1927, and found the work completed in a satisfactory manner.

This drainage work consists of trunk channels within the meaning of the Act and costing \$16,858.00 and is entitled to aid. On report a grant of \$3,371.00, being 20 per cent. of the cost of the drain, was paid to the Township of Howick, the initiating municipality.

#### POINT ABINO MARSH DRAIN, BERTIE TOWNSHIP, WELLAND COUNTY

This drain was constructed by the Township of Bertie under the provisions of the Municipal Drainage Act and in accordance with plans prepared by Ross & Scott, Civil Engineers. The work was undertaken under an order from the Drainage Referee. The engineers' report was adopted by the council of Bertie on September 1st, 1927, and the petition for aid was filed in this Department on April 24th, 1928.

The south part of Point Abino is open marsh and the north part consists of good farming land. Heretofore this farm land was drained by a municipal drain which discharged into Lake Erie at the southwest corner of Lot 31. This drainage was unsatisfactory and improvement was ordered.

The present work comprises an enlargement of the old drain through the Broken Front Concession from the west townline of Bertie to the Point Abino Road, Lots 31 and 32, a distance of 6,450 feet. At the east end the grade of the original drain is changed and the water is now carried west to a new outlet. The new outlet extends from the old drain, south along the east side of the road between Lots 32 and 33, 4,500 feet to a private drain, thence south and east along the private drain a distance of 1,788 feet to Lake Erie.

On the old drain section at the upper or west end, the bottom width is 5 feet with a depth of from  $2\frac{1}{2}$  to  $3\frac{1}{2}$  feet. On the balance of the old drain, the bottom width is 6 feet with depth of cut from 2 to 4 feet. On the new outlet, the bottom width is 8 feet with depth of cut ranging from 2 feet 6 inches to 5 feet 6 inches and side slopes of one to one throughout. At the outlet, the drain passes through a long section of drift sand built up by the action of the waves. An open drain at this point cannot be kept in proper order and a concrete box drain is provided. This box drain is 288 feet long. The private drain was provided with a box drain 5 feet wide and 4 feet high. To provide for the additional flow a second compartment 5 feet wide and 4 feet 6 inches high was added. The box drain consists of 8-inch walls of concrete, well reinforced.

The drainage area comprises some 600 acres in the Township of Humberstone and 1,130 acres in the Township of Bertie. The estimated cost of the work was \$18,700 which was assessed by the engineer as follows:

On lands and roads in Bertie.....	\$15,720 00
"    "    Humberstone.....	3,050 00

The township treasurer reports the expenditure on the drain as \$15,061.02. To this should be added the expense of by-law and clerks' fees in Humberstone, \$125.00, making a total expenditure on the drain of \$15,186.02.

I examined the drain on August 30th, 1928, and found the work completed in a very satisfactory manner. This drainage work is a trunk channel within the meaning of the Provincial Aid to Drainage Act and is entitled to aid.

On report a grant of \$3,037, being 20 per cent. of the cost of the drain, was paid to the Township of Bertie, the initiating municipality.

#### WIGNELL-MICHENER DRAIN, HUMBERSTONE TOWNSHIP, WELLAND COUNTY

This drain was constructed by the Township of Humberstone under the provisions of the Municipal Drainage Act and in accordance with plans prepared

by Ross & Scott, Civil Engineers. The petition for aid was filed in this Department on August 15th, 1928, and the engineers' report on the work was adopted on October 24th, 1927.

The work comprises the repair and improvement of the Wignell and Michener drains. Two upper main-trunk channels find a common outlet south from the Canadian National Railway along the west side of the road between Lots 22 and 23 in the 1st Concession. At the railway the drain divides, one branch extending north and east to the centre of Lot 19, near the rear of the 2nd Concession. The other branch runs east through the 1st and 2nd Concessions to the Fort Erie road, thence north through lots 18 and 17 to the 3rd Concession Road at the road between Lots 18 and 19. The total length of these drains is 34,600 feet.

On the west branch the bottom width varies from 3 to 16 feet and the depth of cut from  $2\frac{1}{2}$  to 9 feet with side slopes of one to one. On the east branch the bottom width varies from 4 to 8 feet and the depth of cut from 2 to 6 feet, side slopes  $1\frac{1}{4}$  to 1.

The estimated cost of the work was \$14,082.50, which was assessed against lands and roads in Humberstone.

A number of branch or lateral drains are included in this work and must be eliminated from the cost on which the grant is based. The cost of these branch drains including a proportionate share of the incidental expenses is as follows:

Branch drain, secs. 5 and 6.....	\$338 71
“ “ sec. 13.....	243 07
“ “ secs. 14 and 15.....	748 37
“ “ sec. 18.....	29 88
	\$1,360 03

The total cost of the work as reported by the township treasurer was \$11,645.77. Eliminating the cost of the branch drains, \$1,360.03, leaves the total cost of the trunk channels \$10,285.74.

I examined the drain on August 30th, 1928, and found the work completed in a satisfactory manner. This drain comprises trunk channels within the meaning of the Provincial Aid to Drainage Act and is entitled to aid under the provisions of the Act.

On report a grant of \$2,057.00, being 20 per cent. of the cost of the drain, was paid to the Township of Humberstone.

A. J. HALFORD,

*Engineer, Public Works.*

Toronto, October 31st, 1928.

Toronto, February 5th, 1929.

HONOURABLE GEO. S. HENRY,  
*Minister of Public Works and Highways,*  
Ontario.

SIR,—

I have the honour to submit the following statement showing the several contracts and bonds sentered into with His Majesty during the twelve months ending 31st of October, 1928, in connection with the Public Buildings and Works, subject to the control of the Public Works Department of Ontario.

I have the honour to be, Sir,

Your obedient servant,

DIGBY HORRELL,  
*Secretary and Purchasing Agent.*

## STATEMENT No. 10

Showing the several contracts and bonds entered into with His Majesty during the twelve months ending the 31st of October, 1928, in connection with the Public Buildings and Works, subject to the control of the Public Works Department, Ontario.

Date	Work	Subject of Contract	Contractors	Amount
1927 Nov. 2	110 University Ave., Toronto.....	Installation of one automatic coal burner..	Allen General Supplies, Ltd., Toronto, Ont.	\$2,471 00
Nov. 14	Parliament Buildings, Toronto.....	Construction of elevator hatchways.....	Sullivan & Fried Co., Toronto.....	7,417 00
Nov. 15	Hamilton New Technical Teachers' Training College.....	Construction of tunnel connecting with Technical School.	W. H. Yates Construction Co., Ltd., Hamilton.	10,799 50
Nov. 17	Hamilton Technical Teachers' Training College.....	Installation of plumbing, heating and venting.	Adam Clark, Ltd., Hamilton.....	17,963 00
Nov. 18	Ontario Hospital, Whitby.....	Installation of laundry equipment.....	Premier Laundry Equipment Co., Montreal	3,875 00
Nov. 29	Parliament Buildings.....	Installation of one electric passenger elevator in East Wing.	Turnbull Elevator Co., Toronto.....	14,485 00
Dec. 2	Bowmanville Boys' Training School.....	Construction of dormitory, all trades except plumbing, heating, ventilating and electric wiring.	Stuart & Sinclair, Ltd., Hamilton.....	54,490 00
Dec. 22	Parliament Buildings.....	Alterations to building.....	Bennett & Crews, Ltd., Toronto.....	46,910 00
Dec. 28	Hamilton Technical Teachers' Training College.....	Electric wiring and fixtures.....	Culley Electric Co., Hamilton.....	3,925 00
1928 Jan. 5	East Block, Parliament Buildings.....	Display cases for exhibit hall.....	Kent McClain Co., Toronto.....	9,500 00
Feb. 9	Toronto, 257, 259, and 261 Simcoe St.....	Purchase and removal of brick houses.....	Frankel Bros., Toronto.....	950 00
Mar. 6	Hamilton Technical Teachers' Training College.....	Supply and delivery of hardware.....	Wilkinson & Compass Co., Ltd., Hamilton, Ont.	1,694 08
Mar. 6	Bowmanville Boys' Training School.....	Installation of plumbing and heating in new dormitory building.	McKinley & Northwood Co., Ltd., Ottawa, Ont.	9,906 00
Mar. 13	Fort Frances Court House.....	Addition of new room in attic, changing of roof, heating and electric wiring.	John East Co., Ltd., Fort Frances, Ont.....	2,211 35

## STATEMENT No. 10—Continued

Oct. 27	Cobourg, Ontario Hospital.	Alterations to cold storage room.	The Martin Jex Co., Cobourg, Ont.	2,500 00

DIGBY HORRELL,  
Secretary and Purchasing Agent.

## ARCHITECT'S BRANCH

Toronto, February 14th, 1929.

HONOURABLE GEO. S. HENRY,  
*Minister of Public Works and Highways.*

SIR,—

I have the honour to report on the work of the Architect's Branch of the Public Works Department during the fiscal year ending October 31st, 1928.

*Government House.*—The residence of His Honour the Lieutenant-Governor, steward's house, chauffeur's cottage, greenhouse and driveways have been kept in good condition and repairs made as found to be necessary. Some of the rooms in the residence were decorated and rooms in steward's and chauffeur's apartments papered and painted. Repairs were also made to the heating, ventilating and plumbing apparatus and electric wiring, renewals being made as required. The grounds were kept in excellent condition. Improvement is very noticeable from year to year as time goes on for which credit is due to the gardener in charge.

*Parliament Buildings.*—Necessary repairs have been made as required from time to time to the buildings, including the painting of the State Dining Room and Reception Room in the Speaker's apartments and a number of the offices. Repairs to roofs, heating, ventilating plant and plumbing have also been made. The roads and grounds have been kept in the usual good order. Repairs were made to furniture and new furniture supplied where found to be necessary.

Additional accommodation: A large amount of work has been done in the roof space of the east intermediate section and the northeast section of the east wing, Parliament Buildings, to provide accommodation for the Motion Picture Bureau and the Board of Censors, who have been removed from 46 Richmond Street West. The rooms in the south end of the east wing, formerly occupied by the Department of Public Works, have been allotted to the Board of Censors, including office of the Chairman of the Board, General Office, Men's Board Room, Women's Board Room, Directors' Office, Clerks' Room and General Office and Store Room for non-inflammable films. The northeast section is divided into three offices for clerks on the east side of the corridor. The west side is divided into dark rooms, film developing room and drying room. The floors of the film developing and drying rooms are of reinforced concrete construction, waterproofed. The centre portion is divided into cutting room for inflammable films, vault for Bureau, cutting room and vault for censors. These rooms are all of fire proof construction. The roof space of the intermediate section to the west of the above has been divided into Bureau and motion-picture projection rooms with operating rooms adjoining each, fireproofed at the east end and a cutting room for non-inflammable films at the west of the Bureau projection room. The corridors have been formed by glass partitions placed around wall of skylight. All of this work has been done in accordance with the requirements of the Canadian Fire Underwriters' Association, the plans having been submitted to and approved by them before the work was commenced. Every precaution has been taken to provide fire protection including the erection of an iron stairway from the west end of the corridor connecting with stairway leading to the floor below.

An office in the rear of the elevator and north of the stairway is being equipped for the telegraph company, and when completed will take the place of the present telegraph office on the second floor. This work (with the exception of the heating, plumbing and electric wiring, which was done by our own staff) was done under contract by Messrs. Bennett & Crews of Toronto.

A fireproof vault for storing inflammable films has been built in the east court yard in connection with the above, containing four vaults and film winding rooms underground, with a small building above ground to enclose the large ventilators from the vaults which have been constructed as per the requirements of the Underwriters' Association. Entrance is on the west side with a stairway leading to the vaults, which is for the delivery of the films. The walls, floors and roof are constructed of reinforced concrete, the walls above ground being faced with Credit Valley stone to harmonize with the work on the main building. The roof over vaults and outside walls are waterproofed with an asphalt membrane made perfectly watertight. A tunnel 5 feet 6 inches in width, 30 feet in length, has been constructed connecting the vaults with the main building, built of concrete same as vaults, the floor being of mastic. From the entrance to the tunnel a passageway with ramp has been constructed in the main building connecting with the main corridor. The work in connection with vault and tunnel was done under contract by Messrs. Gratton, Limited, of Toronto, with the exception of the steam heating, plumbing and electric wiring, which was done by men in the employ of the Department.

Owing to the overcrowding, caused by traffic through the main tunnel, it was decided to place another elevator adjoining the present one, in the East Wing, which necessitated the removal of the stairs in the elevator hall in the basement at tunnel entrance, from the south to the north side of same, the cutting of wall from bottom to top and underpinning the foundation walls. All of the above work was done under contract by Messrs. Sullivan & Fried of Toronto, excepting the steam heating, plumbing and electric wiring which was done by men in the employ of the Department. The contract for the electric elevator was awarded to the Turnbull Elevator Company of Toronto, has been installed and is giving satisfactory service.

Many changes have been made in subdivisions of offices, occasioned by the reallocation of offices to the various Departments and removal of branches from Nos. 15 and 47 Queen's Park and No. 110 University Avenue, all of which necessitated a large amount of redecorating and rearranging of furniture.

Improvements have been made in the vaults of the Provincial Secretary's Department, including the erection of a mezzanine floor in vault No. 183 with stair leading to same. A supply and exhaust vent system was installed in vault No. 158. A floor was laid in one half of the mezzanine floor, the other half being laid last year.

Plans and specifications were prepared for a greenhouse which is now under construction. The contract for stone work is being executed by Nicholson & Curtis; the excavations, concrete and brickwork are being done by men employed by the Department under a competent foreman. The contract for the superstructure has been awarded to Messrs. Lord & Burnham. Good progress is being made with the work. The heating will be done by our own staff, the steam being taken from the Main Boiler House. The building will be completed about November 1st, when the present greenhouse, which is in a dilapidated condition and beyond repair, will be removed.

*East Block.*—The rooms in some of the Departments have been subdivided to meet the requirements of the Departments. An electric clock system has

been installed and clocks placed in each corridor opposite to the elevators and in some of the offices. Fittings and furniture have been supplied to vaults and offices as found to be necessary. Some minor repairs have been made to the heating and ventilating plants, the work being done by the Engineer and staff.

The heating plant in this building has been extended to supply steam to the heating plant in the Psychiatric Hospital, the Government Garage, and No. 15 Queen's Park, the steam being conveyed in mains enclosed in concrete tunnels extending from the East Block to the Garage and from that building to the Psychiatric Hospital. It is estimated that a great saving will be made in coal and operation by hooking up the plants in these buildings with the plant in that building. The work in tunnels was done by men employed by the Department, the steam fittings by the steamfitters' staff of the Department.

*No. 15 Queen's Park.*—Some minor alterations have been made to this building, consisting of putting up partitions on the upper floor and the installation of plumbing to provide accommodation for the Superintendent of the Government Garage. Some painting was done in the offices occupied by the Ontario Athletic Association. The building has been kept in good repair.

*No. 47 Queen's Park.*—Repairs have been made to this building which was formerly occupied by the Ontario Railway and Municipal Board and now occupied by the Ontario Research Foundation.

*Garage, Surrey Place.*—Considerable alterations and additions have been made to this building to provide accommodation for repairs to automobiles, trucks, snow-ploughs and machinery in connection with the Department of Highways and to permit of repair work formerly done on the roads, being attended to in this shop. The construction work was done by men employed by the Department under a competent foreman. The steam heating, plumbing and electric work was done by the staff of the Department.

*No. 110 University Avenue.*—This building, occupied by the Ontario Liquor Control Board, has been kept in good repair and painting done as required. An improvement has been made in the heating system by the installation of an underfeed fireman stoker to one of the steam heating boilers and which it is estimated will reduce the consumption of coal by about one-half. Some minor changes were made to the piping, etc.

*Osgoode Hall.*—This building has been kept in good repair, consisting chiefly of repairs to galvanized iron work on roofs and plaster work in some of the older sections of the building and painting walls of offices and corridors, a certain amount of which is necessary each year owing to wear and tear. Furniture in the various offices has been repaired and new furniture supplied only where found to be necessary. A very desirable change has been made in the basement. The rooms occupied by caretakers have been vacated and fitted up for store rooms of connection with the various Departments, greatly improving the sanitary conditions and adding much needed space for storage.

#### EDUCATIONAL BUILDINGS

*Training College for Technical Teachers, Hamilton.*—This building, which is fully described in my report of last year, was completed and ready for occupancy in August. The following contracts have been awarded this year for steam heating, ventilation and plumbing to Adam Clark, Limited, of Hamilton; for electric

wiring to Culley Electric Company of Hamilton; for equipment of laboratories, sewing room, including tables, fume cabinets, cupboard, etc., to Patterson & Crosshwaite, Hamilton; for plumbing work in connection with the same to S. J. Walsh, Hamilton. The machinery for woodworking room was also purchased from P. H. Yates Company, Hamilton; Cowan & Co., Galt; Preston Woodworking Company, Preston; Canadian Machinery Corporation, Galt. A tunnel 150 feet in length and 6 feet in width has been constructed connecting this building with the Central Technical School, for the convenience of students of the school attending classes in both buildings. This work was done under contract by the W. H. Yates Construction Company of Hamilton. Walks, roads and parking space between the buildings has been laid, the work being done by the City of Hamilton for the School Board, the Government paying a proportion of the cost, the value being first ascertained and agreed upon.

Plans and specifications for Technical Schools have been submitted to this Department for approval including Technical School, Port Arthur, addition to Technical School, Hamilton, and for additions and alterations to Vocational School for technical work including Welland, Brantford, Chatham, and remodeling the St. Jean Baptiste School, Ottawa, and for Boys' Auxiliary School, 361 Jarvis Street, Toronto. All of these plans and specifications have been carefully examined and checked over and alterations made to suit the requirements and approved of by the Department.

The Normal and Model Schools, Toronto and Ottawa, the Normal Schools at Peterborough, London, Stratford, Hamilton and North Bay, and the English-French Schools at Sturgeon Falls, Sandwich and Embrun. These buildings have received the careful attention of the Department and repairs made as necessary, including painting exterior and corridors, class rooms, etc., in the interior, and repairs made to walks and grounds.

Outside of repairs the only work of importance done in these buildings was in connection with the change made to the roof of the Normal School, Peterborough, and repairs to brickwork, which had perished through the action of the rain and frost. This work was done under contract by Thos. Ephgrave of Peterborough. To prevent freezing, the cast-iron down pipes are now placed on the inside of the building, which necessitated considerable alterations and changing of some of the drains; resetting of the boilers in the Normal School, North Bay, this work being done under contract by Jeffrey & Stevens of North Bay; and changes to the heating plant in the Normal School, Stratford, including the installation of a high-pressure steam main, so that steam can be turned on the library, gallery and art room, independent of the rest of the school.

*Ontario School for Deaf, Belleville.*—Work done this year includes repairs to the Superintendent's residence to which nothing had been done to speak of for a long time. New lavatories were installed in same, one on the upper floor and the other in basement, the old ones had become antiquated and out of order and were unsanitary. Renewals of window and door frames had to be made, the old ones being decayed beyond repair. The interior of the building was redecorated where necessary.

The sewer from the girls' dormitory to the main building, 300 feet in length, had to be renewed. This drain had given considerable trouble for some years through being choked. On examination it was found that the drain had been built with poor quality of tile, which had perished in places and the drain was filled up in places with roots of trees. It was found necessary to take the whole up and renew it with joints being made with patent cement to prevent the

roots of trees getting into same. This work was done under contract by Mr. R. P. White of Belleville.

Considerable repairs were made to the stokers and boiler setting in connection with the steam boiler. As the cost of renewals in connection with these stokers, which are patented, has become so great and the consumption of coal is hard to justify, it is proposed to remove them and install underfeed stokers by which we are satisfied there will be a large saving in coal and operation.

Repairs to steam heating and plumbing have also been made in the main building and boys' and girls' dormitory buildings. Renewals have also been made in the lavatories of the hospital building to take the place of some of the apparatus which was worn out and unsanitary. New equipment was supplied to the kitchen in the main building as required, the apparatus being purchased by tender.

Repairs to the buildings generally in connection with this institution have been attended to.

*Ontario School for Blind, Brantford.*—Alterations have been made in remodelling the kitchen and dining room of this Institution, the unnecessary space occupied by the kitchen has been reduced by the erection of a large pantry and supply cupboard on the south side and a scullery on the north side. The old wood floor has been taken up and tile floor with tile dado, laid. A dish-washing room has been provided and a maids' dining room and servery pantry opening off the main dining room. The dining room, which was formerly two rooms has now been made into one commodious room. The large chimney and old elevator in the centre having been removed. The lighting of the different apartments has been improved by having enlarged the openings and using steel sash. A fireproof staircase has been erected on the north end leading from the basement to the upper floor. An electric dumb waiter has been installed leading from the kitchen to the dining room.

Changes have been made to the roof space on each side of the dining room, which has been partitioned off to provide four additional bedrooms and toilets for maids. To permit of this work being done, two steel tanks, formerly supplying domestic water, had to be removed. The wooden staircase on the south side has been carried to the upper floor.

Equipment for kitchen, dish-washing room, dining room, pantry, servery and scullery have been supplied as required, all the apparatus being purchased by tender.

The general contractor for these alterations was the Schultz Construction Co., heating and plumbing, R. H. Ballantyne, and electric wiring and fixtures, Lyons Electric Co., all of Brantford. The electric dumb waiter was installed by the Turnbull Elevator Co., of Toronto. The various buildings in connection with this school have also been given good attention by the Department.

## AGRICULTURAL BUILDINGS

*Ontario Agricultural College, Guelph.*—Alterations have been made to the first floor of the Massey Library building at the north end. The space formerly used as an office has been converted into two stack rooms, one on either side, which will prove a valuable addition to the Library, with iron staircases at each end leading to the floor above. The whole is of fireproof construction, and nearing completion, the work being done under contract by Geo. C. Walker of Guelph.

The residence to the west of the main building has been remodelled in the interior, hardwood floors being laid and new plumbing, electric wiring installed and considerable changes made in the heating plant. The building is nearing completion and will be used as a residence for the President.

Improvements have been made to the Gymnasium Building by removing the proscenium arch in the stage. This building was formerly used as an assembly hall and gymnasium and will now be used for the purpose of the latter only. The wood dado to a height of six feet all around has been removed and replaced by cement and wire screens placed on all the windows to protect the glass. The whole place has been suitably decorated. This work was done by the carpenter of the College under the supervision of this Department.

Some alterations and improvements were made to the sewage disposal plant and an acetylene tank, built of concrete, added thereto. This work was done under contract by Geo. C. Walker.

Repairs were made to the brickwork of Macdonald Hall, a large number of which had perished and had to be replaced with good bricks and a large proportion of the brick work pointed up, the mortar in same having deteriorated.

Repairs have also been attended to the roofs of the other building in connection with this College, all of which has been done under the supervision of a competent foreman from this Department.

*Agricultural School, Kemptville.*—Plans and specifications were prepared for an addition to the Students' Residence providing for additional accommodation for thirty-two students. The contract for general trades has been awarded to R. Beggs & Son of Hallville, for heating to McKinley & Northwood of Ottawa, and electric wiring done by men in the employ of the Department. The building is nearing completion and the furniture for same has been purchased.

Plans and specifications were prepared for a Dairy Barn, ninety feet by forty feet, the contract for same being awarded to Messrs. R. Begg & Son of Hallville.

An acetylene tank has been erected in connection with the sewage system to relieve the overflow of same.

Repairs to the buildings generally have received the attention of the Department.

The Eadie House, adjoining the Students' Residence, has been altered and remodelled and is now occupied by Professor Graham. This work was done under contract by the Chisholm Construction Co., of Cornwall; the heating by Messrs, McKinley & Northwood, Limited, of Ottawa.

*Horticultural Experimental Station, Vinlands.*—The work in connection with this station, including the erection of two staff cottages, has been given attention. The work was done by men employed by the Department, under the supervision of the Director, Mr. E. F. Palmer. A greenhouse, linking up with the present greenhouse has been erected, the work being done by Lord & Burnham Co., of Toronto, under contract, the heating of same being done, also under contract, by Purdy Mansell of Toronto.

Considerable repairs and alterations are being made to the Administration Building, including the fitting up of the attic space to make provision for reading room and apartments for the employees. This work was also done by men employed by the Director and under his supervision. All the materials were purchased by tender and the work inspected, as required, by the officials of this Department.

*Government Building, Canadian National Exhibition.*—About the same amount of work was done this year as previously in re-arranging the apartments to receive the different exhibits, including painting and decorating of same.

#### PUBLIC INSTITUTIONS

*Boys' Training School, Bowmanville.*—The new Dormitory Building (Triple Dormitory), which was fully described in my report of last year, has been erected and is now nearing completion. Tenders were called for early in the season and the contract for general trades awarded to Stuart & Sinclair of Hamilton, heating and plumbing work to McKinley & Northwood of Ottawa, electric wiring by Harris & Marson of Toronto. Grading and walks have been laid by men employed by the Department.

Plans and specifications were prepared for a boiler house and central heating plant. Steam mains have been laid connecting all the buildings in connection with this institution with the central plant. Tenders were received and the contract for general trades awarded to the Schultz Construction, Limited, of Brantford. Three H.R.T. boilers, which were in good condition, were taken from the boiler plant in connection with Macdonald Institute at the Ontario Agricultural College, Guelph, this plant not being in use and the building being heated from the main boiler house. Tenders were called for stokers and boiler setting, the former awarded to Allen General Supplies of Toronto, and the latter to E. Leonard & Sons of London. Tenders were also called for the steam mains and piping and the contract for same awarded to McKinley & Northwood, Limited, of Ottawa. The concrete work of trenches enclosing the steam mains and excavations were done by men employed by the Government under the supervision of the Clerk of Works. All work in connection with this plant has been completed and is working satisfactorily.

*Ontario Hospital, Brockville.*—The work in connection with the Laundry Building has been fully completed and machinery installed. An ash hoist has been erected in the main boiler house, and repairs generally to all the buildings been attended to.

*Ontario Hospital, Cobourg.*—A new cold storage system has been installed which necessitated the removal of the existing cold storage rooms and kitchen. The construction was done under contract by Martin Jex Company of Cobourg, and the ice plant and machinery was also under contract by the Canadian Ice Machine Company of Toronto. This work has been completed and the system is working satisfactorily.

*Ontario Hospital, Hamilton.*—Plans and specifications were prepared for an Infirmary Building, having a frontage for the patients' wing of 143 feet 4 inches x 39 feet 4 inches, and the medical wing of 76 feet x 35 feet 6 inches. The building is of fireproof construction throughout and will be of brick and stone on concrete foundations. It is intended to use this building for surgical work and provision is made for sixty-two beds for patients, divided into single, double, and four-bed wards. Rooms on each floor are provided for hydro-therapy and commodious sun rooms at each end of the corridor. In the centre portion on the first floor provision is made for doctors' office, waiting room, operating, recovery, pathological laboratory and museum, X-ray operating room, nurses' bedroom, and diet kitchen. The second floor provides for a main operating room, sterilizing room, doctors' room, anesthetic and recovery rooms, eye, ear, nose and throat operating room, doctors' living rooms, diet kitchen, and nurses' bedroom.

A passenger elevator will be installed serving all floors, including the basement. Storage rooms, store, pump, and heater room are provided for in the basement, only a small portion of which is excavated. The brick and tile used in connection with the construction of this building will be provided from the Ontario Government Clay Plant at Mimico. The building will be heated by steam from the main boiler house of the institution. The contract for general trades was awarded to Stuart Brothers of Hamilton on September 4th, contract for heating and plumbing to Adam Clark of Hamilton and the electric wiring to Robinson & Robinson of Hamilton.

The only other work done by this Department in connection with the institution was the installation of a 500-gallon pump operated by a 100-h.p. motor in the main pumping station in connection with the water service, which is now working satisfactorily.

*Ontario Hospital, Kingston.*—The work in connection with the Laundry Building has been completed and the machinery installed. Repairs and remodeling of buildings in connection with the Mowat Wing has been continued throughout the year, this work being done by the Provincial Secretary's Department.

*Ontario Hospital, London.*—Changes have been made in the cold storage plant in connection with this institution. The rooms have been rearranged and an entirely new plant installed. The construction work was done under contract by S. Foxworthy of London, the ice machinery and equipment was installed by the Canadian Ice Machine Company of Toronto. New laundry machinery has been supplied to the main laundry as required and provided for.

*Ontario Hospital, Orillia.*—New laundry machinery as required has been supplied and installed in the laundry building. Kitchen equipment has been supplied for the institution. A filtrator has been installed in connection with the boilers by which it is estimated the cost of purchasing boiler compound will be eliminated.

*Ontario Hospital, Toronto.*—A new siding has been laid from the C.N.R. tracks and a trestle erected 100 feet in length x 16 feet in width, built of steel and reinforced concrete, in accordance with plans prepared by the Engineer's Branch of the Public Works Department. The materials were purchased by tender and the work done by men employed by the Department under a competent foreman.

New laundry machinery has been supplied as required.

A fence 12 feet in height has been erected on the south and west sides of the property, taking the place of the fence which was dilapidated and beyond repair.

*Ontario Hospital, Whitby.*—An extractor was supplied and installed to the laundry and some minor repairs made to the Laundry Building.

#### DISTRICT BUILDINGS

District buildings including Court House and Gaol, Sault Ste. Marie, Algoma District; Court House, Gaol and Registry Office and Judges' Chambers, North Bay, Nipissing District; Court House, Gaol and Registry Office, Parry Sound; Court House, Registry Office and Gaol, Fort Frances, Rainy River District; Court House, Gaol and Registry Office, Sudbury District; Court House, Gaol and Registry Office, Haileybury; Gaol at Hearst; Government Offices, New

Liskeard; and Mining Recorder's Office, Swastika, Temiskaming District; Court House, Gaol and Registry Office, Port Arthur, and Registry Office, Fort William, District of Thundre Bay, together with equipment, have received the attention of the Department and inspections made by the officials of the Department, and repairs, painting and renewals made as required. Furniture for offices and steel filing cases for vaults have been supplied as found to be necessary.

The only work of major importance to buildings in the districts is the alterations being made to the roof of the Court House in Kenora, a contract has been awarded to Lindstrom & Nilson of Kenora to remove all the slates from the main roof and cover same with asbestos slates. The roof was originally covered with slates from the U.S.A. (Canadian slates not being available at the time the building was erected), which have proved to be soft and will not stand the severe frost in this district. The contract for this includes all galvanized iron and the removal of the lantern in the centre of the roof. The work has been commenced, and unless something unforeseen occurs should be completed before the severe cold weather sets in.

Plans and specifications for all steam heating and ventilating plants erected in the buildings this year have been prepared by Mr. John Sharp, Engineer of this Department, and the work carried out under his supervision. The inspection and installation of boilers and machinery in connection with the buildings is also made by him along with his other numerous duties.

F. R. HEAKES,

*Architect.*

Department of Public Works, Ontario,  
Toronto, October 31st, 1928.

STATEMENTS  
OF THE  
Accountant of Public Works  
1928

---

---

Toronto, January 28th, 1929.

HONOURABLE GEO. S. HENRY,  
*Minister of Public Works and Highways.*

SIR,—

I have the honour to submit detailed statements of Ordinary Expenditure of Civil Government and Maintenance and Repairs, Government Buildings and Public Works; also Capital Expenditure on Provincial Public Buildings and Public Works, during the fiscal year which ended on the 31st of October, 1928.

I have the honour to be, Sir,

Your obedient servant,

C. KENTLETON,  
*Accountant, Public Works.*

STATEMENT OF EXPENDITURE, CIVIL GOVERNMENT, MAINTENANCE AND  
REPAIRS GOVERNMENT BUILDINGS FOR YEAR ENDING OCT. 31ST, 1928.

C. KENTLETON,

*Accountant.*

Twenty-Second Annual Report

OF THE

**GAME AND FISHERIES  
DEPARTMENT**

1928

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO

SESSIONAL PAPER No. 9, 1929

ONTARIO

TORONTO

Printed and Published by the Printer to the King's Most Excellent Majesty

1929

TO HIS HONOUR W. D. ROSS, ESQ.,  
*Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith, for the information of Your Honour and the Legislative Assembly, the Twenty-second Annual Report of the Game and Fisheries Department of this Province.

I have the honour to be,

Your Honour's most obedient servant,

C. MCCREA  
*Minister of Mines.*

Toronto, 1929.

# TWENTY-SECOND ANNUAL REPORT

OF THE

## Game and Fisheries Department of Ontario

TO THE HONOURABLE CHARLES MCCREA,  
*Minister of Mines.*

SIR:—I have the honour to place before you the Twenty-second Annual Report of the Game and Fisheries Department for the fiscal year ending October 31st, 1928.

### FINANCIAL

The subjoined table will show in detail the various sources from which the Department derived its revenue during the year.

#### ORDINARY

##### GAME—

Royalty.....	\$122,704	50	
Experimental Fur Farm.....		45	75
Licenses—			
Trapping.....	\$49,670	00	
Non-resident hunting.....	61,760	00	
Deer.....	63,737	37	
Moose.....	7,540	50	
Gun.....	14,155	55	
Fur Dealers.....	49,859	00	
Fur Farmers.....	5,997	00	
Tanners.....	240	00	
Cold Storage.....	180	00	
			<u>253,139 42</u>
			\$375,889 67

##### FISHERIES—

Royalty.....	\$16,024	67	
Licenses—			
Fishing.....	\$110,265	00	
Angling.....	185,445	50	
			<u>295,710 50</u>
Sales—Spawn taking.....		2,678	41
			<u>\$314,413 58</u>

##### GENERAL—

Guides.....	\$5,374	00	
Fines.....	17,055	55	
Costs.....	1,877	80	
Sales—Confiscated Articles.....	9,926	38	
Rent.....	4,160	00	
Commission.....	2,428	35	
Miscellaneous.....	1,683.	42	
			<u>42,505 50</u>

\$732,808 75

#### CAPITAL

Experimental Fur Farm.....		451	00
----------------------------	--	-----	----

\$733,259 75

Following is a comparative table in which is outlined total annual revenue and expenditure of the Department during the past five years, 1924 to 1928, and the surplus in each year:

	Revenue	Expenditure	Surplus
1924.....	\$667,227 96	\$336,826 96	\$330,401 00
1925.....	709,455 73	354,736 09	354,719 64
1926.....	682,063 32	399,744 24	282,319 08
1927.....	721,576 25	492,472 88	229,103 37
1928.....	733,259 75	518,054 96	215,204 79

As in the two years previous, the Department, during 1928, continued to increase its work along enforcement and conservation lines, with the result that expenditures were greater. While the revenue collected continued to show an increase during the year, such increase was not sufficient to take care of the additional expenditure, with the result that the surplus during the period reported upon shows a slight decline.

### STATISTICS

Accompanying this report will be found statistical tables showing in detail varieties and quantities of fry and fingerlings of the various species of fish raised in the Provincial hatcheries; and the designation and location of the waters in which such fry and fingerlings were deposited. Likewise there will be found statistics pertaining to fishing and the fur trade, as well as other branches of the Department's work. The figures referred to have been carefully prepared, and afford interesting and valuable information.

### FISH

Statistics with reference to commercial fishing in the Province are as follows:

	1926	1927	1928
Gill nets licensed (yards).....	7,001,130	7,172,456	7,269,528
Seines licensed.....	131	144	160
Pound nets licensed.....	1,306	1,224	1,225
Hoop nets licensed.....	1,134	959	880
Dip and roll nets licensed.....	44	47	58
Spears licensed.....	140	123	88
Hooks licensed.....	124,023	100,632	52,467
Number of men employed.....	4,145	4,156	4,128
Number of tugs.....	119	118	114
Number of gasoline boats.....	1,003	1,006	959
Number of sail or row boats.....	1,022	1,040	1,018
Value of boats, ice-houses, wharves and twine.....	\$3,337,737.00	\$3,257,190.00	\$3,432,528.00
Aggregate catch in pounds.....	32,261,019	34,896,975	33,381,704
Values to fishermen.....	\$2,643,686.28	\$3,229,143.57	\$3,033,924.42

Reference to the statement of revenue, which appears elsewhere in this report, shows that the sum of \$314,413.58 was derived as a result of fishery activities in the Province, which may roughly be classified as \$185,445 from angling, non-resident license fees and the balance of \$128,968.08 from commercial fishermen in payment of license fees and royalty, angling for the second consecutive year being responsible for the greater proportion of this income.

Ontario is rapidly becoming popular on account of the splendid opportunities it affords for satisfactory angling. Undoubtedly the increasing numbers of anglers who derive their sport in this Province are taking their toll of our resources, but this Department is not neglecting the restocking and conservation problems, which are receiving continually increasing attention both from the practical and biological viewpoints.

HATCHERIES

At the Department's hatcheries located at Mount Pleasant, Glenora, Sault Ste. Marie, Normandale, Port Carling, Port Arthur, Fort Frances, Collingwood, Wiarton, Kenora, Sarnia, Southampton, Kingsville and Belleville, the work of fish culture is carried on, with various species of fish. The following table shows the results obtained at these hatcheries during the past three years.

	1926	1927	1928
Maskinonge Fry and Fingerlings.....		68,000	53,000
Whitefish Fry.....	260,575,000	448,789,750	346,172,000
Pickerel Fry.....	13,820,000	223,945,000	155,921,750
Salmon Trout Fry and Fingerlings.....	8,501,000	21,465,375	22,806,090
Herring Fry.....	11,225,000	18,410,000	17,830,000
Rainbow Trout Fry and Fingerlings.....	1,800		419
Speckled Trout Fry and Fingerlings.....	1,085,300	1,444,050	1,669,600
Black Bass Fingerlings.....	12,500	5,425	60,833
Parent Black Bass.....	1,569		90
Parent Speckled Trout.....	300	606	200
	<u>295,222,469</u>	<u>714,128,206</u>	<u>544,513,982</u>

The distribution of the 1928 production is detailed on other pages of this report. In all, six hundred and fifty-eight shipments were required to complete this distribution, as follows:—

NUMBER OF SHIPMENTS

Speckled Trout Fingerlings.....	166
Speckled Trout Fry.....	111
Speckled Trout, Parent.....	2
	<u>279</u>
Lake Trout.....	134
Pickerel.....	125
Whitefish.....	50
Herring.....	13
Bass Fingerlings.....	42
Bass Fry.....	8
Bass, Parent.....	3
	<u>53</u>
Maskinonge.....	2
Rainbow Trout Fingerlings.....	2
	<u>658 shipments.</u>

BIOLOGICAL STUDIES

Biological surveys of lakes and streams and specific problems of importance to fisheries were continued under the supervision of the Department's Biologist, Mr. H. H. MacKay. In this work he was assisted by Messrs. R. A. McKenzie and K. Hamilton, graduates in biology of the University of Toronto, and by Messrs. W. L. Dibbon (2), J. Savage (1), A. E. Allin (3), R. F. Cain (2), R. J. Perkin (1), undergraduates in biological courses at the University of Toronto; and by Messrs. G. W. McCracken (4), G. C. Toner (4), R. W. Peavoy (4), undergraduates of Queen's University, Kingston, in biology, or in a course combined with biology. The number after each name signifies the student's year at university.

There is a very great scarcity of qualified men available for field work. Nevertheless, with the ever-increasing interest, increasing demand and possibilities for such work, future prospects for trained men for fisheries' investigations are hopeful. In future it is desirable that sufficient graduates may be available and that the Department may also secure for summer's work the services of active university teachers, especially qualified in fisheries' investigations.

In studying the various lakes and streams standardized methods of procedure have been employed. Lake and stream cards illustrated on pages six, seven, eight and nine, indicate in condensed form the data obtained. These methods have been compared with ones in vogue in certain states of the United States. The methods are so designed that the various waters may be compared physically, chemically and biologically. In this way a fund of information is obtained that is invaluable and forms a comprehensive basis for restocking. The information must be obtained as quickly as possible and at the same time be consistent with accuracy.

As pointed out in previous annual reports, the purpose of biological surveys is to gain a knowledge of the fish best suited to the environment; the number of fish which should be planted according to the conditions of food and shelter; the most satisfactory places to plant the fish; the most satisfactory period to plant fish of different sizes and ages. The latter depends on the food habits of the fish. The available food supply is fundamentally important and must be studied as carefully and as extensively as possible.

Biological surveys were carried out on seven hundred and seven (707) lakes and streams in 1928, which is four hundred and seventy-four (474) more than in 1927. This brings the total of individual studies to one thousand and nineteen (1,019). The number of waters studied in the various counties and districts of the Province so far is as follows:—

TABLE I.—BIOLOGICAL SURVEYS OF WATERS

				Total.....	1,019

The biological surveys tabulated above include studies of all the lakes and streams in the township of Oakley in Muskoka, and in the township of Matchedash in Simcoe county.

The planting of fish is one which demands painstaking thoroughness. For the waters so far studied the most suitable planting places have been defined as far as possible. However, it is obvious that it is a very difficult matter to define in words the most suitable locations for planting. Considerable education along these lines is necessary, unless the planting of the fish is taken over by the hatchery officials and the Biologist of the Department and his assistants, entirely. Plans are being made to hold meetings in the various districts of the Province, in order to explain the purpose and importance of biological surveys of lakes and streams, the principles underlying a practical stocking policy, and the methods which should be employed in planting fry, fingerling and adult fish.

Applications for fish for the year 1927-28 numbered 1,142. These were disposed of as follows:—

TABLE II.—DISPOSITION OF APPLICATIONS FOR FISH, 1927-28

\*Applications not granted, since pike are not propagated by the Department.

In addition to the general lake and stream surveys, the following special problems were undertaken:—

Messrs. H. H. MacKay and R. A. McKenzie commenced a study of the effect of hoop-netting on game fish in the waters of the Rideau System and Lake Ontario. Considerable information of a statistical nature has been compiled, and for the ensuing year the fishermen will be provided with blank forms, as shown on page ten, in order that we may follow the trend of the fisheries and make regulations accordingly. District wardens and overseers will check up the recording of this valuable information. Doubtless, there will be some objections to this taken by the fishermen, but with the assistance of the overseers the difficulties, if any, should be overcome. Studies in connection with hoop-netting may be extended to include,—firstly, the interdependence of coarse fish in these waters with the game fish, and secondly, a study of the spawning periods, and thirdly, the most satisfactory mesh of netting to use which will protect the fish requiring protection.

NOTE.—Each bag should be numbered and this number retained for the entire season. S.M.B.B.=Small-mouthed Black Bass. L.M.B.B.=Large-mouthed Black Bass. Speckled or Calico Bass.

Mr. G. C. Toner undertook studies in connection with,—

1. The pickerel versus the sucker during the spawning season of the former.
2. Bass and bass fishing in the Georgian Bay.

Mr. R. F. Cain carried on observations on Long Point Bay, Lake Erie, prior to, during and after the spawning season of the small-mouthed black bass. Mr. R. J. Perkin carried out similar studies in the waters adjacent to Pelee Island, Lake Erie.

Mr. R. W. Peavoy, commenced a study on the early life-history of the maskinonge in Pigeon Lake and Sturgeon Lake (Kawartha Lakes' District) and later in the season followed up the spawning habits of the black bass. Mr. Peavoy kept daily records of water levels, at chosen stations on both lakes, and endeavoured to determine the effect of falling water levels on deposited ova and young fry.

During the summer a survey was made of the eastern end of Lake Erie to determine, if possible, the reason for the decline of its fisheries. The survey was under the joint auspices of the Federal Government of the United States, the State of New York, the Ontario Government Department of Game and Fisheries, the city of Buffalo, and the Buffalo Society of Natural Sciences. The work of these various bodies was co-ordinated by Dr. Charles J. Fish, Director of the Buffalo Society of Natural Sciences, and the laboratories of the new Buffalo Museum of Science were opened for their use. In connection with this survey, Mr. A. E. Allin studied the intermediate stages of fish taken by the various gear employed. Messrs. H. H. MacKay and A. E. Allin studied the distribution of fish and the food of the fishes in the shallow waters of Long Point Bay, Lake Erie. Messrs. R. A. McKenzie, G. W. McCracken and R. W. Peavoy studied from the critical and experimental standpoints the spawning operations carried out on whitefish and herring in Lake Erie. A number of whitefish were tagged off Nanticoke in order to study their movements and their rate of growth. Lake Erie fishermen have been advised to return tagged fish, if still alive and uninjured, to the water and, if dead, to remove a few scales from the fish, record its length, girth, weight and sex and return this information along with the tag to the Department.

In regard to the results of the investigations, the following concise references appear to sum up the situation in reference to the reason for the decline of the fisheries in Lake Erie:—

"The question is not yet conclusively answered, but concerning all of the eastern end of the lake, except its waters near the shores, it has been established that none of the causes usually ascribed for the failure of the fisheries exists; the waters are pure and uncontaminated, bottom conditions are favourable, and there is an abundance of food for more fish than ever were known to be in the lake."

and,—

"Concerning the general results of the survey, we can safely say that Lake Erie is capable of supporting as many open lake fish as ever. The depletion appears to have resulted from over-fishing and unwise fishing, and as such the remedy must lie in the hands of those legislative bodies having jurisdiction over the lakes."

A general survey of the Thames Watershed was made by Messrs. H. H. MacKay, R. A. McKenzie and R. F. Cain. Mr. Cain is making a special study of the ecology of the higher aquatic plants in streams and their economic importance to fish.

Mr. G. W. McCracken made preliminary studies of the carp in Lake Simcoe with special reference to their spawning habits and their relationship to black bass.

The effect of three-inch mesh gill net on lake trout in Lake Huron and Georgian Bay was made the subject of preliminary study by Mr. G. W. McCracken.

Messrs. H. H. MacKay and R. A. McKenzie studied the effects of trade wastes on fish life in Puce's Creek (Essex County), Sydenham River (Lambton County), Thames River, Sturgeon River (Nipissing), and the Winnipeg River.

Specific complaints in regard to obstruction to fish migration in the Humber River at Lambton Mills and the Nonquon River, near Port Perry, were investigated. The latter investigation is not completed.

Mr. H. H. MacKay studied a parasitic infection of speckled trout from MacKay's Lake, Algoma, and mortality among goldfish at the Goldfish Supply Company, Toronto. The exact identity of flat-worms parasitic on pickerel sent to the Department from Clearwater Lake, Kenora, and fluke-worms parasitic on speckled trout sent to the Department from Norwood, Ontario, were determined by Mr. George W. Hunter, of the Rensselaer Polytechnic Institute, Troy, New York. In collaboration with Dr. Read, Professor of Bacteriology, Queen's University, Kingston, Messrs. R. A. McKenzie and G. W. McCracken, studied an epidemic disease among suckers in Long Lake, Portland Township, Frontenac County.

Mr. A. W. McLeod, Director of Hatcheries, and Mr. H. H. MacKay, Biologist, and his field assistants, investigated twelve sites suggested for the propagation of bass, or for bass and maskinonge, and seven sites for the propagation of speckled trout.

Noteworthy progress has been made in the culture of speckled trout. In Table III, following, the number, age and size of speckled trout distributed are given. There is considerable variation in the size of fish taken from different hatcheries. Available rearing ponds at Normandale and Mount Pleasant place the fish of these hatcheries at a decided advantage, over those retained in hatchery troughs and fed exclusively on artificial food until they are distributed. Stream and pond conditions at Mount Pleasant and Normandale are as natural as might be expected, and the fish reared under these conditions have considerable natural food at their disposal. Small-mouthed black bass distribution is outlined in Table IV. In Mount Pleasant hatchery ponds during the past year production of fry amounted to approximately 100,000, or a production of 6,250 per fertile nest. Half the fry were distributed as fry, and of those retained, a distribution of 10,833 fingerlings of the sizes and ages shown in Table IV resulted.

### CROWN GAME PRESERVES

At the present time there are some forty Crown Game Preserves, established in accordance with the Department's policy of creating sanctuaries where advisable and desirable for the protection of wild life. The Chapleau Preserve, District of Sudbury, 1,824,000 acres; and the Superior Preserve, District of Thunder Bay, 575,000 acres; represent a substantial percentage of the 2,642,347 acres included in these Preserves. During 1928 the following Preserves were established:—

Preserve	County	Area (acres)
Glen Elm Game Preserve.....	Halton.....	325
Hughes Game Preserve.....	Bruce.....	400

### GAME

This Province continues to enjoy popularity among resident and non-resident hunters. Licenses for the taking of big game continue in demand as is evidenced by the table appended herewith, showing comparative figures for the past five years:—

	1924	1925	1926	1927	1928
Resident Moose.....	1,385	1,291	1,359	1,379	1,371
Resident Deer.....	19,517	17,034	23,392	21,111	21,867
Non-resident Hunting.....	1,651	1,581	1,698	2,237	1,721

It is reported that the majority of these licensees were successful in securing their animals.

*Ruffed Grouse (Partridge).*—This species continues to be found only in very limited numbers, and a continuance of the close season on these birds which has been in effect during recent years is most desirable, in order that they have an opportunity to re-establish themselves.

*Sharp-tailed Grouse (Prairie Hen).*—More or less native to the northwestern portion of the Province, though their numbers would appear to be extending easterly.

*Quail.*—Confined to the counties in the southwestern section of the Province, where they appear to be becoming well established.

*Ducks.*—Continue to make their appearance in sufficient numbers to make the hunting of them a source of considerable satisfaction to a large number of hunters.

*Pheasants (English Ring-necked).*—Continue to increase in various sections of southern Ontario, particularly in the Niagara district, which seems adapted to the raising of these birds. Since 1922 the Department has carried on the propagation of this species at its Bird Farm, at Eugenia. From this farm last year, 1,209 live birds were liberated in Southern Ontario, and some 16,995 eggs were also distributed. The demand for settings of these eggs is in excess of the supply.

FURS

The number of pelts on which royalty was paid during 1928 was somewhat in excess of that of the previous year, although it is again found necessary to report that general conditions respecting fur-bearing animals do not show much noticeable improvement.

*Bear.*—Catch remains practically stationary, an indication that this species continues to hold its own.

*Beaver.*—Catch during 1928 shows some increase. It appears advisable to continue present restrictions as to the taking of these animals.

*Fisher.*—Would appear to be somewhat more numerous in view of reports and increased catch, though still scarce.

*Fox.*—There would appear to be slight decline in the different varieties of this animal. Catch for the year remained practically stationary.

*Lynx.*—Conditions remain unchanged. This species is rather scarce.

*Marten.*—Conditions similar to those which describe lynx would appear to prevail regarding these animals.

*Mink.*—Continued decrease in catch. Would appear to be getting scarcer.

*Muskrat.*—The increased catch in 1928 is not a correct indication of conditions governing this species. Their numbers appear to be decreasing.

*Otter.*—Catch increased considerably during 1928, but this species continues scarce.

*Raccoon.*—Generally speaking, these animals would appear to be gradually losing ground.

*Skunk.*—During 1928 the catch shows a considerable increase. This is one of the few species which are holding up.

*Weasel.*—Increased catch of 1928 and reports generally indicate a slight improvement in conditions here.

The following table compares for the past six years, pelts of fur-bearing animals, other than those which were ranch-raised, on which royalty was paid:—

	1923	1924	1925	1926	1927	1928
Bear.....	1,447	1,399	2,014	1,635	1,472	1,575
Beaver.....	70,684	50,233	48,364	27,597	20,738	22,040
Fisher.....	2,339	1,910	1,936	2,618	3,904	5,400
Fox (Cross).....	1,154	1,082	2,801	4,175	3,502	4,116
Fox (Red).....	12,329	14,695	22,198	30,535	26,112	25,943
Fox (Silver or Black).....	205	167	433	620	403	646
Fox (White).....	1,501	362	974	226	977	590
Fox (not specified).....	34	28	61	165	136	160
Lynx.....	1,177	2,332	2,200	3,884	4,568	3,845
Marten.....	4,704	3,661	3,125	3,177	3,261	3,492
Mink.....	58,634	82,466	68,138	65,299	37,628	32,009
Muskrat.....	478,820	533,256	534,739	387,022	469,947	514,161
Otter.....	3,997	5,096	4,622	4,304	3,168	4,510
Raccoon.....	15,752	21,976	22,157	21,002	15,958	13,513
Skunk.....	54,770	58,130	67,100	75,503	59,488	79,442
Weasel.....	61,603	51,163	34,365	63,599	72,645	79,425
Wolverine.....	20	12	8	11	15	19
Total.....	769,070	827,948	814,935	691,372	723,922	790,886

The value of the above pelts to the trapper was \$3,927,506.28, and this Province continues to set the pace as the leading producer of fur among the provinces of the Dominion.

In addition to the above the total of ranch-raised foxes, on which no royalty is payable, which passed through the fur farms of the Province was 3,433 of which 2,566 were exported and the balance of 867 dressed in Ontario. These had a value of \$379,751.18.

### FUR FARMING

This branch of industry continues to show expansion due to increasing interest on the part of the general public, and in view of conditions as they at present affect the wild fur-bearing animals in the Province, there would appear to be future possibilities in this branch.

Fur Farmers' Licenses issued by the Department during the past five years are as follows:—

1924	1925	1926	1927	1928
392	624	783	986	1,148

and while efforts in this line were originally confined practically to the fox, the appended table shows the extended scope it is assuming, and the increasing number of species with which the 1,148 fur farmers of the Province are experimenting.

†Includes only pen-raised muskrats.

## EXPERIMENTAL FUR FARMING

The first general report in connection with this branch of the Department's activities is set forth herewith, for general information:—

"It can be said without fear of contradiction that the Experimental Fur Farm is the most comprehensive plant in existence conducted for the scientific study of fur farming. The farm has an area of one hundred acres, which is roughly divided into three portions, arable land, marsh and bush.

"The whole acreage is enclosed by a fence with an overhang which serves the double purpose of preventing any animal inside the fence from escaping and also prevents undesirable animals from gaining access to the breeding grounds of the muskrats and beaver.

"Modern dwellings have been erected for the help with every convenience installed. Buildings have been provided to facilitate the care and feeding of the animals, including a cook-house, meat-house, work shop and barn. For the study of diseases a laboratory has been established, with up-to-date equipment, for research work.

"The creek which flows through the farm has been bridged and every portion of the enclosed area is accessible. One of the most desirable features of the farm is the marsh, which can be said to be almost ideal for the propagation of muskrat in the natural state and contains a heavy growth of aquatic plants of many varieties.

"On the farm will be found a very unique collection of animals, including silver, black, white, red, and cross fox, fisher, lynx, mink, marten, skunk, raccoon, beaver, muskrat, moose and deer; also wild ducks, swans and Canada geese. Two wolves are also kept for exhibition purposes.

"One of the first problems facing the breeder of fur-bearing animals is that of suitable housing, and considerable experimental work has been done along this line and is still in progress. All species of fur-bearing animals require warm dry nests, dampness or draughts are invariably fatal over a period of time.

"It has been found with beaver that they require a pen so constructed that they have access to the water at all times. Beaver kept on dry land quickly show the effect, the fur becomes dry and harsh and a condition of a purulent nature affects the eyes. The most satisfactory pen for beaver consists of a dark house, from which leads a tunnel into the water. The house must be high and dry, as well as damp and draught proof.

"Fox pens of different styles have been built in order to determine the most suitable arrangement, taking into consideration, mainly, the need for shade and the best material for flooring.

"It was found that the foxes raised in pens providing partial shade had a better texture to the fur than those raised in open pens without shade. Due to the ever-increasing mortality among foxes from parasitic infection, three different types of floors have been installed, viz.: wood, cement, and gravel, in order to ascertain which of these three materials is the most efficient in preventing the hatching out of the eggs laid by the adult parasites, and which in turn infect the fox.

"The Experimental Fur Farm is finding that the wood and cement floors are much more effective than the gravel ones.

"Mink and muskrat houses featuring a central alley with the nest boxes and feed pans under cover, and the wire runs extending from both sides of the alley have been built, and are a big improvement over open pens entirely exposed

to the weather. It is possible with this type of house to observe the animals without disturbing the entire nest, which is not the case where the den is placed in an open pen and covered with straw.

"With the many different varieties of animals on hand, the study of the most suitable and economical rations occupies a very important place in the experimental work carried on at the farm, and will continue to do so for many years to come.

"The fur farmer is faced with many new problems in this respect not encountered by the breeders of domestic animals, who have years of experience and experimental data to draw from. At all times the effect of various feeds on the colour and texture of the prime pelt has to be carefully considered. At the Experimental Fur Farm very definite data has been obtained with the colour phase of silver fox. While cereals such as corn meal, rolled oats and whole wheat flour may be fed the year round, if such food is continued through the summer months the colour of the pelt is decidedly affected. Any feed containing large quantities of fat, including whole milk, tends to produce a rusty pelt in late fall. It is also becoming evident that fur farmers as a rule are feeding too much meat, heavy meat feeding having a tendency to produce off-colour pelts.

"The question of how far fish can be substituted for meat with fur-bearing animals will be thoroughly investigated this year and it is hoped that reliable data will be secured on this point.

"It is found that animals will thrive on feed that cannot in any way be said to be their natural feed. Beaver, for example, will do well on a diet of roots and grain, and are very fond of bread. The fur farmer cannot, when operating on a commercial basis, feed the natural feed of the animal, and extensive experiments are required to find out how far it is possible to go from the natural without depreciating the pelt value and affecting production of young.

"Many problems in regard to breeding have arisen in the fur farming industry, particularly to in-breeding and line breeding. It is claimed by some that the mating of closely related animals is detrimental to the offspring; while others, again, claim that it is the only possible method by which a uniform strain of animal, showing desirable characteristics, can be bred.

"Results at the Fur Farm tend to show that where judgment is used, in-breeding is a desirable method of producing high-class stock, but the greatest care must be taken that only the best animals be used for such purposes, as the bad as well as the good points of the parents are intensified. It will take considerable time to find out how far it is possible to in-breed a certain family, and still produce healthy, virile stock. Such experiments are now in progress at the Fur Farm.

"There is a steadily-growing demand for advice and help to combat the various diseases that are being found among fur-bearing animals. It is only to be expected as the number of animals kept in captivity increases and fur farms become more congested that new diseases will arise that at present are unknown or go unrecognized by the owner.

"In the past it has been the short-sighted policy of many fur farmers to keep a secret any deaths among their stock; particularly has this been the case where the sale of breeding stock has been bringing high prices. To date, the greatest detriment to the health of fur-bearing animals comes mainly from two sources—parasitic and dietetic. These animals are particularly susceptible to parasites, due to their being kept in small enclosures, with the result that the ground becomes completely saturated with the infection, and medicinal remedies

have only a temporary effect as the animal in a short time becomes re-infected. This continual sapping of their vitality by parasites is very apparent on many ranches, both in production and pelt depreciation.

Parasitic infection has become the most serious hazard the fox rancher has to face to-day and it is a question whether many of them are going to be able to overcome the conditions already established in their ranches and still remain in the business.

"Researches at the Experimental Fur Farm are being carried on, especially on the lungworm. It is interesting to note that foxes sent to Western Canada quickly recover from this worm and the disease is unknown in the Prairie Provinces. Due to its location in the lungs and windpipe, this worm is impossible to kill by direct medication, and is being attacked from other angles, by sanitary flooring of pens by which it is hoped the hatching of eggs will be prevented.

"The hook and round worm are found to be present in 95 per cent. of foxes sent for examination and also cause a large annual loss to the fur farmer. It is found that most fur bearers harbour parasites, including muskrats, mink, marten, lynx, raccoon, fisher, and rabbits, and specimens from each have been identified.

"Where wild animals are taken direct from the wilds and placed in captivity and have to eat whatever is given to them, it is to be expected that some dietetic troubles will arise. The fur farmer may leave out something that is essential for their welfare though it may be needed in only very small quantities. Especially is this true of young animals born in captivity. Rickets, scurvy and an acid condition of the blood are all met with. Considerable investigation as to feeds counteracting these conditions are being carried out. It has been found with mink that a straight cereal and meat diet produces a condition which resembles acidosis. This can be quickly relieved by feeding small quantities of lettuce and canned tomatoes, which seem to reduce the blood to normal.

"Enquiries on every subject connected with fur farming are received, and whenever possible suitable information is supplied. Many post-mortem examinations have been carried out and the findings reported to the owners. Throughout the summer months, numerous live animals are brought to the farm for treatment. There appears to be an ever-increasing demand for such services on the part of the public.

"Fur farming is attracting a wide-spread interest. The correspondence received comes from every Province in the Dominion and especially the Prairie Provinces."

### WOLF BOUNTIES

During 1928 the Department received applications for the payment of bounty on 5,988 wolves, an increase of nine per cent. over the number of applications received in the previous year. The Kenora, Rainy River and Thunder Bay Districts supplied 4,862 of these applications, or over 80 per cent. of the total.

In addition to the above, bounties were paid on approximately two hundred wolf pelts received in the Department during the fiscal year ending October 31st, 1927, but too late for payment in that period.

#### COMPARATIVE STATEMENT OF WOLF SKINS RECEIVED AND BOUNTIES PAID

	Timber	Brush	Pups	Total	Bounties
For fiscal year ending October 31st, 1925...	831	1,066	21	1,918	\$25,465 62
For fiscal year ending October 31st, 1926...	1,022	2,690	107	3,819	51,994 42
For fiscal year ending October 31st, 1927...	1,041	4,414	59	5,514	82,970 07
For fiscal year ending October 31st, 1928...	1,231	4,878	64	6,173	91,297 27

## ENFORCEMENT OF THE ACT

The enforcement of the provisions and regulations of the Ontario Game and Fisheries Act was performed in a satisfactory manner by the field officers charged with this work; and the service rendered by the District Wardens and the various overseers under their respective jurisdictions was capably augmented during the Spring and Fall spawning, and deer-hunting seasons by additional seasonal overseers appointed during these periods for the better protection of fish and game and enforcement of the Act.

In nine hundred and sixteen cases in which parties were charged with fish and game violations, convictions were secured. Fines and costs assessed in these cases amounted to \$18,933.35.

In eight hundred and ninety-three of these cases seizures of goods and equipment were made, which summarized may be set forth as follows:—

Pelts.....	2,512	Fire-arms.....	290
Deer and Moose hides.....	15	Gasoline boats.....	10
Live animals.....	26	Row boats.....	10
Fish.....	5,650 lbs.	Canoes.....	22
Gill nets.....	123 pieces	Punts.....	12
	2,075 yds.	Motor cars.....	3
Dip nets.....	20	Jack lights and lanterns.....	9
Hoop nets.....	14	Deer and Moose.....	10
Seine nets.....	16	Venison.....	450 lbs.
Bull nets.....	9	Moose meat.....	435 lbs.
Trap nets.....	3	Partridge.....	10
Hooks.....	3,799	Geese and ducks.....	23
Grapples.....	1	Pheasants.....	10
Gaffs.....	2	Quail.....	32
Spears.....	37	Decoys.....	45
Rods and lines.....	122	Miscellaneous.....	45
Traps.....	1,200		

In accordance with the usual practice, confiscated articles were disposed of by tender at sales which were advertised in the press, except in cases where articles were sold to the former owner where circumstances warranted. The amount received from these sales is shown in the statement of revenue which appears at the beginning of this report.

## ACKNOWLEDGMENTS

In conclusion, I desire to publicly express my appreciation of the assistance and support which has been rendered to the Department throughout the year.

The members of the staff, both of the inside and outside services, have faithfully and zealously carried out any and all duties which have been allotted to them, and the spirit of loyal co-operation in the performance of the work has at all times been evident.

Our work has been made more pleasant and attractive by reason of the assistance rendered by the transportation companies and Fish and Game Protective Associations, the officers of which organizations having at all times co-operated with the Department in an earnest endeavour to secure a proper observation of the provisions of the Ontario Game and Fisheries Act.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. McDONALD,  
*Deputy Minister of Game and Fisheries.*

The Ninth Annual Report

OF THE

Department of Labour

Province of Ontario

1928

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO:  
Printed and Published by the Printer to the King's Most Excellent Majesty  
1929

TO HIS HONOUR WILLIAM DONALD ROSS, ESQ.,  
*Lieutenant-Governor of the Province of Ontario.*

May It Please Your Honour:

I herewith beg to submit for your consideration the Ninth Annual Report of the Department of Labour of Ontario for the fiscal year 1928.

Respectfully yours,

FORBES GODFREY,  
*Minister of Health and Labour.*

TO THE HONOURABLE FORBES GODFREY, M.D.,  
*Minister of Health and Labour.*

SIR:

I have the honour to submit for your approval the Ninth Annual Report of the Department of Labour of Ontario for the fiscal year 1928.

I have the honour to be, Sir,

Your obedient servant,

JAS. H. H. BALLANTYNE,  
*Deputy Minister of Labour.*

# REPORT OF THE DEPUTY MINISTER OF LABOUR

## INDUSTRIAL CONDITIONS

The encouraging improvement in the industrial situation reported for last year in Ontario continued through the fiscal year 1928, the result being the greatest expansion in the volume of employment as compared with the previous year of any similar period since 1920. According to the index numbers of employment issued by the Dominion Bureau of Statistics all months of the year recorded advances ranging from five to twelve points in the index numbers, the average over the period being 7.7 points. An encouraging feature about this improvement is the fact that, while it was not of a seasonal nature but general throughout the period, the upward tendency was strongest in the latter half of the year, which closed with the index number at 115.3, the peak for the whole period since the records were commenced in 1920. The prospect of further expansion in the present year is therefore promising. Taking the index number for January, 1920, as 100, the volume of employment for the year 1928 will be indicated by 106.3 as compared with 98.6 for 1927 and 93.1 for 1926.

In every industry improvement was indicated by advances in the index numbers ranging from 1.4 points in communication to 25.5 points in the mining industry as compared with 1927. In construction, which recorded the highest index number of 179.7, services and trade the advances were 17.4, 17.2 and 11.3 respectively. In the manufacturing division as a whole the expansion in the volume of employment as indicated by an advance of 6.9 points in the index number was constant throughout the year, the number for each month being higher than for the corresponding month of the previous year. In this division, the iron and steel group recorded the greatest gain of 10.8 points or two and one-half times the gain of last year. Notable progress was also made in the lumber group, in which employment for the two previous years had remained at the same level, but during 1928 the index number moved up 6.3 points to 100.9. Gains in logging, transportation and textile manufacturing were smaller, being 3.7, 2.8 and 1.5 respectively, while gains in pulp and paper and other lines of manufactures averaged over 6 points.

The Examiner of Reports and Designs attached to the Department of Labour has also called attention to this expansion in the manufacturing industry in his report of the year's work. According to *The Factory, Shop and Office Building Act*, plans of all proposed new factory buildings and of all alterations to existing factory buildings and of all office or shop buildings if over two storeys in height are required to be submitted to the Factory Inspection Branch for approval. During the year 1928 the total estimated cost of such buildings, the plans of which were submitted for approval, amounted to \$32,614,300 as compared with \$20,218,950 for 1927, or an increase of 61.3 per cent. When it is considered that the amounts for 1924 and for 1925 were approximately 8½ million dollars, the marked increase in value in the past three years may be

appreciated. Of the \$32,614,300, 48.6 per cent. was for factory buildings and 51.4 per cent. for office buildings. Approximately \$7,000,000 was expended on alterations and additions to existing factory buildings, a particularly significant fact, indicating as it does the stability of established industries.

For all classes of buildings the value of permits issued in thirty centres of Ontario during the fiscal year 1928 amounted to \$100,014,963 as compared with \$77,062,966 in 1927 or an increase of 29.8 per cent. This increase in the value of permits is indicative of a decided expansion in the building industry and of general prosperity throughout the Province.

#### WAGES AND HOURS OF LABOUR

In several sections of the building trades increases in wage rates were reported during 1928. In Toronto, wages for carpenters, electrical workers and sheet metal workers increased 10 cents per hour to \$1.00; wages for plumbers advanced  $12\frac{1}{2}$  cents to  $1.12\frac{1}{2}$  per hour and the minimum rates for painters 10 cents and for builders' labourers 5 cents, the rates changing from 65-80 cents to 75-80 cents and from 35-65 cents to 40-65 cents respectively. In Hamilton, bricklayers' and plasterers' wages increased from  $1.12\frac{1}{2}$  to \$1.20 per hour; carpenters' wages from 85 to 90 cents, plumbers' from 95 cents to \$1.00 and sheet metal workers' wages from 85 to 90-95 cents per hour. In Ottawa, plumbers' wages advanced from 90 to 95 cents and sheet metal workers' wages from 85 to  $87\frac{1}{2}$  cents per hour. The hours of labour for plasterers in Toronto were reported reduced from 44 to 40 hours per week.

In the metal trades no changes in wages were recorded but the hours for iron moulders in Toronto were changed from 44-54 to 45-54, for machinists in Hamilton from 45-59 to  $49\frac{1}{2}$ -60 and for boiler makers in Ottawa from 50 to 44-50 hours per week.

#### INDUSTRIAL UNREST

Greater disturbance due to industrial disputes in Ontario was reported for the fiscal year 1928. The number of strikes and lockouts totalled 52, as compared with 25 in 1927, but although the number of persons involved in these strikes, 5,622, was also considerably larger than the number last year, showing an increase of 27.6 per cent., the aggregate duration in working days was only 5.6 per cent. greater than in 1927, or 59,889 days. More than one-half this time-loss, or 32,004 days, was due to the 15 strikes of workers on buildings and structures, in which 2,627 men were involved and nearly one-quarter of the time-loss, or 13,470 days, was due to the four strikes involving 1,230 pulpwood cutters in Northern Ontario in their demands for an increase in wages. The greatest number of disputes, 20, occurred in the clothing industry but the majority of these were of short duration and comparatively few workers were involved, 5,125 days being lost by 760 workers. Four strikes in automobile plants caused 644 men to lose 2,794 working days; two in boot and shoe factories caused 103 workers to lose 1,966 days and one strike caused 20 fur workers to lose 1,497 days. In one strike, 55 paper makers lost 880 days; in another, 55 upholsterers lost 658 days; 30 granite cutters lost 720 days and in three strikes in the printing and publishing industry 98 workers lost 775 days.

The chief cause of dissatisfaction was the matter of wages which gave rise to twenty-one disputes involving 2,893 workers and resulting in 36,468 working

days lost, or over 60 per cent. of the total. In the case of five of these disputes, hours, working conditions or union matters were also factors in the cause. Union matters gave rise to fifteen strikes involving 1,481 workers who lost 9,099 working days and of this number seven were caused by the dismissal of certain employees. Five of the strikes, involving 979 workers and resulting in a time loss of 8,657 days, were sympathetic; three, involving 82 workers and causing 1,421 days lost, were in protest against changes in working conditions, and two, involving 35 workers and causing 1,872 days lost, were in protest against violation of agreements. There were six alleged lockouts affecting 152 workers and resulting in 2,372 working days lost.

With regard to the outcome of these disputes, thirteen, involving 1,606 workers, were settled in favour of the employees; eight, involving 247, in favour of employers; in the case of fourteen, involving 2,612 workers, a compromise was effected or the strikers were partially successful; thirteen, involving 764 workers, were indefinite as to outcome, the strikers usually securing work elsewhere, and four, involving 393 workers, remained unterminated at the end of the fiscal year.

#### EMPLOYMENT OFFICES

The report of the work of the employment offices during the fiscal year 1928 reflects the general improvement in industrial conditions already noted. The number of placements effected, 153,783, showed an increase of 12.3 per cent. as compared with the previous year; the number of vacancies reported, 175,870, an increase of 10.1 per cent. and the number of applications for employment, 212,422, showed an increase of 6.5 per cent. Of these applicants, 77.1 per cent. were placed and 87.4 per cent. of the vacancies were filled. Of the number of placements reported, 97,217, or 63.2 per cent., were regular, that is, involved employment of two weeks' duration or longer and 56,566, or 36.8 per cent., were of a casual or temporary nature. At various times during the year the demand for workers, especially skilled workers, was greater than the supply.

Creditable work in the placement of handicapped ex-service men is indicated in the increased number of placements effected. These totalled 4,306 and 2,525, or 58.6 per cent., were regular placements. Handicapped ex-service applicants numbered 6,863 and 62.7 per cent. were placed. In the employment offices at Toronto and Ottawa separate divisions are maintained for this special phase of employment work, and in the remaining offices every consideration is given the employment needs of the handicapped ex-service men.

#### STEAM BOILER BRANCH

According to the regulations authorized by *The Steam Boiler Act*, all steam boilers, air receivers and other pressure vessels constructed for use in Ontario must be built from designs which have been approved and allotted a registration number by the Steam Boiler Branch. During the fiscal year 1928, 567 such designs were surveyed, registered and re-registered as compared with 483 in 1927, or an increase of over 17 per cent. and twenty-eight designs were returned to manufacturers for revision. The new pressure vessels inspected numbered 582, as compared with 462 in 1927, or an increase of nearly 26 per cent. and of this number 398 were manufactured in Ontario or eighty more than last year. Thirteen hundred and thirty-two first, second and final inspections were made on these pressure vessels. Used pressure vessels which have been extensively

repaired or which have been sold or exchanged for use in the Province must be inspected and 908 such pressure vessels were inspected during the year and 658 annual inspections were made, or a total of 1,566 as compared with 1,534 in 1927. The number of certificates issued totalled 3,229 or 203 more than last year.

The expansion in the work of every department of the Steam Boiler Branch resulted in an increase of nearly 16 per cent. in the revenue for the year. The amount of moneys transmitted to the Treasurer of Ontario was \$22,152.90 as compared with \$19,102.16 for the fiscal year 1927.

#### FACTORY INSPECTION BRANCH

The continued progress of the Factory Inspection Branch is outlined in the forty-second annual report of the Branch. During the year 18,565 inspections were made of factories, mercantile establishments and office buildings in which the employees numbered 313,595. In addition to these regular inspections, investigations were made of accidents and complaints and during the Canadian National Exhibition the various buildings on the grounds were under the constant supervision of the factory inspectors in the interests of those employed there. Considerable labour on the part of the inspectors is involved in the delivery of the 519 contract clothing permits and the necessary inspection of premises. The number of orders relating to the various requirements of *The Factory, Shop and Office Building Act* totalled 6,691 and 1,244 permits were issued, of which number 697 were permits for overtime. Reports of 1,345 violations of the Acts in the enforcement of which the inspectors have a responsibility were submitted, the great majority of which were due to negligence in the posting of the orders of the Minimum Wage Board. Industrial accidents reported numbered 5,809, of which thirty-five were fatal.

#### BOARD OF STATIONARY AND HOISTING ENGINEERS

Every person operating in Ontario as engineer in charge of a stationary boiler of more than 25 horsepower and of which the safety valve is set to blow off at a pressure exceeding ten pounds, or of a portable boiler, the safety valve of which blows off at a pressure exceeding twenty pounds, must hold a certificate of competency issued upon examination by the Board of Stationary and Hoisting Engineers. Four grades of certificates for stationary engineers are issued by the Board. The holder of a fourth-class certificate may take charge and operate a steam plant of 50 horsepower or less; third-class, 200 horsepower or less; second-class, 600 horsepower or less, and first-class a plant of any capacity. During the year 1,373 certificates were issued upon examination and of this number it is interesting to note than twenty-four more than last year were for second-class certificates. To qualify for a higher grade certificate requires study and increasing efficiency in the management of steam plants, and this expert knowledge is being recognized by employers in the matter of higher remuneration. Altogether 1,851 candidates sat for examination, 667 at the office of the Board in Toronto and 1,184 at outside examining centres arranged for the convenience of candidates. In addition to 1,373 certificates by examination, there were issued twenty-three provisional, thirty duplicate, 114 plant owners' certificates and 15,085 by renewal, making a total of 16,625 issued during the year. The revenue of the Board amounted to \$23,474.02 as compared with \$23,126.61 in 1927.

#### INSPECTION OF CAISSON WORK

The Inspector of Caisson Work, administering the Regulations respecting the Protection of Persons Working in Compressed Air, has reported a decided

decrease in the cases of sickness due to employment in compressed air during the past year. Before these regulations became effective very little provision was made for the care of workmen stricken with caisson disease and numerous cases became claims on the Workmen's Compensation Board, involving considerable expenditure. This point may be illustrated by the figures of the construction job on which the air pressures used were practically the same throughout the period. During the six months before the enforcement of the regulations eighty-eight cases of sickness and three deaths from caisson disease were reported with \$16,521.00 paid out in compensation. During the corresponding six months of the next year when the regulations were in force twelve cases of sickness were reported, no deaths and only \$998.00 paid out in compensation. A workman stricken with caisson disease after leaving his work should be rushed back into the air lock and have the same amount of air pressure imposed upon him as he had been employed in previous to the attack. The pressure should be reduced gradually until he becomes fit to resume normal activities. This procedure, however, may have very unsatisfactory results unless done under proper medical supervision. To provide for this the Inspector of Caisson Work had installed on the job mentioned above, three steel medical locks on the ground surface, suitably equipped and with glass bull's eyes on the doors which enabled the doctor in attendance to keep the patient under observation. It is expected that considerable construction work is to be commenced in the near future necessitating the employment of men under compressed air. The regulations require that "any person, firm, corporation, municipal council or other public authority, before commencing work in the construction of which men are employed in compressed air, shall notify in writing the Inspector appointed to administer these regulations." If such work is carried on strictly in accordance with these regulations and in co-operation with the inspector, elements of danger may be reduced to a minimum.

#### THE APPRENTICESHIP ACT

Under *The Apprenticeship Act, 1928*, an Inspector of Apprenticeship and a Provincial Apprenticeship Committee, comprising an equal number of employers and employees, have been appointed. A number of apprentices engaged in occupations pertaining to the building trades have been registered and arrangements are being completed for their training in all matters associated with the vocations they intend to follow.

This Act, which represents the first legislative action of the kind in Canada, is in the form of enabling legislation, applying at the present time only to the building trades. It does not constitute regulations imposed by the government upon this industry but is rather the result of years of research work and activity on the part of employers in the building industry and organized labour. It is hoped that in time other branches of industry will make application to be brought within the scope of the law, the object of which is to provide, through the co-operation of employers, organized labour and educationists, thorough training for young Canadians entering skilled trades. Provision is made for government supervision of apprenticeship programmes and for the setting up of provincial and local organizations to promote and develop apprentice training in designated trades. This new type of apprenticeship should ensure apprentices of better chances of success, develop more intelligent individuals within the industry and provide employers with fully trained workmen. The benefit accruing to the general public will be evidenced in the stabilizing effect upon conditions in industry and improved industrial relations.

## Labour Legislation, 1928

The Statutes of Ontario, 1928, contain the following Acts of interest to labour:—

1. An Act respecting the Training of Apprentices;

The Act respecting the Training of Apprentices provides for the appointment by the Lieutenant-Governor in Council of a Provincial Apprenticeship Committee composed of an equal number of employers and of employees and of a Chairman to advise the Minister of Labour, in whose hands the administration of the Act is placed, on all matters pertaining to conditions governing apprenticeship and for the appointment of an Inspector of Apprenticeship to be the director of apprenticeship training and to supervise the carrying out of the provisions of the Act by both the employer and the apprentice.

The Act applies to the "designated trades" of the building industry and provision is made for additions to the list of designated trades. All minors employed in these designated trades are required to be indentured by the employer and such contracts must be registered with the Inspector of Apprenticeship. The Act provides for the termination or cancellation of contracts by the Inspector and for the transfer of an apprentice to another employer. The Lieutenant-Governor in Council may make regulations governing the formation of apprenticeship committees in defined areas and certain other matters dealing with details of apprenticeship.

2. An Act to amend the Mothers' Allowances Act;

This amendment requires that an applicant for an allowance be a resident in Ontario at the time of the death or total disability of the father of the children, and for a period of two years prior to making application for an allowance.

3. An Act to amend the Workmen's Compensation Act;

This amendment authorizes the Workmen's Compensation Board to divert the compensation payments in whole or in part for the benefit of a workman's dependants in cases where the workman deserts his family or fails to provide for them and an order of the court has been issued against him. Provision is made for the payment of the salaries of the members of the Board out of the accident fund, the amounts to be fixed by the Lieutenant-Governor in Council. In connection with industrial diseases, the word "tuberculosis" is defined for purposes of the Act as meaning tuberculosis of the respiratory organs. The Act is further enlarged to authorize the Board to appoint such medical officers as may be required to carry out the provisions of *The Mining Act* with regard to the examination of employees or applicants for employment and the salaries of these officers are to be paid out of the rate imposed for the payment of silicosis claims.

4. An Act to amend the Mining Act;

One section of this amending Act requires the annual medical examination of every underground worker by a medical officer appointed under the provisions of *The Workmen's Compensation Act* and restricts the employment underground to those holding medical certificates stating that they are free from tuberculosis of the respiratory organs. A similar certificate is required of workmen engaged in any ore or rock crushing operation which is carried out when the material is not kept constantly in a moist or wet condition. The Chief Inspector of Mines may exempt from the provisions of this clause mines not containing sufficient silica to be likely to produce silicosis and such other mines as he deems should be exempt and these provisions do not apply to workmen employed underground for less than fifty hours in any calendar month. The Lieutenant-Governor in Council may make regulations concerning the medical examination, the certificate and for the better carrying out of the requirements of this section.

## Ontario Government Offices, Employment Service of Canada

GENERAL SUPERINTENDENT—H. C. HUDSON

PARLIAMENT BUILDINGS, TORONTO

The employment index compiled by the Dominion Bureau of Statistics indicates that industrial conditions throughout Canada provided more employment each month during the fiscal year 1927-28 than during the corresponding month of any year since the statistical information relating to employment conditions was first gathered in 1921. The activity throughout the Dominion is directly reflected in the record achieved by the Ontario Government Offices of the Employment Service of Canada. During the twelve months employers asked for 175,870 men and women, 212,422 persons registered for employment, and 153,783 persons were placed. This represents an increase in the vacancies of 10.11 per cent.; in the applications of 6.56 per cent., and in the placements of 12.33 per cent., as compared with the preceding fiscal year. Of the total number of placements made, 63.2 per cent. were placements of a regular nature and 36.8 per cent. were casual placements, that is for employment of less than two weeks' duration. In more than half of the offices the regular placements comprised 70 per cent. or more of the total, the percentage being over 80 in eight offices. It is also significant that at various times of the year the demand for skilled, semi-skilled and unskilled workers exceeded the supply which is in itself evidence of a healthy and active industrial and employment situation.

That the increase in the business transacted by the twenty-six offices in Ontario was not confined to certain localities but was general throughout the Province is seen in the fact that twenty-one of the offices showed increases ranging from one to sixty per cent. over last year's placements, one office made exactly the same number of placements as last year, while only four offices showed decreases. The Men's Department of the Toronto Office provided the largest number of placements, 23,474, while the Women's Department was responsible for placing 18,574 women in various kinds of positions. Hamilton and Port Arthur also passed the 10,000 mark with 11,071 and 10,834 placements respectively. The position of Oshawa on the list with 6,604 placements is particularly creditable and significant, indicating as it does what a single industry with its allied activities may mean to a city with a relatively small population and what an important part the local employment office may take in meeting the needs of that industry and the community as a whole.

As in previous years special attention has been paid to the employment needs of handicapped ex-service men, separate departments dealing with this important phase of placement work being in operation in Toronto and Ottawa, while all employment office superintendents are instructed to devote special consideration to such applicants. Figures on page 17 indicate that 6,863 applications were received from handicapped ex-service men, and that 1,781 regular

and 2,525 casual placements were made. This is a creditable showing in view of the difficulties of fitting handicapped men into employment. The co-operation of various federal government departments and the interest in employment shown by the majority of the applicants themselves have made possible this splendid showing.

Throughout the year the necessity of careful selection has been impressed upon the members of the staff in the various offices and the increase in the business which has been transacted furnishes direct evidence that each year sees an improvement in this direction. The Employment Service must have the confidence and the goodwill of employers and workers in order to succeed, but the period of experimentation is passed so far as this Province is concerned and the employment offices are looked upon not only as the logical centre to obtain work or workers but as the barometer which interprets most accurately the trend of business and industrial conditions in the community.

The co-operation between the Federal Department of Labour under the Employment Offices Co-ordination Act has continued as heretofore and is particularly effective in making possible inter-provincial transfers of men in order to equalize the supply and the demand throughout the Dominion. The clearance machinery functions admirably whether the transfer is to one of the neighbouring provinces such as Manitoba or Quebec or whether the transfer means sending a man as far as British Columbia or obtaining one possessing the special qualifications from the Maritime Provinces. The following figures show the number of transfers-in from the Province of Manitoba to the district be-

Bushmen, lumbermen, etc.....	2,563

tween Port Arthur and the Manitoba boundary during the fiscal year. These figures indicate the part which inter-provincial clearance plays in taking care of the employment requirements of a territory such as the Rainy River District, Winnipeg being to a certain extent the logical centre for recruiting men for the extreme western section of this Province.

**APPLICATIONS, VACANCIES,  
 AND PLACEMENTS.**  
 Ontario Government Offices  
 Employment Service of Canada.  
 — Nov. 1 - 1927 - Oct. 31, 1928 —

124

Clearance between the various departments within Ontario is now organized to the point where workers wishing positions may be and are moved from point to point with the minimum of delay and inconvenience both to themselves and to the employers. There is probably no phase of public employment work which is so superior to the operations of public employment services elsewhere as in this clearance process. The Ontario Government Employment Offices are continuing to place in domestic employment girls and young women recruited for this purpose from the British Isles. The co-operation between the Immigration and Colonization Branch of the Ontario Department of Agriculture is excellent in this connection.

The table following indicates the seasonal fluctuations in the demand for workers throughout the Province as a whole. The vacancies listed with the offices of the Service ranged in number from 9,727 in February to 19,392 in August. The demand for men for the woods in October again brought the total above the 19,000 mark. The average number of vacancies per month throughout the entire year was 14,655. The largest number of applicants registered in any one month was in October when 22,200 men and women applied at the offices for employment. The lowest number was in February, the figure being 13,734. It would appear at first glance that the figure for the month of February would be higher but the explanation is that seasonal workers understand that there is a scarcity of available employment during that month and fail to present themselves at the employment offices. If it were possible to provide four or five thousand more jobs in February than are ordinarily available there is every reason to believe that applicants would be forthcoming to fill the vacancies. It is interesting to note that the average number of applicants per month was 17,701. The lowest number of placements made in any one month was in January when 9,363 jobs were filled. The most active month was August when positions were found for 16,788 men and women. The average number of placements per month was 12,815.

A weekly survey of employment conditions issued from the office of the General Superintendent is intended primarily for the benefit of the local offices of the Service. Quite frequently, however, requests are received for copies of this bulletin and the newspapers as well as some of the financial houses make use of it as a means of keeping in close touch with the employment situation.

The Fifth Conference of Ontario Government Employment Office Superintendents was held in Toronto on June 28th, 29th and 30th, 1928, the General Superintendent acting as Chairman. Among the subjects discussed by the Superintendents were the following—zone and inter-zone clearance; immigration from the point of view of its effect on employment; office routine and administration; publicity, canvassing, progress in placing the handicapped applicant and seasonal unemployment. Special addresses were delivered by Dr. J. W. MacMillan, Chairman of the Minimum Wage Board of Ontario, on the Relationship between the Employment Service and the Work of the Minimum Wage Board; by Dr. J. M. McCutcheon, Civil Service Commissioner, on The Public Service of Ontario; by Mr. G. E. Elliot, Director of Colonization, on the Immigration and Placement Activities of the Immigration and Colonization Branch of the Department of Agriculture, and by Mr. R. A. Rigg, Director of the Employment Service of Canada, on Employment Service Ideals.

Reference to previous reports will provide detailed information regarding the different types of industry in each centre of the Province. The most significant point or points which have developed during the year in the centres where employment offices are located will be found in the following paragraphs.

In Belleville the outstanding feature, apart from the generally satisfactory conditions in industrial employment, has been the large amount of building and construction work carried on throughout the year. The biggest single edifice erected was a new college and technical school costing approximately half a million dollars.

The Brantford Office showed the third largest increase in placements as compared with last year, the total number, 4,070, being 45.67 per cent. more than in 1927. Farm placements and industrial placements, particularly in the agricultural implement trade, made up the major portion of this increase. There has also been an increase in the number of firms utilizing the services of the Brantford Office and the records show that forty-seven concerns depend upon the local employment office for the major portion of the help which they require. As in Belleville, building and construction was active and the clearance system was used to good advantage at different times for the purpose of recruiting building mechanics to fill local positions for which the required number of local workers was not available. Track maintenance and repair work provided a large volume of employment and here again co-operation between the offices secured the required help.

In Chatham the manufacturing plants associated with the automobile trade, the textile factories and the lumber and wood working plants all enjoyed a very busy year which was reflected in an increase in the demand for help. Agricultural employment, particularly in the tobacco and sugar beet industries, was available in larger volume than last year and the Province-wide activity in the building trade was shown in the large number of building mechanics and labourers engaged through the Chatham Office. The outstanding features of the year as noted by the superintendent were as follows: a better class of applicants, smaller labour turnover on the farms, in the factories and on construction work, an increase in wage rates, better working conditions and better board and housing on construction work.

A change of personnel in the Cobalt Office was made with the resignation of Mr. W. C. Ferris and the appointment of Mr. T. E. Dowse. In spite of the reduction in the mining of silver in the Cobalt district, the office was successful

in placing 2,259 men in regular positions, and fifty-two men in casual work during the year. The office did not receive full credit for the actual amount of casual placements for which it was responsible as employers frequently secured men from in front of the office without notifying the superintendent.

The figures submitted by the superintendent of the Fort William Office show a slight increase over the volume of business transacted during 1927. There would, undoubtedly, have been a greater increase had it not been for the fact that there was a marked reduction in the number of summer pulp camps as compared with the previous year, while the closing down of one of the large paper manufacturing plants early in the season also had an adverse effect on the general business of the office. An evidence of the extent to which the clearance system functions in the operation of an office such as Fort William is seen in the fact that 545 transfers out of the Fort William zone were made, 338 of which were to the Prairie Provinces during the harvest season. In addition 207 transfers, mainly construction workers, were made to other zones out of the Province of Ontario. The office made 1,172 placements in all classes of construction work, which represents a substantial increase over any previous year. Transportation business was responsible for 588 placements, which is almost identical with the number during the previous year.

Guelph is one of the offices showing a substantial increase in the year's business with 1,955 placements. During the early part of the year the local factories were not busy but an improvement in the spring of 1928 along industrial lines brought a relatively large number of orders to the office.

An increase of 1,335 in the number of vacancies, 906 in the number of applications and 1,587 in the placements reflects the outstanding improvement in employment conditions in Hamilton in 1928, as compared with 1927. Experienced farm help was in demand throughout the year, particularly after the western harvest excursion had left the district. In the various manufacturing industries practically every plant in the city was operated almost to capacity and several with night shifts throughout the year, while a number also found it necessary to make additions to their buildings. Fully qualified machinists, mechanical draughtsmen, tool designers, tool makers, wood pattern makers, acetylene and electric welders were among the mechanics who were in greatest demand, the iron and steel industries absorbing a large percentage of these types of workers. A large tire and rubber company built an addition to its plant and although an employment department is operated in conjunction with this concern, practically the entire staff for the new portion of the plant was obtained through the Employment Service. Sixteen new industries commenced operations in the city during the year, and a large number of these made use of the Hamilton Office in securing their skilled, semi-skilled and unskilled workers. The activity in the construction industry was such that every qualified mechanic was kept busy, and a large number of workers came to Hamilton from outside points, many of these from the United States, during the year. A rather unusual call for help was received by the superintendent at this residence on a Sunday morning at 7 o'clock, when it was discovered that a large coal pile was burning, and a gang of shovellers was required as water could not be used to extinguish the fire. A change in the location of the office premises was followed not only by an increase in the number of orders and applications but by an improvement in the standard of jobs and men available. The clearance system was used to advantage and 327 men were transferred out during the year. In one case

the entire resources of the Service were utilized in an effort to secure a roll turner for a local steel company. A qualified man was obtained in Vancouver.

While the figures for the Women's Department of the Hamilton Office are somewhat lower than last year, the volume of business transacted has been very satisfactory. There were 4,776 vacancies listed, 6,529 applications received, 911 regular and 3,439 casual placements made. The change to the new premises at 256 King Street East was particularly beneficial to the Women's Department and it is anticipated that an increase in the volume of business will result from the removal to the new office. It was difficult to place the inexperienced worker. Familiarity with factory routine is generally one of the requirements specified by the employer in placing orders for help. The figures relating to the placement of workers in domestic employment would have been higher if there had been a larger number of qualified workers available. It is estimated from the office records that there is a shortage of between 1,000 and 1,500 experienced cooks-general in the Hamilton district. The office effected an arrangement during the year under which girls and young women wishing to train as nurses could be placed with a local hospital at very good wages under favourable conditions.

As indicated in previous reports, there is probably no city in Ontario where there exists a closer connection between the municipal authorities and the Employment Service than in Kingston. All municipal employment both of a regular and relief nature is handled exclusively through the Employment Office. This is one of the factors which has enabled the Kingston Office to make a very creditable showing, the placements being 17.33 per cent. higher than last year. The early part of the fiscal year under examination offered little opportunity for employment, the locomotive works, one of the ship-building companies and one of the tanneries being particularly slack. Municipal relief work was substituted for industrial employment and citizens of Kingston were registered and placed through the local office until conditions improved. An order for twenty-five locomotives received towards the close of the fiscal year greatly helped the local situation at a time when the seasonal contraction in outdoor work commenced. The demand for domestic help including institutional workers was greater than in 1927. As a result 705 placements were made and this number would have been increased if there had been a larger number of qualified domestic workers available. Continued co-operation on the part of the local press and the local trade unions is evidenced in the former instance by the publicity which the office receives and in the latter instance in a resolution passed by the Kingston Building Trades Council endorsing the work of the staff of the Kingston Office.

Kitchener is a city of diversified lines of manufacture. The majority of the factories report an excellent year's business which was offset by slackness in other lines. In this connection it is interesting to note the relationship between factory employment and climatic conditions as evidenced by the experience of one of the rubber footwear manufacturers. As a result of unusually fine mild weather prevailing in November and the early part of December, 1927, the expected demand for winter footwear such as overshoes and rubbers did not materialize and there was a direct re-action on the factory which specializes in this form of production. The second half of the year was exceptionally active and the demand for help was so great that the clearance system had to be used extensively in filling the orders for skilled workers. The office was successful in placing 2,865 men and women in jobs, which represents an increase of 23.54 per cent. over 1927.

One of the means by which the activity of an office may be gauged is by an analysis of the average number listed as unemployed throughout the different months of the year. The records of the Men's Department of the London Office showed an average of 258 unplaced applicants for the month of November, 1927, which increased during December and January to 417. This figure, approximately, was maintained until the month of May when the pendulum swung in the opposite direction and during the summer months the average fell as low as eighty-eight. This may be considered as the irreducible minimum for a city of the size of London as the figure quoted would include the oldest of the applicants, the more severely handicapped cases and the relatively small number who register at an employment office but who show a marked inclination to refuse employment which does not meet exactly with their approval. The volume of construction work available made it difficult to fill farm orders. The most popular form of agricultural employment was that in connection with the cultivation of tobacco. The fact that payment for this work is made on a daily basis and that there is a strict definition of the hours of work is responsible for the comparative ease with which orders of this nature are filled by the employment offices. The construction industry absorbed an exceptionally large number of men during the year both in the erection of dwellings and larger buildings and in such work as conduit laying, while highway construction work in the district maintained a fairly constant call for labourers throughout the summer months. The railways have also been steady customers for maintenance and construction workers.

"An analysis of the registered handicapped ex-service men shows that the great majority of them are rated as from 5 to 10 per cent. disability, a few with 20 to 30 per cent. and only three with 50 to 75 per cent. disability. The highest number registered during the first six months between November, 1927, and April, 1928, was seventy-two during February and the lowest was forty during November. For the six months covering May to October, the highest was thirty-two during May and the lowest was eight during July, ending the year with a registration of seventeen. Placements in this group covering the year were 101 in regular and 46 in casual work. Conferences have been held at different periods with Col. Marriott and the staff of the Department of Pensions and Health, so as to ensure the closest possible working arrangements between the two organizations."

The experience of the Women's Department of the London Office would seem to indicate that there is no dearth of female help for factory work in the City of London. On the other hand the industries located in the smaller centres throughout the district find it very difficult to obtain and hold qualified factory workers. In the City of London itself the only shortage is that which is common to the rest of the Province, namely, in the supply of applicants for household work. An interesting phase of the work done by the Women's Department was the placing of thirty-seven domestic workers from Overseas. This was largely the result of co-operation between the Service and the Immigration and Colonization Branch. In spite of the length of time which elapses between the filing of the order for this type of help and the arrival of the applicants the employers would have engaged a larger number of these girls had they been available. An evidence of the fact that the clearance system applies to the transfer of women as well as men is seen in the figures which indicate that eleven women were transferred into the London district from outside points, while five were sent to other districts.

A consistent increase in the volume of industrial employment available in the Niagara Falls district is indicated by the facts submitted by the superintendent, a case in point being that of a cyanamid company whose present floor space is almost double that of a year ago and whose production has increased approximately 70 per cent. The steel industries in Welland and Port Colborne furnished a barometer of conditions in the Niagara Falls district, and they have operated at approximately 85 per cent. of their capacity throughout the year furnishing the largest volume of employment to the residents of these municipalities. As noted elsewhere, construction and farming were active throughout the year, and resulted in a larger number of vacancies than in 1927.

The extent to which the Niagara Falls Office is developing is indicated by the volume of business transacted by the Women's Department. The applications totalled 777 and of this number 599 were placed in permanent and temporary employment. The supplying of competent help for the hotels provided more employment than in 1927 and the manager of one of the larger hotels stated that the type of help sent to him was so satisfactory he hopes to re-engage the entire staff at the beginning of the next tourist season. The number of applicants applying for factory work greatly exceeded the vacancies, this condition being due largely to a reduction in the volume of available employment in the textile industries. The various new stores which commenced operations during the year required and secured through the employment office a considerable number of sales clerks and office help.

Although the North Bay Office was successful in placing 4,634 men and women in jobs throughout the year, an estimate based on the unfilled orders during the month of October indicates that at least 2,000 more men could have been placed in the district had they been available. The type of employment offered throughout the district is largely seasonal and the demand consequently has a tendency to exceed the supply, particularly during the months of September and October. In June Mr. H. A. Desjardins was appointed superintendent and his previous experience in industrial employment work has proved an asset to the Employment Service. The lateness of the spring and the prevalence of floods, taken in conjunction with the short season, made 1928 a very difficult one from the lumbermen's point of view. Coincident with the limitation of the activities in the lumber woods there was a restriction in the output of saw mills in the district. The North Bay Office was called upon to take care of replacements in the mills, the majority of crews being recruited with few changes when the mills opened in the spring. Overproduction in the newsprint industry brought about amalgamation of several mills and as a result there was a marked falling off in the number of men called for. A concrete example of the reduction is seen in the case of one mill which has contracted for only 90,000 cords of pulpwood this year, as compared with 200,000 in 1927. Highway construction and railroad maintenance absorbed less than 20 per cent. of the number engaged in this work in 1927. The superintendent of the North Bay Office suggests that an earlier start on extra gang work in the spring of the year would have a beneficial effect in straightening out the unemployment curve which reaches its highest point in March or April. The falling off in highway construction was balanced to some extent by the activity in building construction, North Bay alone being responsible for almost \$1,000,000 worth of work during the year.

The record made by the Oshawa Office during 1928 is unique in many respects. In the first place, the business transacted represents an increase of 60.01 per cent. as compared with 1927. Secondly, it is remarkable to note that 6,604 placements were made in a city whose population, according to the latest

available returns is only 20,000. The splendid results achieved may be explained by the following factors; careful selection, an addition to the staff, the opening of the office at 8 a.m., instead of 9 a.m., an improved location for the office and the development of close co-operation between employers of labour and the employment office. The industrial activity which Oshawa has experienced during the past year is indicated by the fact that it was necessary to bring into the district, through the clearance system, 381 skilled and semi-skilled workers to fill jobs for which local help was not available and to meet the farm demand in the district. Commenting upon the situation throughout the year, the superintendent of the Oshawa Office writes as below:

“Conditions during the late fall and winter months were above normal and increases in monthly placements were noted. As early as February calls were made for skilled men and it was necessary in many cases to call on Toronto for help. In the latter part of March the trimmers at General Motors went on strike which eventually involved the entire plant. Fortunately it was of short duration, being settled in less than a week. During April calls came for bricklayers and carpenters and the builders were well on their way to a record season. Workers in this group have been steadily employed all season. Carpenters, bricklayers, plasterers and painters have always been in demand. As in the previous year, the co-operation was of the closest and regular calls were made on all local contractors. Outside contractors were canvassed immediately on their arrival and were never allowed to get out of touch with the local office.”

The activity in the motor and allied industries in Oshawa does not need to be described in detail but it is interesting to note that the local employment office has measured up to the abnormal demands made upon it and has rendered a service which has received the favourable and unsolicited comment of many of the outstanding manufacturers of the city.

A decided increase in the orders and applications and consequently in the placements as well is noted from the reports of the Women's Department of the Oshawa Office. The clearance system has been used to advantage in meeting the demand for domestic and institutional workers. Calls for casual workers are becoming more frequent each year and this phase of the business of the office is rapidly expanding.

The Ottawa Office is one of the few whose figures show a decrease as compared with 1927. The total number of placements in both departments, 8,240, is 5.86 per cent. less than the figures for the previous year. Abnormal weather conditions resulted in the falling off in orders for farm help, while the lumbering industry is gradually moving so far away from Ottawa that the cost of transportation is causing the lumber firms to seek their supply of men from northern centres rather than from the Ottawa Valley as they had formerly done. The decrease in orders for farm help and bush workers was offset to some extent by an increase in the demand for help from the manufacturing industries, the wood working plants being exceptionally busy. There was no difficulty in placing skilled building mechanics as the volume of construction work was above normal but newspaper publicity attracted a large number of unskilled men to the city under the impression that the building programme would provide unlimited opportunities for employment of that kind of help. The activities of the Federal District Commission provided work for nearly 500 seasonal and semi-skilled workers, a fair percentage of whom were placed through the

Employment Service. Highway construction and railway maintenance was below normal and the few orders received were filled without difficulty.

During the year the handicap section of the Ottawa Office registered 589 men suffering from disabilities of various types. Of this number 573 were handicapped ex-service men. In spite of the comparative lack of industrial employment, 485 placements were made, 466 being disabled ex-service men, and 19 were civilians. One hundred and twenty-three of these placements were in casual employment and a large percentage of the regular placements were made in occupations of a seasonal nature but providing employment for the major portion of the year. In order to enlist the co-operation of employers in connection with the work of the handicap section, 690 personal calls were made, covering government offices, business houses, contractors and other employers. Major C. S. Ford, who had been superintendent of the Ottawa Office since 1920, resigned in August, 1928, to accept a position as Commissioner of Social Service for the City of Ottawa. At the conclusion of the fiscal year Mr. J. R. Johnson of the Ottawa Office staff was acting superintendent. Early in the new fiscal year Mr. Rae Halliday was appointed to succeed Mr. Ford.

In the Women's Department of the Ottawa Office an increase of 198 in the vacancies, 451 in the applications and 65 in the total number of placements indicates that the employers of Ottawa are continuing to use the Employment Service when in search of qualified workers. During the year a representative of a large London (England) newspaper visited the office and made the suggestion that the shortage of domestic workers in Canada might be met in part, at least, by the establishment of a central hostel which could be used as a home for young women from England who would be willing to engage in domestic employment provided it was not necessary to "live in." Up to the present time no steps have been taken to put the suggestion into effect. One hundred and fifty girls from Great Britain arrived in Ottawa during the year and were placed in domestic employment. The interest taken by the office in these newcomers to the country extended beyond merely placing them in positions, and every effort is made to see that they have an opportunity of establishing church and social connections as well. An unsolicited testimonial to the work of the Women's Department reading as follows, was received from a local organization:—

"At the annual meeting of the Big Sister Association, great stress was laid upon the very able and kindly assistance rendered by you, and in accordance with the feelings of the members we desire to express our appreciation of the help so courteously rendered, and to advise you that much of what our organization has been able to do in Social Service is due to your co-operation."

In spite of the fact that the type of farming carried on in the Pembroke district requires comparatively very little extra help except during the harvesting seasons, the Pembroke Office was called upon to supply 270 men during the year. Wages averaged from \$30 to \$50 a month and day labour from \$1.50 to \$2 per day with board, according to the season of the year. The manufacturing industries with one exception reported the best year which they have had since the Service was inaugurated. The amalgamation of three of the lumber firms in Eastern Ontario resulted in a slight reduction in the number of mill workers required in Pembroke but the activity in other directions readily absorbed the surplus labour. Among the skilled tradesmen transferred out of the zone were engineers, firemen, setters, filers, millwrights and cooks. The expenditure on highway and building construction in Pembroke and district was higher than

in the previous year and this office was called upon to supply a large number of workers, both skilled and unskilled, on these jobs. An interesting order was received and filled for thirty dock builders for employment at Fort Churchill on James Bay. These workers were transferred from the end of steel to Fort Churchill by aeroplane. There was no noticeable increase in the demand for domestic help except in the case of casual workers. The available supply of women interested in this type of work was sufficient to take care of the local demand.

An unusual feature of the work done by the Peterborough Office was the fact that the placements totalled exactly the same number as in 1927, namely, 2,027. Peterborough did not experience the same degree of industrial expansion that was evident in such centres as Oshawa and Windsor, but employment conditions were favourable and resulted in a normal demand for workers throughout the entire year. The only addition to the manufacturing industries of Peterborough during the year was the establishment of a branch of an American concern which manufactures outboard motors for small boats. As usual, the Trent Valley Canal absorbed a number of ex-service men on maintenance work and for bridge and lock tending. This work, however, is of a purely seasonal nature.

Industrial conditions in the Port Arthur district were such that three members of the staff of the Employment Office were able to place 10,834 men and women in positions. This figure represents the largest number of placements per staff member of any office in the Province and indicates the efficient nature of the Service and the disregard for the limits of office hours shown by the staff. In order to make this number of placements the Port Arthur office opened earlier in the mornings and was also kept open at night whenever it was necessary to do so in connection with out of town placements. Winnipeg has always been regarded as the logical source of supply for the industrial operations in the Port Arthur and Fort William districts. Many of the large lumbering companies maintain offices or representatives in Winnipeg during the recruiting season but the work done by the Port Arthur Office is indicating to local employers that the Service can take care of their requirements. As a result the records indicate that there was a reduction of 23 per cent. in the number of men recruited through the Employment Service in Winnipeg for employment in the Port Arthur district as compared with 1927. The same condition which affected the pulp and paper industry elsewhere throughout the Province, namely, temporary over-production, resulted in a falling-off of 400 placements in this industry so far as the woods operations were concerned. Steady employment in the pulp and paper mills themselves, however, somewhat offset the reduction in the woods operations. The building industry was exceptionally active so far as the construction of elevators, schools, store buildings and residences was concerned. The shipbuilding trade was very quiet. Railway maintenance work, transportation and storage absorbed a large number of men throughout the year, while 69 placements were made in connection with development work on new mining prospects.

Although the winter of 1927-28 provided less than the usual volume of employment in St. Catharines this was compensated by a marked improvement during the spring and summer months. As a result the St. Catharines Office made 4,147 placements of men and women, representing an increase of 10 per cent. over 1927. The building permits passed the million dollar mark in St. Catharines and as a result building mechanics were kept steadily employed. Seven firms reported increases in their plants and equipment, while one industrial

concern moved from St. Catharines to Galt. Plenty of work was available on the large dry dock at Port Weller during the summer months. The main difficulty in securing ordinary labourers for this work was due to lack of camps where men could stay and the fact that a number of men are reluctant to accept work on the canal because of the number of accidents which occurred during the year. There was a demand for over 600 farm workers but the supply of qualified help was not equal to the demand although 583 placements were made as compared with 525 in 1927. The office premises were moved to 146 King Street, where more adequate space has been available for the development of a women's department. The activity of the office in this direction is indicated by the fact that 145 women were placed in various capacities on farms, 227 in offices, 119 in factories, and 237 in domestic employment of a permanent nature. In addition, 305 casual placements were made in response to the demand for day workers in local homes.

A ten per cent. increase in the placements made by the St. Thomas Office reflects the relative industrial conditions in that city and district during 1928 as compared with 1927. An increase in the tobacco acreage provided a corresponding increase in the calls for farm help, the total placements in this occupation being 550 men. Although there were no new industries established in St. Thomas, the factory workers were kept steadily employed and in some cases overtime production was necessary to keep pace with the demand for the products manufactured locally. The building and construction industry and the railroads all called for more men than during 1927. In addition, 473 women were placed in household, hotel and factory positions.

Although the placements made by the Sarnia Office were slightly higher than in the previous year, the improvement in industrial conditions reported by the superintendent has been a little below the average for the Province as a whole. There was, however, marked activity in the oil manufacturing industry, the farm implement business and the local bridge manufacturing company while the salt industry has absorbed approximately 30 per cent. more men than in previous years. The building and construction industries called for fewer men than in 1927 which was offset by an increase in the demand for sailors and freight handlers.

The principal industry served by the Sault Ste. Marie Office is lumbering in which over 800 men were placed during the fiscal year. A shortage of qualified bush workers made it impossible to fill all the orders which were received and the clearance system was utilized to bring men in from other sections of the Province and from Montreal. Activity amongst mining syndicates operating in the Sault Ste. Marie district brought many orders to the office, principally for cooks, cookees, and surface men as the mines in the district have not yet reached an advanced stage of development. An increase of \$65,359 in the value of the building permits issued in 1928 as compared with 1927 provided employment for the total available supply of building mechanics throughout the summer months. One hundred and six men were placed on a dredging and dock building project on the Canadian side of the St. Mary's River. The production of approximately 90,000 tons of pig iron has kept the local steel mills busy and as this is the key industry in Sault Ste. Marie the volume of business has been reflected in a large number of orders for help being placed by employers with the local employment office. In addition to the extensive production of pig iron, over 40,000 tons of rails were rolled during the year. The Sault Ste. Marie Office placed 1,902 men and women in regular jobs and 806 men and women in casual employment during the year. In addition 1,460 men were transferred

into the Sault Ste. Marie zone during the year with the knowledge and consent of the local employment office superintendent. Forty-four concerns representing lumbering, railroad, iron and steel, pulp and paper, transportation, and mining industries placed orders with the office during the year.

Commenting upon the year's activities, the superintendent of the Sudbury Office writes as below:—

“The amount of business transacted by this office does not show any great increase over last year but rather reflects a steady growth. It is gratifying to look back on the ten years' record and find that the office is still holding the confidence and receiving the hearty co-operation of most of the employers in this district, some of whom have given their support since the opening year. Others have since moved to other zones and provinces but are still looking to the Sudbury Office for their labour requirements.”

In spite of the keen competition offered by the presence of three licensed private employment agencies in Sudbury, the Employment Service was successful in placing over 1,600 men in bush work, 2,896 on railroad construction and maintenance work and over 2,000 in all other industries, making a total for the year of 5,715 placements, or 9.34 per cent. more than last year. The increase in the development of the mineral resources in the Sudbury district resulted in a corresponding increase in the volume of building construction and over 200 houses were built in the town during the summer months. The Employment Service assisted in this construction programme by filling 264 vacancies in the industry. The erection of a new smelter, the opening up of the Falconbridge Mine and the prospecting and development work being done on mining properties near Sudbury is providing, and will continue to provide, a large volume of employment at that point. The Sudbury Office is kept open eighteen hours a day at certain periods during the busy season. This is more than double the prescribed number of working hours and is indicative of the spirit of the staff, and employers and workers have both commented favourably upon the work of the office.

The development of Northern Ontario could be deduced from the records of the Timmins Office which during the past year has had orders for more construction workers, more sawmill hands and more men for the mines than during the previous year. In order to take care of the local demand it has been necessary to utilize the clearance system extensively. The completion of a new mill for one of the mines operating at Schumacher and the mining developments in the Kamiskotia area have brought orders to the office for mill hands and surface workers respectively. As in the case of the Pembroke Office some of the men hired have proceeded to the place of their employment by airplane which is proving an important factor in the development of new mining fields. The extension of the T. & N.O. Railway from Cochrane towards James Bay and maintenance work on the Ferguson Highway have brought orders for construction labourers.

In the Men's Department of the Toronto Office the fiscal year was one of increased business, a larger number of placements, a very busy staff and a greater shortage of skilled workers in various lines. The city has gone through a tremendous building and construction programme which has taxed this office in the supplying of suitable men and there have been actual shortages of good husky labourers on several occasions. Conditions generally are greatly improved and more firms are dealing with the employment office than ever before. Registra-

tions numbered 12,814 as compared with 10,587 in 1927, and of this number 1,906 were immigrants, of whom 1,595 were British and 311 foreigners. The number of vacancies for the year increased by 5,000 and the number of placements effected by 6,073.

In the industrial section the demand for carpenters and painters showed a marked increase and was much greater than in the other building trades although stonemasons, cutters and concrete finishers were in demand but not available in sufficient numbers. Great activity was evidenced in the metal trades with a shortage of skilled mechanics. Orders for cabinet makers and wood pattern makers were more numerous than last year and resulted in many placements while considerable business was also done in the textile, boot and shoe and rubber industry. Satisfactory placements on short order were made of seamen and sailors during the summer months. Altogether 4,207 more placements were made in this section than last year.

In the business and professional section the figures indicate that the past year has been by far the most successful year since this section was established. The number of placements increased from 310 to 441 while the quality was of the same high standard as previously. Prosperous conditions and the introduction of a scientific management with the popularity of the credit system of retail merchandising all tend to increase the demand for professional and business help. It is obvious that the trend of the times through the quantity production of industry is materially increasing the ratio of this class of help to that of manual labour so that a continued increase in the number of placements through this section may be expected.

The remarkable growth of the work in the boys' section shows that with a suitable location where the boys would not be associated with the men this section has every prospect of becoming what it is intended to be, a clearing house for employment for the coming citizens of Canada. It has been possible to place boys of the better type in suitable employment but here as elsewhere there are "problem cases," boys who should receive thorough medical examination at a clinic established for the purpose and undergo whatever treatment is necessary to cure any ailments or disabilities before being placed in employment. The number of placements made in this section, 1,190, showed an increase of 647 or more than double the number of last year and the wages or salaries ranged from \$6 to \$16 per week, some of the boys receiving substantial increases during the year.

A review of the work of the out-of-town labour section shows an increase of 148 placements over the previous year. There were 1,200 labourers placed this year as compared with 425 but only 450 bushmen as compared with over 1,100 last year. The increase in the number of labourers placed is attributed to the extra amount of work done by the railroads in this vicinity and the work carried on by the Hydro-Electric Power Commission on their new power lines. The decrease in placements of bushmen was caused by the lack of experienced men applying for this kind of work. One of the largest lumber companies operating in Northern Ontario asked this office to supply them with men in gangs of thirty or more. Only seventeen men could be obtained for them which indicates the shortage in Toronto of experienced bushmen. Many had secured jobs in the city on the many buildings being erected or with the Toronto Transportation Commission which absorbed a large number of men this fall. Lumbering has been carried on very extensively for a number of years with the result that many limits, which consist mostly of pine, have been cleared up. Of the companies

that secured their help through this office, some have acquired new limits in other districts, some have ceased to operate and others are operating hard wood camps, which work is less attractive to experienced bushmen. Many of them have gone north on their own account and located in pine camps.

In the farm section during the winter the demand for farm hands fell off until February, since which time there has been a steady demand from this office. It has been possible generally speaking to place experienced farm hands in jobs at any time since February and most of the time the demand has exceeded the supply. This is due in part to the fact that during the summer and fall months there was so much building and construction work in the city and strong healthy men prefer this work with its higher wages to life on the farm with its loneliness and attendant hardships. The type of men applying for farm work this year has been good. The demand for peach pickers was good, one employer in Queenston taking over 100 men from this office. The apple crop did not demand so many workers, though one employer in Oakville hired fifteen men here for the work. There has been a great demand from farmers living outside this zone and the office had several hundred transfers to other offices in the Province. From the present outlook the demand will keep up and it will be possible to place all men who are looking for farm work and who know something about it. One difficulty in connection with this work is the fact that some farmers undertake to hire men in this office from among the unplaced applicants without any reference to the staff. This is a mistake as they pick up men they know nothing about and the Employment Service cannot assume any responsibility for men hired in this manner.

The number of workers dealt with by the clearance section during the past year was 441, or an increase of 233 over last year. This increase is due to the improved industrial conditions throughout the country and to the fact that employers of skilled labour have been satisfied with the service and co-operation rendered by this section. Manufacturing in general has been greatly increased through the Province, automobile and allied industries and wood-working concerns being especially active. One hundred and thirty-seven more men than last year were transferred for this type of work while there was a slight decrease in the number for construction work due to the amount of employment available locally. Of the workers classified as domestic and personal 118 were transferred, or an increase of 86 and good wages were assured these workers.

The scouts, whose duties keep them in close touch with employers of labour, report a great expansion in many lines of business, with many firms busier than ever before and building operations very brisk. From the beginning of the year until June there was a surplus of men for work but from the middle of June until October it was often impossible to meet the requirements and by the end of October men were again plentiful. Employers in general are very optimistic regarding business for the forthcoming year.

In the handicap section of the Employment Office there were 1,061 new registrants during the year, nearly 80 per cent. of whom were disabled ex-service men and 20 per cent. disabled civilians, and 17 per cent. of these civilians were disabled as a result of industrial accidents. The number of placements effected, 3,448, showed an increase of 1,107 over last year and 1,187 were of a regular nature. Of the handicapped applicants placed over 92 per cent. were ex-service men and over 80 per cent. were pensioners, 12 per cent. being disabled ex-service men not in receipt of disability pension.

Among the new applicants, a considerable increase is noted of men who have passed middle age and who find it difficult to hold up their end in com-

petitive industry of the present day. Slightly more than 7 per cent. registered directly as a result of old age with its attendant infirmities, while 5 per cent. of the total consists of applicants handicapped by disabilities of the nervous system. Medical cases continue to constitute the greater number of applicants, chief among which are those suffering from heart and chest disabilities. The reason for this is obviously due to the progressive nature of their ailments.

Despite the volume of placements made by this section during the fiscal year just closed, the difficulties met with in placing chronic "problem cases" suffering from tuberculosis, mental or nervous disorders and various medical cases who are unable to work more than a very limited number of hours each day still remain. The situation affecting ex-service "problems" who are in receipt of disability pensions has been slightly eased since the formation of the Industrial Problem Board, which consists of representatives of the Employment Service of Canada and the Department of Pensions and National Health. This board has been in operation for three months and deals with cases selected by the handicaps section of the Government Employment Service, which is responsible for the submission of the recommendations in each case. As a result of these recommendations, a number of applicants have been placed in the Vetcraft Shop under Order-in-Council P.C. 2328, some for sheltered employment and others for a limited period only in order to determine their adaptability for competitive industry. A number have also been admitted to the indigent men's ward at Christie Street Hospital under Order-in-Council P.C. 1197. These applicants were in receipt of a very small pension for disability but owing to premature old age in many cases had become unemployable in the general labour market. The general situation with regard to "problem cases" would be considerably eased were the facilities of the Vetcraft Shop extended and other forms of sheltered employment created.

The results achieved by the handicap section during the fiscal year constitute a record since the section was created, and the gratifying success is in no small measure due to the splendid co-operation and enthusiasm of the entire staff. The special scouts attached to the office by the Federal Department of Labour continue to render yeoman service which has resulted in the most cordial relationship being maintained between the employers of labour and this office, while the office staff continue to put forth every effort to improve the quality of service rendered both to the government and the disabled citizens who avail themselves of the facilities of this branch of the employment service.

The appreciation of this section is extended to the medical and neurological clinics at the Toronto General Hospital where applicants are examined and reports furnished at the request of the handicap section without undue delay. These reports are very important and materially assist the interviewers when classifying the applicants with respect to suitable employment. This section appreciates also the co-operation of the various departments of the civic, provincial and federal governments, together with the public utilities and business concerns throughout the city.

The Women's Department of the Toronto Office changed its location to 147-149 Church Street and has thus secured better working conditions for the staff and more suitable accommodation for the applicants and employers using the offices. The firms which obtained help through the clerical and industrial section prior to the move continued to do so and a campaign is now in progress to increase the number of vacancies received by giving publicity through canvassing and by other means to the types of workers available. The largest number of vacancies for clerical workers was received in February when employers

called for 163 and all the positions were filled. For factory workers the largest number of vacancies was in September when 361 calls were received and 200 placements made. The general improvement in industrial conditions was shown in an increase of 504 orders for factory workers during the year.

The broad field covered by the houseworkers' section may be judged by the fact that 125 hotels, clubs and camps called on the section for the help they required for the summer. The office was able to meet the demand fairly well although the transfers showed a decrease of about thirty as compared with those of last year, no doubt because many of the applicants who were placed the previous year were re-employed direct. However, in some hotels the requests were actually five times greater than last year. The placement on farms which was formerly carried on in the industrial section was taken over by the houseworkers' section on April first with the result that the numbers were almost double those of last year. The demand for casual workers was considerably better than the previous year, the number of placements being 900 more. This increase is partly due to the great scarcity of cooks-general and resident maids. Very little distress was reported among the workers. Those who were unfortunate day after day were mostly those who were classed as poor workers by the employers, or too old or unfit for heavy work. Oftentimes the interviewer at the desk would be distressed and perplexed to know what to do with such applicants, although it was necessary to refer fewer applicants than last year to the charitable organizations. It is interesting to note that 1,738 workers from Great Britain were registered and placed through this section during the year as a result of the continued co-operation between the Employment Service and the Immigration and Colonization Branch of the Department of Agriculture.

The showing made by the Windsor Office was outstanding in the fact that there was an increase of 52.7 per cent. in the number of placements made as compared with 1927. There were 1,987 more men who registered for employment, and 2,189 more calls for male workers than during the previous year, while the women's department also showed an increase of 875 placements. The total vacancies for women were 3,619 which was 1,132 more than in 1927. The following extracts from the report of the Windsor Office superintendent indicate clearly the marked improvement in industrial conditions in the Windsor district:

"During the summer months the Ford Motor Company had approximately 9,000 employees on its pay roll, this being a record for the local plant. The many auxiliary plants which cater to the Ford Motor Company, General Motors and Chrysler Corporation were exceedingly busy and more skilled men were placed by this office with these concerns during the past year than in any previous period. Great activity was shown in the building trades and many large projects such as the Ambassador Bridge, Detroit and Windsor Tunnel, St. Mary's Academy and a twelve-storey office building are well under way at the present time. There was a fairly large demand for farm hands during the spring and summer months and some difficulty was experienced in filling all orders owing to the great demand for help in the Border Cities. During the last week in September a severe frost damaged many acres of tomato plants and approximately ten per cent. of the tobacco crop was ruined. There was a marked increase in European applicants during the past year. This class of applicant is very difficult to handle because of their lack of knowledge of our language and customs. There was a noticeable decrease in the number of Finnish applicants. It is estimated that the population of the Border Cities has increased by 10,000 people during the past year."

## Private Employment Agencies

Below will be found a table indicating the activities of the private employment agencies in Ontario during the twelve months ending October 31, 1928. It is interesting to note that while the public employment offices placed 12.33 per cent. more men and women in positions during 1928, as compared with 1927, the increase in the business of the private employment agencies has been less than 6 per cent. for the same period.

## Board of Stationary and Hoisting Engineers

Chairman of the Board: J. M. BROWN

Members of the Board: W. J. SCOTT, S. G. ROSE

Inspector: E. J. EVERETT

Office: Parliament Buildings, Toronto

It is pleasing to note the steady improvement each year in the type of candidates appearing for examination for engineers' certificates. This may be attributed partly to the easier facilities in acquiring a thorough technical education which are presented by the various technical schools to the young men of to-day. The grading of the certificates, however, which was inaugurated by the Board of Examiners in 1920, has also had a decided effect in raising the standard of stationary engineers in Ontario. To qualify for a higher grade certificate necessitates study and taking more than a passing interest in one's daily work. This increasing efficiency on the part of the engineer not only gives greater security in the protection of human life, but is becoming a factor in co-operation between employee and employer. A mutual interest in efficiency is resulting in a better understanding, and the expert knowledge of the competent engineer is being recognized more and more in the matter of higher remuneration.

A further satisfaction is the happier relations now existing between plant owners and the Board of Examiners. Realizing the obvious advantages in employing a qualified certificated engineer who understands his business, owners as a rule have no desire to evade the law, but their attitude is rather that of whole-hearted support.

Following is a report of the activities of the Board for the fiscal year 1928:—

### "A"

Certificates granted during the fiscal year 1928.....		16,625
By EXAMINATION:	Number granted

## REVENUE STATEMENT

This fiscal year shows increased activity in all work coming under the jurisdiction of the Steam Boiler Branch. The total amount of moneys transmitted to the Treasurer of Ontario was \$22,152.90 as compared with \$19,102.16 for the fiscal year 1927.

Model of boiler shop designed by officials of the Steam Boiler Branch.

## Inspection of Factories, Shops and Office Buildings

Chief Inspector: JAMES T. BURKE

Office: Parliament Buildings, Toronto.

In submitting the forty-second annual report of the Factory Inspection Branch of the Province of Ontario, it is a pleasure to report continued progress in the work of the Branch. During the year the inspectors were required to make a number of inquiries and investigations into several matters coming within the scope of the Factory, Shop and Office Building Act. The most important of these investigations were in connection with carbon-monoxide, duco systems of spraying paint under compressed air and chromium plating, as well as certain fatalities. The expansion in industry has given rise to the use of many new methods which in some cases are attended by hazards to employees. Co-operation has been maintained between the Factory Inspection Branch and the Provincial Department of Health in order to obtain satisfactory results in dealing with these problems.

### WOODWORKING

The converting of various kinds of wood into lumber, furniture, vehicles, buildings, etc., is perhaps the oldest and most important of industries embracing a number of specialized trades. The growing demand for furniture has increased the capacity of factories to such an extent that very large buildings are equipped with the latest machinery and processes to accelerate the early completion of orders. Another development in the industry has been the specialization in the manufacture of chairs, tables, beds and mattresses, the making of which has been looked upon in the past as a side-line but the number of specialized factories is increasing each year. The activity in building throughout the country has also been a factor in the development in the joinery branch of this industry.

The list of accidents which are reported yearly as being due to woodworking machinery affords ample evidence of the necessity for adding special precautionary safeguards. In practically every branch of the industry high-speed cutting tools are used. Operators, therefore, require knowledge and careful instruction in the use of their machines, the safeguards provided and of the safe methods of operating the machinery. The upkeep of tools is also of great importance. There is still some difficulty encountered where older types of machinery are used although such are gradually being replaced by modern machinery operated from motors and in many cases by direct motor control. The absence of adequate exhaust systems is also an item of danger in many small plants because of the accumulation of waste materials on the floor.

It is amazing to find how little importance is attached to illumination in some of the woodworking plants and yet it is obvious that where such dangerous machines as woodworking tools are not furnished with sufficient light the risks of serious accidents are great. Although it is generally conceded that light is a tool which adds to the efficiency of every other tool, this fact is often ignored. Poorly illuminated workshops result in a poor quality of work, a lessened output and an increase in eye strain. The placing of woodworking machines in the most advantageous positions for light is an important factor. The custom usually followed in order to obtain natural light is that at least ten per cent. of the floor space be allocated for this purpose. Many occupiers are of the opinion that the providing of a certain number of windows is their only responsibility, but this

is by no means the case, as it has been found that the admission of natural light from above is the best possible arrangement, provided that care be taken to exclude the direct rays of the sun. The saw-tooth type of building with a southern aspect and weather proof has been found to fulfil this purpose most satisfactorily. In addition, windows should be kept clean, walls and ceilings should be painted or whitewashed frequently and electric light bulbs washed because dust adheres to bulbs and diminishes such illumination in a short time.

With the advent of cold weather certain woodworking plants are confronted with the problem of low temperatures. The constant opening of doors for the receiving and discharging of materials is difficult to control and in such cases the heating units should be so placed that those employed may warm themselves from time to time in the coldest weather. It is important that such shops should be warm before the employees commence work.

#### ABRASIVE WHEELS

The substitution of abrasive wheels for sandstones is considered a step toward advancement as it is claimed that for the grinding of metals and cleaning of castings the dust from abrasive wheels is less malignant than that from sandstones because it contains little or no silica and that the abrasive wheels cause less dust because of their lasting qualities. The danger, however, is with the bursting of the wheels, usually caused by too high speed, flaws or incorrect mounting so that each wheel should be provided with an efficient steel or wrought iron guard and operators should be provided with sterilized goggles.

## DERMATITIS

High temperatures, water ammonia and ammonia salts, shellac, pumice powder, wood dust, chrome ore, cyanamide and "dust" cyanamide, flour, sodium, hyposulphate, formaldehyde, mercuric chloride, arsenious acid, glue, sand, gutta percha, tobacco leaf, calcium carbide—"vesol"—liquid soap, etc., will cause dermatitis.

The microscopically uninjured skin is capable of considerable resistance to irritating substances but when there is any abrasion or when the skin becomes sensitive through soaking or inflammation, dermatitis is liable to occur. Workers' hands need the most careful inspection and care daily if the cases of dermatitis are to be reduced.

The stains for wood used by furniture polishers are chiefly two anilin dyes, bismack and vandyck brown, and bichromate of potash spirit and shellac are also used with oil as the actual polishing medium. All or any of these substances may produce dermatitis, but it is probable that the chief cause of dermatitis is the bichromate stain, which attacks the broken skin surface. The proper protection of all injuries, however small, is essential where a solution of this salt is used.

## CHROME PLATING

Oxide of chromium is readily soluble in water and forms chromic acid. This oxide was thought to be chromic acid because it takes up water so readily. It also picks up water from the air to form the acid when left standing. When the chromium baths are at a comparatively high temperature, the fumes rise and one grain of fumes inhaled during the day will destroy the nose membrane in a short period of time. Where the tanks are 4 feet square, a 24-inch fan operating at 1,400 r.p.m. should be connected to a 14-inch pipe to remove the fumes.

The Chemical Section of the National Safety Council presents the following summary of safety precautions:—

*Poisonous Compounds:* Chromic acid, chromium sulphate, chrome alum, bichromates of ammonium, potassium and sodium, etc.

*Dangerous Forms of Exposure:* Solids, liquids, dusts and fumes.

*Mode of Entry into Body:* Through abrasions and sensitive portions of skin and upper respiratory tract.

*Minimum Toxic Quantities:* Unknown.

*Action Cumulative or Non-cumulative:* Non-cumulative but persistent unless completely removed from sores, due to a burrowing action of the chemical.

*Susceptibility Variable or Non-variable:* Greater among newly exposed persons and among those having sensitive skins. Indirectly affected by personal hygiene.

*Acute Symptoms after Brief Severe Exposure:* Itching or excema on exposed parts of body. Ulcers from slight skin abrasions, at root of finger nails, at knuckles or where chafing occurs. Sneezing followed by gradual perforation of central nose wall (the septum).

*Chronic Symptoms after Prolonged Mild Exposure:* No direct constitutional effects. Extensive skin disorders may follow failure to remove the chemicals thoroughly.

*Characteristic Signs or Proof of Poisoning:* Chromium in urine. Limitation of nose ulcers to cartilage of septum.

*Medical Treatment:* For recent cases, use solution given under paragraph 11 to neutralize the chrome action and remove it from the ulcers; followed by aseptic dressing that should be waterproofed (by adhesive plaster, collodion or gutta-percha tissue), if the exposure continues. Treat chronic cases with lead-and-opium wash.

*Preventive Methods:* Enclose grinding processes to confine the dust. Ventilate all processes that generate dust or fumes. To avoid direct handling, use waterproof gloves, aprons and boots. Where direct handling is necessary, lessen absorption by daily rubbing into the skin before work a small amount of salve such as three parts of petrolatum and one part of lanolin. Also neutralize chemicals on body by daily rinsing after work with 5 per cent. solution of either sodium thiosulphate (hypo) or sodium bisulphite. Provide good wash rooms and require high personal hygiene. Under severe exposure, provide weekly or daily examination of arms, etc., by first-aid attendant or physician.

## TAR STILLS

The following rules for cleaning and repairing tar stills are the result of the combined efforts of the management of the Dominion Tar and Chemical Company and the Factory Inspection Branch who are of the opinion that the observance of these rules will promote safety in these operations.

### RULES FOR THE CLEANING AND REPAIRING OF TAR STILLS

#### "A"—TAR STILLS

1. FINISHING STILL: (a) The still must be finished on pitch; (b) immediately the hot pitch has been run off, the still must be blown through with steam until no vapours issue from vapour line.
2. COOLING: The still must then be allowed to cool for at least twenty-four hours.
3. CONNECTIONS: Manlid opened, *all* pipes connected to the still must not only be disconnected but also blanked off with metal flange and joint securely bolted. Flange must have large indicator lip. The connections attached to the still are left open.
4. COOLING: Still and brickwork allowed to cool thoroughly.
5. VENTILATION: Air pipe placed in still and current of air blown in from compressor, air being taken from source free from noxious gas. The air pipe must extend to bottom of still to insure complete removal of gas or vapour and to give adequate circulation of air.
6. TESTING FOR GAS: After thorough ventilation the still is tested by insertion of a cage of white mice, they should be in normal condition after five minutes' seclusion in the still.
7. INSPECTION: An iron ladder is placed in manhole. Manager, after being fitted with safety belt with rope attached and two men in attendance on top of still, enters the still and makes thorough inspection. If manager finds conditions in still satisfactory, he will sign the inspection book certifying still to be fit for entry. If conditions are not satisfactory, still must be resteamed, and tested as before.
8. CLEANING OR WORKING IN STILL: *No man must enter still without being fitted with safety belt.* During the entire time the man is in still an attendant *must remain on top (outside) of still*, holding rope end of safety belt and ready at all times to render assistance. The delivery of fresh air into the still must be continuous throughout all operations. The cage of white mice must be left in the still during the complete operation. If at any time the mice show signs of distress, the operator must come out at once and report to the manager.

"B"—OIL STILLs, COLD TAR STILLs AND ALL CLOSED TANKs UNDER 20,000  
GALLONS CAPACITY

1. STEAMING: As soon as the vessel is emptied it must be thoroughly steamed until all vapours are driven from it.
2. CONNECTIONS: Manlid opened, *all* pipes leading into still or tank must not only be disconnected, but also blanked off with metal flange and joint securely bolted. Flange must have large indicator lip. The connections attached to the still or tank are left open.
3. COOLING: The vessel is then allowed to cool thoroughly.
4. VENTILATION: Air pipe placed in still or tank and current of air blown in from compressor, air being taken from source free from noxious gas. The air pipe must extend to bottom of still or tank to insure complete removal of gas or vapour and to give adequate circulation of air.
5. TESTING: After thorough ventilation the still or tank is tested by insertion of a cage of white mice; they should be in normal condition after five minutes' seclusion in the still or tank.
6. INSPECTION: An iron ladder is placed in manhole. Manager, after being fitted with safety belt with rope attached and two men in attendance at manhole, enters the still or tank and makes thorough inspection. If manager finds conditions in still or tank satisfactory he will sign the inspection book, certifying still or tank to be fit for entry. If conditions are not satisfactory, still or tank must be re-steamed and tested as before.
7. OPERATIONS IN STILL OR TANK: *No man must enter any still or tank without being fitted with safety belt.* During the entire time the man is in still or tank, an attendant *must remain at manhole* holding rope end of safety belt and ready at all times to render assistance. The delivery of fresh air into the still or tank must be continuous throughout all operations. The cage of white mice must be left in the still during the complete operation. If at any time the mice show signs of distress the operator must come out at once and report to the manager.

"C"—COKE STILLs

1. FINISHING: The stills must be finished on coke, otherwise cooled and treated same as a cold tar still.
2. QUENCHING: The still must be quenched within six hours of finishing using not less than three hundred (300) gallons of water.
3. OPENING UP AND VENTILATION: After the heavy flow of steam has eased down at the outlet of the distillate pipe the two top manlids are raised and still allowed to cool for a minimum of two hours, when the rear manhole cover is removed and excess water released.
4. DISCONNECTING STILL: All piping must be disconnected as follows:—(a) Distillate line broken and blank flanged at outlet of water condenser; (b) tar charging line at top of still; (c) steam and water lines at top of still.
5. ENTERING STILL: Not less than five (5) hours after quenching the still may be dug open at the rear manhole and an entry made for the removal of the coke.
6. OPERATIONS IN STILL: The removal of the coke must be done in the daytime. No workman shall be permitted to enter the still until it has been approved by the manager.

"D"—COVERED STORAGE TANKs OVER 20,000 GALLONS CAPACITY

1. EMPTYING OF TANK: The layer in bottom must be reduced to a minimum before attempting to clean or repair.
2. COOLING AND VENTILATION: All manholes opened, all piping completely disconnected and tank allowed to cool for at least three days before entry. A windsail must be erected at one manhole so that a good supply of air will be forced through the tank.
3. INSPECTION: When tank has been properly cooled and ventilated the manager must equip himself with a "Pure Air Machine" and generally inspect condition of tank prior to workmen entering. If conditions are satisfactory he will certify tank to be fit for entry.
4. CLEANING OR REPAIRING: Any workman, before entering the tank must equip himself with a "Pure Air Machine" with an operator in attendance outside delivering pure air continuously through the intake tube by means of a bellows. Cleaning of storage tanks should be done during cold weather.

"E"—OPEN TOP STORAGE TANKS

1. **EMPTYING OF TANK:** The layer on the bottom must be reduced to a minimum before attempting to clean or repair.
2. **COOLING AND VENTILATION:** All manholes opened, all piping completely disconnected and tank allowed to cool for at least three days before entry. A windsail must be erected at one manhole so that a good supply of air will be forced through the tank.
3. **INSPECTION:** When the tank has been properly cooled and ventilated the manager, wearing safety belt with rope attached and two men in attendance, will inspect the tank and, if conditions are found satisfactory, he will certify tank to be fit for entry. While manager is inspecting tank, attendant must be stationed at manhole and one attendant must be equipped with a "Pure Air Machine" ready to enter tank and render assistance. The duty of the other attendant is to operate bellows.
4. **CLEANING OR REPAIRS:** Any workman, before entering tank, must see that two attendants are stationed at manhole and that one attendant is equipped with a "Pure Air Machine," ready to enter tank and render assistance. The duty of the other attendant is to operate bellows. Cleaning of storage tanks should be done during the cold weather.

"F"—TANK CARS

1. **EMPTYING:** The layer on the bottom must be reduced to a minimum before attempting to clean or repair. The manhole must be removed and tank filled with water and allowed to stand a short time before emptying.
2. **INSPECTION:** After tank car is emptied the manhole and outlet valve remaining open, a cage of white mice is placed in the tank and left there for five (5) minutes. If the mice remain unaffected, the manager, wearing a safety belt with rope attached and having two men in attendance at manhole, will enter tank and make thorough inspection. If conditions are satisfactory, he will certify tank to be fit for entry.
3. **CLEANING OR REPAIRING:** Any person entering a tank car must be equipped with a safety belt with rope attached and an attendant must be stationed on top of car holding end of rope and ready to render assistance.

The volume of work accomplished by the Factory Inspection Branch is indicated by the following figures.

	Year 1927	Year 1928
Total inspections and visits.....	18,870	18,565
First inspections.....	11,539	12,416
Second inspections or revisits.....	7,331	6,149

In addition to these are investigations of accidents and complaints, also inspection of buildings at grounds during Canadian National Exhibition, and delivery of 519 contract clothing permits under Section 52.

There were also the usual special visits, office calls and conferences incidental to inspection.

Employees in above industries, mercantile establishments and office buildings numbered 313,595.

Year	Males over 16	Males 14-16	Females over 18	Females 14-18	Children under 14 dismissed	Total
1927	202,417	699	69,420	2,821	38	275,357
1928	226,331	556	81,737	4,971	24	313,595

## HOURS OF LABOUR PER WEEK

Males					Females				
45	50	54	58	60	45	50	54	58	60
92,122	51,960	32,832	3,821	23,438	53,670	14,707	6,945	564	3,938

Also 29,598 employees, male and female, working approximately 50 hours per week.

Orders issued relating to the various requirements of the Act totalled 6,691 as compared with 6,924 in the year 1927.

## PERMITS

Total applications for permits, overtime and others, numbered 1,244 and were issued as follows:

Year	Regular Sec. 33	Bake Shop Sec. 71	Fruit Camps Sec. 40A	Sale of Bread manufactured out of Province, Sec. 70	Contract Workers Sec. 52	Total
1927	511	33	22	2	634 (24 cancelled)	1,202
1928	697	7	30	..	510 (26 cancelled)	1,244

## COMPLAINTS

One hundred and twenty-four complaints were received during the year. Upon investigation 63 were upheld, 38 not upheld, 22 are pending investigation and one does not come within the jurisdiction of this branch. Some investigations cover more than one complaint. Subjects of complaint are:

Year	Heat	Elevators	Fire Protection	Child Labour	Lavatories	Sanitation	Boilers	Guards	Ventilation, Dust, Fumes, etc.	Overtime	Hours of Labour	Light	Mechanical Exhaust	Sunday Work in Bakeshops	Miscellaneous	Violation of Stationary Engineers' Act	Violation of Minimum Wage Act	Violation of Adolescent School Attendance Act	Not under our jurisdiction	Total
1927	5	17	2	5	17	4	16	..	12	10	24	2	3	2	9	11	1	5	3	148
1928	4	4	8	5	16	3	12	2	7	9	23	1	3	2	9	7	5	3	1	124

## PROSECUTIONS

Proceedings were taken against five firms for violation of the Ontario Factory, Shop and Office Building Act: three under Section 57 for failure to have boilers inspected, one under Section 34 for working overtime without a permit and another Section 41 for failure to provide sanitary conveniences.

In two of the cases under Section 57, fines amounting in all to \$100 were imposed. In the other, the case was withdrawn on compliance with the regulation and boiler inspection report sent in. The case under Section 41 is still pending. A fine of \$10 was imposed for violation of Section 34; making total amount of fines \$110.

## VIOLATIONS

Reports of violation of Acts in the enforcement of which the inspectors have a responsibility were submitted as follows:

Of the Stationary and Hoisting Engineers' Act.....	78
Of the Steam Boiler Act.....	15
Of the Adolescent School Attendance Act.....	47
Of the Minimum Wage Act.....	1,205

## EXPLOSIONS

Three explosions were reported during the past year. One gasoline, one acetylene tank, and one hot metal, causing two deaths and injuries to six others, but no boiler or pressure vessels coming under our Act exploded.

## ACCIDENTS

Five thousand eight hundred and nine accidents were reported during the year 1928, 35 of which were fatal, as compared with 5,425 reported in 1927, with 34 fatal.

Fatalities were due to:

Suffocation.....	1	Janmed between articles.....	2
Burns and scalds.....	1	Gears, cogs, sprockets.....	1
Cranes and derricks.....	1	Belts, pulleys, shafting.....	1
Elevators.....	2	Saws.....	2
Electricity.....	7	Conveyors.....	1
Explosions.....	2	Hammers.....	1
Falling substances.....	4	Drowning.....	1
Falls.....	6	Industrial poisoning.....	1
Infection.....	1

## J. H. AINSBOROUGH

During the year many recommendations were made for the purpose of guarding various kinds of machinery, open gearing, belting pulleys, shafting, circular saws, jointers, wood shapers and other mechanical devices. All canning factories in this district were visited twice during the canning season and all recommendations carried out. Restaurants and Chinese laundries were found in fair condition and local health officials were always willing to co-operate when requested by the inspector. Bakeshops were in a fair condition. When it was necessary to order screens or the painting and repairing of screens, such orders were usually carried out promptly. Very little trouble was experienced in the enforcement of the Minimum Wage Act and the Adolescent School Attendance Act. The inspection of boilers and pressure vessels received careful attention and where no inspections had been made in accordance with the Act, orders were given for such and with very few exceptions were promptly complied with.

There were four fatal accidents in this district during the year. In a brickyard an employee went into a chute after his shovel and was smothered, and in another brickyard an employee fell from the top of a crusher, receiving fatal injuries. An employee at a portable sawmill fell across the saw, and an explosion of gasoline in a rubber factory caused the death of an employee a few days later from burns received.

---

R. ALBROUGH

Factory inspection follows along much the same lines each year, but owing to the constant changes in the various kinds of machinery and the use of more up-to-date methods in manufacture the work of an inspector has no end. A great deal of diplomacy must be used in dealing with both the large and small manufacturers in order to obtain the safest, healthiest and best working conditions possible under the various circumstances. Most trades were in a flourishing condition and business in general may be reported as good. The paper industry stands much the same as reported last year, some of the mills at the present time being closed down and others working only three or four days a week. A great number of recommendations were made during the course of inspection and in practically all cases were received in a spirit of co-operation and were promptly carried out.

No boiler explosions occurred in this district during the year. Some of the small plants that do not carry boiler insurance have the annual inspection made when the time comes due, but in many cases owners wait until the inspector comes around and orders the inspection to be made. It was necessary in two cases to take legal proceedings against the owners of cheese factories for failing to have their boilers inspected as ordered. The fines imposed were fifty dollars and costs in both cases. Considerable attention was given to the kind of air receivers used in garages and in having the annual inspection made on them. In all cases air receivers now in use were found to have been constructed for that purpose and in no case was a kitchen range boiler being used for air storage, which was a common occurrence until the Factory Inspection Branch set the maximum air pressure on these vessels at fifty-five pounds per square inch. The Stationary Engineers' Act was well observed and there now appears to be a sufficient number of certified engineers to cover the steam plants coming under the Act. There was very little cause for complaint of the working conditions in steam laundries. Most laundry machinery now manufactured is adequately

guarded before leaving the factory. The placing of machinery, good ventilation, heating and lighting are important factors in enabling firms to turn out first-class work at a minimum cost so as to be able to keep pace with the keen competition of to-day. Attention has also been given to the Adolescent School Attendance Act and the Minimum Wage Act, all infringements being promptly reported.

The season of the year is at hand when the wood for the mill will be taken from the block pile in the yard, in some cases barked and placed there during the summer. These piles are usually built to a great height and in the winter months become a frozen mass of tangled pulpwood. Sometimes the sides of the piles are built up straight to a height of forty or fifty feet and very often run parallel with roads, power lines and pipe lines. This is a very dangerous practice and should be discontinued wherever possible, as piles of this construction can never be depended upon and a slide would be disastrous either to life or property, or both. Taking wood from these piles during inclement weather is one of the most hazardous operations around a paper mill and every precaution should be taken in the work. The men selected for this work should be careful and quick to act. The ground at the foot of the pile should be kept clear of obstructions to allow the workmen to get back from the face of the pile quickly in case of a slide or a block falling down the pile. Tools provided, such as pickaroons, hooks, etc., should be kept sharp to prevent them slipping when striking the wood as far too frequently painful wounds result from the use of blunt tools. A man should always be posted to watch the face of the pile and give warning to the men when a block starts to slide from above. The dangerous practice one too often sees around the block piles is a man on the top throwing down blocks to dislodge others or poking on the face of the pile with a pikepole to start a slide. When the face of the pile becomes dangerous through overhanging portions, the workmen should be taken away from the bottom to work at some safer place on the pile, while the dangerous part is being broken down. Good results are obtained by using a drag on an endless cable to break down the hanging parts and make a safe slope on the face of the pile. When dynamite is used on the pile only a man experienced in the handling of explosives should be allowed to do the work.

---

T. B. ANGROVE

In making a survey of the inspections in this district during the past year one is rather perplexed to know how to start, the duties of a factory inspector being so diversified, in his efforts for the betterment of the working conditions in factories, shop and office buildings throughout the Province to the mutual benefit of employers and employees alike. In the industrial plants there was a steady improvement in the number of persons employed and overtime permits were granted in some instances. In connection with the operation of these plants it may be said that the officials in charge are giving more consideration to the physical requirements of the employee with regard to health and safety conditions. In some cases it was necessary to bring pressure to bear to have the management comply with certain conditions of the Act, but when the requirements of the Act were complied with, they were quite happy and anxious to show the inspector the improvements made upon his return visit to the plant.

The introduction of duco and other spray paints requires considerable attention from the factory inspector because of their harmful effect on the health of the operator and also the inflammable nature of the materials used. Spraying

cabinets with exhaust fans were required from the owners of such plants and were installed in almost every case. Provisions to prevent inhalation of dust and grit particles are very generally installed but there is a slackness on the part of the foremen in some instances in allowing men to discard their goggles and respirators when working at abrasive wheels. There is also a tendency to remove guards from circular saws and punch presses and it was necessary to remonstrate with the foreman and men in this connection. Hoists and elevators are receiving attention and the necessity for inspection is very apparent. In one instance it was necessary to order repairs which will in all probability require a complete new outfit due to the decrepit condition of the present elevator.

In the matter of the employment of adolescents it is most regrettable that so many find it necessary to leave school at an early age and seek work in order to assist in supporting the home, but in every case investigated in the district certificates granting them absentee privileges were secured from the proper authorities. In some instances it was necessary to investigate a breach of the Minimum Wage Act, the offenders showing some hesitancy in making reply to questionnaires addressed to them by the Minimum Wage Board. The factory inspector's duties also include the reporting of violations of the Stationary Engineers' Act, and in some cases this was necessary in this district. In the main, however, the Act is conformed to.

The factory inspector has a very important job to perform in enforcing the inspection of uninsured steam and hot water boilers, air tanks and other vessels under pressure. This district comprises no less than seven counties and in order to discharge this duty it is necessary to enter every township in each county, which necessitates travelling by motor approximately 6,000 miles. This is mainly for cheese factory inspection. To show that this is necessary each year it might be interesting to quote one case. Three years ago a cheese factory boiler in this district exploded and two lives were lost. The factory was rebuilt and a second-hand boiler installed after due inspection. When this factory was visited during this year it was found that, notwithstanding the terrible warning given them through the consequences of their neglect in the past, they had not had their boiler inspected. Two other cheese factories operating in the immediate vicinity had also been negligent to the same degree.

A pleasing event took place in this district during the fiscal year, the occasion being the unveiling of a massive tablet donated by the Portland Cement Corporation of America to the Point Anne plant of the Canada Cement Company for having gone through the year without a lost time accident. A gala day was spent and the employees enjoyed the holiday and entered into the spirit of the occasion heartily. It is regretted that three fatal accidents occurred in this district during the past year, two by electrocution and one by misadventure, each accident being investigated and reported upon to the Chief Factory Inspector.

---

#### H. BOURNE

The employer is the agent who buys and sells the labour of his workers and he must necessarily find a market for his product. In so doing he finds that he is up against keen competition on all sides and must speed up production in his plant to meet a competitive price or close his doors, which means a loss of money for the owner and unemployment for the worker. Word is passed on to the department heads that the production must be increased to a point at which

wages, overhead expenses and a margin of profit may be taken care of. This speeding-up process causes increased strain and fatigue, thereby increasing the possibility of accidents. The writer has given this matter careful study and has found that in shops where consideration is given, the situation as a whole reflects on the entire surroundings of the worker, bringing good results to the employer and making for good citizenship. In order for a condition of this kind to be maintained the best efforts of the inspector and the co-operation of the employer are required. The past year has shown a marked improvement in trade conditions and indications are that the country is now due for a term of prosperity.

Many changes have been made in the way of safeguarding and improving conditions in the foundries of the Province during the year. Ventilation, heating, lighting and sanitation have received attention and the protection of equipment, including molding pits, furnaces, lifting tackle, conveyors, travelling cranes, sand slingers and ladles which are used in producing castings. Also eye protection has been given careful consideration

---

W. T. E. BRENNAGH

The fiscal year has been of great interest so far as the duties of the factory inspector are concerned. The demand for production is clearly shown by the increase in factory building activities. This is noticeable in this district, particularly in the Niagara Peninsula, where many new plants and costly additions have been and are being erected and the usual procedure of having the plans forwarded to this Department for approval has been adhered to. If the factory at the time of erection is well designed, having regard to ample working space and conditions for each employee, plenty of available exits in case of fire or panic, together with approved lighting and ventilation, then the stage is set for the final effort of the inspector to induce the management to further plan in his equipment those essentials, by way of mechanical safeguards, that are of vital importance to efficiency. This building activity seems quite general throughout the district, and is a good index to the prosperity of the community from an industrial standpoint. In all cases where factory plans have been approved by this branch, the management have undertaken to provide those employed with comfort, convenience and safety, as laid down in the provisions of the Act. To care for the workman and show an interest in his personal welfare will result in increased efficiency which can be measured by dollars and cents.

Accident prevention is still foremost in the mind of the factory inspector and the hazard which is the forerunner of the accident is what we are endeavoring to eliminate as far as possible. Machinery must be protected at the time of installation and it is when this rule is violated that accidents occur and the usual excuse is then offered. However, working conditions in general are improving rapidly, principally because employers are awake to the fact that it pays financially and otherwise to protect the man who is in reality "worthy of his hire." Many accident reports were received during the year, some of which might have been prevented by the exercise of proper precautions and the enforcement of safety rules and practices. Two of this number were caused by electrocution and both occurred in the city of Hamilton.

Many industries have worked full time all the year, which in itself is an indicator of progress, and a great help to the unemployment situation. Many overtime permits were issued to the industries employing females to allow extra

working hours during the rush seasons, but only after an investigation showed they were really in need of this assistance.

In general, factory owners are co-operating in the matter of sanitation and ventilation of their plants. The removal of dust and obnoxious fumes is a step in the right direction as the health of the employee is a prerequisite, if efficiency is to be attained.

It is difficult to recall a case of child-labour in this district, and the Adolescent School Attendance Act appears to be well enforced, especially in the towns and cities where certain lines of manufacture are being carried on.

Out of thirty-four canning and jam factories, twenty-nine operated during their season of activities. All of these were visited and found to be conditionally good. The majority of these required permits to work overtime when the weather became such as to cause the fruit to ripen too rapidly and the danger of spoilage appeared. Eight camps for women workers were operated this season, in the process of fruit-picking, one of which was destroyed by fire. Seven permits were issued here, after an inspection revealing the provisions of this Act were complied with.

On factories, stores and office buildings, new and old, a total of twenty outside fire escapes were erected, nine of this number in the city of Hamilton and all conforming with the code of specifications.

Many visits were made to cheese factories and dairies for the purpose of boiler inspection reports, where these are not insured, and also portable saw mills in the outlying parts of the district. These inspection reports are only accepted when duly signed by an inspector who is the holder of a stationary engineer's certificate for the current year, or an officer of the Steam Boiler Branch. Only one explosion is recorded, and that occurred in an office building where two sectional steam heaters in the basement were coupled together, the second one being fired up with the main valve closed and the boiler full of water. The damage to the building was considerable, but fortunately no one was injured. Negligence on the part of someone appeared to be the verdict in this case.

The assisted enforcing of the Stationary and Hoisting Engineers' Act has been the occasion for a few visits and investigations after which no serious difficulties were encountered.

Steam laundries and dye-houses showed a decided improvement in the matter of discharge of steam and vapour from workrooms. The latest models in machinery together with the introduction of the suction fan has worked wonders in this respect, proving that, regardless of the weather, the matter of ventilating these places is no longer a problem to be feared.

The hazard coincident with the operation of the freight elevator is still with us, and although the gate interlock and the push-button device have proved their real worth in the matter of safeguarding, the "human element" will always have to be reckoned with. Looking down the elevator shaft through an opening caused by a missing gate spindle or climbing on the gate in order to look over the top has been the direct cause of a few major accidents, when the car descended and the employee was caught between the car-floor and the gate. This phase of elevator safety operation is difficult to control and it would appear that some more education is required to cope with a situation similar to that quoted.

Only on one occasion was it deemed necessary to invoke the aid of the courts, the owner of the premises refusing to install sanitary equipment for the benefit of the employees.

On the whole, the outlook for the future seems very promising, and the coming year will doubtless see many new plants in operation.

## H. A. CLARK.

The general condition of business has an important bearing on the work of a factory inspector. When times are good it is more easy to induce manufacturers to finance the changes recommended by the factory inspector. During periods of depression manufacturers are invariably short of funds and it is more difficult to secure the enactment of the recommendations. As a general rule, however, employers are most willing to safeguard their plants in every way possible and are largely interested in securing comfort and safety for their employees.

The safety of workmen and the maximum output of the plant are promoted by making the physical surroundings of the workmen as comfortable as possible. Plenty of light, good air, safety and comfort are advantageous. Statistics show that the greatest number of accidents occur during the months of diminishing light. Dirty windows and insufficient artificial illumination often make conditions much worse than are necessary. Canada must safeguard the eyes of its workers, for without sound vision industry is handicapped and reasonable attainment of human happiness made difficult. Until recent years, care of the eyes was regarded largely as a question for the individual. Development of the physical sciences and their application through engineering has, however, revealed eyesight as a problem of national concern. In industry and in education the need of organized eye conservation has been most insistently pressed. It is now plain that a child without good eyes cannot be expected to make normal progress in school. It is equally plain that workers, whether in factory, office, field or mine, cannot meet the obligations of their tasks unless they can see with the ease and precision intended by nature. The economic and social losses resulting from defective eyesight are now beginning to be realized. Inquiries by governmental and public service bodies are tracing to poor eyesight an appreciable portion of the industrial waste. Much of this loss and suffering can be prevented if the fullest possible measures are taken to protect the eyes of employees. Defective vision ranks well up among the contributing causes of accidents, as poor lighting, it has been shown, is a substantial factor in causing industrial injuries. Steps are being taken to remedy fundamentally bad conditions and the results are most encouraging. It is evident that appropriate precautionary methods will cut down the number of eye accidents. Industry shows that for three years eye losses have been steadily decreasing in the metal and metal products industries. Eye conservation should be a part of the safety programme of every industry and inspector in order to increase the nation's stock of health and wealth. A very large loss of productive time and value is attributed to industrial accidents, and for this reason the practical interest of executives in safety programmes is being awakened. The railroads have accomplished remarkable results in their efforts to shield the lives of the workers. What has been accomplished in transportation can be accomplished in other fields. There are signs that industry in general will eventually recognize in thorough-going fashion the necessity of eye conservation as a national need, fundamental to the normal existence of all classes of our people.

Overtime work is a common method of getting out extra production in a rush period. It is so common as to have become the rule in many industries subject to high pressure in the busy season. It is often the result also of lack of foresight and planning within the plant; one department failing to keep up to schedule, works overtime to make up production arrears. But employers resorting to these methods rarely count the costs. Those who have studied overtime

in relation to production cost find that it does not pay. It is a wasteful and expensive way to meet extra demands. One large firm has eliminated overtime in their plants because they found that it was too costly and inefficient to be used in a process of manufacture which demanded every economy. A plant running on steady schedules reaches a certain rhythm of operation. It is keyed to the pace at which work can be most efficiently and skillfully performed, and which can be maintained for long periods without overfatigue to the workers. Overtime breaks up this rhythm. It brings high-tension activity for exhausting hours, a severe strain on men and girls. Under the wear and tear of this pressure production cannot be maintained at a high level of quality and efficiency. Ordered routine is also sacrificed. The whole plant suffers. A period of depression must follow, with work force fatigued and schedules disorganized, meaning further inefficiencies before normal production is restored. Overtime is essentially an emergency measure. But seasonal rush times, recurring periodically every year, are not emergencies. They can be counted on and planned for. The part of wisdom is to study the demands which are likely to be put on the plant at these times and plan to meet them as part of the yearly programme, rather than to treat them as emergencies. Overtime and undertime usually go together. The workman who is fatigued with overwork at certain seasons, and hardly has an hour he may call his own, is likely also to suffer from unemployment at other seasons. Overtime work is characteristic of an ill-regulated, unstabilized programme of production. No extra pay for overtime can make up for insecurity and disorganization of the wage earner's work in life.

---

W. S. FORSTER.

Three hundred and ten direct recommendations were necessary to maintain the standards outlined by the Act. The cheese factory question was given first consideration this year in an attempt to round out the delinquent lists for the district. In this connection boiler inspection reports were received from approximately ninety per cent. of the cheese factories visited. The balance was confined mostly to the class of owners who will always wait year by year to be individually and personally reminded of their duty in this respect. Once the matter has been brought to their particular notice, these reports were forthcoming immediately. As a result of the earnest drive against child labour, employers in nearly every case have protected themselves by making certain that the adolescent employee has been granted a proper certificate.

Most of the accidents reported from this district were caused by individual carelessness or neglect, in some cases employees running the risk of tampering with machinery while it is in motion. On the whole, machines are equipped with safety devices of every kind, which permit the operators to go about their work in safety. In cases of smaller industries, precautions must be taken and warnings issued by the inspector.

Despite the attempt to keep the overtime question well within bounds there has been an increase in the number of permits issued within the year.

The increase in industrial institutions is becoming marked. Textile industries flourishing more abundantly in one section, steel manufacturing in another, and scattered throughout the whole district additional sawmills and lumber mills springing up here and there and operating at uncertain times of the year. General conditions this year appear much the same as in previous years, except that there is a discernible upward trend and many additional establishments.

## MRS. E. GURNETT

On the surface the work of a factory inspector may appear to be principally routine, inspecting the same plants year after year, but it is surprising how far short it falls of being so. One may inspect clean, sanitary factories where all machinery is well guarded, in a word, a well-conducted industry, and yet find infractions of the Factory, Shop and Office Buildings Act. During the past year a number of factories decided that it was in the best interests of the female workers to cut down the noon hour and allow the workers out half an hour or twenty minutes earlier, usually so they would not have to travel on crowded street cars during the evening. This was not peculiar to any one plant, for it was found to be in operation in printing, lithographing, textile, automobile, metal workers, and other places. It was epidemic. On investigation it was invariably found that the suggestion or order had come from the office. Not in a single instance had the female workers asked that their noon hour be shortened to half an hour, as the prevailing time was found to be. The superintendent insisted that the girls liked this arrangement so well that they would kick if forced to return to a full hour for the noonday meal, as stated in section 32, subsection (d). Time cards conspicuously displayed showed that an hour was allowed at noon, but despite this and the Factory Act, the hour was disregarded. When this was pointed out to the management, a return was made to the proper hours. Complaints that girls were not allowed an hour at noon, or in some cases, no time at all, in hair-dressing and beauty parlours, when investigated proved correct in many instances, while in some places girls receiving a commission on all work, took appointments straight through the day without taking a meal. Some workers reported that their health was beginning to be affected by the irregularity of meals. Sometimes it was four o'clock before they had a chance to take any food. These conditions were found where only a few workers were employed. This is being remedied wherever it exists.

Nearly fourteen hundred inspections were made during the past year, all industries being inspected once, many twice, and some places very often, when orders were made for certain improvements. Home permits to the number of one hundred and thirty were delivered in the city and adjacent county. Many complained of the very low pay received for homework.

The employment of adolescents is steadily decreasing. Places where a large number used to be employed now have none, claiming that where there is no interruption in work, results are so much better. Machinery generally may be said to be safeguarded, but it is alleged the occasional worker removes the guards, claiming they impede production. No serious accidents happened to female workers in the past year in this district. Tables, boxes and machines are still found obstructing the aisles leading to fire escapes, while in a few places the windows or doors opening on to the escapes were found encrusted in rust and difficult to open. However, there is a marked improvement along these lines. The orders of the Minimum Wage Board are found posted in all places where females are employed and fewer complaints were made to the inspector than in previous years. In some restaurants run by foreigners, not Chinese, girls have been found working sixty-five hours a week of seven days, and while they did not seem to mind these long hours, they were anxious to be paid the twenty-five cents an hour that is stated may be claimed on the wage card in restaurants. They have been referred to the Minimum Wage Board. There are also the girls and women employed in the small novelty and hosiery shops, women's wear and bakeshops, who, while they do not exceed the ten hours a

day allowed by the Act, yet spend their mornings, afternoons and evenings at work. Hours often are nine a.m. to twelve noon, one hour for midday meal, one till five, and from seven to ten at night, making ten hours daily and leaving little or no time for rest or recreation. A very decided improvement is noticeable in the cleanliness of factories and especially so in the sanitary conveniences due in some cases to having moved to newer and more up-to-date premises. As in former years, there has been a desire for co-operation with the Department on the part of managers, superintendents and owners, and the work of the inspector has been made easier and more pleasant.

---

MISS N. HAMILTON.

In making a summary of the different features of the work of factory inspection overtime permits seem to be almost of the first consideration. In this district a number of overtime permits have been asked for, and in all cases where warranted they were granted. One of the reasons given by firms for requiring the overtime permit is that the retail merchant does not carry as heavy a stock as in former years, but buys his goods as conditions and seasons affect his trade, and places his orders on short notice, which makes the manufacturer rush the work to fill such orders. Some firms increase the number of their employees and place additional machinery to overcome the necessity of overtime work. However, such arrangement is not feasible with all firms. In suggesting to employers and employees ten hours a day in order to overcome overtime, they hesitate to make this arrangement because it has a tendency to revert to the long working hours of a few years ago. Besides certain employees, rather like the overtime which means extra pay which appeals to the employees. It is then explained that extra overtime pay can be arranged within the ten hours or sixty hours per week, thus dispensing with night work. Altogether overtime permits are seldom abused in this district.

As to child labour, conditions are very favourable and employers are careful to adhere to the law prohibiting the employment of children.

Sanitary conditions are steadily improving but the inspectress has to be diligent in this part of her work as employees are not as careful as they should be, and in some instances do not bother to bring to the notice of their managers needed repairs to their washrooms. This neglect on their part is due partly to carelessness and sometimes timidity. Also in small establishments where the expense for stated repairs would fall upon the manager personally, they try to have the inspector accept their verbal statement as to the conditions. However, this method is not satisfactory as shown by a concrete example where an employer stated that the workroom, which was above the store, was in good condition, but upon personal inspection it was found very unsatisfactory in the matter of water supply in washroom.

As to safety of employees from fire, all exits and fire equipment need to be looked after on each inspection as there is a tendency towards inattention in guarding against the hazards of fire. Modern machinery with its safety appliances, assists in combating the danger to life and limb of employees and employers encourage their employees in using and applying all safeguards where it is possible. The reduction of accidents is not only a benefit to the employee, but also adds to the output of the employer and is beneficial to the general welfare of all. The Minimum Wage cards are kept posted since there is a penalty for not

complying with this regulation. The lighting of workrooms is a condition that in a number of places needs improvement, and it is found that the blue light known as the daylight system gives general satisfaction and it has been recommended where a change is practical, keeping in mind glare and shadows as objections. There is a very earnest effort on the part of employers and employees to carry out the regulations required by the Department of Labour. This attitude is very encouraging.

---

A. W. HOLMES.

Quite a large number of new factories were built and others are in course of construction. The great majority of firms had a fairly prosperous year. The new factory buildings being erected are fully up-to-date in regard to ventilation, sanitary arrangements, heating and lighting, which all help to make conditions better for the workers and are certainly a paying proposition from the employers' standpoint.

A great deal could be written on the subject of spraying machines. They have come into general use in a large number of factories. No doubt more thought has been given to the labour-saving than to the ill effects that can ensue if the fumes from the sprayer are not taken care of by some mechanical means. The lacquer and duco paint fumes are not healthful and fans should be installed for removing same. Sometimes it is hard to get the support of the men operating these fans to do their part by taking the necessary precautions to assist in this work. Most of these plants have canopies with exhaust fan in rear. A great many of the employees will persist in having the work as far away from the fan as possible, not giving the fan a chance to do the work intended for it. The wearing of respirators of cheese cloth over the nose and mouth is some protection but it is objected to very often, especially during the warm weather, as being inconvenient, causing a lot of perspiring. To get good results these respirators require adjusting to the shape of the face and also need the filter changed occasionally. In large work like automobile bodies they handle them sometimes on turntables and can do one of them in a few minutes. The lacquers and sprays used are alleged to be injurious, owing to cumulative effect on a person inhaling these fumes constantly. White or red lead is also used in some of those spray operations.

The great improvements made in laundry machinery during the last few years are worthy of passing notice. The makers of laundry machinery seem to vie with each other in making them practically foolproof. The changes taking place in these machines are remarkable when compared with a few years ago. The buildings now occupied as laundries will compare with anything in the manufacturing line and the result has been a great improvement in the personnel of the help employed therein. The use of electric power for heating mangles and doing away with the old gas and steam system has made conditions very much better.

A number of complaints have been received in reference to the question of heating factories that are rented for revenue only; the owner, not having any employees himself, is sometimes careless as to how the tenants secure heat. Quite a number of places work only five days a week and when the factory is closed from Friday night until Monday morning it is more difficult to heat. If it were only the employer who operates the plant there would be little difficulty,

as he would guard against stopping work and would furnish employees with the required temperatures. There were no startling improvements in the guarding of well-holes in elevators. The locks now in use on gates give good results and if they are given fair treatment, no fault could be found. The garage hoist gates are hard to keep in repair, as the auto and truck drivers are not always of the careful kind. These well-holes should all be fitted with iron doors and where they are in use little trouble is found.

A large number of fruit camps were inspected during the summer and found in fairly good condition. There are only about two camps operating with white labour, the girls coming from the city and making a holiday of the work, as well as earning fairly good wages. The sleeping, eating and sanitary accommodations are good with a matron in charge. The great majority of these camps are composed of Indians. They are brought in from the reservations, whole families, male and female, from the youngest to the oldest. If the weather conditions are good, not too much rain, they are able to make good wages; it is all piecework. They are supplied with housing, sleeping quarters with cook stove to do their cooking, as they board themselves. The season is short and they try to make hay while the sun shines.

So far as child labour is concerned, no one under fourteen years of age was found working. Those working without the permit required by the Adolescent School Attendance Act were instructed to secure same and were not allowed to remain until such was in the hands of the employer.

---

MRS. G. E. HORNELL

This year shows a very marked increase in industrial activity, necessitating the building of additions to old establishments and many new factories which are well up to the standard called for by the Factory, Shop and Office Buildings Act. In erecting new plants and extending old ones, the health and comfort of the employees now get as much consideration as other details. Light and ventilation are first principles in new buildings. Fireproof towers which are used by employees make the best kind of fire escape, though even these need inspection as in one case the landings were being used for storage. Inside the factory it is the approach to the fire escape that has to be constantly watched to be kept free from obstruction.

Overtime permits were granted to many industries in order to cope with conditions of trade. These are not issued until investigation is made for no inspector encourages overtime. Often an extension of the regular hours will meet an emergency when suggested by the inspector. Various complaints were investigated *re* long hours in the retail stores—Saturday usually being the day females work in excess of the ten hours prescribed by law. In some cases meals are taken on the premises so that girls are required to jump up and wait on a customer—getting no regular hour for relaxation or fresh air which is essential to the health of the worker. Quite a number of employers have the mistaken idea that by giving a half-holiday during the week they were not breaking the law by keeping females employed longer hours on Saturday. The inspection of homes where a permit (under Section 52) was applied for, takes up considerable time as many of these homes are in outlying districts. Most of them were found fairly clean and it was not necessary to refuse a permit. Several complaints were made that the pay was insufficient for the number of hours worked. The Minimum Wage Board card was posted in practically all industries where females are

employed. Often a request is made for a new card when the old one has been defaced. At the present time very few boys and girls under sixteen are employed in factories due to the vigilance of the factory inspectors and the operation of the Adolescent School Attendance Act. Conditions in general throughout the district are fairly good and most employers are agreeable to co-operate in improving conditions for employees.

---

S. J. MALLION.

During the year there was increased activity along industrial lines which was taken care of in various ways. Some manufacturers applied for overtime permits, as they reasoned that the demand for their goods was of a temporary nature; others increased the number of their employees, while the more sanguine and optimistic built extensions and new additions to their factories. The permits for those wanting to work overtime were not issued indiscriminately but according to emergency demands. The plans for the new additions and new buildings were duly submitted to the Factory Inspection Branch for consideration and approval and the buildings subsequently inspected before occupancy, to see that the said plans as approved had been strictly adhered to.

Factories and certain shops manufacturing food products received special attention as the general public are entitled to have these products manufactured under the best conditions possible, and while this condition is being brought about, it means good wholesome factory conditions for the employees. The dairy plants and all canning factories of the district were visited and found to be operating under splendid conditions. The tomato season in some localities was cut short by an early frost but on the whole a fair pack was obtained. The corn-borer is gradually dying out, either by a natural death or the means used by those combating this destructive pest, and all managers of the corn canning factories of the district report that its presence was not observed very much this season. Strict inspection and special machines were again used to prevent any possible chance of foreign matter getting into the corn being canned.

The inspection of all uninsured boilers and pressure vessels was carefully looked after. In some cases where inspections were made repairs were recommended and subsequently complied with. In one case where an inspection was recommended, the condition of the boiler was such that it was necessary to make an order prohibiting further operations until such time as the boiler was repaired and put in safe working condition.

Letters of information received relative to violations of the various Acts coming within the jurisdiction of this Department were given due consideration and careful attention. Some complaints were well founded and immediate steps taken to have the condition complained of removed or improved as the case may be, while others were imaginary and of little value.

---

J. MONTEITH.

Reviewing conditions in this district, all the establishments of which were covered once and in a few cases twice during the year, business may be reported as far ahead of previous years and manufacturers have been running full time and in many plants working overtime with additional help. This state of affairs makes the work of inspection more pleasant; when the plant is busy, the com-

pany does not object to complying with the recommendations. A fatal accident occurred at a plant in this district from poisonous gas. This accident was most unusual in so far as the plant has been in operation for several years and nothing of the kind ever occurred before or was even thought possible. However, with the assistance of the Chief Inspector and the wholehearted co-operation of the officials of this company, there is now in force a system whereby it will be almost impossible for an accident of a similar nature to occur again at this plant. Most recommendations made during the year were carried out without any serious objection from the employer except in one or two cases where the owner did not think it was necessary to have automatic locks on the gates of power elevators. However, these locks were installed to the satisfaction of all. Numerous saw-mills are situated in outlying districts which are by no means up-to-date, but quick action is taken when a recommendation is made. Special attention was given *re* inspection of all vessels under pressure and to seeing that the law was complied with in regard to the Stationary Engineers' Act, the Adolescent School Attendance Act, and Minimum Wage Act. Bakeshops in this district are in fair condition and employers are doing their best to live up to the law. Great assistance was rendered by the Industrial Hygiene Branch of the Department of Health in ascertaining the amount and kind of poisonous gas in plants where the duco system and kindred methods are in use. The same applies to the examination of persons working under conditions which we believed detrimental to health.

---

MISS J. W. OGILVIE.

The work of the factory inspector grows more important each year in all kinds of industries. With changes of industrial conditions it is the duty of employers and employees to co-operate in their efforts to avoid accidents and inspectors must direct and help to bring about better results. Accidents occur sometimes when operators become too familiar with their machines, the work becoming almost mechanical, and when the mind is not on the job in hand the result is an accident. Every reasonable precaution must be taken and perhaps the gravest responsibility rests with the individual employee, who must be trained to think and act safely at all times. Close co-operation is essential to the well-being of the industrial world to-day.

---

MRS. E. SCOTT.

The past year has seen a marked increase in business activity with the result that factory and shop inspections have been carried out under pressure. When employers are abnormally busy it makes it a little more difficult to get them to carry out the recommendations of the inspector. On the whole, however, employers are being convinced that the recommendations made by the Department are to their own advantage. Good working conditions, in both shop and factory, tend to improve the standards of the employee, resulting in better workmanship and more production.

In those industries where business is seasonable, it is still difficult to eliminate overtime work at nights and in most cases permits were granted. More overtime permits were granted this year than any previous year. In a few instances employers were found working after the statutory hours without a permit and these cases were investigated. There are still some employers who persist in

employing minors in violation of the Adolescent School Attendance Act, which necessitates strict inspections to make sure that all minors have the necessary certificate. A few retail stores and small shops were found employing child labour, principally as messengers and for odd jobs around the store. The employer in these cases seems to have the idea that on account of the light work it is all right to employ child labour, and this condition demands that the inspector devote considerable time to eliminating this practice as far as possible. There was a marked increase in the granting of permits for making wearing apparel at home. This takes up a great deal of the inspector's time as an inspection must be made at each home before a permit is granted. The sanitary and general conditions in these homes in most cases are favourable. In reviewing the past year's work, it is gratifying to note that splendid progress was made in all phases of the Department's activities. Factory and shop conditions are better than at any other time and it is to be hoped that employers and employees will co-operate in making conditions ideal.

---

#### H. STEVENSON.

During the year industrial conditions were good in the great majority of plants in this district and a number of new factories opened up. A large number of new buildings were erected and in course of construction.

One of the greatest sources of accidents in the past has been the freight elevator, but this has been overcome to a great extent by the installation of mechanical locks, safety dogs and other safety devices. Yet the inspector will find in his rounds an occasional freight elevator without these devices, which are ordered on at once. In spite of all these devices there is an occasional freight elevator accident, often with fatal results. One of the principal causes of these accidents is the fact that any man working in a factory can get on a freight elevator and operate it, whether he has had any previous experience or not. Any man who is required to operate a freight elevator should be instructed beforehand.

There are a large number of public garages in this district and the managers have generally co-operated with the inspector in having exhaust systems installed which take care of the exhaust from cars. The "ramp" is now being put in most of these plants which does away with the freight elevator.

Bakeshops have been inspected regularly and are generally kept in good condition. The inspection of boilers and other pressure vessels has received careful attention and where they are found to have not been inspected an inspection has been ordered and unofficial forms either left or mailed for same. The Stationary Engineers' Act is being well observed, but where a man is found operating a boiler contrary to the Act, a report is made on same with the result that it is adjusted and a certificate is found in the plant the next time the inspector calls. The Minimum Wage cards are posted in most factories where females are employed, yet some factories are found in which no cards are posted, the same being reported at the time of the visit.

The sanitary conditions, ventilation and heating of factories received special attention and were carefully looked after. In the new modern factory building there is very little trouble on this score, yet there are still a large number of plants in old buildings that never were intended as factory buildings, with poor lighting and sanitary conditions. These are ordered to be put in the best condition possible. The latter places are being generally eliminated and replaced by new buildings.

J. PENDER WEST,  
Examiner of Reports and Designs.

The general prosperity in the Province during the past year has been accompanied by a substantial increase in the amount of industrial building, and as the preceding three years had each shown an improvement on the previous year, this may be taken to indicate a steady, uniform progress in the industrial development of the Province. The following figures show the proportionate increases in the estimated cost of buildings for which plans were approved by this branch:—

1924—\$8,250,000.	
1925— 8,692,000, an increase of .....	5.4 per cent.
1926—16,321,000, “ “ “ .....	87.6 “
1927—20,218,950, “ “ “ .....	30.1 “
1928—32,614,300, “ “ “ .....	61.3 “
Total increase in four years.....	295.0 “

The estimated costs for buildings during the past year comprise 48.6 per cent. for factories and 51.4 per cent. for shops and office buildings. Of the factory plans, 76.8 per cent. were for new buildings and 23.2 per cent. for additions and alterations to existing buildings; corresponding percentages for shops and office buildings were 81.3 and 18.7 per cent. respectively. In previous years attention has been called to the significance of the amount spent in adding to existing plants. During the past year this has been particularly noticeable, some \$7,000,000 having been spent in providing thus for increased business—a striking indication of the stability of existing industries.

The great majority of the plans were for buildings of the most modern type and it is gratifying to note the provisions which are made in the new buildings for ensuring the safety and good health of the employees. It is now generally recognized by leaders of industry that, apart from humanitarian considerations, the monetary value of good health among employees is an important factor in a successful business; that every hour lost through sickness entails a direct loss to the employer; that indifferent health means indifferent work and that work performed by a healthy, cheerful employee in a bright, sanitary building will be greater in quantity and very distinctly better in quality than that done by employees whose health and spirits have been undermined by working under unhealthy and depressing conditions.

In this connection it may be noted that new inventions, involving new processes in their manufacture and use, often produce unexpected dangers to those employed therein and demand special precautions to safeguard the workers. Where such special safeguards have to be provided in existing buildings, a considerable amount of inconvenience and expense is sometimes incurred, but this can generally be avoided or minimized in new buildings if the matter is given careful consideration when the building is designed. For instance, where deleterious fumes have to be removed, the necessary flues and openings can be provided whilst the building is being erected.

Great improvement in the artificial lighting of industrial buildings has been evident in late years, but in far too many cases, this subject still does not receive the attention necessary to secure satisfactory results. Each industry and almost every building presents its own problems in lighting and these cannot be solved by a perfunctory provision, however liberal, of a certain number of lamps of a certain candle power. The work upon which each worker is occupied and the best way of lighting that work without certain shadows upon the work or glare upon the eyes of the worker should be carefully studied as well as the correct

amount of light required to produce the best results. Good general lighting is essential in all cases but this often requires to be reinforced by local or individual lights. The best system of lighting can only be evolved by careful collaboration between the management or other person having intimate knowledge of the work to be performed, and the lighting engineer. A good lighting system soon pays for its initial cost by improved efficiency and increased production.

The question of adequate exits from buildings is always carefully considered before plans are approved and in some cases, especially in closely built-up areas, constitutes a knotty problem. Too often, this is not considered until the requirements of the owner as to working lay-out, etc., are satisfied, when it is often found that the provision of satisfactory means of exit requires changes in the plans which could have been avoided if earlier consideration had been given to the question.

---

#### H. A. WINNETT

During the year the factories in this district were called on once, most of them twice and sometimes oftener. As a rule most manufacturers were willing to co-operate in improving conditions but in a few instances it was necessary to apply pressure. The lack of co-operation is usually due to lack of knowledge of the requirements rather than to unwillingness. An entire new exhaust system was installed in one factory when the necessity for it was pointed out. A considerable portion of time the latter part of the year was taken up with the investigation of the new plating process known as chromium plating, which is likely to become general as its superiority over present methods is marked. The different formulae used in the chromium process are said to be injurious to those employed and certain precautions are necessary. There seems to be only a limited knowledge of its effects but those who work with it are convinced that it is dangerous, causing ulcers and other ailments. During the year there was a marked revival of business in the Province. The number of employees in some of the factories was quadrupled and the plants increased in size, one and three-quarter acres being added to the floor space of one factory.

---

#### A. J. WRIGHT

During the year three hundred and seventy-five accidents were investigated, the majority of which were of a minor nature but one was fatal. The list, included fractured knees, legs, ribs and arms. In abattoirs the accidents were caused by meat hooks falling, cuts and other injuries received while killing cattle, scalds, falls, strains and by hands and arms being caught in beltings, pulleys, presses, saws, gears, rollers and fans. Injuries at carpentry work were due to bricks falling, electric burns and burns from explosion of varnish tank, being caught in elevators or falling down elevator shafts and by hands being caught in drills.

There was a peculiar case recently of a boy of fourteen years of age, employed as a messenger after school in a drug store. Removing a bottle of sulphuric acid from a shelf, the bottle upset and the contents went in his face. His eyes were saved but he will likely be disfigured. In another instance a man operating an electric elevator had his hands badly burned and a third suffered severe injuries in getting the ring on his finger caught in an electric drill. A fourth suffered from blood poisoning due to a neglected sliver.

Persons injured in factories were given first aid and if necessary were afterwards taken to hospital for further treatment. In many cases they were able to go home or return to work. Some men had their fingers so badly mangled that amputation was necessary and in one case an employee lost his hand. The great majority of the accidents investigated did not cause absence from duty for a period of six days and therefore were not reportable under the Act.

#### DISTRICT INSPECTORS

The following is a list of the factory inspectors of the Province, showing the district in which each is responsible for the proper observance of the factory regulations as set forth in *The Factory, Shop and Office Building Act*:

- J. H. AINSBOROUGH, 66 *Pacific Avenue, Toronto*.—Mr. Ainsborough's district is the City of Toronto, including Lansdowne Avenue and Bloor Street, also West Toronto, Lambton, Milton, Branchton, but excludes Drumbo, Stratford, Gowanstown, Fordwich, and includes Palmerston and East of Toronto on the C.N.R. lines to Lakeside and Prince Edward. Excludes Greenwood and east on the C.P.R. Lake Shore main line, but for cheese factory inspection purposes, includes that portion of Northumberland and Peterborough Counties south of the C.N.R. between Peterborough, Anson and Trenton.
- R. ALBROUGH, 25 *Grosvenor Avenue, Saull Ste. Marie*.—Mr. Albrough's district is west to Manitoba boundary line and east, including St. Joseph's, Cockburn, Manitoulin Islands, French River, North Bay to the Quebec boundary line.
- T. B. ANGROVE, 294 *Frontenac Street, Kingston*.—Mr. Angrove's industrial district includes Brockville, County of Leeds and north, excluding Perth and Smith's Falls, but includes Glen Tay to Sharbot Lake and north and west, including Calabogie, but excludes Renfrew, Egansville, Barry's Bay and Madawaska, but includes Wallace, Bancroft, Coehill and Peterborough and south, including Campbellford, Anson, Belleville, Amherst and Wolfe Island, but excludes Prince Edward County, but cheese factory inspection includes the counties of Northumberland, Peterborough, Hastings, Lennox, Addington, Frontenac, Leeds, Grenville and Dundas, except that portion of Northumberland and Peterborough Counties south of the C.N.R. between Peterborough, Anson and Trenton.
- H. BOURNE, 111 *Milverton Boulevard, Toronto*.—Mr. Bourne covers all districts in the Province of Ontario for the purpose of investigating foundries.
- W. T. E. BRENNAGH, 59 *Kensington Avenue South, Hamilton*.—Mr. Brennagh's district is G.T.R. main line west to London (exclusive), east to Niagara Falls; south and east of London and Port Stanley lines; north C.P.R. and G.T.R. to Crumlin and Tavistock, but exclusive of Milton, Branchton and Ingersoll Junction.
- H. A. CLARK, 238 *Dufferin Street, Toronto*.—Mr. Clark's district is City of Toronto, east side of Yonge Street and west of Don River; north, including Leaside and Metropolitan line, but excluding Aurora and Newmarket; south, including a portion of Toronto Island.
- W. S. FORSTER, 336 *McLeod Street, Ottawa*.—Mr. Forster's industrial district is east and south to Maitland, St. Lawrence River and Quebec Boundary, and north, including the County of Grenville, Smith's Falls, Perth, but excludes Glen Tay and east to Calabogie, and north and west to Quebec Boundary line to Algonquin Park, but excludes North Bay; but the Counties of Lanark, Carleton, Russell, Stormont, Prescott, Glengarry and Renfrew are included for cheese factory inspection.
- MRS. ELEANOR GURNETT, 102 *Kingswood Road, Toronto*.—Mrs. Gurnett's district is west side of Yonge Street north to city limits and west, including Linwood, Tavistock, Eastwood, Nixon, Shakespeare, but excluding Port Dover and south, including Jarvis, Cayuga, Waterdown and Dundas, and north, exclusive of Bolton and Fergus.
- MISS HAMILTON, 200 *Princess Street, Kingston*.—Miss Hamilton's district is Kingston, K. & P. Railway, north and east to the Quebec boundary line.
- A. W. HOLMES, 39 *Lakeview Avenue, Toronto*.—Mr. Holmes' district is City of Toronto, east and south of Lansdowne Avenue and Bloor Street, west to Burlington, north to city limits; east, including York Street, University Avenue and Avenue Road; south, including a portion of Toronto Island.

- MRS. G. E. HORNEILL, *Mimico, P.O.*—Mrs. Hornell's district is south of G.T.R. and C.P.R. main lines to water front and east, including Bathurst Street and west, south of C.P.R. to Cooksville, and G.T.R. Dundas, Cayuga, Jarvis and Niagara Peninsula.
- S. J. MALLION, *74 St. Vincent Street, Stratford.*—Mr. Mallion's district is Fordwich, Gowanstown, Stratford, St. Mary's, London, St. Thomas and Port Stanley; south and west to border line, including Ingersoll Junction on the C.P.R. and north, including Teeswater, Kincardine and Goderich.
- J. MONTEITH, *Queen Street, Humber Bay.*—Mr. Monteith's district is the City of Toronto, east of Don River to city limits, south to the water front and north to the city limits; and east, including Greenwood on C.P.R., but excludes Bancroft, Wallace, Coehill, Peterborough, Algonquin Park, North Bay and French River, but includes Lindsay, Quays, Owen Sound, Bruce Peninsula, Southampton and Harriston.
- MISS OGILVIE, *118 Centre Avenue, St. Thomas.*—Miss Ogilvie's district is Port Dover, Simcoe, Woodstock, Tavistock, Gowanstown, Teeswater; west, south and north to Lakes Huron, Erie and River St. Clair.
- MRS. E. SCOTT, *127 Walmer Road, Toronto.*—Mrs. Scott's district is east side of Yonge Street, and west and north of the K. and P. Railway, excluding Pembroke, Renfrew and Kingston, and north to Quebec and Manitoba boundary line, and west, including Bolton, Fergus, Caledon East, and excludes Linwood.
- HUGH STEVENSON, *22 Hambly Avenue, Toronto.*—Mr. Stevenson's district is City of Toronto, west side of Yonge Street to York Street, but excluding York Street, University Avenue and Avenue Road, to northerly limits, south, including portion of Toronto Island.
- H. A. WINNETT, *75 William Street, London.*—Mr. Winnett's district is temporarily covering all the district in the Province of Ontario for the purpose of investigating the industrial plants where polishing, grinding, and buffing is carried out.
- A. J. WRIGHT, *175 Galley Avenue, Toronto.*—Mr. Wright's district covers all districts in the Province of Ontario for the purpose of investigating polishing plants, etc.

## Report of Inspector of Caisson Work

INSPECTOR: F. A. SWARBRICK

OFFICE: PARLIAMENT BUILDINGS, TORONTO

During the past year there have been eight jobs under construction throughout the Province necessitating the employment of men in compressed air. The amount of pressure used on this work varied from eight to forty-five pounds per square inch. It has been customary to visit these jobs daily and when necessary to make recommendations for improvement in conditions. Through constant supervision and the enforcement of the Regulations respecting the Protection of Persons Working in Compressed Air, cases of sickness due to such employment have been kept at a minimum. The number of accidents has also shown a decrease which may be attributed to the periodic examination of equipment and machinery.

The construction work on the Windsor-Detroit bridge carried on under compressed air has been under the supervision of the Inspector of Caisson Work. The accompanying sketch illustrates the equipment and methods employed in the construction of the main piers. At the commencement of these shafts the work of excavating was done by clam shells or grapple buckets to the depth of the water bearing area. During this procedure the walls of the shaft are supported by wood or steel cribbing and when water is encountered the work of constructing a concrete working chamber is necessary. The chambers in these shafts were about thirty feet outside diameter with a minimum wall measurement three feet thick which was reinforced with steel and the slab deck was four or five feet thick. On the bottom of this chamber there was a wedge-shaped cutting edge which allowed the caisson or chamber to sink freely after the work of underpinning and excavating had been done. The operation of sinking this chamber was performed by having the air pressure leak off from the inside and thus allowing it to sink with its own weight. As it is sunk, more concrete is poured on the top of the slab to add weight for the next sinking operation and it becomes part of the finished pier. Again the required air pressure is injected back to the chamber with the same routine carried on until the necessary depth is reached.

In the centre of this working chamber there is inserted a steel shaft or tube four feet in diameter, the length of which is usually governed by the depth of the original shaft and this shaft is fitted at the top with a manlock (see diagram letter C) equipped with two steel doors opening inward. As soon as the men or material pass through, the top door is closed and the air pressure is turned on at the lock-feed valve. When the air equalizes with the air in the working chamber the bottom door automatically opens allowing the men or material to pass on to the working chamber.

The work of excavating is carried on by men with the use of automatic air tools and hand spades, the excavated earth being filled into buckets and hoisted to the surface. All communications are made by rapping signals from the surface to manlock and working chamber or *vice versa*. The procedure of getting these buckets to the surface is as follows: They are hoisted up the

REV. 1928.

SECTION THRU CENTRE OF SHAFT.

CAISSON WORK ON PIERS, WINDSOR-DETROIT BRIDGE.

F.S.

steel shaft into the manlock where the bottom door has to be closed and the air in the lock reduced until it is equal to the atmospheric pressure. This allows the top door to open and the material to pass out for dumping. In this manner the pressure may be constantly maintained to keep back the water in the working chamber and thus ensure proper working conditions. There are air pressure gauges in both manlocks and working chamber, placed in such a position that they can be easily read by persons in both chambers. The humidity and temperature are taken care of by the engineer who controls them by water coolers inserted between the inlet air pipe and compressors. As the depth of the excavation increases very often it is necessary to have a corresponding increase in air pressure and therefore the hazards involved become greater. This necessitates careful observation of the men engaged and also a decrease

Cross section of nine-foot sewer under construction

in the length of the working periods. For example, work of this nature may start with twenty pounds air pressure with two working periods of four hours with a rest period of one hour between and may finish with an air pressure of fifty pounds with two working periods of forty-five minutes each and a rest period of five hours between. It is at the higher pressures real trouble begins with regard to sickness.

Workers who are not in good physical condition are more susceptible to caisson diseases which usually attack the victim in a form commonly known as bends, staggers or chokes. A worker suddenly stricken with caisson disease, either at his home or on the road, should be rushed back to the job, into the air-lock and have the same amount of air pressure imposed on him as he had been

employed in previous to being stricken. The pressure should be reduced, gradually until he becomes fit to resume his normal activities. Putting a sick man back into the working lock without proper medical attention is very unsatisfactory, and on one job the caisson inspector had installed three steel medical locks on the ground surface. These locks were equipped with two compartments, furnished with a cot, electric light and heat, and had glass bull's eyes on the doors which enabled the physician in attendance to keep the patient under observation.

Before the Regulations were put into force very little provision was made for the care of workmen stricken with caisson sickness and numerous cases became claims on the Workmen's Compensation Board, involving considerable expenditure. Since the enforcement of the Regulations in January, 1927, there has been a remarkable decrease in the cases of sickness and no deaths have been reported. The following figures of one construction job covering twenty-five months will illustrate this point as the air pressures used were practically the same throughout the period.

BEFORE REGULATIONS ENFORCED	Caisson Sickness	Deaths	Amount of Compensation Paid
July to December, 1926 (6 months).....	88	3	\$16,521 00
AFTER REGULATIONS ENFORCED			
January to June, 1927 (6 months).....	38	0	2,482 00
July to December, 1927 (6 months).....	12	0	998 00
January to July, 1928 (7 months).....	1	0	30 00

It is expected that considerable construction work will be commenced in the near future necessitating the employment of men under compressed air. The Regulations respecting the Protection of Persons Working in Compressed Air require that "any person, firm, corporation, municipal council or other public authority, before commencing work in the construction of which men are employed in compressed air, shall notify in writing the Inspector appointed to administer these Regulations." If such work is carried on in accordance with the Regulations under the supervision of the inspector, elements of danger may be reduced to a minimum.

## Appendix

### INDUSTRIAL DISPUTES IN ONTARIO, FISCAL YEAR 1928

(From figures published in the "Labour Gazette")

Groups of Industries	Number of disputes in progress during year			Number of persons involved	Aggregate duration in working days
	Carried over from last year	Commenced during year	Total		
Building and structures. . . . .	2	13	15	2,627	32,004

## STRIKES AND LOCKOUTS COMMENCED PRIOR TO FISCAL YEAR 1928

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Northern Ontario.	Pulpwood cutters.	Sept. 24, 1927	For increase in wages. Lapsed early in November.	10	50
Toronto.	Ladies' clothing factory workers.	June 30, 1926	Alleged lockout; enforcement of non-union conditions. Employees secured work elsewhere by beginning of December.	4	50
Toronto.	Electrotypers.	Dec. 20, 1926	Against discharge of employees for union activity. Employees secured work elsewhere by the end of November.	3	50
Toronto.	Carpenters.	Oct. 5, 1927	For closed shop; terminated Nov. 8, 1927. Compromise.	927	4,635
Toronto.	Building trades.	Oct. 24, 1927	In sympathy with dispute of carpenters; terminated Nov. 8, 1927. Compromise.	600	3,000
Total.....	.....	.....	.....	1,544	7,785

## STRIKES AND LOCKOUTS COMMENCED DURING FISCAL YEAR 1928

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Hamilton.	Cap factory workers.	Nov. 23, 1927	For union shop and reduction in hours. Terminated Dec. 7, 1927, in favour of employees.	9	108
Toronto.	Elevator erectors.	Nov. 29, 1927	To maintain union wages and working conditions. Terminated Dec. 2, 1927, in favour of employees.	35	140
Timmins District.	Pulpwood cutters.	Dec. 1, 1927	For increase in wages and changes in conditions; terminated Dec. 7, 1927; partially successful.	70	420
Toronto.	Embroidery workers.	Dec. 21, 1927	Against employment of non-union workers; terminated Dec. 23, 1927, in favour of employer.	16	16
Toronto.	Boot and shoe factory workers.	Jan. 4, 1928	Alleged lockout; change to piece work system and alleged reduction in wages; terminated Jan. 17, 1928, in favour of workers.	75	850

## Strikes and Lockouts Commenced during Fiscal Year 1928—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto.	Ladies' cloak makers.	Dec. 3, 1927	Against change in working conditions; terminated Dec. 22, 1927, in favour of employees.	38	608
Toronto.	Ladies' clothing factory workers.	Jan. 17, 1928	For increase in wages. Strikers secured work elsewhere by February.	10	130
Toronto.	Cap workers.	Jan. 17, 1928	Against reduction in wages. Terminated May 15; strikers replaced but secured work elsewhere.	8	320
London.	Printing compositors.	Jan. 13, 1928	Refusal of employer to grant an increase in wages or arbitration; terminated Jan. 16, 1928. Compromise.	75	225
Toronto.	Tile setters.	Jan. 3, 1928	Alleged lockout; increase in wages; terminated Jan. 19, 1928. Indefinite.	43	602
Toronto.	Terrazzo and marble workers.	Jan. 5, 1928	In sympathy with tile setters. Terminated Jan. 27, 1928. Indefinite.	104	1,896
Toronto.	Cap workers.	Feb. 15, 1928	For recognition of union. Terminated February 21, 1928, in favour of workers.	14	63
Toronto.	Asbestos and insulation workers.	Feb. 6, 1928	For increase in wages. Terminated June 1, 1928. Partially successful.	40	1,175
Toronto.	Men's clothing factory workers.	Mar. 5, 1928	Against discharge of employees. Terminated Mar. 22, 1928. Indefinite.	25	15
Toronto.	Upholsterers.	Mar. 26, 1928	Against reduction in wages. Terminated April 10, 1928. Compromise.	55	658
Oshawa.	Automobile factory workers.	Mar. 24, 1928	Against reduction in piece rates. Terminated March 31, 1928. Indefinite.	450	2,700
Corbyville.	Building labourers.	Mar. 16, 1928	For increase in wages. Terminated March 17, 1928, in favour of employer.	60	60
Toronto.	Fur workers.	April, 10, 1928	Against violation of agreement. Employees secured work elsewhere by the end of August.	20	1,497
Brantford.	Winders.	April, 2, 1928	Against reductions in piece rates. Terminated April 4, 1928, in favour of employer.	25	30

## Strikes and Lockouts Commenced during Fiscal Year 1928—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto.	Granite cutters.	April 2, 1928	For increase in wages. Terminated May 1, 1928. Compromise.	30	720
Kingston.	Plumbers.	April 2, 1928	For increase in wages. Un-terminated.	50	4,847
Cornwall.	Carpenters.	April 2, 1928	Against discharge of employees. Terminated April 6, 1928, in favour of workers.	43	172
Kingston.	Carpenters, masons and sheet metal workers.	April 17, 1928	In sympathy with striking plumbers. Un-terminated.	28	2,881
Toronto.	Lathers.	April 16, 1928	For increase in wages and five-day week. Terminated April 24, 1928. Compromise.	60	420
Toronto.	Embroidery workers.	April 24, 1928	Alleged lockout; against discharge of worker. Terminated July 7, 1928, in favour of employer.	5	285
Toronto.	Embroidery workers.	May 7, 1928	Against discharge of workers. Terminated July 7, 1928, in favour of employer.	11	583
Toronto.	Ladies' clothing workers.	May 17, 1928	Against changes in working conditions. Terminated July 3, 1928, in favour of workers.	19	800
Toronto.	Painters.	May 1, 1928	For increase in wages. Terminated June 15, 1928; indefinite.	2	76
Toronto.	Structural iron workers.	May 15, 1928	For increase of wages and recognition of union. Lapsed July 23, 1928; partially successful.	450	Approx. 11,000
Toronto.	Knitting factory workers.	June 15, 1928	Against changes in working conditions. Terminated June 15, 1928, in favour of employer.	25	13
Hamilton.	Printing trades.	June 1, 1928	Alleged lockout; against changes in hours. Work resumed June 11, 1928; partially successful.	20	500
Toronto.	Building trades.	June 7, 1928	In sympathy with striking iron workers. Terminated June 18, 1928; indefinite.	57	500
Cochrane District.	Pulpwood cutters.	June 28, 1928	For increase in wages. Terminated July 21, 1928, in favour of workers.	850	8,500

## Strikes and Lockouts Commenced during Fiscal Year 1928—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto.	Men's clothing factory workers.	July 13, 1928	Against employment of an expelled member of the union. Terminated July 16, 1928, in favour of workers.	80	160
Toronto.	Ladies' clothing factory workers.	July 30, 1928	Alleged lockout; against reduction in wages. Terminated August 31, 1928, in favour of employer.	5	85
Ford City.	Automobile factory body assemblers.	July 13, 1928	For increase in wages. Terminated same day in favour of employer.	100	50
Toronto.	Shoe factory workers.	Aug. 13, 1928	To maintain union shop. Employees secured work elsewhere by end of Oct.	28	1,116
Welland.	Textile workers.	Aug. 8, 1928	Against decrease in wages. Terminated Aug. 19, 1928. Compromise.	159	318
Tilbury.	Automobile factory body assemblers.	Aug. 13, 1928	For increase in wages and improved working conditions. Terminated Aug. 14, 1928. Compromise.	29	29
Toronto.	Men's clothing factory workers.	Aug. 21, 1928	Against alleged violation of agreement for employment of union members only. Unterminated.	15	375
Oshawa.	Automobile factory workers.	Sept. 11, 1928	Against dismissal of employee. Terminated Sept. 12, 1928, in favour of workers.	65	15
Toronto.	Plasterers' labourers.	Sept. 24, 1928	For union agreement. Terminated Oct. 9, 1928, in favour of workers.	128	600
Cochrane.	Pulpwood cutters.	Oct. 15, 1928	For increase in wages. Unterminated.	300	4,500
Hamilton.	Men's clothing factory workers.	Oct. 3, 1928	For recognition of union and increase in wages. Terminated Oct. 8, 1928, in favour of workers.	60	240
Toronto.	Men's clothing factory workers.	Oct. 4, 1928	In sympathy with striking clothing workers in Hamilton. Terminated Oct. 6, 1928, in favour of workers.	190	380
Guelph.	Knitting factory workers.	Oct. 15, 1928	Against discharge of worker for union activity. Terminated Oct. 30, 1928. Partially successful.	42	546
Kapuskasing.	Paper makers.	Oct. 1, 1928	Against discharge of worker for union activity. Terminated Oct. 19, 1928. Partially successful.	55	880
Totals				4,078	52,104

# REPORT

OF THE

## Minister of Education

FOR THE YEAR 1928

---

TO HIS HONOUR W. D. ROSS, ESQ.,  
*Lieutenant-Governor of the Province of Ontario.*

YOUR HONOUR:

I beg leave to present the Annual Report of the Department of Education for the year 1928. During the period under review there is evidence of marked advancement in various phases of education, and while, from the nature and organization of the system, the complete statistics necessarily relate to the calendar year 1927, the reports of the different officials, appearing in the form of appendices, bring down the information respecting conditions in the schools to the more recent date.

### Present Conditions

The expansion of the primary and secondary schools, which are under public supervision and control, has now reached impressive proportions. Apart from the training of character and of fitness for actual life, which are of the first importance in education, the schools considered as an investment challenge attention. The enrolled attendance in day and evening classes in the primary and secondary schools during 1927 exceeded 738,000, while the total value of the property in buildings, equipment, and so forth, was approximately \$145,000,000. The annual expenditures by trustee boards was more than \$48,000,000, and of this amount nearly \$26,000,000 was paid out in salaries to teachers. While it is the duty of all those who supervise and inspect the schools to direct attention, from time to time, to those points where improvements should be made, rather than to dwell unduly upon the high standard of efficiency reached, no one seriously contends that the people of Ontario are unmindful of the trust imposed upon them or doubts that in this vital department of State activity, the training of future citizens, there has been displayed an enterprise, courage, and forward spirit which augur well for the country. The boards of trustees, in whose hands are the direction of the schools and the regulating of all expenditures, have not been slow, as a body, to recognize the need for increased facilities, nor have they been deterred, during a period when taxation for other purposes is essential to national progress, from carrying forward the necessary educational undertakings. The obligation resting upon the Department is to suggest

policies and to point the way to their accomplishment, but in the main the results depend upon the people through their chosen representatives, the trustees and the members of the Legislature. The existing situation, therefore, with such promising features as better attendance; generous expenditures upon new buildings and equipment; the engagement, to an extent scarcely ever reached before, of well qualified professional teachers; and the desire to extend and amplify the courses of instruction in the schools, is due in large measure to the foresight and ability of the local authorities, and that ultimate court of appeal, the ratepayers, who prompt them.

### Recent Improvements

The educational system, however, which rests upon its achievements and is content to mark time is really in a declining state, since changes to meet fresh situations are imperative. The simplest and the most attractive idea of administration is to let things alone. But this is a fatal policy and one wholly unsuited to the age in which we live. A Minister of Education, alive to his responsibilities, is bound to listen respectfully to suggestions from all quarters; to remember that he represents education for the entire Province and not one part of it only; to weigh carefully the practicability of all plans proposed to him; to reflect that destructive criticism possesses little substantial value; and to be guided, in the end, by the wisdom of progressive minds in education and not by honest reactionaries, well-intentioned as their efforts may be. Following out this principle during recent years, it has been the object of the Department to promote certain educational improvements which manifestly have the whole-hearted support of popular opinion. These steps toward betterment include a number of reforms that relate closely to the efficiency of the system. The modification of the courses of study and the limitations of the subjects to be taken up in any one year have been factors in stimulating the work of the schools. The development of vocational education and the training of the teachers required for this kind of instruction have produced practical effects to be seen throughout the Province. The benefits that flow from constant and helpful inspection have been enhanced by means of co-operation between the Department and the Inspectors through conferences and interchanges of ideas with visible advantages in the classes. The substitution of teachers with higher grades of certificates for those with less training has made steady progress, and this advance is of special significance seeing that we are face to face, by reason of the normal growth of the country, with the competition of other occupations tending to withdraw teachers from their own profession. The supply of teachers is adequate and it is no longer impossible for school boards to secure those with the requisite qualifications, provided reasonable inducements as to salary and the comfort of the teacher are held out. The valuable efforts of the Provincial School Attendance Officer in co-ordinating the work of the local officers to secure observance of the attendance laws, both in respect to whole-time and part-time pupils, are set forth in the statistics of attendance to which further allusion will be made. These and other reforms have had much to do with recent advances in education.

### Future Proposals

While the Department has in these respects sought to furnish incentives to local action and to endeavour by invitation and persuasion to impart additional stimulus to the schools. I have had no hesitation, as Minister, in propounding

to the Legislature and to the general public certain other proposals of a far-reaching character which are worthy of the fullest consideration. The Bill to provide Township School Boards has been brought before the Legislature on several occasions and will be again laid before that body in order that every phase of opinion, for and against, may be consulted. The adverse criticism of this measure has been met, on some points, by provisions to secure equitable disposal of the financial assets and obligations of the sections and to ensure local representation, and when the ratepayers realize that the object in view is to provide better schools and to save rather than to add to the cost of education, the misunderstandings that have arisen will be removed. A proposal also of general concern is a modification of the present basis of paying the Legislative grants to schools, which from one cause and another has gradually ceased to serve the purposes which were in view when the arrangement was drawn up nearly twenty years ago. Yet another proposition has to do with the large question, in several of its implications, of enabling every child in the Province to obtain an education as near his own home as is possible and to carry forward his education to the highest possible grade consistent with efficiency of instruction. The solution of this question in all its aspects involves changes that will affect both the courses of study and the organization of the schools. The effect of transferring from the Universities work that should be done in advanced classes of the secondary schools has been under consideration and enquiry for some time, and decision has been delayed in order that every phase of the subject may be studied and its consequences fully provided for. In the course of this enquiry another and equally important possibility has arisen: the extension of the programme of instruction in the elementary schools so that the pupils, especially those who reside outside of urban centres, may not be forced unnecessarily to leave home for the instruction to which they are entitled, at an age when they should be under the parental roof with all the advantages—moral, social, and economic—which such residence confers. This proposal is in no wise theoretical and experimental. The extensions of the courses in primary schools, beyond the entrance examination, now proceeding in many parts of the Province, often under great difficulties, is a revelation of a deep-seated determination to attempt this policy without waiting for legislative action. Such proofs of the sacrifices which parents are ready to make, to keep their children with them as long as possible by giving them adequate preparation in the local school for their future careers, warrants the belief that whatever re-construction of the present system is required will have the sanction of enlightened opinion. This change need not cause school boards to halt in their programmes of improvements for new or enlarged buildings on the ground that the contemplated revision of courses may render them unsuited to new conditions. Any such scheme, being constructive, should not render useless what has been created already. Extended instructions should be adapted to the existing system and not be destructive of it.

It is evident that all these suggestions, most of which are inter-related and fundamental, point to a considerable educational measure. They are not to be carried out with undue haste and call for the fullest discussion both by the Legislature, to which they must first be submitted in the form of a Bill, and by the public at large. For this reason I have invited attention to the subject and it is gratifying to find that the tentative announcements at this early stage have at once awakened interest and created intelligent debate. In no other way can we expect to retain Ontario in the forefront of educational progress, but by arousing public attention to the needs of the time.

### School Attendance

Allusion has been made to better attendance. This reflects with a greater degree of certainty the general zeal for education than almost any other factor in the situation. The co-operation of the Provincial and local officials has effected a more cordial attitude toward the law in both the urban and rural communities. Resort to legal proceedings to enforce the attendance Act is comparatively rare, and only 1.1 per cent. of the infringements have entailed the appearance in court of parents or guardians. An examination of the statistics worked out in full detail in the appended report is a profitable study. The figures of illiteracy for Ontario, based on the last census, show that the percentage was but 3.25 compared with 5.49 for the Dominion, and the results of the approaching census may be confidently looked for as reducing the figure of eight years ago. The average attendance in urban centres has risen to about 90 per cent. and if the rural schools show a low percentage, the reasons are to be sought, not in indifference, but in physical obstacles and economic demands which are inevitable and readily comprehended. Truancy in the rural schools has become practically negligible. The Provincial School Attendance Officer prudently says: 'In 1927 the average school time profitably employed by pupils was 140 days out of the 196 days in the school year. This is much in excess of the average of many countries, but offers large opportunity for improvement.' The attendance of adolescents, pupils whose age exceeds fourteen, is likewise encouraging. In 1927 these pupils numbered 92,476, and of these but 6 per cent., or 5,905, were granted home permits or employment certificates. There were 3,167 part-time pupils in the Province, and it will thus be seen that the youth of Ontario to the age of sixteen, in those areas of the Province where the law applies, are either at school or at work.

### The Rural Schools

For reasons which are obvious the prosperity of the country, and its future development on sound lines, are bound up with the efficiency of rural education. The modern form of inspection, the chief aim of which is to help rather than to criticize, reveals conditions that indicate a steady advance and also some conditions not so favourable. The rural population display the keenest interest in their schools. The readiness of ratepayers to provide the best possible conditions for their children is generally commented upon by the Inspectors throughout the Province. The adapting of the courses to the welfare of the farming community, by introducing the study of agriculture and by promoting school fairs, which owe so much to the valuable aid of the representatives of the Department of Agriculture, is a movement that goes steadily forward. Advanced teaching of Fifth Form work, in whole or in part, progresses to an extent that is surprising, since it is carried on in many quarters without the aid of the special grants that are available for fully organized Fifth Classes. The employment of professional teachers, holding either First or Second Class certificates, and the virtual elimination of the Third Class certificate, is one of the outstanding features of both the counties and the districts. The number of unqualified teachers is insignificant and these are employed usually in those exceptional cases where vacancies occur during the school term. New or improved buildings are reported from all the more progressive sections. Equipment is supplied to the extent called for by the regulations and the school libraries are being strengthened by new books especially for the younger pupils in whom the taste for good literature, once implanted, will not disappear in later years.

On the other hand, the rural school situation is still handicapped by causes that would diminish if a more comprehensive and vigorous policy were applied. A very small school is undesirable. Such schools are not merely defective from the educational standpoint, as giving the pupil little of the discipline and stimulus of school training, but are also wasteful in expenditure. There are almost a thousand schools—to be exact, 849—with an average attendance of 10 pupils or less, and the total cost of maintaining them is \$903,913, so that from indications the Province will be expending at no distant date a million dollars upon schools which are far from effective and unduly expensive. The cost per pupil in them is approximately \$140. In the 147 schools with five pupils or less the cost per pupil is close upon \$240. Once people realize the seriousness of the situation it will be remedied. Not less extraordinary are the cases of school boards which hoard money instead of spending it on education. One Inspector thus reports: "Many of my schools have large cash balances on hand at the end of the year. In a few cases there is more than sufficient to pay the ordinary expenses of the school for the following year. There are some schools where the township and legislative grants are more than sufficient to pay the ordinary expenses of the school."

#### Four School Cars

The Department found that ordinary schools could deal with regular conditions of settlement only. Two-thirds of Northern Ontario are for the present unorganized and a large portion unsurveyed. In these parts rural settlement is, therefore, sparse and not continuous. This is especially true along the lines of railway which thread their way for hundreds of miles through the Laurentian Highlands. Right-of-way groups of workmen, hunters, trappers, and bushmen from "pocket" settlements are linked with each other only by this line of steel. These are shifting and unstable, and some more elastic service than the fixed school is demanded to meet their needs. The school on wheels has answered the problem. A car can go where the need is and can move as the population moves. It has brought help to hundreds of children and homes otherwise beyond the reach of regular education. Intensive study for four to ten days a month, and supervised exercises for the remaining time, has put them in possession of the essentials of education and has developed initiative and self-dependence that the organized school might well emulate. Four cars are now in commission, serving about 600 miles of railway. This co-operative enterprise between the railway companies and the Department has amply proven its worth, not only to the children, but to the communities as a whole. Eighty per cent. of the settlers are of non-English origin. The School Car is a welcome visitor month by month and has become the real social centre of these isolated settlements. Through night school work in English and associated services, the communities are being wrought over into the fabric of loyal Canadian citizenship.

#### Correspondence Courses

This attempt to reach children who are in isolated places and who would otherwise receive no education has developed in three years into a well-organized and ever-expanding system which year by year justifies its establishment. The salient facts of this inspiring experiment are to be found in the report of the Chief Inspector. The plan was initiated in 1926, and the total enrolment is approximately a thousand pupils. The lessons in the course extend from the primer to the entrance grade and some of the pupils have passed the high school

entrance examination. The co-operation of the parents, without which the system could not be worked successfully, is a gratifying proof—if any were needed—that the appeal of education is not confined to those to whom it is easily accessible. The courses are shared by many who are beyond the school age. It will be noted that while the text-books and all necessary supplies are as free to the pupils as the lessons themselves, the cost to the Province is only \$13 per pupil, the computation taking into account all the charges that should properly be considered in this connection.

#### **Conditions in the Schools Attended by French-Speaking Pupils**

The new plan of dealing with the schools attended by French-speaking pupils, which was adopted after the presentation of the Report of the Committee of Inquiry which investigated these schools in 1927, is now in the second year of operation. While it is as yet too early to speak in positive terms as to its results, the experiment shows encouraging signs of success. The universal desire on the part of French-speaking parents to have their children acquire English, the sympathetic support of the Departmental plans by school boards, the energetic co-operative effort on the part of teachers, inspectors, and training school staffs are factors in the situation that promise well for the future.

Improvement in the work of the schools is found to be in direct proportion to the ability and earnestness of the teachers in charge. No effort is being spared by the Department to promote the efficiency of both the future and the present teachers. The Normal and the Model Schools established for their training are staffed by the best available instructors. The inspectors are regularly and constantly in the schools directing the teachers in service, giving them counsel and encouragement, and demonstrating the best methods of teaching. The Director of English Instruction and the Director of French Instruction are in continuous co-operation with the training school staffs and with the inspectors in the actual work of the schools. It may confidently be expected that, under such methods of selecting and training teachers and of supervising them while in service, the standard of the schools will be progressively improved.

Two gratifying features of the general situation are the increase in the numbers of French-speaking pupils passing the High School Entrance Examination and the improvement in the qualifications of the teachers through attendance at summer school courses. The number of successful candidates at the High School Entrance examination in 1928 was 920, an increase of 409 over that of the previous year. At the summer school courses in 1928, over four hundred French-speaking teachers made progress towards higher certificates of qualification.

#### **Auxiliary Classes**

The classification of handicapped children who can not, for one reason or another, benefit much from the ordinary school courses has in recent years produced a widespread and rapidly growing organization. These Auxiliary Classes flourish better in the larger urban centres, where the problem is more quickly grasped and more easily handled, than in the rural schools which are beset by difficulties of grouping, conveyance, instruction, etc. There are now throughout the Province 207 Auxiliary Classes; they increased during the year by twenty-eight; and surveys laying basis for action have been conducted at sixteen different points. The response by school boards to the movement, when the necessary information resulting from the surveys is laid before them, can be inferred by the establishment during the year of twenty-five classes

outside of Toronto. These classes form part of the regular school; no stigma is, or should be, attached to the pupils in attendance, since the term mental defective is not properly applicable to them. The pupils are rightly considered as handicapped, in one way or other, from pursuing the same educational training as the majority of children and are given the special treatment best suited to developing the capacities they possess. To assist school boards in making the requisite arrangements, the Department's grants cover one-half the excess cost over ordinary classes. In the urban centres there now exist varieties of special training and the definitions of them indicate the nature of the instruction, such as sight-saving, orthopaedic, hospital, open-air and forest schools, preventorium, lip-reading, institutional, promotion, special industrial. A knowledge of how this work is carried on, as set forth in the report of the Provincial Inspector, is indispensable for all those interested in the magnitude of educational effort and desirous of realizing to what extent a progressive school system should reach out in service to the community. How the rural situation can be treated is at present receiving serious attention from trustees, parents, and inspectors, and the steps taken by the Department to qualify teachers for doing their share of the work will well repay perusal. It can not be said that a practicable method has as yet been discovered to deal with it, but no effort will be spared to find one.

#### Vocational Education

The enthusiasm which has attended the expansion of vocational training in Ontario is one of the most notable chapters in our educational history. There are now forty-two such schools, this number including those designated as Agricultural Schools at Renfrew, Beamsville, Ridgetown, and St. Thomas; the schools with mining departments at Sudbury and Haileybury; and the navigation schools at Kingston, Midland, and Collingwood. The prospect is that, notwithstanding the ample accommodation provided by enterprising school boards for vocational training, with buildings and equipment of the most modern type, all the space will be used to the fullest extent. The total attendance in the day schools during 1927-8 was 20,149 full-time pupils, 2,909 part-time pupils, and 1,455 taking special courses. This was an increase of thirteen per cent. over the previous year. The evening schools number sixty-one, with an enrolled attendance of 39,096 adults who secure effective instruction to promote success in their occupations in a great range of subjects, many of them not included in the programmes of the day schools. The cost of the vocational schools may be conveniently summarized by taking the expenditures for the year 1927. In that year the municipalities expended \$3,788,735; the federal aid was \$347,636, and the legislative grants, \$849,569. The federal subsidy has been withdrawn. What effect this withdrawal may have upon the preparation of the youth of the Dominion for industrial pursuits is a matter of common concern, seeing that the intimate relationship between federal policy and the special and expensive training required was recognized, when the subsidies were begun ten years ago, as constituting a valid claim for federal assistance. But it may be taken for granted that the failure by the Dominion to go on with its obligations will not be imitated by this Province.

The effectiveness of vocational instruction being so closely associated with qualified teachers, it is gratifying to observe that the work of the Training College for Technical Teachers continues to justify to the fullest extent the establishment of that institution. The new College building at Hamilton is now in occupation, and the installation of the equipment will shortly be completed. The College

has maintained its Spring, Summer, and Autumn courses at Hamilton with an attendance of 270 teachers-in-training; the extension courses for uncertificated teachers of evening classes were held in Ottawa and in Perth; and in the Summer of 1928 the first part of the course for the Specialist Certificate in vocational or shop work was attended by thirty candidates. In the second class for the Specialist Certificate in Manual Training the attendance was twenty-two. In October, 1928, a fresh plan to prepare uncertificated teachers of evening class work was initiated by the sending out of 500 monthly letters to all teachers who had taken an extension course and for whom some regular advice and instruction as to the application of principles would be helpful. The fidelity and zeal with which the instruction of the College, in its various branches, is pursued, calls for acknowledgment.

#### **Schools for Deaf and Blind Pupils**

In recording a successful year in the Ontario School for the Deaf at Belleville, I much regret the demise of the Principal, Dr. C. B. Coughlin, whose faithful and efficient service of over twenty years was generally recognized as a chief factor in the quite remarkable advancement of this School during the period of his principalship. By the selection of a capable staff of instructors, the adoption of a course of training to ensure a supply of native professional teachers, a wise supervision over the health of the pupils, in body as in mind, and competent inspection by the Public School Inspector, the status and efficiency of the School have become a credit to the Province. The institution of advanced classes in High School work, which were inspected by one of the Provincial High School Inspectors, drew back to the School ten pupils who had completed the elementary course of study, and it is hoped that this evidence that deaf pupils, properly trained from early age, may continue their studies as ordinary pupils do will be permanent. The use of the audiometer and the radioear, appliances to ascertain the hearing capacity of pupils and to convey instruction directly through the ear, have proved effective in the class rooms. Since Dr. Coughlin's death, Mr. W. J. Campbell, the Senior Master, has been Acting Principal.

The School for the Blind at Brantford, under Principal Race, maintains its reputation as a resident institution for the training of children with the handicap of little or no sight. Here, too, the literary instruction, which follows the prescribed courses for Public and High Schools, is wisely joined to attention to athletic exercises and reasonable provision for entertainment. The promising qualities of pupils in music, attested by Dr. Ham; their success in manual training, domestic science, and certain branches of industrial training; the prizes won in athletic and oratorical contests; and the tributes of visitors from other similar schools abroad, are proofs that the School is doing well the work for which it was established.

#### **Public Libraries**

The connection of the Department of Education with the public libraries, through grants, inspection, and sympathetic advice, is set forth in the report of the Inspector of Public Libraries, which discusses the different problems that beset the path of the small libraries, especially those in rural communities. In the large cities and towns, the library service has made excellent progress. Under boards possessing the confidence of the ratepayers results entirely creditable to the Province have been attained, but in sections less favourably situated there is evidently a field for additional effort, and the suggestion that as the school libraries advance the possibility of linking together the work in the public

libraries with the schools seems to point in the direction where tangible results can be reached. The travelling libraries sent out from the Department are much appreciated, and the extension of these facilities can be made part of a general plan to provide more books for what is essentially a reading population. The establishment of the Library School, in connection with the College of Education, where library assistants are being given a course of one year, is the beginning of a movement that promises to have an important bearing on the expansion of libraries. Reference is made to the benefactors who have generously given buildings to several places in the Province, and a word should be added in tribute to the intelligent activities of the Women's Institutes, the members of which have stimulated the circulation of travelling libraries, helped to raise funds for the starting of local libraries, and have been the means, in some cases, of erecting or purchasing buildings for this purpose. The Women's Institutes, during the past ten years, are credited with having been prime movers in the setting up of approximately fifty rural and village libraries throughout the Province. This is but a part of the work done by these public-spirited bodies in behalf of education and the labours call for the expression of my warm gratitude.

It cannot be too strongly emphasized that the schools belong to the people for the training of their children and that the Department is always at the disposal of the trustees and ratepayers for the purpose of assisting them in every possible way to make improvements and add to the efficiency of public instruction.

Respectfully submitted,

G. HOWARD FERGUSON,  
*Minister of Education.*

## APPENDIX A

# REPORT OF THE CHIEF INSPECTOR OF PUBLIC AND SEPARATE SCHOOLS

### Inspectoral Changes

The following changes took place in the Provincial Inspectoral staff during 1928:

#### I. By death:

W. H. G. Colles, of West Kent; Dr. E. T. Slemmon, of Ottawa; R. O. White, of Nipissing, Parry Sound and Muskoka Districts; John Ritchie, late of Thunder Bay District; and Dr. Samuel Huff, late of East Grey.

#### II. By resignation:

F. W. Sheppard, of Kitchener and North Waterloo; J. Elgin Tom, of West Huron; G. R. Mikel, of Sarnia; and C. W. Mulloy, of York County.

#### III. By transfer:

Henry Conn, from West Lambton to the City of Sarnia; and D. G. Smith, from Timiskaming South to Nipissing, etc.

#### IV. By overseas exchange:

Dr. A. E. Marty, of Toronto, to South Africa, in exchange with Mr. J. J. Strasheim, B.A., of South Africa, to Toronto.

#### V. By creation of new inspectoral units:

The cities of Chatham and Kitchener have been detached from their respective counties for Public School inspection purposes, and have appointed local Inspectors, viz.: Mr. Corbin A. Brown, M.A., to Chatham, and Mr. H. J. Prueter, B.A., B.Paed., to Kitchener, their duties to begin January 1st, 1929.

In 1914 the Ottawa Board of Education decided that, in the interests of their Public Schools, a second Inspector was required. Dr. E. T. Slemmon, B.A., of the Ottawa Normal School was offered and accepted the position. For the following fourteen years Dr. Slemmon's work was largely confined to classroom inspection, in which he became an expert. He died in 1928, leaving behind a fine reputation as a zealous and progressive educationist.

Inspector R. O. White, of North Bay, died in August last. His inspectoral work since his appointment in 1911 had been chiefly in the Districts of Parry Sound East, Nipissing (in part), etc. During this period of seventeen years Mr. White discharged the arduous duties of a District Inspector ably and loyally.

Dr. Samuel Huff, of East Grey, retired on December 31st, 1927, in failing health. He died early in March, 1928. Dr. Huff had shown a keen interest throughout his experience in educational affairs in his Inspectorate and in the Province.

Reverend W. H. G. Colles, Inspector of Public Schools, East Kent, passed away in February, 1928. He was born in Ireland and educated at Trinity College, Dublin. As a young man, he came to Canada and entered the teaching profession. In 1884, he received the appointment of Inspector of Public Schools for East Kent, a position which he held for forty-four years. For a number of

years he was a member of Sir James Whitney's Educational Council as one of the representatives of the Inspectors of Ontario. Under his leadership the East Kent Inspectorate became one of the most efficient in the Province.

The late John Ritchie was appointed Inspector of Public Schools for the Thunder Bay District in 1903, and, after twenty-three years of faithful service, involving much toil in travel and personal discomfort, retired in 1926. Inspector L. J. Williams, in his Report for 1928, pays the following well-deserved appreciation of his work and worth: "Inspector John Ritchie, my predecessor for the Thunder Bay District, passed away recently at Regina, Sask. Probably the best tribute to his memory is the wealth of kindly reminiscences among those whom he first met during the earlier pioneering days. The organization and direction accomplished by him during his long term of office must reach a total of expert effort equalled by few Public School Inspectors in Ontario."

Mr. F. W. Sheppard, Public School Inspector of North Waterloo and the City of Kitchener, was forced by illhealth to resign this position last August. His resignation was reluctantly accepted by the County Council and by the Kitchener Board of Education. Mr. Sheppard's kindly personality, his good judgment and his ability as an administrator had won for him the confidence and respect of all classes of the community whom he had served since 1906. On his retirement the Inspectorate was divided.

Mr. J. Elgin Tom, Inspector of Public Schools for West Huron since 1886, resigned in August last. In this Inspectorate there are 113 rural school teachers exclusive of those in urban centres. This placed an unusually onerous burden on the Inspector in the matter of inspectoral visitation, correspondence, etc. Mr. Tom's enthusiasm in the work of his schools and his great physical vitality enabled him for more than forty years to serve faithfully and successfully the cause of Public School education in Huron County.

Mr. C. W. Mulloy, B.A., Public School Inspector of North York since 1906, resigned in December last after twenty-three years of successful service. The present educational standing of the North York Public Schools is due very largely to his progressive leadership. Mr. W. A. Fydell, B.A., Principal of the Runnymede Public School, Toronto, was appointed to succeed him.

#### Public School Inspectors Appointed in 1928

The following appointments to the staff of Inspectors were made during the year 1928:

1. Mr. Norman Campbell, M.A., of Ottawa, to North Renfrew, to succeed Mr. I. D. Breuls, B.A., resigned, 1927.

2. Mr. Henry Conn, B.A., of Sarnia, to the City of Sarnia, to succeed Mr. G. R. Mikel, B.A., resigned.

3. Mr. H. B. Galpin, B.A., B.Paed., of London, to West Lambton, to succeed Henry Conn, resigned and transferred.

4. Mr. Geo. A. Pearson, B.A., of Windsor, to East Kent, to succeed Reverend W. H. G. Colles, B.A., deceased.

5. Mr. R. H. Roberts, M.A., of London, to North Waterloo, to succeed Mr. F. W. Sheppard, B.A., resigned.

6. Mr. W. A. Fydell, B.A., B.Paed., of Toronto, to North York, to succeed Mr. C. W. Mulloy, B.A., resigned.

7. Mr. H. J. Prueter, B.A., B.Paed., of Toronto, to the City of Kitchener, to succeed Mr. F. W. Sheppard, resigned.

8. Mr. C. A. Brown, M.A., of London, to the City of Chatham. to succeed Mr. J. H. Smith, M.A., resigned.

9. Mr. R. A. A. McConnell, M.A., of Palmerston, to the District of Timiskaming South to succeed Mr. D. G. Smith, transferred to the Districts of Nipissing, etc.

10. Mr. D. G. Smith, B.A., of Haileybury, transferred to the District of Nipissing, etc., to succeed Mr. R. O. White, deceased.

11. Mr. E. C. Beacom, B.A., of Toronto, to West Huron, to succeed Mr. J. Elgin Tom, resigned.

12. Mr. McGregor Easson, B.A., of Ottawa, to the City of Ottawa, to succeed Dr. E. T. Slemon, deceased.

#### **Inspector Additions in Prospect**

Growth of settlement along the T. & N. O. Railway and the transcontinental railway west of Cochrane is giving rise to a rapid increase in the number of Public and Separate Schools in these areas. Very shortly there will be need for an additional Public School Inspector resident at Timmins or Iroquois Falls and an additional Separate School Inspector resident at New Liskeard or Haileybury.

The suburban area just outside Toronto, in York County, continues to expand rapidly. There is present urgent need of a sixth Public School Inspector in York County because of this growth. Three of the present Inspectors are already supervising nearly 200 classrooms each. This number might not seem so large were it not for the many new organization problems and new building programmes constantly occupying the Inspector's attention in these suburban areas.

The appointment of full-time Inspectors for Chatham and Kitchener has greatly lessened the over-burden of work on the County Inspectors in the counties adjacent to these cities.

The schools of Oshawa have had rapid growth recently, due to industrial expansion in the city. The time is near when it will be to the advantage of both City and County for the city to appoint a full-time Public School Inspector and permit the two County Inspectors to make equal division of the remaining rural and urban schools in the County.

#### **The Work of the Inspectors**

In the past the Public and Separate Schools Inspectors of Ontario have been looked upon too often by people, teachers and pupils, as the arch-critics of the schools. In earlier days there was great need for the dictatorial attitude and the insistent demand for more rapid progress. But the keynotes of the Inspector's work at the present time are co-operation with the people and the giving of real help in school matters and particularly toward improvement in the classroom work. And it is found that these methods are bringing about greater advancement. The General Annual Reports of the Inspectors indicate this closer co-operation and keener interest in the improvement of the work done in the schools.

The Departmental Inspectors cannot speak too highly of the splendid work being done by the Inspectors. The high qualifications demanded in Ontario for the Inspector's certificate have resulted in a group of men thoroughly prepared for their work; and the zeal shown by the Inspectors in their work is unsurpassed in other fields of endeavour.

During the year the Departmental Inspectors visited sixty local Inspectors.

### The Wastage of Time in the Schools

Time-tables, courses of study and text books are most valuable to the best teachers and when they are used as aids and means; and the resourceful and successful teacher will not allow herself to become a slave to any of these aids. In too many of the elementary schools in Ontario traditional methods and practices have given, unfortunately, the chief place to time-tables, texts, and courses.

Lack of space in this Report will only permit of one illustration of this evil. In many rural classrooms four or five class-groups in each of spelling and arithmetic are given recitation each day. And all members of the class-group in each case are taught the lesson. With careful judgment on the part of the teacher it might be possible in many of these rural schools to have at least two or three fewer arithmetic groups or classes and two or three fewer spelling groups. Furthermore, many pupils on many occasions would be the better for not being included in the class recitation in one or the other of these subjects for the day. The teacher would be able as a result to give more attention to the weaker pupils while the brighter ones of the group would do seat-work on their own initiative.

Where proper lesson assignments and careful gradation of the work are made by the teacher, it is surprising how much can be accomplished, the pupils doing the maximum of work and the teacher having time to spare to direct and supervise.

We need more teachers who will live "above" rather than "below" the three aids mentioned. We need more teachers of strong personality and strong scholarship, so well trained and so confident in their methods and resources that they will not fall, through sheer helplessness, into age-bound practices.

### Conferences with Inspectors

During February and early March six Group-Conferences of Inspectors were held at Normal School centres as follows: London, North Bay, Ottawa, Hamilton, Peterborough and Toronto. Each Public or Separate School Inspector attended the Conference at his most convenient centre.

Three days of informal discussion took place at each Conference. Inspectors' problems and Departmental requirements and policies were freely discussed. Each Inspector gave a short review of the outstanding phases of progress in his Inspectorate. Departmental Inspectors in charge of the Conferences were able to get a very thorough grasp of the field work and to urge forward new or neglected lines of progress and to establish clearer understandings.

The unanimous conclusion at the end of each Conference was that the discussions were most valuable to all. And in the months following there has been constant reference to good features resulting from the meetings.

An indirect but very valuable contribution to the success of each Conference was the opportunity given for Inspectors to meet and confer with the Principal of the Normal School and his staff.

### Retardation in the Middle Grades

In many rural and urban schools there would seem to be too many pupils, on the average, enrolled in Second and Third Form classes. The official courses of study make the Second Form a one-year Course and the Third Form a two-year Course. In two cities where special attention has been paid to the progress of pupils in the middle grades, it was found in one city that there were 16.9 per cent. of all the pupils in the Second Form while in the other city this per-

centage was 14.9 per cent. On the other hand when a number of better-than-average rural and urban schools were selected in various parts of the Province, and the enrolments totalled, it was found that more than twenty per cent. of the pupils were in Form II.

This latter condition can only be explained by the fact that in the middle grades of these last-mentioned schools insufficient attention was given to classification in one of the following ways: (1) The teacher may have had an enlarged view of what is required in the various subjects of Form II and therefore have taught too much and found it necessary to have too large a proportion of the pupils take two years in the Form. (2) In some schools an unconscious repression of the pupils in the middle grades takes place because of the demand that the pupils may be found more fit when they reach the Senior grades and particularly the Entrance Class. (3) Much of the work of Form II is largely mechanical and teachers vary widely in their ability to cover the work rapidly and maintain the pupils' interest in the work.

The middle grade classes require the very watchful attention of teachers and Inspectors. Where the various grades have percentages considerably higher than the following there is need for careful survey:

Primer.....	not more than 20 per cent. of the enrolment of the school.
First Form, Senior.....	14 to 16 per cent.
Second Form.....	15 to 18 per cent.
Third Form.....	25 to 30 per cent.
Fourth Form.....	above 20 per cent.

These percentages for any particular year are more applicable to the large urban schools. To apply them successfully to an ungraded school would require a summation of, say June, enrolments for a three to five-year period.

#### **The Danger of Mis-direction of the Inspector's Efforts**

In February, 1926, James McRae, M.A., Chief Inspector of Primary Schools for the State of Victoria, Australia, visited Ontario and other Canadian Provinces. In his report of his observations to his home Department of Education he stated: "The Canadian Inspector as compared with the Australian Inspector has many more routine duties and much more purely clerical work. Much of his time is spent in compiling official returns upon which the payment of grants by the Provincial Authority can be made, and in keeping in touch with and advising the local School Boards. In consequence, inspection in Canada does not concern itself so exclusively with the actual problems of school management—or organization, instruction, and discipline. . . ." Similar observations have been made about the Ontario system of inspection by other visiting educationists from other parts of the Empire.

It is true that at the present time too much of the Inspector's time is consumed in duties which have not a sufficient bearing on the improvement of the work in the classroom. Over a period of years the official reports, correspondence, the distribution of grants, etc., have added greatly to the Inspector's duties and there is grave danger that routine clerical duties may take precedence over the chief function of the Inspector, viz., to show teachers by demonstration teaching and by sympathetic suggestions how they may further improve their work in the classroom.

The remedy for this danger will not come through the abolishing of present required records and reports although some relief may be obtained in this way. A greater relief will come through the Inspector making the clerical part of his work secondary to his work in the classroom with the teacher and pupils.

Provision is made in the Act for clerical assistance, and the Inspector who permits a large part of his time to be used in clerical work is failing to put a true value on the possibilities of his own efforts.

#### Consolidation of Schools

There are twenty-eight consolidated schools operating in the Province. Their locations are:

In the Districts (18):

Quibell, in Kenora District; Barwick, Burriss and Morley, in Rainy River District; Dorion and Nipigon, in Thunder Bay District; Mindemoya, on Manitoulin Island; Charlton, Hudson and Savard, in Timiskaming District; Byng Inlet, Katrine, Nobel, Pointe au Baril and Sundridge, in Parry Sound District; Gooderham, West Guilford and Wilberforce in Haliburton.

In the Counties (10):

Falls View, in Welland; Grantham, in Lincoln; Macdonald, in Wellington; Humber Heights, in York; Tweed, in Hastings; Tamworth, in Addington; Wellington, in Prince Edward; Mallorytown, in Leeds; North Mountain, in Dundas; and Grant, in Carleton.

With the exception of a few consolidated schools all the others provide High School education in Fifth Classes or Continuation Classes or nearby High Schools. The eight consolidated schools maintaining Continuation Classes provide both Elementary and High School facilities up to and including the Middle High School Course at net cost.

These consolidated schools are providing educational facilities, for the rural districts served, comparable to those provided for urban centres. The chief advantage is that the children from extended areas attending these schools obtain their education without leaving home, under favourable conditions and at a reasonable cost.

Inspector Dowsley of Brockville, in his report for 1927-1928 to the County Council regarding the Mallorytown Consolidated School, states:

"Mallorytown Consolidated School was opened in September, 1920, so has been in operation long enough to allow one to draw fairly sure conclusions as to its success. The Board was pleased to sign unanimously a year ago a statement which closed thus: 'We have a fine schoolhouse for our youth, over forty of whom are procuring a High School education at low cost. About fifteen are due to graduate from the Middle School this summer. We believe that the people generally are well pleased with the new conditions.' Half of the school for the last two years has been Continuation, with two experienced University graduates in charge, while the other half has been Public School with *two* well-qualified teachers doing the work of *five* teachers under the old system. Liberal government, county and township grants, and a saving of approximately \$2,500.00 as salaries (due to the reduced staff) have enabled the Board to reduce their special levy to five mills, well within the average for the township. When the debenture levy of eleven mills (the half-way mark in payment of which is reached this year) has been wiped out, the operation of this school should be found as economical as that of the average rural school, with the High School advantages 'to boot.' The debenture burden is well vindicated by improved accommodations and opportunities for the children, the formation of a larger community unit, and the prospect generally of a higher cultural standard for the rising generation. One needs only to recall the classrooms of the old discarded schools to

realize the advance made in merely sanitary conditions, not to speak of the advance in tuition."

Another excerpt from the Board's statement, referred to above, says: "We have no transportation difficulties and transportation costs are very reasonable."

The advocates of the consolidated school idea should have no apology to make if good judgment is shown as to the extent of consolidation, the selection of an easily accessible centre, and the observing of a fair ratio of building cost to assessment.

#### School Attendance

Dr. J. B. MacDougall, Assistant Chief Inspector, has submitted the following memoranda relating to School Attendance and the Travelling School Cars:

"The standard of school attendance is steadily rising. This is due not only to closer supervision but to the fact that the parent is being educated to the worth of education. As a result, attendance promises to become more and more automatic. Urban schools with their more fully organized health oversight and attendance control have reached a high standard of efficiency. Since 1920, the percentage average as based upon possible attendance has risen from 87 per cent. to 90 per cent. for the entire Province. In the larger cities it is gradually stabilizing at a maximum of 92 per cent. to 94 per cent. The rural pupil encounters serious handicaps in the way of distance, weather and road conditions and seasonal occupations, but he is measuring up more and more closely to the urban standard. A rise from 80 per cent. to 86 per cent. for the Province is noted for the same period.

"Truancy in the true sense is almost an obsolete word in its application to attendance, and illiteracy in Ontario, according to the Dominion Census of 1921, bears a most favourable ratio to other sections of the country. To this end Correspondence Courses and the Travelling School Cars are making a worthwhile contribution in the more sparsely settled districts.

#### Travelling School Cars

"In 1928 two of these cars were added to the service. These operate on the Kenora-Fort William subdivision of the Canadian Pacific Railway and the Port Arthur-Sioux Lookout subdivision of the Canadian National Railways. Thus an additional area of over 300 miles is being cared for. The former car has organized Fifth Class work at one centre, and both are carrying on night school classes. The four cars now in use have fully proved their worth, not only in the way of actual instruction of children, but of making life more wholesome and enjoyable in these frontier settlements, and in assimilating the new Canadian and giving him a place he is glad to fill in building up the land in which he has chosen to make his home. One teacher reports in this connection: 'There is no 'red' around this school at all. The children are most loyal subjects of the King. The Italians set up a flag pole at A—— and their only objection was that it was not a bigger one. They asked if they might have it flying after we moved away. Any man on the line would ask the same.' Thus the School Car is vindicating its worth in a national way."

#### Correspondence Courses

General Inspector Neil McDougall gives the following account of the Correspondence Course work which is conducted by mail at the Department of Education:

"The plan of sending lessons by mail to children living in isolated homes, so remote from a school that they are unable to attend, has proved wonderfully successful. This plan was put into operation by the Department of Education early in the year 1926, and is meeting in a very effective way the educational needs of hundreds of children scattered through the great northern region of Ontario and living from four to fifty miles from the nearest school. In a number of cases, owing to bad road conditions or the closing of school during the winter months, pupils take the Correspondence Lessons during that part of the year, and attend school during the other months of the year.

"The total enrolment since these Courses were begun three years ago has been almost 1,000. Those enrolled vary in age from six to thirty-five years, the majority being from six to sixteen years. That the enrolment has rapidly increased from year to year is shown by the following figures: 1926 enrolment, 200; 1927 enrolment, 450; 1928 enrolment, 775. Lesson assignments are mailed every ten days to the pupils enrolled and when the answers are returned to the Department they are carefully examined by a staff of fully qualified and experienced teachers. The corrected answers are then returned to the pupils. These lessons cover the Public School Course of Study from the Primer grade to the High School Entrance Examination. Five of the Correspondence Course pupils passed the High School Entrance Examination in June, 1928, two of them with honour standing.

"The Courses are given free and all the necessary books and supplies are provided by the Department, yet the average cost per enrolled pupil for the year was only \$13.00, or about one-sixth the average cost per pupil enrolled in the rural schools of the Province. From the results of the past three years it may be stated that the pupils taking these Courses advance just as rapidly in their studies as they would if attending a good school. The success attained depends to a considerable extent on the co-operation of the parents. Even where the parents have very little education, but have a keen desire to assist in every way they possibly can, splendid results are being achieved.

"The hearty co-operation and the sincere appreciation of the parents may be judged by the following extract from a letter received a few months ago from a parent who has three children taking lessons by mail:

"I owe my many thanks for the books and all requirements for the lessons sent to the children. My husband and I sure think these courses a wonderful thing, and I do not see why anyone should not appreciate such a wonderful thing. We think it is one of the wisest and best things ever created."

"This extract is typical of the expressions of appreciation contained in hundreds of letters received at the Department since the Correspondence Courses were inaugurated."

#### Summer Courses, 1928

General Inspector Neil McDougall, in charge of these courses, reports as follows:

"The Summer Courses are conducted by the Department of Education for the benefit of teachers who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing and thus to become more efficient in carrying on with a modernized curriculum.

"No fees are charged those who attend these Courses, but there is no allowance for living and travelling expenses, except in the cases of those who served overseas during the war, to whom one dollar per day is allowed. That the teachers fully appreciate this golden opportunity is shown by the great increase in

attendance from year to year. In 1928 there were 3,088 in attendance at the various Summer Courses provided as compared with 2,767 for the previous year. In the last five years the attendance has doubled. The registration in the various Courses was as follows for 1928:—Agriculture, 272; Art, 215; Auxiliary Classes, 69; Cadet Corps, 44; Commercial Subjects, 185; High School Assistants, 9; Household Science, 69; Kindergarten-Primary, 317; Manual Training, 44; Middle School, 39; Oral French, 48; Physical Culture, 363; Physics (Refresher Course), 21; Vocal Music, 138; Upper School, 705; Vocational, 100; Special Courses for English-French teachers, 450."

#### **Interchange of Teachers Within the British Empire**

The following report is made by General Inspector Neil McDougall, who is Interchange Officer for Ontario:

"About fifteen years ago the first organized exchange of teachers was effected between Canada and England, but the Great War cut short the promising beginning that had been made. After the war the plan was revived, but it was not until the meeting of the Imperial Education Conference in 1923 that the scheme for the Interchange of Teachers between the Dominions and the Mother Country was established on a permanent basis. Each part of the Empire is now prepared to accept in its schools, on exchange, teachers who possess the standard qualifications required in their own country, and who are certified to be efficient. The salaries of the exchange teachers continue to be paid by the Board under which they are permanently employed; thus each teacher, while on overseas service, receives the same salary that he or she would have received at home.

"The scheme is applicable to teachers in the elementary schools, secondary schools, and also to School Inspectors. There are usually from twenty-five to thirty Ontario teachers on exchange each year. Those desiring information regarding this matter should write to the Interchange Officer, Department of Education, Toronto.

"For the school year beginning September, 1928, there are twenty-nine of these interchanges in operation in Ontario. These include twenty-one Ontario Public School teachers and one High School teacher, in exchange with teachers from England, Scotland and Wales; and also six Ontario teachers in exchange with teachers from Vancouver, Calgary and Edmonton. The inter-provincial exchanges, which began a year ago, are becoming quite popular. Dr. Marty, Public School Inspector of the city of Toronto, is also on exchange for the year with Mr. J. J. Strasheim, B.A., Public School Inspector of the Transvaal, South Africa."

#### **School Health Supervision**

Dr. J. T. Phair, Director, Division of Child Hygiene, Department of Public Health, makes the following brief comment on this work:

"The relationship which exists between health and scholastic progress in children of school age, is receiving annually a larger measure of thought by those actually engaged in teaching. The lost time from preventable illness, and inability of a small group to maintain the class level, as the result of below-normal health, are now recognized as conditions warranting the best thought of both health and educational authorities. This thought is now being directed toward the recognition and correction of certain of the more patently disabling conditions, such as vision, hearing and orthopedic defects and disturbances of the nervous system. The extension of a satisfactory school health service to

practically all of the urban centres in the Province has materially lessened the magnitude of this problem. Unfortunately, our efforts toward the establishment of such a service on a permanent basis in the rural sections, has not met with the success hoped for. While over half of the children of school age in Ontario are receiving the advantages of a worth-while permanent school health service, of this number comparatively few are resident in a strictly rural community. This question still awaits solution."

#### Music and Art

During the past few years and particularly during the last year, 1928, there has been noted an increasing interest toward the teaching of Music in the rural schools. During the year, 1928, the increase in the special teaching of Music throughout the Province was double the increase in the previous year.

Subjects which can be made to subserve material ends are apt to be stressed in education, since their practical usefulness is patent to all. But when it is realized that education must take into account the whole man and aim at enriching his personality, and when the wise use of leisure is acknowledged as one of its chief objects, then the arts, and especially Music, are seen to deserve generous recognition.

In September, 1928, the scheme of grants, payable by the Department to boards and teachers for the successful teaching of Music, was revised so as to give more encouragement to the teaching of Vocal Music in the rural schools. The Inspectors have been asked to aid the local Boards in arranging for the special teaching of Music. It is felt that the most successful results in Music can be attained through the special teacher of the subject, this teacher visiting and teaching Music in each school weekly for one-half an hour to an hour, and the regular teacher supplementing the work of the special teacher by daily review and rehearsal. The method has worked out very successfully in many parts of the Province.

It may safely be predicted that the teaching of Vocal Music in the elementary schools will increase rapidly during the next few years.

<b>Music</b>

#### Rural School Fairs

Mr. R. S. Duncan, B.S.A., Director of the Agricultural Representative Branch, Department of Agriculture, makes the following report on Rural School Fairs, which is very interesting and much appreciated:

"In 1909 the first rural school fair was held in the Province of Ontario. As more or less of an experiment, seeds were distributed by the Agricultural Representative to the pupils of three rural schools in the County of Waterloo. Later in the year the first school fair was held and, while only three schools, with an attendance of fifty-eight boys and girls participated, the event created a good deal of interest.

"It was felt by both agricultural and educational leaders that this project provided a real opportunity to create greater interest in agriculture amongst the boys and girls. With this in mind, school fairs were adopted as a general policy of the Ontario Department of Agriculture in 1912. From this time onward the growth has been phenomenal. Interest and popularity have kept pace with the development, and in the year just closed statistics show that 141,397 boys and girls, pupils in 4,893 rural schools, participated in the 568 rural school fairs held in the Province.

"Each spring, eggs, flowers, vegetables seeds and cereal grains of elite stock are distributed to the boys and girls. In many of the school sections the boys' and girls' plots are scored during the summer months by a local judge and small prizes awarded. Many of the cereals, potatoes and poultry flocks on our Ontario farms to-day have been bred up from seed and eggs originally distributed through the schools.

"School fair day in the fall is looked forward to with eager anticipation by every boy and girl. The prize list provides classes not only for the material distributed in the spring, but also for calves, colts, lambs, pigs, nature study collections, fruit, cooking, sewing, farm mechanics, essays, writing and art. During the day the classes are judged and reasons given on as many as possible. Included in the programme are also inter-school competitions in physical exercises, singing, team competitions in first aid, live stock judging, domestic science judging, individual competitions in weed-naming, fruit or vegetable judging, and public speaking.

"Up to the present time all seeds including potatoes have been provided and distributed free of charge by the Ontario Department of Agriculture. Judges, prize lists, entry tags, ribbons and badges are also supplied by the Department. On the other hand, the prize money is provided locally.

"The success of school-fair work depends not only on the encouragement received by the boys and girls from their parents, but also to a large extent on the interest taken by the teachers and public school inspectors of the Province. To the Department of Education, therefore, belongs no small part of the credit for the success that has been attained.

"In most counties a committee of teachers and the public school inspectors assist the Agricultural Representative in planning the prize list and programme for school fair day. It is quite noticeable that school fairs are most successful in districts where the Agricultural Representatives and public school inspectors work in co-operation. In the majority of cases the public school inspectors attend all of the fairs in their respective inspectorates, assist with the judging, meet with the parents and teachers and generally help in making the event an outstanding success.

"In some counties it is interesting to note that the public school inspectors in co-operation with the Agricultural Representatives, have so planned the course in Agriculture that it and the school fair supplement one another. It is hoped that in the not too distant future this idea may be extended to all counties in the Province, so that the lessons taken from school fair work may be still further developed in the school room."

### Inspectors' Reports

The General Annual Reports submitted each year to the Department of Education by the Public and Separate School Inspectors, indicate lines along which school progress has been made and contain valuable suggestions. The following are a few abstracts from these reports:

*On Promotion Examinations:*

"1. Every classroom in the Inspectorate is now in charge of a fully qualified teacher holding a First or Second Class certificate, and the work being done, generally, is a reflection of their efficiency. The old grind for the final promotion examinations in June has been done away with and replaced by a system which grants promotion on the pupil's yearly record and his regular attendance. Any pupil who makes 65 per cent. on his year's work is not required to write a final examination in June, and this privilege has been extended so as to include every Public School in the Inspectorate.

"2. Perhaps the most important function the Inspector can exercise is to keep in touch with the classroom work of the teachers, and by suggestions, by taking part in the lessons, and by actual co-operation with the teacher in the work of the day do what he can to improve the work of the school. Some influence can be exerted, too, by means of the system of promotion adopted for the Inspectorate. Formerly final promotion examinations were depended on to set a standard for all the schools, but for several years I have thought it better to ask teachers to give their own final tests on the year's work, and at the same time to keep a monthly record of tests given throughout the year so that both sets of results may be considered in deciding on the pupil's fitness for promotion. This method seems to fix upon the teacher the responsibility of taking her classes thoroughly over the work prescribed in the courses of study, and of expecting them to master that work as a condition of promotion, whereas with the uniform examination method there is a tendency on the part of both teacher and pupils to depend on the chance of picking up enough marks by anticipating the examiner's favourite line of questions."

*On Teachers' Institutes and the Improvement of Teachers:*

"1. I accordingly arranged for the forty classrooms to be divided into two sections. Twenty of the classrooms were to be open on Thursday, October 4th, and the teachers of the other twenty classrooms, along with those from elsewhere in the county, observed on that day in whichever of the twenty designated classrooms they chose. On Friday, October 5th, the other twenty classrooms were open to visitors. Meetings of these teachers by grades were also arranged for after each day's observation.

"2. Teachers on the staff are taking courses to improve their academic standing. At the Departmental Examinations last June, approximately seventy-five papers were written at the Upper School Examinations, and almost half of the staff wrote one or more papers per individual. It is a very good thing for Ontario education when there is such a spirit on the part of the teachers. The teacher who studies is the teacher who grows and who does the best work in the classroom.

"3. The Teachers' Institute functions most satisfactorily when it is managed and controlled by the teachers. When this is the case, they develop a feeling of responsibility for the success of the meetings, and they are much more willing to assist in the programme and participate in the discussions. Under these conditions they are in the proper mood to derive benefit from the meetings.

"4. The young teachers leaving the Normal School to-day seem to come to their first schools with a fairly adequate stock-in-trade of type methods, but in many cases failure to adapt the type method to practical and special conditions is resulting in very poor teaching. This failure is due, I am convinced, in very many cases to poor academic grounding. The net result is, that the teacher in difficulties gropes blindly backward into her own Public School experience, and teaches, in the course of two or three years, very much as she herself was taught.

"5. Judged by the comments of the members after the meeting, the Teachers' Institute this year was one of the most profitable that they had ever attended. The demonstration of devices used for profitable busy work in the Primary grades by teachers of experience was an outstanding part of the programme. In my visits to schools since the Institute met, I have seen a number of these devices or variations of them being employed. If more suggestions that have been found useful and of practical application in the ordinary classroom could be shown at these meetings the value of the Institute might be still further increased. The difficulty lies, in some cases, in finding capable teachers who are willing to appear on the platform.

"6. Forty teachers of the Inspectorate—nearly one-sixth of the total—attended a Summer School in 1928. In every school there is at least one teacher who attended Summer School this year, and in one school there are ten such teachers. Seventy-eight teachers—nearly one-third of the total—have worked toward a higher certificate or degree during 1928.

"7. The most valuable part of the convention was, however, the group-conference. The whole of the programmes at these conferences were provided by members of the Institute."

*On the Teaching of Music:*

"1. In one township, five sections have combined and engaged a qualified teacher to give music instruction to the pupils in their schools.

"2. That the interest taken by the parents in the teaching of music in the schools is steadily increasing is shown by the fact that out of 100 rooms the classes in fifty-four rooms are receiving instruction in this important subject by six special music teachers who visit the schools weekly and are paid by the trustee boards concerned. The new Regulations issued by the Department of Education in September last, which make it possible for rural boards to receive grants equal to 50 per cent. of their expenditure in connection with Music, have proved a real incentive.

"3. About fifteen rural schools have a music teacher who teaches music in each school one hour each week for which they pay about \$3.00 per hour. This plan has been carried on for several years quite successfully and the parents and pupils are quite pleased with it."

*On Primary Reading:*

"In the teaching of Primary Reading more advance has been made, I think, than in any other subject. The majority of children complete the Primer in one year and read with a good degree of thought expression. Generally the method is as follows:

"Teaching of sight words in sentences and from pictures and actions.

"Reading easy sentences from the first, using print.

"Key words well taught and quickly recognized.

"Oral phonics and written phonics developed naturally.

“Training in language by use of stories and games, and suitable questions about these.

“Writing lessons, apart from the reading.

“A simple phonic reader and plenty of blackboard and cardboard reading prepare the child to read quite readily from our authorized primer in three or four months.”

*On History:*

“History continues to be a difficult subject with some teachers; but not the majority, I am glad to say. By means of more interesting texts like the *New Canadian History*, by encouraging supplementary reading in the subject, the use of stories and graphic illustration, correlation with other subjects, and the setting of certain class projects, the study of History is appealing more to the pupils' liking and understanding.”

*On Oral Composition:*

“To stimulate interest in oral composition throughout the schools the Principals eagerly adopted a suggestion to introduce last winter *a contest in public speaking*. All details were arranged by a special committee of two enthusiastic principals and the Inspector, with the loyal co-operation of the teachers. The innovation proved a great success. It aroused the interest not only of the pupils, teachers, and principals, but also of parents, trustees and newspaper men.

*On Arithmetic:*

“During the past year the teachers of this Inspectorate prepared a month-by-month outline of the Course of Study in Arithmetic, together with notes as to how the work in this subject might be improved. Two points in particular have been stressed in the teaching as a result; the necessity for accuracy, and the necessity for speed. While this presented nothing new to the teachers, because the need for accuracy and speed is so familiar as to be commonplace, yet the standards by which speed and accuracy might be obtained drew attention to a weakness in arithmetic work in the past and the necessity of securing better results. The thorough teaching of short topics well arranged was also a feature included in the notes bearing on the subject. My observations since September have shown the definite progress that has been made in securing much better results than heretofore.”

*On Arithmetic and Grammar:*

“I find a marked weakness in the average teacher's grasp of the fundamentals of Arithmetic and English Grammar, and I feel that there is considerable force in the argument that a place should be made for these two subjects on the Departmental Middle School Examination.”

*On Composition:*

“In Composition, the pupil must first search for ideas of his own, and then his mind must analyze these ideas, make a selection of the best, and then express these ideas in suitable language, and with proper technique. This search for ideas can become a very fascinating task if the pupils are in charge of a teacher who can stimulate the spirit of enthusiasm and make the pupils feel that here is work that will challenge the best that is in them and that will pay huge rewards to the successful explorer—the rewards of mental growth, larger interests, and greater appreciation. If the study of technique could become secondary to the

search for the gold of good ideas, the educational benefits possible in written and oral composition would be bestowed more richly and in greater abundance upon the minds of the students."

*On Primary Reading:*

"In one school the teacher and pupils in the Primer class prepared little reading books which contained phonic words which the class with a knowledge of phonics had found out for themselves. These words were combined into sentences and were entered into their booklets. Great interest was aroused in the reading of their booklets. This interest in reading was transferred to the reading of other books and soon the regular Primer was added to the list of books read."

*On Games:*

"The school spirit has much to do with the pupils' progress and with their desire to complete their course of study. Organized and properly supervised games have proved beneficial in all the schools. The Home and School Association have co-operated in every possible way with the teachers to foster a wholesome school spirit."

*On School Fairs:*

"The Trustees' and Ratepayers' Association organized public speaking contests in every township. Competitions were held, and the winners of these local contests were qualified to take part in a final contest. The contests were well attended and were highly satisfactory. The School Fairs and the Competitions gave the Inspector additional opportunities to meet the people and to become personally acquainted with many."

*On Agricultural Representatives:*

"Too much cannot be said in praise of the splendid leadership of the Agricultural Representative in connection with the School Fairs."

*On Correspondence Abroad:*

"There has been a great impetus in Inter-Imperial correspondence among children. Pupils from Public Schools now correspond with all parts of the Empire. This has led to an exchange of products among schools. By this means Geography has become a living subject to the children."

*On the Penny Bank:*

"The Penny Bank project was introduced into the schools during 1928. It has met with success and a large percentage of the pupils are contributing regularly."

*On the School Cars:*

"The most useful and far-reaching work in connection with educating the adults along the lines of railway is being done by the school cars. The teachers in charge are admirably adapted for work of this nature, and I venture to suggest that much of the work these men are doing in the way of inculcating right habits of living and thinking in the minds of the children and the foreign adults, and in the way of helping these people to be loyal Canadian citizens, cannot well be estimated."

*On Fifth Classes:*

"The County Council, recognizing the value of Fifth Classes in rural schools for those who would not otherwise get a chance of further education, have encouraged trustee boards to start Fifth Classes by giving a grant of \$15.00 to the Board for each pupil doing Fifth Class work in that school."

*On School Grounds:*

"Much has been done during the past year in repairing, remodelling and decorating school buildings, and too much praise cannot be given to the trustees for the way in which they have beautified their school premises. Grounds have been levelled, trees planted, flowers cultivated, school yard equipment added; altogether, the school buildings and surroundings generally present a very creditable appearance."

*On Sanitary Toilets:*

"In addition to these new buildings many minor improvements were made in the present school buildings, the chief of which was the installation of sanitary inside closets in seven rural schools. This excellent modern convenience is a great boon for rural schools and I hope to see them installed in all schools in the near future. There are now fifty-six Public School buildings in the Inspectorate, of which 32 are equipped with inside toilet conveniences."

*On School Buildings:*

"There is a general tendency to improve the appearance of the school buildings, the classrooms, and the school grounds. It would appear that the discussion provoked by consolidation and the township board has drawn the attention of trustees and ratepayers to their school plants. I am surprised and gratified at the number of parents and trustees who come to me and say, 'The children should have the best.' New hardwood floors, electric wiring, where the Hydro is available, new furnaces, decoration of the interiors according to the suggestions of the Department in the revised Regulations, new outdoor toilets well built, and indoor chemical toilets and improved school grounds, are the result. One board had the District Representative and his assistant plan their school grounds for them according to the specifications recommended by the Ontario Agricultural College. The annual meeting of one section authorized the board to install electric lighting and to discard the old chemical toilets and install a flush water system."

*On the Township Board Bill:*

"1. The more this Bill is being studied and discussed the more it is growing in favour. Any scheme whereby educational work in advance of the Public School Course will be brought nearer to the rural homes is certain to be acceptable when understood. Much of the opposition to the Bill is due either to prejudice or to a failure to give it fair and unbiased study. Our national growth is demanding educational progress, and this progress, so far as our rural schools are concerned, has about reached its goal under our present organization. We must amend this organization before we can hope to advance much further.

"2. The Township Board Bill scheme is getting more sympathetic attention from the people who were formerly bitterly opposed to it. This Bill is not yet well understood by the masses of the ratepayers. They are opposed to the principle of the Bill without any reason for their opposition. When some trouble has arisen in the section, and has to be settled, then is the best time to

put a word in in favour of the Bill. Very often the township scheme, if in operation, would prevent difficulties which are constantly arising. The people are traditionally opposed to any sudden change in existing conditions, but the Bill is receiving increasing support every year.

"3. The Township Board Bill does not seem to be discussed as much as heretofore, although the uncertainty of whether it is going to become law or not is holding school boards back from considering seriously the building of new schools in several cases. Necessity for such a Board shows itself every once in a while where conditions are not satisfactory.

"4. The two Township Boards in this Inspectorate are functioning smoothly and efficiently. In Tarentorus, where the Township Board has been in operation for years, nobody ever suggests reverting to Section Boards. In Prince, where the Board strenuously came into being one year ago, keen opposition has apparently subsided; most certainly there has been greatly increased efficiency. All organized townships in this Inspectorate would, I think, now accept without protest Township Boards, unless some organized movement from without interfered."

#### General Remarks

In those communities of the Province where there is apathy toward the schools, and those communities are now few, it is usually noted that other conditions and activities are backward. And the schools, through lack of outside support, cannot thrive and do their best work in such communities. The primary schools of Ontario owe much to the increasing interest being taken in them by the people in general, and by many organizations.

It would be impossible here to mention the many bodies and organizations which have shown a kindly interest in and have greatly helped the schools. The Imperial Order of the Daughters of the Empire presented splendid libraries of books to many northern schools during the year. The Women's Institutes, the Home and School Clubs, and Mothers' Clubs, have given invaluable support to the schools in all parts of the Province. The Junior Red Cross has continued to assist in a splendid Health and Citizenship programme in an increasing number of schools. The Ontario Safety League has increased its efforts in the schools and the schools gain by a very close co-operation with the League in its successful attempts to combat increasing menaces to the lives of children. The Fire Marshall's Department has rendered fine service to the schools with its literature and the co-operation of Fire Departments.

The Agricultural Representatives are continuing to co-operate with the Inspectors, and Mr. Duncan's comments in another part of this report indicate the increasing success of School Fairs and the teaching of Agriculture.

The Penny Bank is being made a part of the programme of an increasing number of schools. Mr. Littleproud, the official Inspector and organizer for the Bank, is receiving the hearty co-operation of Inspectors and Boards where he visits. The value of the teaching of thrift cannot be over-emphasized.

In addition to the contributions made by others in this report, I am indebted to my colleague, Assistant Chief Inspector W. I. Chisholm, for his hearty co-operation and assistance.

V. K. GREER,

*Chief Inspector.*

Toronto, January 31st, 1929.

## APPENDIX B

### REPORT OF THE HIGH SCHOOL INSPECTORS

---

One of the striking facts in connection with the development of secondary education—a fact that is both a cause and an effect of such development—is that there has grown up in every part of the Province a strong public opinion that gives sanction to the progressive policies of local authorities in the matter of providing everything essential to real educational advancement. The people as a whole are solidly behind all movements for better school accommodations and equipment, more extensive and more varied courses of study, higher grade teachers and a longer and a fuller school life for the youth of the land.

During their past year's work among the 200 High Schools and Collegiate Institutes of the Province the Inspectors met upwards of 1,900 teachers. They found their duties heavy, but not irksome, because their visits to the schools were made pleasant by the uniform courtesy and thoughtfulness of school boards, principals and teachers and by the cheerful atmosphere of the classrooms.

#### Accommodations

The improvement in High School accommodations and equipment which has been a marked feature of the advance in secondary education throughout the Province for the past ten years goes on apace. During the year 1928 two large new collegiate institute buildings have been opened, one at Belleville which provides for both academic and vocational courses, and one in London South, making the third collegiate in that city. The problem of providing educational facilities in suburban areas, always a serious one, is being solved satisfactorily in the townships adjacent to Toronto. A new building, to be known as the Etobicoke High School, has been recently erected at Islington; a third Collegiate Institute for York Township is under construction on Eglinton Avenue; and the North York High School District has plans perfected for a fine building to house the Earl Haig High School. Bridgeburg, Dutton, Cochrane, Fergus and Waterdown have erected new buildings along modern lines and Newmarket has rebuilt since the fire which recently destroyed their school. Additions have been made to the following schools: Forest, Fort Frances, Mimico, Niagara Falls Collegiate Institute, Parkdale, Port Hope, Runnymede, Vaughan Road, and Whitby. A second large Collegiate Institute is under construction in Windsor, and additions are being made to the North Toronto Collegiate Institute which will make it one of the largest schools in the Province.

#### Changes in Status

The Continuation Schools at Kirkland Lake, Willowdale and Maxville have become High Schools and the Vaughan Road and Runnymede High Schools have now collegiate institute rating. In Ottawa, the Lisgar and the Glebe Collegiates have been made separate units.

#### Courses of Study

During the year the courses of study have been revised along lines suggested by the experience of the seven years during which the present programme of school work has been in operation. The changes made have been, in the main,

minor ones. The science syllabus has been rewritten with a view to making it more definite, Canadian and British History have been interchanged, the geography course has been modernized. In the revision of the courses, the suggestions offered from year to year by the various sections of the Ontario Educational Association were acted on wherever possible.

#### The Teachers

The Inspectors who visit the schools year after year are struck by the evidence of an increasing desire on the part of the teachers to improve their scholarship. In one school after another one finds a teacher with Specialist standing who did not have it at the time of his last visit. It is significant that of the 1,950 high school teachers in the Province, 1,443 of them are Specialists in one or more departments. During the summer vacation of 1927, 322 high school teachers attended summer schools conducted by the Department of Education, many more took courses at the Universities of Ontario and elsewhere, and 659 were in Toronto acting as associate examiners—an experience possibly as valuable to a young teacher as a summer course. The Inspectors are unanimous in bearing witness to the effectiveness of the teaching, to the seriousness of purpose of those engaged in it, to their increasing interest in the extra-curricular activities of the schools, and to the fact that an increasingly large proportion of the Specialists are prepared to give instruction in courses beyond what is now attempted in the best Collegiate Institutes of the Province.

## APPENDIX C

## REPORT OF THE INSPECTORS OF CONTINUATION SCHOOLS

In the Province there are 216 Continuation Schools, in which 459 teachers are employed. These schools are classified as follows:

Grade A. (in which at least the time of three teachers is required).....	34
Grade B. (in which at least the time of two teachers, but less than the time of three, is required).....	134
Grade C. (1—those in which the whole time of one teacher and at least half the time of an assistant teacher is given to the work). 26	26
(2—those in which the equivalent of the time of one teacher is given to the work).....	22
	216

For purposes of inspection, the Province is divided into three parts and the schools apportioned as follows:

1.—The eastern.....	G. K. Mills 72 schools and 149 teachers.
2.—The western and north, by C.P.R.....	J. P. Hoag 74 schools and 155 teachers.
3.—The southern, central and north, by C.N.R.....	J. P. Cowles 70 schools and 155 teachers.

### Indications of Progress

The past year has given evidence of progress. New schools have been established at Allenford and Palgrave. The Continuation Schools at Kirkland Lake, Maxville and Willowdale have been given the status of High Schools. The teaching staff in sixteen schools has been increased. New buildings that in every way are a credit to the communities have been erected at Blind River, Haliburton, Hepworth, Little Britain, New Dundee, Ridgeway and Thornton, and additions of one or more classrooms have been made to the schools at Allenford, Englehart, Feversham and Milford Bay.

However, the attendance in a number of schools shows some decrease as compared with recent years. This is so very marked in a few schools that it is quite possible the community would be served as satisfactorily by a fifth class as by the Continuation School.

### Supply of Teachers

There is a marked desire on the part of most boards to secure qualified men with successful experience as principals, particularly if more than one teacher is employed. There are not enough such men to meet the demand and there is little hope of providing them at the salaries offered by many boards. These salaries may be larger than most boards have been accustomed to pay, or even larger than some boards can fairly be expected to pay, but capable young men can readily get positions in city schools at higher salaries than those usually offered in Continuation Schools. Boards that advertise early, offering fair salaries, get the best of the supply; those that advertise later have considerable difficulty in

filling their positions. Several Boards, after advertising several times and passing over qualified women, finally filled the positions with unqualified men. Toward the end of the summer holidays an unusual scarcity of qualified applicants developed. This was unexpected as for several years there had been a supply of qualified principals quite adequate to the needs of our schools.

This scarcity may be explained by the fact that owing to the well-known surplus of young teachers, a number of experienced teachers holding the qualifications necessary for principals, thought it well to renew agreements with their Boards, or had secured positions as early as possible. Also, an unusual number of experienced teachers went to the universities to secure university standing. The fact that the qualifications for principals of Continuation Schools subsequent to September 1, 1928, have been raised may have had some influence in bringing this about, although the change did not affect the validity of those certificates issued previous to that date.

### **Some Advantages**

Relatively small classes resulting in intimate contact between teacher and pupil, necessity for independent work, absence of distractions, and home environment are all factors in producing results in Continuation Schools far beyond what might be expected were the academic preparation and experience of the teacher the only factors considered. Academic preparation frequently is inadequate and experience very limited, but the old adage "the school is the teacher" is not more than half true. The conditions surrounding the pupils have a great influence not only in character building, but on examination results, and the type of pupil coming from these schools and his preparation for the work of life or the pursuit of knowledge in higher educational institutions, will compare favourably with those from other types of schools.

### **Lower School English**

Because of lack of experience and a limited acquaintance with suitable literature, many young teachers fail to make use of the freedom of choice given them when dealing with Lower School Literature. Too frequently the work of the course is limited to a very few poems such as had been prescribed for Middle School Literature when the teacher attended High School. These few poems, taught in minute detail as the teacher heard them taught in the Middle School, fail to have much result in arousing interest, developing taste or giving acquaintance with the world of good things in English Literature.

### **Notegiving**

With many teachers, notegiving and notemaking during the lesson has very largely taken the place of discussion, questioning, drill and review in such subjects as Botany, Zoology, Physiography, Geography and History. Since all teachers of these subjects in the training schools and most experienced teachers in High Schools and Collegiates condemn this method, it is somewhat of a mystery that the practice of notegiving not only persists, but actually seems to be on the increase. While there should be sympathy for the young teacher who faces a class with little teaching experience, a limited knowledge of the subject and possibly little interest in it, there can be little but condemnation for the teacher who persists in a method that loads the memory with unrelated and unassimilated matter in the hope that it may be used for examination purposes.

### Latin and French

Very frequently the teaching of Latin and more particularly of French in the Lower School is unsatisfactory. It is true that a new attitude toward these subjects is discernible. Teachers are beginning to realize that in the Lower School the aim should be to have the pupil acquire a facility in reading and speaking the language as well as to obtain an accurate knowledge of the grammar. As a better preparation for their work, a considerable number of our teachers attend Summer Schools where French is the language spoken and a few of the teachers in the larger schools of the Province spend from one or two summers to one or two years in France. All of this has an influence, but conditions in our schools in regard to the teaching of Latin and French improve slowly. It is usual to find so much time wasted in writing sentences that the pupil had for homework for the teacher to correct that there is not enough time left for questioning, oral drill, reading and conversation. The amount of blackboard work seems to increase with the years until it is not unusual to find about seventy-five per cent. of the time for teaching grammar used in this way and little attempt made to give practice in reading and speaking French.

### General Remarks

The weakness indicated above, as well as others unmentioned, are of sufficient importance to warrant consideration of means by which they may be cured or conditions improved. Our teachers generally are earnest, willing workers, with youth, energy, ambition and good ability. The difficulty does not lie in the teaching of stated lessons, but in the method of dealing with subjects. No individual is in possession of all wisdom as to best methods. Methods may vary with the teacher, the class, and the conditions under which the subject is taught, but there are methods that are wasteful of time, that do not tend to arouse interest in the subject, that do not train the pupil to express his ideas clearly and concisely and that do not give pupils sufficient practice in applying knowledge already gained. Young teachers, under the stress of work in new positions, very frequently seem to forget what the training school stressed so diligently and earnestly, and fall back upon methods to which they were accustomed when attending primary or secondary schools. Thus, methods no inspector or training school teacher would countenance are practised and continued until they become fixed habits. To find means of eliminating such methods while leaving the teacher freedom to express his individuality, is the most difficult problem the inspector meets, and he meets it almost daily.

## APPENDIX D

## REPORT OF THE DIRECTOR OF TECHNICAL EDUCATION 1927-1928

### PROGRESS DURING THE YEAR

#### Day Schools

Satisfactory progress may be reported again this year, as shown by the statistical tables. During the year 1927-1928 there was an enrolment of 20,149 full-time, 2,909 part-time, and 1,455 special day pupils, an increase in enrolment over the previous year amounting to 2,829 pupils, or 13.05 per cent. The number of day teachers increased from 607 to 660, an increase of 8.73 per cent. The advance is attributable to the opening of several new Technical and Commercial Schools and also the taking over of certain commercial departments in High Schools.

The number of day schools or departments in operation during the year was forty-two, including the four Agricultural Schools of Renfrew, Beamsville, Ridgetown, and St. Thomas; the two Mining Schools at Haileybury and Sudbury; and the three Navigation Schools at Kingston, Midland and Collingwood.

#### Evening Schools

The number of evening schools in operation was sixty-one. The number of students enrolled was 39,096, as compared with 37,977 for the preceding year. The programme of studies offered was similar to that of previous years, and results have been very satisfactory.

It is gratifying to note that sixty-one boards of trustees throughout the Province are making use of the school buildings and equipment to offer further opportunities for education to over 39,000 adults enrolled for a great variety of courses. In many centres the equipment used in the day school is suitable for evening school work, but a lack of equipment has not prevented boards from offering effective instruction for adults in a variety of subjects not covered by the day school programme.

#### Statistical Information

The following tables show the progress of the vocational schools:

##### DAY VOCATIONAL SCHOOLS

	1922-23	1923-24	1924-25	1925-26	1926-27	1927-28
Number of full-time teachers. . . . .	286	371	416	530	607	660
Number of part-time teachers. . . . .	51	88	108	147	148	171
Number of full-time pupils on roll. . .	6,987	9,184	11,595	15,201	17,359	20,149
Average attendance of full-time pupils	5,518	7,209	9,263	11,689	13,400	15,414
Number of part-time pupils on roll. .	988	1,837	1,739	2,743	2,729	2,909
Aggregate student-hours of part-time pupils. . . . .	60,972	177,638	237,378	358,283	354,089	453,976
Number of special pupils on roll. . . .	1,427	1,798	1,875	1,705	1,626	1,455
Aggregate student-hours of special pupils. . . . .	243,074	235,082	242,685	173,365	166,928	186,477

## EVENING VOCATIONAL SCHOOLS

## SUMMARY OF EXPENDITURES BY MUNICIPALITIES

1919	1920	1921	1922	1923
\$659,072.82	\$1,347,905.04	\$1,585,086.36	\$1,871,614.21	\$3,957,136.88
	1924	1925	1926	1927
	\$3,105,235.11	\$3,365,434.69	\$3,499,380.46	\$3,788,735.83

## LEGISLATIVE GRANTS

1919	1920	1921	1922	1923
\$140,294.14	\$511,021.04	\$670,758.56	\$638,217.28	\$624,558.06
	1924	1925	1926	1927
	\$672,077.86	\$743,427.37	\$813,581.74	\$849,564.50

## Dominion Subsidy

The following table will show that the total amount of subsidy available under the Technical Education Act, 1919 (Dom.), has been earned and received by the Province of Ontario:

Dominion Year	Amount Available	Amount Received
1919-20.....	\$224,383.30	\$224,383.30
1920-1.....	259,528.10	259,528.10
1921-2.....	294,672.80	294,672.80
1922-3.....	314,206.97	314,206.97
1923-4.....	347,636.30	347,636.30
1924-5.....	347,636.30	347,636.30
1925-6.....	347,636.30	347,636.30
1926-7.....	347,636.30	347,636.30
1927-8.....	347,636.30	347,636.30
1928-9.....	347,636.30	347,636.30
	<u>\$3,178,608.97</u>	<u>\$3,178,608.97</u>

## New Schools

The Advisory Vocational Committee of the City of Toronto opened a large building in the west end of the city to take care of both technical and commercial work. The building provides about eighty rooms and will be in charge of two principals and two staffs. It was opened in September, 1928. The enrolment of full-time day students for the first year in this new school was—technical, 786; commercial, 911.

The City of Belleville opened a fine, modern school of the composite type, in September, 1928, to take care of their complete secondary school programme.

The local education authorities at Peterborough built an addition to their Collegiate Institute to provide for industrial, commercial, and home-making courses, with assembly hall and gymnasium accommodation for the complete school.

Timmins opened, in 1928, a new wing of the Collegiate Institute, which provides for industrial, mining, commercial, and home-making courses. This addition contains also an assembly hall and gymnasium.

Port Arthur let contracts and made good progress on a combined Technical and Commercial School, to be situated on a commanding site overlooking the lake. It is expected that the new building will be ready early in 1929.

The last addition to complete the Technical School in London, provided for an assembly hall, two gymnasia, and some classrooms. This addition was opened during the year.

The Advisory Vocational Committee of Toronto has had plans approved and is making progress with the replacement of a part of the old Jarvis Street Collegiate, which is used for special industrial instruction to pupils from auxiliary classes.

In Brantford, plans have been approved and an addition to the Collegiate Institute is well under way to provide accommodation for industrial and home-making classes.

The City of Hamilton has built an addition to the Technical School to provide for a girls' gymnasium.

Plans have been approved and some progress has been made with the construction of a new shop unit, which will give more satisfactory accommodation in the Technical School at Chatham. This is the first unit of a building, which will be completed at a later date, to provide for all courses in the Technical School.

Plans for new buildings and additions to buildings already erected are now under consideration for Hamilton, Toronto, Oshawa, Sault Ste. Marie and Ottawa.

It can be stated with considerable confidence that the movement towards vocational education has gained such strength in the Province that the accommodation previously available, and at present in course of erection, will be used to the fullest extent. Moreover, it is of such a nature that it will afford better means for evening as well as for day class instruction.

The following summary refers to the employment of graduates from all Ontario Vocational Schools, as far as could be ascertained from the reports of principals:

#### Summary of Employment of Graduates from Ontario Vocational Schools

##### A. INDUSTRIAL COURSES—

Machine Shop Practice.....	251	Blacksmith and Welding.....	6
Tool-making.....	62	Mechanical Drawing.....	149
Carpentry.....	116	Architectural Drawing.....	55
Cabinet-Making.....	38	Gen. Building Construction.....	28
Pattern-Making.....	42	Contracting.....	14
Moulding and Foundry.....	15	Machine Operators.....	251
Plumbing.....	68	Chemical Laboratory Work.....	30
Tinsmithing.....	39	Surveying.....	15
Electrical Operation.....	35	Mining Underground.....	3
Electrical Maintenance.....	56	Stationary Engineers.....	11
Electrical Installation.....	99	Hoist Operators.....	1
Electrical Construction.....	48	Telephone and Telegraph.....	72
Printing and Binding.....	337	Painting, Decorating, etc.....	29
Linotype Operating.....	5	Business Clerks.....	133
Automobile Manufacture.....	18	Other Occupations.....	963
Automobile Mechanics.....	204		
Total.....			3,193

##### B. HOMEMAKING COURSE—

Home Makers.....	237	Alterations.....	3
Cooking.....	13	Nursing.....	129
Dietetics.....	16	Millinery.....	78
Dressmaking.....	56	Novelty Making.....	16
Sewing.....	24	Beauty Culture.....	22
Machine Operating.....	148	Teachers.....	8
Cutting and Fitting.....	1	Factories.....	78
House Work.....	224	Other Occupations.....	141
Selling.....	184		
Total.....			1,378

## C. ART COURSE—

Commercial Design.....	37
Applied Art.....	31
Lithography.....	11
Interior Decorating.....	3
Novelty Manufacturing.....	7
Fine Art Work.....	10
Total.....	99

## D. COMMERCIAL COURSE—

Stenography.....	1369	General Office Work.....	249
Typewriting.....	606	Assistants to Manager.....	1
Bookkeeping.....	601	Teaching.....	64
Accounting.....	83	Nursing.....	22
Filing.....	149	Home Makers.....	76
Selling.....	424	Banking.....	39
Business.....	348	Other Occupations.....	171
Secretarial.....	80	Total.....	4,282
Total.....			

## E. AGRICULTURAL COURSE—

Farming.....	82
Dairying.....	5
Fruit Growing.....	1
Plant Growing.....	2
Other Occupations.....	2
Total.....	92

## F. NAVIGATION COURSE—

Masters, Inland.....	10	Master Painter.....	1
Mates, Inland and Coasting.....	90	Income Tax Officer.....	1
Masters, Minor Waters.....	16	Wrecking Master (Marine).....	1
Mates, Minor Waters.....	22	Marine Engineers.....	—
Captains, Inland and Coasting.....	30	Other Occupations.....	15
Pilots.....	12	Total.....	198
Total.....			

## G. MARINE ENGINEERING COURSE—

Masters.....	—	Third Engineers.....	1
Mates.....	—	Fourth Engineers.....	6
Chief Engineers.....	2	Oilers.....	2
Second Engineers.....	12	Firemen.....	4
Total.....		Total.....	27

Railway Operators.....	9
Telegraph Operators.....	1
Assistant Railway Agents.....	2
Assistant Baggage Master.....	1
Other Occupations.....	2
Total.....	15

## I. MINING COURSE—

Mining Engineering and Executive Mining Positions.....	16	Civil Engineers.....	3
General Mining and Millmen.....	18	Chief Chemists.....	3
Electrical.....	5	Mine Surveyors.....	7
Prospectors, Scouts, Diamond Drilling, etc.....	22	Assistant Foremen or Superintendents.....	8
Smelters, Metallurgists and Assayers.....	14	Mechanics.....	2
Draughtsmen.....	4	Miscellaneous.....	6
Total.....		Total.....	108

D. A. CAMPBELL,

*Director of Technical Education.*

Toronto, February 6th, 1929.

## APPENDIX E

### REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

---

The enrolment of teachers-in-training at the Provincial Normal Schools and the College of Education for the session 1928-29 shows a net decrease of 330 from that of the previous session. The decrease in the Public and Separate School First Class Course is ninety-three, in the Second Class Course 276, and in the Kindergarten-Primary Course ten, while the enrolment in the High School Assistants' Course shows an increase of forty-nine. Owing to the growing stability in the teaching profession, and the very adequate supply of teachers at the present time, this decrease does not suggest the probability of any shortage in the supply of Elementary School teachers.

#### The Ontario College of Education

Exclusive of thirty-five students registered in the newly created Library School, the total registration for the scholastic year 1928-29 is 552, as against 515 in 1927-28. Of this number, 311 are registered in the High School Assistants' Course. The registration in the graduate courses in pedagogy also continues to increase. Twenty-one B.Paed. degrees and three D.Paed. degrees were conferred by the University in June, 1928, on students in education.

The academic standing of the students registered in the High School Assistants' Course may be indicated as follows:

B.A. or M.A.....	291
B.A. Sc.....	3
B.S.A.....	14
B.H. Sc.....	1
B.B.A.....	1
B.S.....	1

The registration of teachers-in-training in the various courses is as follows:

The One-Year Household Science Course.....	6
The High School Assistants' Course (113 men and 198 women).....	311
(a) Intra-mural (100 men and 184 women).....	284
(b) Extra-mural (11 men and 7 women).....	18
(c) July, 1928 (2 men and 7 women).....	9

The registration in the various Specialist Courses is as follows:

(a) Registration in Specialist Courses (intra-mural):	
Classics.....	7
English and French.....	9
English and History.....	34
French and German.....	14
French and Spanish.....	7
Household Science.....	8
Mathematics and Physics.....	10
Science.....	11
Agriculture.....	12
Physical Education.....	4
English and History; English and French.....	1

(b) Registration in Specialist Courses (extra-mural):	
English and French.....	7
English and History.....	15
English, French and Spanish.....	1
English, French and German.....	1
English and Spanish.....	1
French and German.....	1
Household Science.....	1
Mathematics and Physics.....	6
Science.....	1
Agriculture:.....	1
Registration in the Optional Courses:	
(a) First Class Public School Course.....	38
(b) Elementary Art Course.....	54
(c) Elementary Physical Education Course.....	196
Registration in Courses for Degrees in Pedagogy:	
(a) Summer Session, 1928.....	71
(b) Winter Session, 1928-29.....	64
(c) Degrees granted, June, 1928.....	24

At the opening of the University Schools in September, the registration of pupils in each classroom was reduced to make the classes conform with the regulations of the Department of Education. The staff of the University Schools was also increased by two through the appointment of Mr. B. C. Diltz, M.A., and Mr. A. C. Lewis, M.A., B.Paed. These additions to the staff have made it possible to provide more oral work in the languages and more laboratory practice in Science.

Mr. S. W. Perry, instructor in Art, retired from the active duties of the classroom with the close of last session. As a High School teacher and principal of distinction, and as an instructor in Art who has led the movement to establish Art in Secondary Schools, Mr. Perry takes with him into retirement the good wishes of the teachers of the Province.

The vacancy created through Mr. Perry's retirement has been filled by the appointment of Miss A. Marsh, A.R.C.A.

Professor J. T. Crawford, who had been in charge of the department of Mathematics in the College of Education and the University Schools since their organization on Bloor Street, died suddenly, July 16th, at Innsbruck, in the Austrian Tyrol, where he was travelling with his family. Professor Crawford came to the College of Education from Hamilton, in which city he had served for twenty years as Mathematical Master at the Collegiate Institute and was for ten years in charge of the Department of Mathematics in the Ontario Normal College. In these positions he had already acquired a province-wide reputation as a successful teacher of mathematics. Professor Crawford was, at the time of his death, the senior in experience of those engaged in training High School teachers in Ontario. "As a teacher of mathematics he has not his equal in the schools of Ontario," exclaimed an educational administrator, when he heard of Professor Crawford's sudden death.

The vacancy created by Professor Crawford's death has been filled by the promotion of W. J. Loughheed, B.A., Instructor in University Schools.

#### The Provincial Normal Schools

The following table gives in detail the attendance in the various courses of the seven Provincial Normal Schools for the present session:

## FIRST CLASS COURSE

	Male	Female	Total
Hamilton.....	11	87	98
London.....	11	68	79
North Bay.....	6	31	37
Ottawa.....	10	63	73
Peterborough.....	5	39	44
Stratford.....	16	36	52
Toronto.....	31	116	147
Total.....	90	440	530

## SECOND CLASS COURSE

Hamilton.....	10	48	58
London.....	11	67	78
North Bay.....	6	102	108
Ottawa.....	11	96	107
Peterborough.....	12	49	61
Stratford.....	13	45	58
Toronto.....	25	135	160
Total.....	88	542	630
Kindergarten Primary (Toronto).....	....	26	26
Grand Total.....	178	1,008	1,186

## The Normal Model Schools

The enrolment of pupils at the Normal Model Schools at Ottawa and Toronto for the year 1928 was as follows:

School	Boys	Girls	Total
Ottawa.....	314	259	573
Toronto.....	353	317	670
Total.....	667	576	1,243

To provide the required observation and practice teaching for the teachers-in-training at the various Normal Schools, under agreement with the School Boards concerned, affiliated urban and rural Model Schools have been used, as follows:

Normal School	Urban Model Schools	Rural Model Schools
Hamilton.....	3	3
London.....	4	3
North Bay.....	2	3
Ottawa.....	1	4
Peterborough.....	2	4
Stratford.....	2	3
Toronto.....	2	7

Special courses for the Elementary Certificate in Art and in Physical Culture were provided for the first class candidates at the Normal Schools, the enrolment in the courses being as follows:

School	Art	Physical Culture
Hamilton.....	34	..
London.....	56	..
North Bay.....	..	36
Ottawa.....	..	66
Peterborough.....	27	..
Stratford.....	..	50
Toronto.....	..	70
Total.....	117	222

#### Kindergarten-Primary Summer Courses

In addition to the twenty-six students in training at the Toronto Normal School for the Kindergarten-Primary certificate, Public and Separate School teachers attended the Summer Courses for this certificate, as follows:

	Part I	Part II	Total
Hamilton.....	24	28	52
London.....	29	19	48
Ottawa.....	20	22	42
Toronto.....	101	74	175
Total.....	174	143	317

Dr. H. G. Park, Master in Science of Education at the Peterborough Normal School since its opening in 1908, retired from the service in September last. Dr. Park is an honour graduate of the University of Toronto and a Specialist in Classics and, prior to his appointment on the Normal School Staff, had served for a number of years as Principal of the Uxbridge High School, in which position he was recognized as a most capable administrator and educator. The many teachers of Ontario and others who had the good fortune to receive instruction from Dr. Park, will cherish the recollection of his sympathetic and untiring efforts on their behalf.

The following appointments were made to the staffs of the Normal Schools during the year:

Miss Ambia L. Going, appointed Instructor in Art at the Peterborough Normal School, in place of Miss Jessie McRae, deceased.

Miss Dorothea Graham, appointed as Kindergarten Assistant at the Ottawa Normal Model School, in place of Miss Dorothy Walker, resigned.

A list of the staffs of the Normal and Normal Model Schools is given in the register of Schools and Teachers for the Province of Ontario.

During the year provisional standing was granted to teachers who had received Normal School training outside of Ontario, as follows:

Province or Country	Provisional First Class	Provisional Second Class
Saskatchewan.....	1	3
Alberta.....	..	1
Manitoba.....	..	1
Quebec.....	..	1
British Columbia.....	1	1
Australia.....	..	2
England.....	..	3
Scotland.....	..	8
United States.....	..	1
Belgium (Brussels).....	1	..

In addition to the special professional spring and summer courses mentioned in the foregoing, special professional courses for teachers were held at various centres in the Province during the summer of 1928, at which the enrolment was as follows:

Course	Enrolment
Art.....	215
Agriculture.....	272
Auxiliary Classes.....	69
Household Science.....	69
Manual Training.....	44
Physical Culture.....	363
Vocal Music.....	138
Vocational certificates.....	100

#### Teachers' Institutes

Annual conventions were held by the 102 Teachers' Institutes of the Province. These conventions were visited by departmental representatives in accordance with the regulations. The minutes of proceedings forwarded to the department indicate that the Annual Convention serves a useful purpose as a means for the further professional training of teachers in service.

S. A. MORGAN,

*Director of Professional Training.*

Toronto, December 31st, 1928.

**APPENDIX F**

**REPORT OF THE PRINCIPAL OF THE ONTARIO  
TRAINING COLLEGE FOR TECHNICAL  
TEACHERS**

---

**New Building**

The new building in process of erection was completed during the summer of 1928 and was used by the staff and teacher-training classes for the work of the autumn term.

While the autumn session was opened without full provision of furniture and equipment there was enough in place to carry on quite as satisfactorily as when temporary accommodation in the Hamilton Technical Institute was being used. During the autumn the equipment for the laboratory, cloak rooms, and dressmaking and millinery rooms was put in position. Orders have been placed for the power machinery for the woodworking shop, consisting of a surfacer, jointer, band saw, variety saw and speed lathes, and it is expected this equipment will be in place shortly.

**Extension Teacher-Training Classes**

Extension courses in methods of teaching for uncertificated teachers of evening class work were carried on in Ottawa and Perth during the months of January, February and March. Four days a week were spent in Ottawa and one day in Perth. In the former place, fifty-eight evening class teachers were enrolled, and in the latter, seven. The scheme for carrying on the work was similar to that described in the reports for 1926 and 1927.

In October, 1928, a plan for giving further assistance to uncertificated evening class teachers was adopted. Under this plan a circular letter was prepared each month dealing with some particular element in the teaching process, and sent to all teachers who had taken an extension course. The topic dealt with in the letter might be a review or re-statement of matter that had been taken up in the extension course or might deal with some phase of teaching that had not been discussed in the course. These circular letters were planned in the first instance for evening class instructors without professional training, who had attended an extension course in methods of teaching, and were intended to help them in the application of principles discussed in the course. These letters were received with considerable favour, and numerous requests came in from Principals for an additional supply to be used for distribution to teachers other than those for whom they were intended. The circulation has reached some 500 per month.

**Specialist Certificate for Vocational Teachers**

In the summer of 1928 was offered the first part of the course leading to a Specialist Certificate in vocational or shop work. The requirements for this certificate are:

- (a) Attainments in English, mathematics, and science equivalent to that of Middle School standing.

- (b) Some knowledge of economics and industrial history, and of certain technical subjects related to the particular shop subject of the candidate.
- (c) A more advanced course in principles of education, and in special methods in the shop subject of the candidate.
- (d) A high degree of trade skill and knowledge.

The Training College offers such courses as may be necessary to enable candidates to meet the requirements under (a), (b) and (c). No provision is made for improvement courses in trade competency. Where candidates are not able to meet the requirements set up in trade skill and knowledge they must obtain the improvement by actual wage-earning experience in the trade.

The first part of the summer course for this certificate was attended by twenty-three men and seven women. The instructor in English reported that this was one of the most satisfactory groups of students he had ever taught. They brought to their studies a maturity of judgment, an experience of life, an earnestness of purpose, and a variety of view-points, unusual in ordinary High School or College classes.

#### Manual Training Specialist Certificates

The second class in the recently established course for Specialist Certificate in Manual Training entered on the course in the summer of 1928. This class will complete Part II of the course in 1929. Twenty-two candidates were enrolled.

As pointed out in the last annual report, the time provided for the course, viz., two summer courses, is not sufficient to cover properly the prescribed work. It is therefore recommended that after this the course be extended to cover three summer courses.

#### Enrolment

The enrolment in the Training College for the year 1928 was as follows:

Resident Courses	Men	Women	Total
Spring Session.....	39	7	46
Summer Session.....	118	92	210
Autumn Session.....	10	4	14
	167	103	270
Extension Courses			
Ottawa.....			58
Perth.....			7
			65

F. P. GAVIN,  
*Principal.*

Hamilton, February 15th. 1929.

## APPENDIX G

## REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

The number of Auxiliary Classes for abnormal children in Ontario and their distribution is as follows:

*Training Classes.*—Belleville, 1; Brantford, 2; Chatham, 1; Cobourg, 1; Ford, 1; Fort Frances, 1; Fort William, 1; Galt, 1; Guelph, 3; Hamilton, 10; Kitchener, 2; Leamington, 1; London, 8; Midland, 1; New Toronto, 1; North Bay, 1; Oshawa, 1; Owen Sound, 2; Ottawa, 5; Parry Sound, 1; Peterborough, 1; Port Arthur, 1; Pembroke, 1; Smiths Falls, 1; St. Thomas, 1; Sault Ste. Marie, 1; St. Catharines, 3; Stratford, 1; Toronto, 47; Walkerville, 1; Waterloo, 1; Welland, 1; Windsor, 3; York County, 13; Toronto Separate Schools, 1; Windsor Separate Schools, 1.

*Sight-saving.*—Hamilton, 1; London, 1; Toronto, 4.

*Orthopedic.*—Toronto, 3 classes; Ottawa, 1 class; Toronto, 3 visiting teachers.

*Hospital.*—Toronto, 5; London, 1.

*Open Air and Forest Schools.*—Toronto Public Schools, 3; and 2 Forest Schools; Toronto Separate Schools, 2.

*Preventorium.*—Brantford, 1; Hamilton, 1; London, 1.

*Lip Reading.*—Toronto, 2; Hamilton, 1; Visiting Teachers, Toronto, 2.

*Institutional.*—Toronto, 5.

*Promotion.*—Hamilton, 4; London, 2; Ottawa, 8; Windsor, 2.

*Special Industrial.*—Toronto, 29.

This makes a total of 207, being an increase of twenty-eight during the year.

Auxiliary Class Surveys have been conducted in the following places: Danforth Park, Forest Hill, Fort William, Guelph, Humewood, Mount Dennis, Port Colborne, Preston, Port Arthur, Sandwich, Smith's Falls, St. Thomas, Sault Ste. Marie, Scarborough S.S. No. 12, Victoria Industrial School, William Burgess School.

One day of each of the Inspectors' Conferences which were held throughout the Province was devoted entirely to the subject of auxiliary classes—the best methods of utilizing the results of the previous Provincial survey, etc.

Sixty-nine teachers attended the Summer School.

Valuable assistance is rendered by the well-attended monthly meetings of auxiliary class teachers in Toronto and at other centres, the annual O.E.A. meeting and the Auxiliary Class Teachers' Bulletin.

London has established two classes for children of exceptionally high intelligence quotients.

The treatment of dull and backward children who are over thirteen years of age is receiving special attention.

An interesting event of the year was the Sixth Annual meeting of the International Council for the Education of Exceptional Children, held in Toronto in February. There was an attendance of about six hundred. Many Ontario School Boards generously made provision for auxiliary class teachers to attend

the meetings which were addressed by prominent United States and Canadian Educational Workers, including the Premier of Ontario.

Speaking generally the progress made during the year has been highly satisfactory. The numbers of classes established, surveys made, teachers trained and pupils taught have exceeded those of any previous year.

#### **Physical Handicap**

The city of Toronto is making excellent provision for physical handicap in lip-reading, orthopedic, sight-saving, open-air and other classes and with the assistance of visiting teachers. In other places the progress has been slow owing chiefly to the difficulty of transportation.

#### **Mental Handicap**

In Ontario there is no compulsory law for the establishment of special (auxiliary training) classes for slow-learning children. All requests for surveys must come from the Board. Information is given school boards to convince them that such classes are necessary. Free surveys and grants equivalent to one-half the excess cost are given by the Government. The fact that without compulsion during the year twenty-five new classes were formed outside Toronto is proof that the response has been encouraging.

An effort is made to render the classes so attractive that parents will desire to send their children. The school room accommodation, equipment and course of study are adapted to the special needs of the children. The teachers have a minimum requirement of Normal School graduation, five weeks special training, three years' teaching experience and certificate of special aptitude for the work.

Care is taken to avoid stigma. Surveys are conducted privately and no one below fifty per cent. mentality is admitted to the classes. The class is treated as an organic part of the school and the children are not called mental defectives or feeble-minded.

#### **Selection of Pupils**

The Ontario Auxiliary Class Act of 1914 and subsequent Regulations wisely provide that admission to an auxiliary class shall be on the report of a board consisting of the local school principal, the inspector and a medical officer and based upon an examination approved by the Minister of Education.

There is no travelling auxiliary class clinic. The preliminary selection is made after a continued confidential and sympathetic study of the child by the teaching staff, the school nurse and (if possible) by the parent, and an effort is made to obtain a comprehensive knowledge of the child. At the conclusion of the study the nurse makes a confidential report on the child's life history, heredity, home conditions, etc. The teacher reports on different characteristics of the child including his ability to receive stimuli from his environment and to interpret, assimilate and reconstruct this material, and his powers of adjustment, self-control, and self-expression through varied forms of activity. She also gives an approximate estimate of his mental age.

These reports by the teacher and nurse are written on a record sheet prepared by the Department which also contains answers given by the child on the subsequent Stanford Binet examination which is given to all training class pupils by a specialist. In assigning pupils to classes all of these three reports are taken into consideration, for the study by the staff may reveal significant and far-reaching facts undiscoverable by an intelligence test or a battery of

tests. In the auxiliary class the previous child study work is continued. The teacher keeps individual records and the classroom is a constant clinic.

Dr. Cyril Burt, the eminent British Psychologist and authority on special classes says: "Intelligence tests can be but the beginning, never the end, of the examination of the child. To take a young mind as it is, and delicately one by one to sound its notes and stops, to detect the smaller discords and appreciate the subtler harmonies, is more of an art than a science. The scientist may standardize the method; to apply that method and to appraise the results, demands the tact, the experience, the imaginative insight of the teacher born and trained."

The trained teacher who has had experience with normal children and has made a thorough comparative study of the differences between these children and normal children of the same mental age finds adjustment to the new course of study and methods of teaching a natural and comparatively easy matter.

### Training Classes

There are two training class obstacles which are exceedingly difficult to surmount. One is the view that since a training class for backward children contains only sixteen children it should be given a very small room. Such children require sensory motor training which necessitates the installation of work benches, etc., which cannot be placed in a small room. They also require more room for marching, etc., than an ordinary class. A classroom somewhat smaller than the regulation size proves fairly satisfactory but hall cut-offs, teachers' lunch rooms and discarded basement rooms are utterly inadequate. It is for this reason that a government room accommodation grant is given to cover one-third the cost of a classroom.

The second obstacle is the stigmatizing of these children as mental defectives, feeble-minded, etc. The children and their parents naturally resent such treatment and very properly refuse to send their children to a stigmatized class unless compelled to do so. These children are all above fifty per cent. mentality (half of them are above seventy per cent.) and with proper educational facilities will make happy and helpful citizens. The man on the street has always held that such terms should be applied only to people who are less than half-witted (below fifty I.Q.) and prior to the discovery of intelligence tests the terms mental defective and feeble-minded were not applied in Ontario to people of over fifty per cent. mentality. Of the 600,000 school children in Ontario there are, speaking generally, not more than 1,500 below fifty per cent. mentality and not more than 12,000 between fifty and seventy-five per cent. At least 10,000 of these dull and backward children can be trained to become fairly efficient citizens without being stigmatized or institutionalized in any way. A pleasing feature of the year has been the announcement by Dr. Goddard, the eminent authority on feeble-mindedness, that in his opinion no child above fifty per cent. mentality should be called a mental defective.

### Handicapped Children in Rural Schools

At the 1927 Easter meeting of the O.E.A. the Rural School Trustees' Department with an attendance of over 800 passed an unanimous resolution asking the Ontario Government to make special provision for handicapped children found in the general confidential survey of the Province made in 1926, and described in the Minister's Report of that year. The survey found 2,454

children with obvious serious handicap in rural districts, and this is no doubt a very conservative estimate.

The machinery provided for urban auxiliary classes has proved so satisfactory that during the past eight years the number has increased from twelve to 207 and there is reason to hope that fairly adequate provision will soon be made for all urban children requiring special educational facilities. For example, Ottawa began with two efficient auxiliary classes in 1914, and now has fourteen classes for backward children which provide for nearly all such children in the city.

As the question raised by the Rural School Trustees involves half the handicapped children in the Province and as no comprehensive practical solution has ever (so far as I can learn) been applied in any country the problem is a vital one.

The usual solution advocated is to transport the children to a special class in the county town on Monday morning and bring them home on Friday evening. This method seems to have failed owing to the cost of transportation and the objection by parents to having their young children taken from the home and publicly stigmatized as abnormal.

Another method is to have a visiting teacher go from house to house and teach the children in their own homes. In Toronto there have been for years visiting teachers for crippled children, each of whom pay two visits per week of one hour each, to some sixteen children. This method which has proved very valuable for city orthopedic children who cannot go to school would not be so satisfactory for rural children with other forms of handicap owing to the facts that the intervening distances in the country would be greater for the visiting teacher than in the city and the children are happier and better at school if they can walk there.

A third method would be to have a course of auxiliary class lectures given to Normal School students to prepare them as far as practicable to give special help to any handicapped child who might be in their rural school.

For example, if a child is so low mentally as to remain for a number of years in the same class the teacher could in the normal school be taught how to estimate his mental age and predict the kind of work for which he will be best fitted in after life. She could also see that the selection and arrangement of subject matter and the methods of treatment were suited to his special needs. Special equipment (e.g. easy supplementary readers) could also be provided. Last year every Normal School student received some assistance in diagnosis and treatment of handicapped children. With the two years course of training it will be possible to deal with the subject more satisfactorily.

S. B. SINCLAIR,

*Inspector of Auxiliary Classes.*

Toronto, February 2nd, 1929.

---

**APPENDIX H**  
**REPORT OF THE INSPECTOR OF ELEMENTARY**  
**AGRICULTURAL CLASSES**

**PUBLIC AND SEPARATE SCHOOLS**

Satisfactory progress has been made during the past year in Agricultural Education in Public and Separate Schools. This aspect of Education has already become fairly well established throughout the Province and the people are becoming better acquainted with its possibilities. Urban and suburban as well as rural communities have undertaken to maintain Agricultural Classes with very gratifying results to all concerned.

The number of schools has increased year by year as shown by the table given below.

Year	No. of Schools	Year	No. of Schools	With School Gardens	With Home Gardens
1903.....	4	1914.....	264	208	56
1904.....	7	1915.....	407	222	185
1905.....	6	1916.....	585	324	261
1906.....	8	1917.....	989	466	523
1907.....	2	1918.....	1,020	588	432
1908.....	14	1919.....	1,408	618	790
1909.....	16	1920.....	1,648	702	946
1910.....	17	1921.....	1,804	690	1,114
1911.....	33	1922.....	2,047	796	1,251
1912.....	101	1923.....	2,288	843	1,445
1913.....	159	1924.....	2,285	831	1,454
		1925.....	2,509	783	1,726
		1926.....	2,802	852	1,950
		1927.....	3,193	981	2,212
		1928.....	3,595	1,059	2,536

There is still a strong demand for teachers qualified in Agriculture. The demand is much greater than the supply. A teacher may obtain an Elementary certificate in Agriculture in either of two ways: (1) by attending Summer Courses and (2) by taking a four-year course in a High School. The supply of teachers qualifying under the second alternative depends, of course, upon the number of High Schools which maintain classes in Agriculture, but this number is rather limited.

**Secondary Schools**

Agricultural instruction is offered as an option in these schools under three fairly separate plans as follows:

(1) Elective classes offered as a four-year course. This is sometimes spoken of as academic Agriculture because it may be selected as an option in preparing for Junior Matriculation.

(2) Departments of Agriculture under the High Schools Act.

(3) Departments of Agriculture under the Vocational Education Act.

The following schools are now maintaining classes under the scheme indicated in (1) above.

Collegiate Institutes—

Barrie, Brockville, Clinton, Cobourg, Cornwall, Fort William, Ingersoll, Napanee, Perth, Picton, Port Arthur, Renfrew, Smith's Falls, Strathroy.

High Schools—

Amherstburg, Beamsville, Belleville, Bowmanville, Bracebridge, Burlington, Cayuga, Dundas, Dunnville, Elmira, Essex, Fergus, Flesherton, Fort Frances, Haileybury, Kincardine, Kingsville, Leamington, Listowel, Madoc, Midland, Mitchell, Nepean, New Lis-

keard, Niagara, Niagara Falls South, Norwich, Oakville, Petrolia, Port Perry, Ridgetown, Runnymede, Saltfleet, Scarborough, Shelburne, Simcoe, Smithville, Thessalon, Uxbridge, Walkerton, Waterdown, Watford, Whitby, Winchester.

Continuation Schools -

Agincourt, Arkona, Coldwater, Drayton, Drumbo, Fenelon Falls, Jarvis, Lobo, Lynden, Lyndhurst, Milford Bay, Mindemoya, Mount Brydges, Mount Pleasant, Pakenham, Princeton, Ridgeway, Sparta, Swansea, Thamesford, Thornbury, Thorndale, Wheatley.

Public and Separate Schools with Form V—

S.S. 7, Biddulph; New Toronto, 20th Street School; Hesson, R.C.S.S. Britton, R.R. 2; Walkerton, R.C.S.S.; R.C.S.S. 3, Mara; R.C.S.S. 4, Wellesley.

An Intermediate certificate in Agriculture is required as the minimum qualification for a teacher of this subject. Nearly one-half of the teachers in these schools have Specialists' certificates in Agriculture. More than half of these schools have school plots notwithstanding the fact that the school grounds are usually too small or otherwise unsuitable for plots. In most cases the plots are secured on premises near the school grounds and these plots are frequently furnished free by citizens who are interested in this phase of education.

The following schools are carrying on under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Mitchell, Port Perry, Wheatley and Whitby.

Under (3) above the following schools are now maintaining classes and qualifying for grants under the Vocational Education Act: Beamsville, Renfrew, Ridgetown and St. Thomas.

### Summer Courses

Summer Courses in Agriculture for teachers are offered at the Ontario Agricultural College and at the Kemptville Agricultural School. The courses given at the Ontario Agricultural College lead either to (1) an Elementary certificate, (2) an Intermediate certificate, (3) a Specialist's certificate in Agriculture and to (4) a certificate in Farm Mechanics. An Elementary certificate qualifies the holder to teach Agriculture in a Public or Separate School, and the others are applicable to High Schools as well as to Public Schools.

The tables given below show the number who attended the courses mentioned:

#### Attendance at the Ontario Agricultural College Summer Courses in Agriculture

Year	Elementary				Intermediate					Inspectors		Farm Mechanics	Total

**Normal Schools**

Methods of teaching Agriculture in the Public and Separate Schools are dealt with thoroughly in each of the seven Normal Schools by teachers who hold at least Intermediate certificates in Agriculture. The accommodation for teaching Agriculture in these schools is very limited and the classes are large, but the teachers are capable and in spite of this handicap good results are obtained.

**Comments from Trustees and Others**

The following statements taken from the annual reports submitted to the Department of Education, indicate to some extent how the subject is appreciated by those actually concerned.

S.S. No. 2, Yarmouth, Elgin County.

There seems to be a tendency on the part of the parents, who are engaged in agricultural pursuits, to belittle their privileges and opportunities. This attitude has the wrong influence for the good of the country.

Agriculture is the basis of all true wealth and prosperity. Let us illuminate the oldest and best vocation known to man.

H. GORDON SMITH, *Secretary.*  
I. M. BINNS, *Teacher.*

S.S. No. 6, South Walsingham, Norfolk County.

Concerning Agriculture, I think it is a splendid subject to take up in the schools, especially rural schools.

FRED A. BROWN, *Chairman.*

S.S. No. 4, South Gower, Grenville County.

We think Agriculture is a benefit to the Courses of Study. In this school the children are very interested in this subject. They apply their knowledge of the garden work in their gardens at home after leaving school.

P. J. MCGAHEY,  
MAYME MCGINLEY, *Teacher.*

S.S. Nos. 8 and 20, Charlottenburgh, Glengarry County.

I have found Agriculture well worth the time spent on it and also I have found the pupils have taken a keen interest in this subject.

DONALD HOPE,  
M. J. MCKAY,  
DONALD A. GRANT, } *Trustees.*  
JESSIE B. CLARK, *Teacher.*

Port Perry Public School, Port Perry.

We find that Agriculture is very helpful in our school. It interests the scholars in learning how to do things for themselves, and the competition at the School Fair makes them alert by trying to do and make things better. It also interests the parents.

GEORGE E. DAVEY, *Chairman.*  
GERTRUDE V. STONIN, *Teacher.*

---

S.S. No. 3, Leeds and Lansdowne, Leeds County.

In reference to Agriculture taught in our school, I would say the children seem very enthusiastic about it. On visiting the school I was surprised at the knowledge the children had on the subject.

It should be very helpful to them as it is a general knowledge that they might not have opportunity of getting in any other way.

LLOYD GREEN, *Secretary.*  
MITA S. DAVIS, *Teacher.*

---

J. B. DANDENO,  
*Inspector of Elementary Agricultural Classes.*

Toronto, January 31st, 1929.

---

## APPENDIX I

**REPORT OF THE INSPECTOR OF MANUAL TRAINING  
AND HOUSEHOLD SCIENCE****Manual Training Centres**

Manual Training centres to the number of one hundred and twenty-two are now carried on in thirty towns and cities to the extent shown:—Brantford (3), Bridgeburg (1), Brockville, (1), Chatham (2), Collingwood (1), Fairbank (1), Guelph (1), Hamilton (12), Ingersoll (1), Kingston (1), Kitchener (2), London (9), North Bay (1), Orangeville (1), Ottawa (16), Owen Sound (2), Pembroke (1), Peterborough (3), Port Perry (1), St. Catharines (1), Sarnia (2), Stratford (3), Sudbury (1), Toronto (43), Walkerville (2), Waterloo (1), Weston (1), Windsor (6), Whitby (1), Woodstock (1).

**Household Science Centres**

Household Science centres to the number of one hundred and twenty are now carried on in twenty-nine towns and cities to the extent shown:—Brantford (3), Bridgeburg (1), Brockville (1), Chatham (3), Cobourg (1), Collingwood (1), Fairbank (1), Guelph (2), Hamilton (13), Ingersoll (1), Kingston (1), Kitchener (2), London (10), New Liskeard (1), North Bay (1), Ottawa (8), Owen Sound (2), Peterborough (3), Port Perry (1), St. Catharines (1), Sarnia (2), Stratford (3), Sudbury (1), Toronto (46) Walkerville (2), Weston (1), Windsor (6), Woodstock (1), Waterloo (1).

**General Situation**

The work has been carried on very largely as in previous years. Additional centres have been opened in Toronto and new centres established in Pembroke Public Schools and Bridgeburg Collegiate Institute.

The character of the work being done in the Manual Training classes is showing considerable improvement in several directions. More needed attention is being paid to the condition of the tool equipment. It is being recognized at last that in order to accomplish good work the tools must be kept in good working condition. The schools that are turning out the best work and giving the best training are doing so, very largely owing to the fact that the tools are kept sharp and clean. Methods of arranging tools are also being improved. The necessary periodic checking of the tool equipment is much facilitated by an arrangement that shows at a glance any loss in the equipment.

The character of the drawing and the lettering attached still shows improvement. Methods of teaching these subjects are being adopted that make a more interesting appeal to the pupils who, generally speaking, prefer the constructive processes with concrete material. Mechanical and working drawings are being presented in such a way that the boys more readily see that all construction depends for its efficiency upon a well-thought-out and developed plan.

Elementary sewing throughout the schools is becoming more common particularly in the smaller places and rural districts where hitherto the subject has not been considered.

The teachers of cookery and general household management are departing very largely from the fractional recipe, where a microscopic quantity of material is cooked, for the larger quantity based on the family meal and the result of this is that the teaching of the schools is being carried into the homes.

While the equipment generally is ample and in one or two cases elaborate, there is one aspect in which most schools are still lacking and that is in the provision of illustrative material.

In every Household Science department there should be a collection of food products, both in their raw and manufactured states. I noticed in one school a collection of posters from all the food product manufacturers in the city. This could be carried a step further by making a collection of all the food products themselves manufactured in the locality of the school. Various manufacturers send out specimens showing the processes their goods undergo during the course of their manufacture from the raw material. Charts showing the chemical composition of the various foodstuffs should be provided, and every effort made to obtain such a collection of charts, illustrations and specimens as will give life and vitality to the teaching of the various problems with which Household Science has to deal. Charts and models illustrating the principles of plumbing, ventilation and the various labour-saving devices that are now used in the home might also be provided.

The work in both subjects is generally carried on in a centre which the children from surrounding schools attend at stated periods. Objection is sometimes raised to the fact that the children have to lose time in travelling from their school to the centre, but in some cases this is prevented by allowing the children to attend for a whole half-day.

In order to overcome the difficulty above referred to, some schools are employing a Manual Training and Household Science instructor to take charge of all the manual activities of the one school throughout all the grades and this plan is working smoothly and with great efficiency, as it has the added advantage of providing a co-related course of study throughout all the grades and gives the pupils the ability to do more advanced work in the higher grades.

I notice a growing tendency to use these subjects in the general service of the school, and the community. The parents are being interested owing to the ability of the pupils to perform small household repairs such as hanging screen doors, fitting storm windows, fixing shades, repairing broken windows, locks, tables, etc., putting new washers in leaking taps, connecting up electric bells, irons, lights, and adjusting shades, etc. Some schools have drawn up a list of more than a hundred minor operations round the home which any intelligent boy or girl ought to be able to perform.

#### Rural Schools

Manual training and Household Science in rural schools has made gratifying progress. In 1927 there were eight hundred and fifty-three rural public schools teaching Household Science for at least one hour each week, and eight hundred of these serving at least one hot dish to supplement the lunch brought by the pupils from home. The corresponding numbers for 1928 are eight hundred and ninety-nine, and nine hundred and fifty-eight. In addition there are fifty rural separate schools teaching the subject and forty-five serving a hot dish. As has been previously pointed out, the extent and character of this work depends very largely upon the interest taken by the Public and Separate School Inspectors.

Outstanding inspectorates in this regard are:—

Bruce East.....	29
Dufferin.....	22
Glengarry.....	21
Grey South.....	25
Grey West.....	21
Lanark West.....	25
Leeds and Grenville (2).....	36
Lincoln.....	34
Northumberland and Durham (1).....	22
Northumberland and Durham (3).....	27
Peel.....	21
Peterborough.....	27
Renfrew North and South.....	43
Simcoe East.....	32
Wellington South.....	50
Wentworth.....	63

In 1927 there were one hundred and eighteen rural schools teaching Manual Training. In 1928 this number increased to one hundred and fifty-one.

During the year I have visited a number of rural schools in company with their Inspectors, and have been much impressed with the whole-hearted service, conscientious effort and great ingenuity shown by the rural school teachers in their efforts to introduce these subjects into the rural schools, often under the greatest obstacles.

#### Training of Teachers

The plans now in operation for the training of teachers are working out very satisfactorily. The certificates issued in each subject are now of three grades: (1) Elementary, (2) Ordinary, (3) Specialist. The Elementary certificate is obtained by attendance at two Summer Schools. These courses are now given at the Industrial Training College, Hamilton, and have been, up to the present, well attended. In order to give opportunity to rural school teachers to obtain this certificate during the school year, classes have been held at Hamilton Normal School on Saturdays. These classes have been held for several years and the present classes have a large attendance. It is to be regretted that it has not been possible to establish such classes in connection with other normal schools, but transportation difficulties seem to stand in the way. Summer Schools in Manual Training and Household Science were also held at Ottawa Normal School. The Elementary certificate obtained by attendance at these Summer and Saturday Courses qualifies the holder to teach the subject in rural schools only, but it enables the holder to enter the one-year course qualifying for the ordinary certificate in January instead of the previous October, thus saving time and expense. A growing number of teachers are availing themselves of this opportunity. The Ordinary certificate in Manual Training is obtained by taking a one-year course at the Industrial Training College and that in Household Science at the College of Education, or by a two-year course at the Macdonald Institute, Guelph.

The Specialist Course in Manual Training is obtained by attendance at courses held at the Industrial Training College in Hamilton. These courses are open only to the holders of the "Ordinary" certificate. This course continues for two summers and the students work from eight till five. The second group of students taking these courses will graduate next year, and the results of their training is already being seen in the improvement of the instruction being given

---

in the schools and several School Boards have recognized this additional qualification by granting increases in salaries. This course might now with advantage be made a three-year course.

The Specialist certificate in Household Science is obtained through a four-year course at the University of Toronto.

ALBERT H. LEAKE,

*Inspector of Manual Training and Household Science.*

Toronto, January 31st, 1929.

---

**APPENDIX J**

**REPORT OF THE**

**PROVINCIAL SCHOOL ATTENDANCE OFFICER**

---

While it is the economic and administrative phases of education with which contending forces in the educational arena are frequently occupied, there is no doubt that the individual child is the centre about which the entire system revolves and towards which all educational forces should be directed. His advantage is the controlling principle and apart from him they have no significance. The contribution that any existing factor is making, or that any contemplated change may make, to his well-being is the final measure of its value. It is for him and him alone that all school facilities, all school organizations and the entire investment of human power and physical resources exist. Further, it is upon their effectiveness in relation to him that the social and moral strength of the community, and the economic progress and security of the nation primarily depend. To this end, therefore, an ever-increasing portion of the resources of every progressive people is being devoted as a sound civic and national investment. But the provision of adequate school facilities alone will not suffice. The avenues of approach to the school must be left clear and unhampered and protective forces must be thrown about the child to safeguard him in his right to an education commensurate with his needs and powers.

**General Oversight of Attendance**

This protective principle has shaped itself objectively into what is known as the Compulsory Attendance System. Few persons to-day question the wisdom of controlled school attendance. This changed attitude on the part of the public serves to strengthen the hand of the officer in charge and tends to make the presence of the child at school more and more automatic. But in every community there will continue to be homes in which the preoccupation, over-indulgence or indifference of the parent leaves the child largely to his own choice. In such cases the intervention of the attendance forces is necessary for the protection of the child. The general system should provide means to detect such delinquencies and should bring machinery to bear which will ensure early and permanent improvement. To this end, inspectorial surveys have been systematically carried out, and a province-wide knowledge of conditions has been attained. Index ratios have been arrived at to show the levels of attendance in individual schools, in townships and in inspectorates as a whole. The extent of losses and causes of absence have been secured, and upon this data, carefully collected, classified and recorded, remedial measures are based.

**Causes of Loss of Time**

Figure A, page 47, gives in graphic form the prevailing causes of absence in rural schools arranged in the order of priority, together with the proportionate loss due to each cause.

## 1. ILLNESS;

It is a fact worthy of note that illness stands out pre-eminently in the series as a cause of irregular attendance. In the year 1928 child epidemics took serious toll of time. They were severe and widespread, and no part of the Province was immune. The wave of influenza toward the close of the year added greatly to the disorganization. In rural areas the effect was especially telling, and many schools were almost depleted of attendance while a number were closed through actual illness or fear of contagion. The more general extension of School and Public Health Service to the rural areas would appreciably curtail the loss.

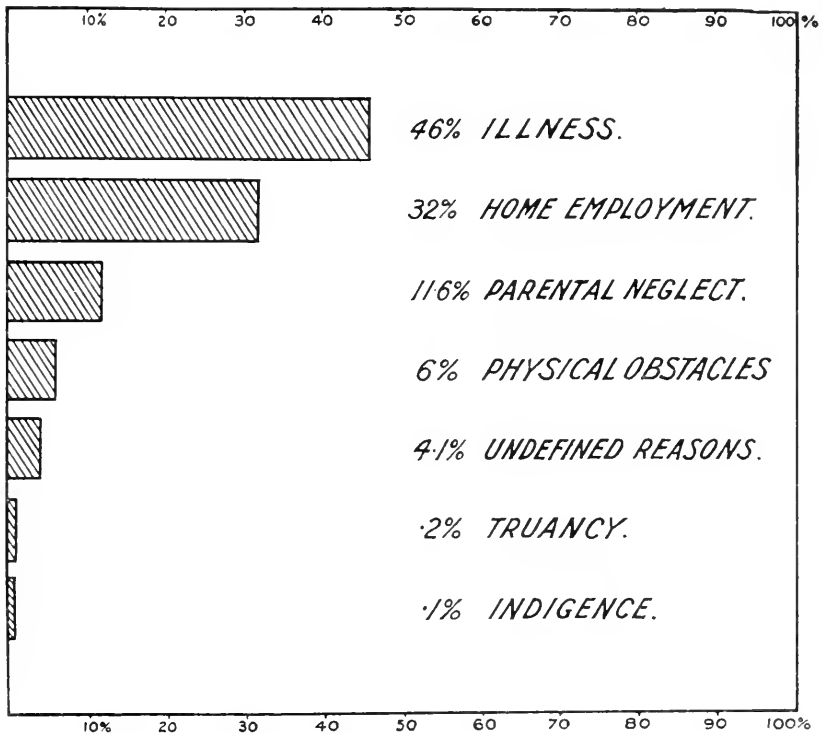

Figure A.

Causes of Irregularity in Rural Schools and Proportionate Loss of Time

## 2. SEASONAL OCCUPATION:

Serious inroads on attendance are made by emergent conditions on the farms, to meet which the help of the school child is invoked. Farm life has radically changed in the last decade. The machine age is upon us, the "hired man" has largely disappeared, and hand-help at urgent times must fall upon the school girl and boy. Ontario is peculiarly situated in this respect. The simple and more uniform procedure of grain growing in summer, and wood-cutting in winter has given place to specialized production such as truck-farming and sugar-beet, potato, tobacco, tomato and fruit culture on a farm-wide scale. These demand concentrated effort during a few weeks to plant and especially to harvest the crop without loss, and, in his dilemma, the farmer turns to the growing child for available help. Solution of this perplexing problem by holiday

schooling to compensate for the loss of time during the school term has met with limited success. The only apparent hope lies in the direction of close checking of absentees by teachers and attendance officers in the effort to reduce the loss to the minimum possible.

### 3. TRUANCY:

In rural schools this has become an almost negligible quantity. Diagram A shows a loss of .2 per cent., or two absences in every 1,000 due to this cause. In urban areas it is more common, but closer co-operation of home and school, and the parents' growing sense of the need and worth of education have gradually relegated it to a very minor place among the handicaps of the school.

### 4. INDIGENCE:

This cause varies with the local conditions and with the character of the times. On the whole, there is little poverty in Ontario. It is rarely allowed to react on the child, though distressing cases are sometimes in evidence. In such cases, co-operation of benevolent organizations is sought and their generous response helps to avert any serious loss to the education of the child on this account.

### General Conditions

In 1927 there were 738,636 pupils enrolled in all schools, including night classes, or 25 per cent. of the total population of the Province. This figure takes no cognizance of private and parochial schools. The following table gives valuable attendance data for the year 1927:—

**TABLE I**  
**Attendance—All Schools—1927**

	Total Enrolment	Inc. or Dec. in re. 1926	Average Attendance	Inc. or Dec. in re. 1926	Percentage Attendance	Inc. or Dec. in re. 1926
Public and Separate Sch.	634,592	+11,471	456,978	+12,838	*88.47	+ .73%
High Sch. and Coll. Inst.	55,805	+2,405	47,797	+1,422	85.65	-1.19%
Continuation Schools...	10,079	+425	8,296	+137	82.31	-1.17%
Day Vocational Schools.	20,149	+2,820	15,414	+1,901	76.50	+1.48%
Totals.....	720,625	+17,121	528,485	+16,298	85.13	.....

Note: \*Percentage is on basis of Possible Attendance.

All schools show a substantial increase in total enrolment and average attendance. The percentage of increase in enrolment for each class of schools for 1927 over 1926 is as follows: Elementary, 1.8 per cent.; High, 4.3 per cent.; Continuation, 4.2 per cent. Vocational, 14 per cent. It is evident that the secondary schools are absorbing an ever-increasing proportion of the output of the elementary schools. This condition is especially noticeable in the Vocational Schools.

### Standard of Attendance

A graphic presentation of the comparative attendance level of the District and County Rural Schools and the Urban Schools of the Province is shown in Figure B on page 49, covering a six-year period.

It shows an appreciable rise in the standard of attendance for all grades of school. The spread between the District Rural and County Rural Schools is readily accounted for by the adverse conditions that confront the pupils of

Figure B

Comparative attendance level of the District and County Rural Schools and the Urban Schools.

a-a Percentage of average to total enrolment, 1921-1927, District Rural Schools.

b-b Percentage of average to total enrolment, 1921-1927, County Rural Schools.

c-c Percentage of average to total enrolment, 1921-1927, Urban Schools.

a-a, b-b, c-c Corresponding percentages based on relation of actual to possible aggregate.

the former class. But this spread is gradually diminishing. Urban Schools have the decided advantage over both District and County Rural Schools, as

physical disabilities are largely removed. It would appear that they are slowly stabilizing at a maximum of 90 to 91 per cent. A considerable number have exceeded this standard.

Figure C, below, gives a composite picture of the attendance standing of all the elementary schools of the Province for the year 1927. The schools are classified, as shown at the base of the figure, in six groups, ranging from those below

Figure C

Classification of Elementary Schools on basis of Attendance—1927:  
 Hatched columns—urban schools. Black columns—rural schools.

75 per cent. to the 100 per cent. maximum. The vertical column indicates in percentages the proportionate number of schools which reached the several standards. It is noted that while six per cent. of the rural schools are below 75 per cent., only one-half of one per cent. of the urban schools dropped to this level. Again, 32 per cent. of the rural schools attained the 90 per cent. standard whereas 63.5 per cent. of the urban schools did so. The rural average throughout is approximately five per cent. below that of the urban schools.

TABLE 2  
Judicial Enforcement of Attendance—1927

	Complaints made re violation of Attendance Acts	Convictions re illegal employment of children under 14	Convictions re illegal employment of adolescents	Convictions re parental negligence
<i>Urban Schools—</i>				
In Districts.....	41	1	5	2
In Counties.....	468	12	5	55
<i>Rural Schools—</i>				
In Districts.....	19	12	..	1
In Counties.....	52	5	..	3
Totals.....	580	30	10	61

Judicial measures are resorted to only when all other reasonable means fail. There were 506,953 pupils of compulsory age (eight years to sixteen years) in all schools in Ontario in the year 1927. For every 1,000 registered pupils, therefore, only 1.1 infringements of the Attendance Acts had to be referred to the Courts. The convictions were, approximately, one per cent. of the complaints. In many cases the situation is reviewed by the judicial authority, and judgment is suspended on conditional terms, such as the undertaking of the parent to comply with the law, or probation under the care of some officer of the Court or benevolent organization. This method is frequently effective. Recurrent cases naturally receive more drastic treatment when parental responsibility is proven. Rural conditions present a more difficult problem than urban. The urban attendance officer is detached from local influence, whereas the rural attendance officer is disinclined to jeopardize his neighbourly relations by resort to severe measures. On the other hand, in the latter case, there are extenuating circumstances, since the rural dweller has to contend against handicaps which do not confront the city resident, and the rural child profits by his many-sided contacts with Nature and the diversified activities of the farm in which he may participate and which are a very real education in themselves.

Figure D, page 52, gives a visual presentation of how the school years are occupied, covering a five-year period from 1923-1927. The legal school year is shown as comprising three periods (a) the average time actually spent in school, (b) the average time lost through avoidable absence, and (c) the average time lost for which the child cannot be held accountable. The last named falls from 40.4 days in 1923 to 37.8 days in 1927, a gain of 2.6 days in the period. This time represents loss due to closing of schools through epidemics or teachers' illness, days allowed at opening and closing of terms (especially in June), Municipal holidays, lawful home employment and other such causes. Many of these conditions are preventable, and Boards, teachers and Inspectors should co-operate in reducing the loss. (b) shows time lost for which pupils and parents are responsible, owing to such causes as unauthorized home employment, parental neglect, truancy, etc. (See Figure A, page 47.) This time ranges from 19 days in 1923 to 18.2 in 1927, a gain of almost one day for every child in the Province. The time occupied in school averages 135.6 days in 1923 and 140 days in 1927, or a total gain of 4.4 days in the five-year period for every child in the Province. In 1927 the average school time profitably employed by the

child in school was 140 days out of a school year of 196 days. This is much in excess of the average of many countries, but offers large opportunity for improvement.

Figure D.

- Average time lost through avoidable absence.
- Average time actually spent in school.

## Adolescent Education

Records show that the age of retirement from school is steadily rising. Comparatively few applications for exemption are now being presented for pupils under fifteen years of age, and seldom does any other motive than sheer necessity prompt the appeal.

Table 3 shows the number of adolescents fourteen and fifteen years of age enrolled in 1927 in our elementary and secondary schools, and Table 4 the exemptions granted to pupils of these ages under authority of The Adolescent School Attendance Act.

TABLE 3

## School Classification of Enrolled Adolescents 14 and 15 years of age—1927

	Form I	Form II	Form III	Form IV	Form V	Total
Elementary Schools.....	680	2,174	11,935	35,597	3,589	53,975
	1st and 2nd years		3rd and 4th years		5th year	
Secondary Schools.....	31,136		7,189		176	38,501
	Total...					92,476

TABLE 4

## Legal Exemptions of Adolescents 14 and 15 years of age—1927

All Schools	Home Permits	Employment Certificates	Total
Rural.....	501	381	882
Urban.....	885	4,138	5,023
Totals.....	1,386	4,519	5,905

Table 3 shows that there were 92,476 pupils of adolescent age up to sixteen years enrolled in all schools in 1927, and Table 4 shows that of these 5,905 or 6.4 per cent. were granted Home Permits and Employment Certificates.

Under The Adolescent School Attendance Act all employed adolescents in centres of 5,000 population and over, where the total number of workers warrants it, must attend day part-time classes of instruction. These classes are fully organized and in operation in four centres—Toronto, Hamilton, London and Kitchener. In six other centres special part-time instruction is given in some branch of industry. The total number thus enrolled is 2,909. In addition thereto the city of Toronto conducts day part-time public school classes with 258 pupils enrolled, making a total of 3,167 part-time pupils in the Province. The programme for this class of pupil includes cultural studies for general education and practical work of a vocational type adapted to his daily occupational task. Thus teacher and employer make their contribution to his welfare. The immature child who, through financial stress, is thrown upon the working

world is not left as a hostage to ill-fortune. Every effort is made to compensate him for the sacrifice he is forced to make on behalf of himself and his home.

For the purpose of estimating the percentage of pupils of adolescent age who retire from our elementary schools after reaching the age of fourteen years, the following table is given:—

**TABLE 5**  
**Total Enrolment and Withdrawals from Elementary Schools of Adolescents**  
**14 years of age and over—1927**

Elementary Schools	Enrolment 14 yrs. of age and over	Withdrawals				
		2nd Form	3rd Form	4th & 5th Forms	Total	Percent.
Rural.....	26,100	632	2,014	6,019	8,665	33.3
Urban.....	36,752	324	1,520	4,108	5,952	16
Totals.....	62,852	956	3,534	10,127	14,617	23.2

Under authority of The Adolescent School Attendance Act, pupils residing in a rural section, so long as their services are required in the home or on the farm, may retire from school without the necessity of formal sanction. As shown in the above table, under these conditions, 8,665 rural adolescents out of a total enrolment of 26,100 retired, or 33.3 per cent. of the total. Sixteen per cent. of the urban adolescents retired under regular conditions. In all elementary schools about 23 per cent. retire and 77 per cent. remain to continue their education after reaching the close of the compulsory school age.

#### Illiteracy

Ontario has achieved and held a creditable record in this connection. The federal statistics for the last decennial census show, for the adult population, a percentage of 5.49 who could not read and write. The percentage for Ontario for the same year was 3.25. There is naturally a very definite relationship between literacy and supervised school attendance. Illiteracy tends to mount rapidly where school attendance is poor, or, as it may be pointedly put, "It is a vicious cycle—poor school attendance means adult illiteracy and adult illiteracy keeps children out of school." A table prepared by the Canadian Council of Child Welfare shows this relation in seventy-nine of the largest centres of Canada. It indicates that in thirteen centres where loss of school time is between five and six per cent., illiteracy totals only 1.4 per cent. of the Canadian-born population over ten years of age, but where the loss is ten per cent. to sixteen per cent., illiteracy totals 5.9 per cent. of the Canadian-born for twelve centres. The lesson is obvious. Illiteracy has a chance of advancing in close to geometric progression as non-attendance increases. Most of Ontario's larger centres stand in the class producing less than one per cent. of illiterates, and out of the fifty-five Canadian centres responsible for only two per cent. of the illiteracy, Ontario has thirty. She has practically no centres beyond this class.

#### Caring for the Full Quota

The quality of the product is an essential but not an exclusive test of the efficiency of a plant. The quantity of output, in relation to its capacity and the

investment involved, is equally important. Is it economical in operation, has it reduced wastage to a minimum, is it caring for its full quota of raw material and getting from it the maximum value possible?

These are valuable criteria. The educational plant is measuring up more and more closely to this standard, not only the normal child under normal conditions being cared for, but the child who is losing his chance through mental or physical handicaps or through isolation from school facilities. The crippled child, the child of defective sight, hearing or speech, the anti-social child, the child on the frontiers of settlement, the child who labours under a handicap of poverty, distance from school or other physical obstacles, is being brought within the range of our care. The open-air school, the Junior Vocational School, the Boys' Training School, the auxiliary class, the lip-reading class, the occupational therapy class, have found a place in our system. Correspondence Courses are reaching the isolated homes of hundreds of children and the Travelling School Car extends a helping hand to the sequestered child along our thousands of miles of railway lines in the sparsely settled North. Thus extra-academic school facilities are supplementing the regular school, and together they are gradually attaining the democratic ideal of a chance for education for every child in the land.

J. B. MACDOUGALL,

*Provincial School Attendance Officer.*

Toronto, January 16th, 1929.

**APPENDIX K**

**REPORT OF THE  
INSPECTOR OF PUBLIC LIBRARIES**

---

Following is a report of the Public Libraries Branch for the year 1928, and the statistics, etc., of the Public Libraries of the Province for 1927; also a statement of the grants paid in 1928 to public libraries.

**Summary**

1. Ontario has now 516 public libraries; seven new ones were added in 1928: School Section 28, York Township, Englehart, Kinburn, Kinsale, Kirkland Lake, Vars, and the John Richardson Branch, Windsor. The Church Street library and the Municipal branch of Toronto are now housed in the downtown branch.

2. Fourteen new and enlarged library buildings are to the credit of the year.

3. The patronage of public libraries continues to increase. The total figures might lead one to believe otherwise. The difference is accounted for by a change in keeping statistics in one of our largest libraries. The increase in patronage in association libraries was 19,000. As these institutions are practically all in rural districts there is special reason for satisfaction.

4. The libraries are showing evidence of improvement in the quality of service given to the public.

5. Expenditure by libraries shows an increase of only \$5,000 over the previous year. This was insufficient to meet the requirements of patronage. The average library is not expending sufficient for books.

6. Travelling libraries continue to give service to the maximum that the branch's resources will permit. A number of special cases of books, all by Canadian authors, were made up and sent to rural communities.

7. Two new school cars were equipped with public library book collections, and other cars were supplied with books to supplement their original collections.

8. The training of librarians and assistants was transferred from the Public Libraries Branch to the Ontario College of Education, University of Toronto.

9. The *Ontario Library Review* was prepared and published each quarter and sent to all libraries, librarians and library trustees in the Province, and to many individuals and libraries outside the Province.

10. Fifty libraries were visited during the year.

11. Several public libraries claimed that the increase in demand for library service had made the cost of library maintenance so much higher that the rate of taxation specified in the Statute as a claimable rate is insufficient to meet requirements.

**General Progress**

Progress marked our library field in 1928. Abundance of evidence convinces us that the majority of our libraries, large and small, have been winning success in promoting a demand for a better class of books and other reading material. Improving the quality of demand has always been one of the chief aims of our better libraries, but there has been added emphasis of late, and a more widespread

application of that commendable feature of library service. From all directions we hear of keener interest in selecting and purchasing the best works to which the public will respond, and a stronger determination on the part of the librarians to make better contacts with their readers. In many cases library boards determined to employ well-educated and well-trained librarians and assistants. The idea of encouraging a better class of reading is pervading the rural library field in a most encouraging way. Success has also followed the demand for a better class of books in our travelling libraries. Our records show that a larger number of new buildings have been erected and older ones remodelled than in any year since the outbreak of war. Our libraries have increased in number, and there has been a large response from the public.

### **The Rural Public Library Problem**

No phase of the public library situation is so important from the Provincial standpoint as rural and village library service. All public libraries need more or less help from the Legislature, but rural districts and small communities depend to a very large extent upon Provincial leadership and assistance. Far and wide we find thinking people solicitous in regard to rural life, and means of making it more interesting and livable. It is quite needless to present arguments to prove that access to well-selected books will furnish pleasure and profit to rural people of any country. We seem to have arrived at that point in our library history when important steps should be taken to assist rural Ontario in placing itself on a better basis for library service.

We have now 343 public libraries in rural Ontario. If we exclude branch libraries from our list, our rural and village libraries make up 71.4 per cent. of our whole library system.

And still 900,000 of our population are out of reach of public library benefits. Rural and village libraries are giving fair service and an immense amount if we consider the very low cost. A fraction of these very small institutions are doing surprisingly well under present conditions. A large number are doing fairly well, and altogether too many are merely existing. It would be a mistake, however, to say that the latter would be better out of existence, as numerous cases can be cited where unpromising-looking institutions have produced wonderful results. In fact some of them have inspired Canadians whose names are well known throughout the Dominion.

In theory it is not impossible for the 343 rural and village libraries to give excellent service, but there are too many uncertain factors to deal with. The following difficulties confront us:

1. Two hundred and seventy-two of these little libraries are of the association type, and only seventy-one are under free, tax-supported organization.

2. The unit for administration is too small. When any public library is so small that it can not employ a full-time librarian at a reasonable salary countless difficulties are met with. The members of the board are volunteer workers like all other library board members. The librarian works but a few hours a week. The book fund is necessarily quite small, and purchases are made only from two to four times a year. The result is that the book selection is not first-class. The part-time librarian is rarely capable of bringing the right books and the right readers together. Small units will never solve the problem; there are local difficulties as well as the one of reaching the unserved parts of Ontario.

3. Each small centre has its own wants in view and rarely its real needs. The average board does not provide satisfactorily to meet even these requirements. There is no practicable way of arranging for interchange of books as selections are never made with interchange in view. These library boards are lacking in experience, and would be unable to enter into any kind of elaborate co-operation with other members of a group of libraries.

4. There are special readers in every community, but the small library is not justified in purchasing several or even one book for one, two or three readers. These people with special needs are very important, and there is no provision for them.

5. The great majority of these institutions are of the association type, and it is doubtful whether it would be wise to encourage a campaign to convert them into small free public libraries, the unit being too small to function in a manner worthy of a modern public library.

6. As the workers in these communities are volunteers and the older members often change residence or drop out of office, and new ones come in, it is difficult to gain reasonably permanent results by giving instruction.

7. The old scriptural parable of the talents seems to hold good when applied to rural libraries. The majority of them may be likened to the man of one talent. Our larger centres may be likened to the man who had five.

The majority of our rural libraries will probably be of the small unit type for some years to come, but the time seems to have arrived when there should be provision for larger library units. The county as a unit has proven satisfactory in Great Britain and in parts of the United States. For the community that is not ready to enter into a county or similar system, there should be closer and more formal contact with the Department of Education, in order that the rural and village libraries may function much better than at present.

A travelling library is a poor substitute for a local public library, because the collection lent is very small and unrepresentative, and it remains in a community for a very limited period.

It seems as though the unserved communities must depend upon the local school libraries and the travelling libraries. To my mind there are several hundred books that should never be out of reach of any person in the Province. It may be possible to devise some scheme by which school libraries and travelling libraries could work together in those sections of our Province where public libraries cannot be organized for some time to come.

#### Eight Years of The Public Libraries Act

The Public Libraries Act now in force was received with considerable enthusiasm on the part of the library field. It attracted the interest of the whole library world, very largely on account of section 39, which governs the municipal rate. Three other features have been highly commended: That a library board is an appointed board with the appointing powers divided—this saves the board from being dictated to by any other municipal body; (2) wide powers for the Minister of Education to assist and encourage public libraries; (3) fairly generous provision for cash grants from the Legislature.

There are two matters in the Act that will require attention before long: (1) The rate clause, (2) provision for larger units of administration for rural and village libraries. The latter has been treated elsewhere in this report. The "rate clause" has become a matter of special interest and concern, as a

comparatively large number of our leading libraries have outgrown the particular provisions for a claimable rate.

When my recommendations were made in the year 1919, they were made in the light of a special study covering a period of three years. At the time of my appointment in 1916, the Deputy Minister of Education referred to the fact that the country was at war, and that it was inopportune to make any important changes in library legislation. He stated that it would be wise to make a careful study of library conditions in this Province and elsewhere, with a view to the construction of a new statute for Ontario. The study was made and the recommendations were laid before the Honourable Dr. Cody, then Minister of Education. The session in 1919 was brought to an abrupt close, and it was decided to hold The Public Libraries Act for another year.

In studying the financial phases of public libraries, I discovered that the old principle of a fraction of a mill on the dollar of taxable assessment was not practicable as there was a very great variation in the bases of assessment. A half or a quarter mill was one thing in one place and another thing in another. It seemed obvious that a rate bearing some relation to population would be the only satisfactory principle upon which to work. A study was made as to per capita cost of library service. We had no libraries in Ontario spending as much as fifty cents per capita at the time the study was made, and I learned of only three expending more than that in the United States. I found none in the records of English or Scottish libraries. It was undoubtedly a generous provision to place in the statutes "that rate on the dollar of taxable assessment that would yield fifty cents per capita of the population." as a claimable rate for library boards. The adoption of a rate of this kind established a new principle in library legislation, and it was this principle that attracted so much attention in other countries. A further provision was made to permit a municipal council to increase the rate above fifty cents, but not exceed seventy-five cents. Another clause of the Act makes provision for gifts of money, buildings or land.

Around and about 1919 and 1920, the average demandable rate by public libraries was about thirty cents per capita. It will readily be seen that a possible increase of income of sixty per cent. was as much as conditions deserved.

I should mention here that in computing financial requirements for library service, considerably smaller service was considered than obtains among our libraries at the present time. Of course we were aware of the fact that some libraries would give larger service than others, and some would give better service than others. It was our opinion that where service was larger or better or both, the library board could easily obtain a special vote of council on the ground that public opinion was friendly and favourable to the library.

Our latest official reports from the libraries show as follows:

From seventy cents to ninety-three cents is being expended by ten public library boards. The larger amount mentioned happens to be by a town that has the privilege through a private Bill sponsored by the local council. Of these ten municipalities, three are cities, five are towns, and two are villages.

Twenty-six libraries are expending slightly more than fifty cents per capita—four cities, fourteen towns, and eight villages.

Twenty-seven boards are expending the full fifty cents or close to it. They are represented by eight cities, fourteen towns, and five villages.

One hundred and eighteen public library boards are expending less than fifty cents per capita for library maintenance.

The figures given include free public libraries, from which branch libraries have been omitted.

Since the Act has been in operation, two important considerations have developed: (1) the demand for library service has increased nearly 100 per cent.; (2) gifts of buildings are not as easily obtained as they were and more libraries are forced to use their own funds for building purposes.

There is no doubt but many of our public libraries and certainly all the best ones need more money than is provided as a claimable rate. A first-class kind of library service given by well-educated and trained librarians and assistants, at a volume representing public demand with a certain amount of capital expenditure, cannot be given at a cost of fifty cents per capita. In order to keep within the fifty cent rate it would be necessary for a library to limit its services and, in many cases, employ inferior talent.

In these days of high taxation it is doubtful whether all public library boards should be permitted a higher rate than at present obtains merely on their own claim or demand.

In order to qualify for a higher rate than at present provided it seems to me that some obligation should be placed upon a library, such as the employment of certificated librarians, and the library to be otherwise approved. Without some form of approval requirements the only relief which would be in every sense fair to ratepayers would be an increase in the rate to which a local municipal council could raise the tax.

#### **New and Enlarged Buildings**

The kind and the number of new and improved buildings to the credit of 1928 is a matter of great satisfaction. For many years and up to the outbreak of war gifts for library buildings were easily obtained. Since war time, each year has had very few new and enlarged buildings to its credit. It speaks well for library boards that fourteen buildings are to their credit for 1928.

Windsor erected one of the most modern library branch buildings in the Province at a cost of \$25,000. It is known as the John Richardson Library, the name being given in honour of the late Major John Richardson, the eminent writer and soldier.

The village of Wellington, Prince Edward County, received as a gift a handsome building worth \$18,000. The benefactor was Dr. Parry D. Saylor, who presented the building to the village in honour of his mother, Mrs. Annie Dorland Saylor. In November the village gave a complimentary banquet to Dr. and Mrs. Saylor and to Dr. Saylor's father and mother. The dinner was held in the assembly room of the modern consolidated school. Nearly all of the adult population of the village attended the banquet.

New Toronto built a modern building from municipal funds, and appointed a graduate of the Ontario Library School to serve as librarian.

The village of Marmora erected a community building which includes excellent library rooms. This building was built in honour of the fallen heroes of the village. Newburgh came into possession of new rooms in a building presented to the town by Sir Allen Aylesworth. Chapleau was given excellent accommodation in a community building presented to the town by Mr. George B. Nicholson, of Chapleau, in memory of his son, who lost his life in the Great War.

Kirkton is justly proud of being able to build with a fund raised by private subscription. Newbury public library board came into possession of a building

through a gift by Mrs. William Bayne. Lakeview Beach was also given a library building. Other enlarged or exchanged buildings are to the credit of Oshawa, Locke Street Branch, Hamilton; Norwich, Timmins, the Downtown Branch, Toronto.

#### Travelling Libraries

This worthy form of service to sparsely-settled sections in the Province continues to give the full volume that our equipment and travelling library fund will permit. We had 337 travelling library stations in 1928. At the present time attention is being directed to a study of the possibilities for promoting systematic reading and other forms of adult education through the agency of travelling libraries. Except in odd instances the kind of demand for books sent out in our travelling library cases has not been very satisfactory. A good selection may be sent to an isolated community, but there is rarely the right kind of custodian. In library service three factors must be considered: the books, the reader and the librarian. The right kind of librarian or custodian can make fairly satisfactory contacts between the people and the books. We experimented in a small way in giving "long distance" advice and met with fairly encouraging results. The most notable experiments were with Canadian selections.

#### All Canadian Selections

A large purchase of books was made for the purpose of sending out a number of all Canadian travelling libraries. In selecting the books a careful study was made of all the books of Canadian authorship that were in print and purchasable through the regular book trade. Our selections were confined to works of merit that had strong interest value, and were popular enough to appeal to average readers. We made four types of cases: general selection, Canadian literature, About Canada, and a young people's library. We found it necessary to make four different selections for the general cases on account of the breadth and variety of suitable books. I am pleased to report that these selections have been so well received that new applications are coming to us on account of the reputation gained by the first cases sent out.

The Canadian Authors' Association has commended the innovation, and a number of established public libraries are making use of our lists of selections for public library purchase. We hope to increase the number of the Canadian travelling libraries.

#### The School Car Libraries

The Public Libraries Branch equipped with community libraries the two school cars which were sent to northwestern Ontario in September last. These were in addition to regular school book collections. We had the advantage of the experience with the first two cars, and made a collection which included a general class of books and a fair amount of the best fiction. We included also a goodly proportion of very attractive books written in simple English for the use of non-English speaking adults and children. We have had a number of requests from the teachers in charge of the first two cars for more books and for special selections to meet specific needs of people in the isolated parts of the north country. The teachers report that the libraries have been appreciated by the people along the divisions served by the cars. The demand has been for a good quality of books, which reflects credit on the people in pioneer settlements, and on the teachers whose influence has had much to do with the kind of books read by the pupils, their parents and other members of their families.

### Training of Librarians and Assistants

An important step was taken in transferring the professional training of librarians from the Public Libraries Branch of the Department of Education to the Ontario College of Education, University of Toronto.

The first course offered since the change has been one covering an academic year. It may be considered a standard library school as compared with those maintained in other countries. A course of an academic year will serve a good purpose and will be appreciated by a limited number of public libraries. In addition to this course, a shorter one to serve members of staffs and prospective appointees for town libraries and assistants for average positions in many of the cities, might be considered. A still briefer course for the benefit of village, rural and school libraries with instruction aimed to solve the problems of the very small institutions, is also to be commended. From the point of view of the Public Libraries Branch the short course is very important.

### Recommendations

The following recommendations are respectfully presented:

1. That the Public Libraries Branch be granted the right to put into effect a programme for encouraging adult education in the Public Libraries of the Province, including chiefly: (a) the compilation and publication of standard reading courses; (b) the compilation of special reading courses for libraries needing that kind of assistance; (c) other methods of assisting libraries in readers' advisory work.

2. That more adequate accommodation be provided for the travelling library section.

3. That the whole problem of village and rural library service be reviewed, that a more satisfactory rural public library service may be encouraged.

### Statistics

I present below a statement of the statistics of the Public Libraries of the Province.

W. O. CARSON,

*Inspector of Public Libraries.*

Toronto, February 15th, 1929.

Six new libraries were added during 1928.

One was added to the list of Free Public Libraries: York Township, S.S. No. 28, Mt. Dennis.

Five were added to the list of Association Public Libraries: Englehart, Kinburn, Kinsale, Kirkland Lake, and Vars. Kinburn and Vars were formerly closed Association Public Libraries.

**APPENDIX L****REPORT OF THE SUPERINTENDENT OF THE  
ONTARIO SCHOOL FOR THE BLIND**

---

**Attendance**

The average attendance for the session which ended June, 1928, was 133. School opened the last week in September, 1927, with 127 in attendance. During the school term which ended June, 1928, twelve new pupils were admitted, which brought the attendance up to 139, of which seventy-nine were boys and sixty girls. The number of pupils registered for the twelve months of the official year from October 31st, 1927, to October 31st, 1928, was 160, which is nine more than in the preceding year. There were in residence at the opening of school in October, 1928, 134 pupils.

In October, 1928, twenty-six of the former pupils did not return. Of this number, eighteen were boys and eight girls. Of these, nine had graduated in June, five found employment without graduating, three remained home owing to the indifference of their parents, four were not suitable, two had too much sight, one left to attend school in the United States, one remained home on account of ill health, and one died.

**Changes in Staff**

At the end of the school term in June, resignations were received from Miss Jean Clark, teacher of Household Science, and Miss Margaret Roberts, stenographer and teacher of Typewriting. The former was succeeded by Miss Laura M. Behrens, of Harriston, and the latter by Miss Vera M. Kellett, of Brantford.

Miss Sarah E. Scholefield, who had acted as Girls' Nurse for several years, was superannuated and the vacancy was filled by the appointment of Miss Margaret Milne, R.N.

**Visitors from Teachers' Convention**

The Annual Convention of the teachers from Brantford, Brant County and North Norfolk was held in Brantford, November 8th and 9th, and the programme provided for a visit to the School for the Blind, Friday afternoon, November 9th. The teachers were welcomed in the Assembly Hall, and a programme was provided which included every phase of the work done by the pupils. Choral numbers were given by the Seniors, piano and organ solos, recitations, reading and writing of Braille from dictation, typewriting, a lesson in geography from raised maps, and gymnastics by both the girls and the boys. The work shop and gymnasium were thrown open as well as the class rooms, and interested groups were conducted about to inspect what appealed to them most.

**Improvements in Grounds**

A cement sidewalk was built along Ava Road from the entrance to the school grounds to the rear of the property extending toward the Golf Club. This walk fills a longfelt need, and is greatly appreciated by the citizens living west of the school. An iron railing was built along both sides of the boys' walk, from the

top of the hill to the bottom, thus lessening the difficulty of pedestrians walking on the slippery pavement during the winter season. The danger of accidents is now appreciably diminished.

#### **Health of the Pupils**

A reference to the report of Dr. Marquis, school physician, will call attention to the unfortunate outbreak of scarlet fever among the pupils shortly after the Christmas vacation. The first case, strange to say, developed among the pupils who remained at the school, and was followed by so many others, that further admission was refused to the Isolation Ward of the Brantford General Hospital. Under the circumstances it was necessary to isolate the remaining cases in one end of the Girls' Dormitory and engage special nurses to look after them. The lack of adequate hospital facilities to take care of contagious diseases causes much inconvenience, and it can only be remedied by the erection of a separate building or the fitting up of a special room in either the Workshop or the Tuning Building.

The death of Adelino Cescon of Sault Ste. Marie on Christmas Day saddened the holiday period for the pupils who remained at the school. This death was the result of inflammatory rheumatism contracted at the boys' home during the summer vacation.

#### **Postponement of School Opening**

Extensive alterations in the main building were not completed in time for school opening in late September, and it was necessary to postpone the opening of the school until October 6th. The work which was commenced immediately after the close of school in June was more comprehensive than at first thought, and this with certain unforeseen delays made it impossible to have the dining room and kitchen ready in time.

#### **Sports Competition in Batavia**

On May 11th, in response to an invitation from the Superintendent of the School for the Blind in Batavia, N.Y., eight of the senior boys, accompanied by the Superintendent and the Physical Director went to Batavia to compete in a friendly contest with the pupils of that school for a silver cup donated by the New York School. The events consisted of running races, broad jumping, throwing the basket ball and climbing a sixteen foot rope. Our boys were successful in winning these events and returned to Brantford the proud possessors of the cup. To retain permanent possession it will be necessary to win it twice out of three attempts and the return visit of the athletic team from Batavia next year in an effort to regain possession of the cup is looked forward to with much interest by all the students.

Thanks are due to Mr. Stanley Forbes and Mr. Percy Verity of the Brantford Rotary Club for their generosity in giving so freely of their time by conducting the boys to and from Batavia in their motor cars.

#### **June and Christmas Concerts**

Never were the concerts attended by such large numbers as during the past year. For the first time the Assembly Hall was packed to the doors at the Christmas Concert, the attendance usually being small owing to the many functions going on in the city at that time of the year. In June it was necessary

to present the programme two nights in succession to accommodate those who wished to see it. The increased interest is undoubtedly due to the development of physical culture and dramatic work among the pupils.

#### Convention in Faribault, Minnesota

The Twenty-Ninth Biennial Convention of the American Association of Instructors of the Blind was held this year in Faribault, Minnesota, from June 25th to June 29th, inclusive. There are many state institutions in Faribault and the delegates were entertained as a matter of greater convenience in the buildings of the Minnesota school for the Deaf.

There were thirty-four superintendents of American Schools for the Blind, forty teacher delegates and others representing public schools and boards of management. Conspicuous among the superintendents was Mr. George B. Fryer of the School for the Blind, Shanghai, China.

The guests were welcomed by Superintendent J. E. Vance of the Minnesota School, Mr. C. W. Turner, Mayor of the city of Faribault, and Hon. J. M. McConnell, State Commissioner of Education of St. Paul, Minnesota. The latter outlined generally the characteristics of the Educational System of the State and enlarged upon its progressive spirit.

During the convention meetings, many valuable papers were presented dealing with all phases of the education of the blind. Industrial and manual training were dealt with at length. Among the possibilities for the blind graduate, insurance salesmanship suggested a profitable field of endeavour. The subjects discussed were varied and of sufficient value and interest to justify the continuous attendance at all the sessions of the delegates. On Wednesday afternoon, the delegates were taken by motor cars, provided by the citizens, to St. Paul and Minneapolis, a distance of seventy miles. Arrangements had been made beforehand with the officials of the Twin Cities to facilitate the sight-seeing progress through the cities and a generous welcome was given at the State Capitol. In the Citizens' Aid Building an evening session was held, followed by a trip to Lake Harriet to hear a concert put on by the Minneapolis Municipal Band.

Round Table talks were held for the Superintendents, Matrons, head teachers and others where special subjects of interest to those immediately concerned were discussed.

The annual address was given by Miss Cornelia Adair, of Richmond, Virginia, President of the National Education Association. Miss Adair is a teacher of wide experience and she spoke most interestingly on the subject, "Building the Professions."

Opportunity was given during the week for the delegates to pay a fitting tribute to the memory of Dr. James J. Dow, for many years the successful Superintendent of the State School for the Blind at Faribault. His good work was extolled by Dr. E. E. Allen of Boston at the graveside of the distinguished educator and a wreath was placed on his grave by the committee.

#### Visitors from Other Schools

During the year the school was visited by representatives from several schools for the Blind in the United States. Among these interested visitors were Superintendent and Mrs. C. A. Hamilton of the New York State School for the Blind, Batavia, N.Y.; Superintendent and Mrs. Edward Van Cleve of

the New York City School for the Blind; Mr. and Mrs. Bramlette, formerly of the Texas School for the Blind, but now at the head of the Printing House for the Blind in Louisville, Kentucky. All were especially interested in the Industrial Department, and later, the Manual Training Instructor of the Batavia School spent a few days studying the methods of instruction in the workshop. An interested visitor, also, was the industrial teacher from the Indiana School for the Blind at Indianapolis.

#### **Graduates on the Concert Platform**

Several of the graduates of the school have been finding employment from time to time on the concert platform in different parts of the Province. They are taken out under the management of the Canadian National Institute for the Blind in Toronto and newspaper accounts have paid high tribute to their accomplishments and the training they received in the school.

#### **New Gymnasium Suits for the Girls**

The senior girls were equipped during the year with new gymnasium outfits and they look quite natty as they appear for their daily exercises. Their contribution to the programme at the Christmas and June concerts is always considered a feature of the occasion.

#### **Prizes Won by Pupils**

In a Dominion-wide essay contest conducted by the Laura Secord Candy Company, the results were highly gratifying to the teachers and pupils of our school. The subject of the essays was "Laura Secord, the Woman who made Confederation possible," and four thousand essays were examined. In making their decision the judges referred particularly to the wonderful work done by some of the pupils of the Ontario School for the Blind, one of whom won the second prize of fifty dollars in the junior division, two others were awarded minor prizes, and all the essays from the school were given honourable mention on account of the very high standard displayed.

The fourteen-year-old winner of the second prize, Ernest Philpott, of Brockville, won a similar prize of fifty dollars in a contest held two years earlier, and another of the prize winners was also the successful winner of a contest held last year when her essay was considered of exceptional merit.

#### **A Tribute to the Athletes**

In an editorial, the Brantford *Expositor* paid a high tribute to the part played by boys from the school at the circus held under the auspices of the Y.M.C.A. In part it reads:

"One of the most pleasing features of the circus was the contribution made by the boys from the School for the Blind. The extraordinary skill which they manifested in their work, the building up of pyramids, balancing, leaping over tables, and the various exercises which they performed as a result of implicit confidence in their training, and obedience to the signals of their instructor made a deep impression upon all who saw it. The work was generously recognized by repeated outbursts of enthusiastic applause. It is to be expected that boys who can see will perform daring and difficult feats, but the extraordinary skill, precision of action, sustained thought, swiftness and unity of movement displayed by these sightless boys was a remarkable revelation of the perfection to which their instruction has attained."

### Improvements in the Main Building

During the summer vacation rather extensive alterations were made in the rear of the main building, chiefly in the kitchen and the pupils' dining room. The two dining rooms used for so many years by the boys and girls were thrown into one by the removal of the dividing wall, and this was refinished and decorated to make one large bright room, running the full length of the building. The old windows were replaced by the newest approved type of English steel sash which not only improved the appearance, but gave better light and ventilation. New steam tea and coffee urns were installed and new dinner wagons and furniture.

Adjoining the main dining room are three smaller rooms, the maids' dining room, the servery, and a tiled room with an electric dish washer. A new electric dumb waiter, operated by pressing a button, carries food and utensils up and down from the kitchen below; a large steam table of the latest design and construction will keep food hot and dishes warm in its many compartments, while enamelled cabinets and shelves are also provided, and the floor is neatly tiled.

The kitchen, including scullery, pastry room, pantry and store rooms are models of efficiency, being equipped with new labour-saving kitchen machinery. In the main kitchen, two of the latest type electric stoves have been installed with steamers for vegetables and steam kettles for other purposes, electric toasters, fully-equipped cook tables, coffee grinder and bread slicer. In the scullery are large new sinks with draining tables, electric potato peeler, and tables. In another room are an electric refrigerator, marble-topped pastry table, a bread store room with a special cabinet for 200 loaves of bread. The floor and walls are tiled.

A fireproof stairway leads from the kitchen to the domestic quarters above, and these too, have been improved and added to, providing extra bed rooms and bath rooms. The entire portion of the main building where this work was done has been re-wired, new transformers have been installed and the whole electric services renewed.

W. B. RACE,

Brantford, January 31st, 1929.

*Superintendent.*

---

### PHYSICIAN'S REPORT

SIR,—

I have the honour to forward my report as physician for the Ontario School for the Blind for the year ending October 31st, 1928.

During the school term there were the usual number of minor ailments, particularly colds, occasional sore throats, which only caused much discomfort where there was a tendency to enlarged tonsils. One of the younger boys returned late in the fall from his home in Sault Ste. Marie, after having had an attack of rheumatic fever during the summer. After he had been at school for a short time, there was an unfortunate recurrence of this trouble, which resulted in his death on Christmas Day in the Brantford General Hospital. One of the maids who was operated on for appendicitis in the General Hospital during an attack of influenza, died owing to the double infection. The girls' nurse, Miss Scholefield, was in the hospital for several weeks suffering from

general debility. She was afterwards superannuated and a successor was appointed. One of the boys suffered an injury to his knee, but before vacation it was quite well again. It was found necessary, owing to an unavoidable accident, to send a young lad to the hospital to have his eye removed, shortly before the end of the school term.

There was only one case of mumps during the year, and fortunately it was isolated, preventing further spread of the disease. Shortly after the return of the pupils from Christmas vacation there was an outbreak of scarlet fever. Admission was refused to the Isolation Ward of the Brantford General Hospital for the first time, owing to the city's requirements. It was necessary, under the circumstances, to isolate the others at one end of the girls' dormitory, and place competent nurses in charge. This brings up again, the point which has been emphasized so many times,—that there is a great need for better facilities to take care of such cases. Although a medical officer from the Department of Public Health in Toronto was sent to investigate the matter, nothing was done, and until something is done the same inconvenient arrangements will have to be resorted to from time to time.

Respectfully submitted,

J. A. MARQUIS.

#### DENTAL SURGEON'S REPORT

SIR,—

I have the honour to submit the following report for the year ending October 31st, 1928.

As usual I have examined the teeth of all the pupils and have done the work necessary to repair the teeth and to put the mouth in a healthy condition.

One hundred and twenty-two fillings were inserted for the boys, and sixty-three for the girls.

For the boys twenty-one deciduous and six permanent teeth were extracted. There were twenty-one deciduous and four permanent teeth extracted for the girls.

The care the pupils take of their teeth I consider highly satisfactory.

Respectfully submitted.

J. R. WILL.

#### OCULIST'S REPORT

I have the honour of reporting the results of the ophthalmological examination of the new pupils for the new term 1928-1929, thirteen of whom are boys, and eleven girls.

##### Condition of Sight

	Male	Female	Total
1. Loss of sight in both eyes.....	2	2	4
2. Loss of sight in one, perception of light in other. . . .	1	2	3
3. Perception of light in both eyes. . . . .	3	1	4
4. Limited sight in one eye, perception of light in other	1	0	1
5. Limited vision in both eyes. . . . .	6	6	12
	13	11	24

From the above table, we see that there are four pupils who are totally blind in both eyes, with no hope of future improvement.

In the second group there are three cases with only light perception in one eye.

In the third group, the amount is similar to that of last year, containing four cases.

The fourth group is smallest, there being only one case.

We are pleased to note that in the last class of cases, twelve of the pupils, or half of the total number of new pupils this year, have limited vision in both eyes. This may vary in amount, but generally, they are able to count fingers at a distance of two to seventeen feet. This degree of sight is decidedly of service, as it enables them to go about much more readily than otherwise.

#### Diseases Causing Loss of Sight

	Male	Female	Total
1. Cataract (congenital and juvenile).....	1	2	3
2. Optic atrophy.....	3	..	3
3. Retinochoroiditis.....	1	1	2
4. Ophthalmia neonatorum.....	1	2	3
5. Myopia.....	2	1	3
6. Iritis and irido-cyclitis.....	1	..	1
7. Corneal opacities and anomalies.....	2	2	4
8. Traumatisms.....	2	2	4
9. Undetermined.....	..	1	1
	13	11	24

Of the four cases that are completely blind, one is the result of an infection dating from birth, apparently a case of ophthalmia neonatorum. One, a case of congenital cataract, with corneal opacity. The other two cases are both results of injuries. The one, a gunshot injury at eleven years of age, required an enucleation of one eye. In the other case, at seven years of age, a severe type of irido-cyclitis was produced, as a result of which, some eight years later, a detachment of the retina, with hypo-tension, developed in the good eye, followed by complete loss of sight.

Congenital cataract and optic atrophy cannot be held to account for producing as many cases of blindness as in last year's pupils, the chief offenders this year being injuries and opacities of the cornea. With regard to this latter group, it is extremely difficult to classify them in a definite way, as many of these cases of diffuse opacity and degeneration of the cornea date their origin from birth, and may really be more properly placed as cases of ophthalmia neonatorum. Though owing to a very meagre history, it is impossible to decide the aetiology of the condition.

Two cases of sympathetic ophthalmia were noted, both following injuries in which the exciting eye was absolutely amaurotic and where a definite interval of from one to two years elapsed between injury and the development of sympathetic trouble. This type of case serves to forcibly impress on us the necessity of enucleating sightless eyes especially when due to an injury involving the ciliary region.

Many of the pupils were re-examined, in a number of whom, we are pleased to report a substantial improvement in their visual acuity.

Respectfully submitted,

NORMAN W. BRAGG.

## REPORT ON MUSICAL INSTRUCTION

I have the honour of presenting my report on the Music Department in connection with the Ontario School for the Blind at Brantford, Ontario.

The annual examination which took place in the week of June 4th, included the following practical and theoretical subjects: Piano, Organ, Violin, Solo-singing and voice-production, Choral-class Singing, Rudiments and Elementary Harmony, Counterpoint and Musical History.

*Piano*—

Introductory Grade: Three pupils gained honours and four passed.  
 Elementary Grade: Two gained honours.  
 Primary Grade: Six, with honours.  
 Junior Grade: Four passed.

*Organ*—

Primary Grade: One passed.  
 Junior Grade: One passed.

*Violin*—

Introductory Grade: Two honours and three passed.

*Singing and Voice Production*—

Elementary Grade: One gained honours in Class 1; two gained honours; one passed.  
 Primary Grade: One passed with honours.  
 Intermediate Grade: One passed.

*Rudiments and Elementary Harmony*—

Six passed with I honours; six passed with honours; one passed.

*Counterpoint*—

Intermediate Grade! Two gained honours; two passed.

*Musical History*—

Intermediate Grade! One passed with II honours; three passed.

The pupils of the various piano classes were, as a whole, extremely promising. As compared with the previous five years there was a marked improvement in technique, and in the interpretation of the various selected compositions presented for performance. Evidently better attention is being given to touch and to matters of detail generally.

In addition to the piano students who took the regular examination, I tested several others who were more advanced. These students performed their studies and pieces with real artistic sense and good technique.

The teachers in this department, Mr. F. Lord (Musical Director), Miss Z. Perry, A.T.C.M., and Miss S. Miller are to be congratulated on the outcome of their work.

*Organ*.—Three lads were examined in this section, two of whom displayed much promise. The fact that a number of former students of the School are holding more or less important church appointments should act as a stimulus to the serious study of the organ not only from an artistic point of view, but as a possible commercial asset.

I venture to hope that the organ class will grow from year to year.

*Violin*.—The present class in violin playing are only beginners, but already several of these promise to do justice to their excellent teacher, Mrs. F. Lord

*Singing.*—In solo-singing there is a considerable improvement; the songs and studies were sung with good phrasing and clearness of diction. The production was somewhat faulty and needs more careful attention.

*Theoretical Subjects.*—(Rudiments, Elementary Harmony, Counterpoint and Musical History.) The results of the Theoretical examination were very gratifying in all grades.

The choral class is a well-balanced organization, and its fifty members are doing very good work under the able direction of Mr. F. Lord.

The singing of this band of choristers was extremely good in both accompanied and in unaccompanied pieces.

The selected compositions were very attractive, especially those by Sterndale, Bennett and Cowen—British composers. The tone quality, intonation, expression and enunciation were really excellent.

A Junior Class of about thirty voices sang with pretty effect.

The Tuning Class under the efficient, painstaking direction of Mr. Ansell, is doing first-rate work. The mechanical part of the students' training is now on an up-to-date basis.

I understand that a considerable number of the former pupils of the Tuning School are holding important appointments in the leading piano manufacturers' establishments in Ontario, Quebec and Manitoba.

In conclusion I should like to offer my congratulations to the courteous, able Principal, Mr. W. B. Race, and his staff on the splendid efficiency and discipline of the whole school.

I have the honour to be, Sir,

Yours obediently,

ALBERT HAM, Mus. Doc., F.R.C.O.

---

#### LITERARY EXAMINER'S REPORT

I beg leave to submit my report as literary examiner for the academic year ending June, 1928.

I examined the literary work of the several classes on June 12th, 13th and 14th.

I found some changes in the staff since last visit, the new members being Misses O'Donohue, Snitsinger and Babb. I also found some rearrangement of grades among the staff. Mr. Cole now has charge of all the Grade 5 work, except French, which is taken by Miss O'Donohue; Mr. Langan has Grade 4 classes; Miss Draper, Grade 3 classes; Misses Moffat and O'Donohue, Grade 2 classes; Misses Snitsinger and Babb, Grade 1 classes; Mr. Donkin, the Manual Training; Miss Clark, the Domestic Science; Miss Roberts the Typewriting, and Capt. Clegg, the Physical Training.

The course of study is essentially the same as that laid down by the Department for Public and High Schools, except that no Art or practical Science is taken.

The classes are well graded and the proportion of pupils to teachers is quite satisfactory.

The discipline is excellent and a fine school spirit has been developed. There is good co-operation between teachers and pupils. This results in progress on the part of the pupils from a reasonable effort on the part of the teachers.

Throughout the school much interest is taken in Literature, Composition, Spelling, Grammar, History, Geography and Reading. The pupils read with expression and comprehension, and express themselves clearly and accurately. The knowledge of History and Geography is wide and the pupils are deeply interested in these subjects. The teachers read a great deal to the pupils from the daily press, books of travel and other supplementary literature with the result that the pupils are well versed in current literature and events. The senior classes have a good knowledge of Civics.

Much of the Arithmetic, Algebra and Geometry is done mentally or orally and the progress of the pupils is quite as good as in ordinary schools. Much progress has been made in Algebra and Geometry since my last visit.

In the languages good results have been obtained in Latin and French; this, notwithstanding the handicap under which the teachers work, in not having many books in Braille to assist them.

In Manual Training and Household Science the school now has a fine equipment and sufficient for the pupils taking these subjects. Needless to say, there is interest on the part of the pupils, and the results are satisfactory.

In typewriting, considerable accuracy is obtained and a means given the pupils of putting their work down rapidly and in a way that is read easily by those looking it over. If each pupil had a typewriter on which Braille characters could be used, it would be a wonderful time saver, but I do not know whether this would be practicable or not.

In the Physical Training splendid results have been secured. The carriage and alertness of the pupils is much greater than formerly. This must make the work of the Grade teachers easier and more effective. I am pleased to see that this work has been extended to the girls, also to note that the pupils carried off the honours in competition with pupils of the schools of the neighbouring Republic.

It is gratifying to note that as a result of a written test, quite on a par with that set by the Department, seven pupils successfully passed the Entrance Examination.

In concluding my report, I wish to pay tribute to the various members of the Staff on the interest they show in the work of the School, the ingenuity they have displayed in devising means of presenting the work to the pupils, and to the loyalty and co-operation they have given Principal Race in bringing the School to its present high standard of efficiency.

E. E. C. KILMER,

*Literary Examiner.*

## APPENDIX M

**REPORT OF THE SUPERINTENDENT OF THE  
ONTARIO SCHOOL FOR THE DEAF**

---

The following report of the activities of the Ontario School for the Deaf for the year ending October 31st, 1928, owing to the recent death of the late Superintendent, Dr. Coughlin, will not be as comprehensive as it otherwise would have been, yet we hope will cover the leading features to some extent.

The average attendance during the session was 298. School opened in September, 1927, with 289 pupils in attendance, and during the year, new pupils were enrolled making a total of 300, of whom 164 were boys and 136 girls.

The health of the pupils during the year has been very good, as the report of the Physician, Dr. Boyce, indicates.

At the opening of school in September, 1928, ten pupils of former years returned to take up the work of the first year High School. Much of the work is, of course, new to them, but I believe they are making satisfactory progress.

During the year there have been several films, largely of an educative nature, shown on the screen in the auditorium of the school. Subsequent class-room work on these has shown the value of this class of work in the cultivation of observation, memory and deductive reasoning, as well as giving the children good, clean entertainment, and cultivating in them a desire for such pictures, as contrasted with many of those frequently seen in movie theatres.

The training of the physical side of the education of the children has been well looked after, not only in drill work, but sports, supervised by the teachers and officers on duty; and the social side of their education has not been neglected. Social evenings, properly supervised, furnish opportunity for teaching deportment to those attending. We cannot overestimate the value of the training for the future that such gatherings as these have for our children, away from home and home influence. The Field Day Sports, both those of summer and winter, encourage the "Give and Take" spirit, so essential in after life.

The audiometer and the radioear, installed during the year, have amply justified themselves. By the former, the degree of hearing, if any, possessed by a child, is readily discovered and can be utilized in the class-room work. By the latter, a teacher can take a class and convey much instruction to the pupils, directly through the ear, each of them being able to tune in to the extent of his or her degree of sound recognizance.

Through the foregoing, I have endeavoured to show that we have tried to so interweave the teaching of the mind and the training of the body that good, healthy and honourable citizens may, when their period of training is over, leave us to take their place among their fellows with as little handicap as possible.

The reports of the Literary Examiner and the Physician, to the late Dr. Coughlin, are attached hereto.

I have the honour to be, Sir,

Your obedient servant,

WM. J. CAMPBELL,

*Acting Principal.*

Belleville, January 28th, 1929.

#### Officers of the School

C. B. Coughlin, M.D.	Superintendent.
W. W. Boyce, M.D.	Physician.
J. Chant, M.D.	Aurist and Oculist.
Mrs. H. MacCluggage	Housekeeper and Acting Matron.
Miss K. Bawden	Stenographer and Clerk.
Miss M. Allison	Trained Nurse.

#### Teachers

MANUAL—D. R. Coleman, M.A., Teacher Emeritus; Mrs. Sylvia Balis, Miss Ada James, Miss Nina Brown.

ORAL—W. J. Campbell, Supervising Teacher, Senior Oral Department; Miss E. Deannard, Supervising Teacher, Intermediate Oral Department; Miss C. Ford, Supervising Teacher, Junior Oral Department; Geo. F. Stewart, E. B. Lally, Miss V. Handley, Miss E. Nurse, Miss L. Carroll, Miss B. Rierdon, M. Blanchard, Miss M. Cass, Miss E. Panter, B.A., Mrs. M. Blanchard, A. Gordon, Miss M. Lalley, Miss K. B. Daly, B.A., Miss F. M. Bell, Miss C. O'Connell, Mrs. Wannamaker, A. C. Stratton, Miss E. M. Benedict, Miss M. B. Code, Miss M. Hegle, Miss R. Van Allen, Miss G. Burt.

L. Morrison	Printer and Instructor in Printing.
T. O'Hara	Carpenter and Instructor in Carpentry.
A. Morrice	Shoemaker and Instructor in Shoemaking.
J. N. Boyd	Baker.

#### Literary Examiner's Report

Having spent three full weeks among the several classes, part of the time in early December and the balance late in March, I may fairly claim to have an intimate personal knowledge of the progress and proficiency in the several classes. Particularly is this the case, since from the fact that this is the twenty-first inspection I have made of this school, I am fairly familiar with the work of teaching the deaf, more familiar probably than anyone else in the Province outside of yourself and your more experienced teachers. With these explanatory remarks, I have no hesitation whatever in assuring the Honourable the Minister of Education, through you, that the School for the Deaf is in excellent condition, that the Staff are well qualified and intensely interested and earnest in their work, and that the pupils generally show a creditable degree of proficiency. As I passed from class to class, I was strongly impressed by the harmony and cordiality that exists throughout the teaching staff. This is of the utmost importance if the best results are to be attained, and in the twenty-one years that it has been my privilege to visit your school officially, I do not recollect finding a finer spirit of co-operation than I found this year. I think it is only fair to say this much for the encouragement of the teachers, for I strongly believe that where merit is, it should be recognized.

Having before you at all times the detailed reports from the several teachers, it is not necessary for me in this report to particularize the work that I have observed in the various classes. To do so, would make this report unduly long. I would, however, like to say that I observed a great deal of teaching of a very high order indeed.

I have very carefully examined your Course of Study, and I consider that you have developed a course exceptionally well suited to these children. While it covers the regular Public School Course as nearly as possible as far as High School Entrance, there are many modifications that are decidedly advantageous to the children for whom it is intended. As in all schools, you have pupils who will never be able to satisfactorily complete the full course. I am of the opinion that your arrangement of the work meets well the case of this child, the child who is able to complete only the Junior Department or the Intermediate Department. Whichever he completes, he has a course that is fairly complete in itself, and while it naturally merges into the higher department, still if he has to leave school after either of these elementary courses, he has something that will go a long way towards lightening his burden through the journey of life. I like that idea in your prescribed course of study very much.

During my visit I was intensely interested in those new appliances that have been installed during the school year, the audiometer and the radioear. The former appeals to me as almost a necessity since I saw it in use, for it gives a definite and scientifically accurate basis from which to work. The instructor can know exactly whether there is any residual hearing that might be estimated and perhaps developed. He also knows exactly what percentage amount of residual hearing he has to deal with, while the "radioear" has undoubtedly already greatly assisted in the "speech work" and only the future can tell just how great that assistance may become to your already efficient system of instruction. But if the apparatus had no instructional value, the pleasure these children get from the fact that they can actually hear music and the spoken words of their companions and teachers, would be worth all it cost. Beyond any question, though, it has an educational value.

Another feature of your work, that has made very notable progress during the year, is the rhythmic exercises that are being systematically carried on. I observed several classes in this work during my inspection and I was greatly impressed by what I saw and by the evident possibilities offered by this form of training.

I cannot close this report without a brief reference to two events that stand out prominently in my memory and probably will always remain with me. I refer to the entertainment put on by the pupils shortly after my last inspection, and to which you were good enough to invite me with many of the citizens of Belleville and surrounding district; the other event is the visit that your kind invitation allowed my teachers to make to the school during the Teachers' Institute meeting in October. Speaking of the entertainment, while I thought that I knew what to expect, I am bound to say that the children far surpassed my expectations. The citizens, who were not as familiar as I am with the school, were simply amazed to hear these children take their several parts almost as freely as would hearing children, while their portrayal of the characters represented was highly complimentary both to the children and to those who trained them. I most sincerely offer my congratulations. In reference to the visit by my teachers, it was an experience and a pleasure that was deeply appreciated. I had frequently told them of what was being done at the O.S.D., but

I believe that some, at least, thought that I was over-enthusiastic. They know now that I might have said more than I did say. On their behalf, as well as on my own, I wish to thank you for the opportunity you gave us to visit your school while in session, and observe the work in the several grades. It is something that the teachers will never forget.

It was a matter of deep regret on my part that I was not able to accept your invitation to be present when the Rotarians and Kiwanians of Belleville visited your classes, but from remarks that have reached me, these men fully appreciate the importance of your work. In my judgment, visits of business men such as these, are beneficial to the school, for the better it is known by the public, the more it will be appreciated.

In conclusion, let me express my thanks and appreciation of the kindnesses and courtesies extended to me while in the discharge of my official duties. Every opportunity was given to me to arrive at a proper estimate of conditions in the school, and this made my work much lighter and far more congenial.

All of which is respectfully submitted.

H. J. CLARKE,

*Inspector of Public Schools,  
South Hastings, Belleville and Trenton.*

---

#### Physician's Report

The following is a summary of the health of the School for the session 1927-28:

At opening there were a number of children in a state of malnutrition, anaemia, debility and skin affections, but were able for school and rapidly improved.

During October and November we were pretty busy with many cases of influenza, both bronchial and gastro-intestinal, some complicated with pneumonia—five cases—with few exceptions, mild in character, throat troubles, such as pharyngitis and tonsillitis were prevalent. December was quiescent of sickness as compared with previous months, some mild bronchial and throat cases and two cases of pneumonia. January and March, 1928, were also busy months, the prevailing sickness being influenza, respiratory disorders as well as gastro-intestinal troubles, all being mild excepting when complicated, of which we had four cases of pneumonia. During the school term we had a number of accidents, open wounds, contusions and sprains requiring surgical treatment—about the average, also one fracture of clavicle, one appendicitis, one scarlet fever and a number of minor operations. There was very little sickness during the last few weeks of the term, and at the closing the health of all was satisfactory.

Yours respectfully,

W. W. BOYCE,  
*Physician.*

Sites and buildings.....	\$1,603,438	.....	.....
Other purposes.....	\$2,866,788	.....	.....
Total.....	\$8,800,306	\$1,682,142	.....

### b. Evening High Schools

Number of schools.....	16	2	.....
Total enrolment.....	3,887	935	.....
Number of teachers.....	149	36	.....

### c. Continuation Schools

Number of schools:			
Five-teacher schools, 2; four-teacher schools, 4; three-teacher schools, 35; two-teacher schools, 147; one-teacher schools, 29.....	217	11	.....
Total enrolment: boys, 4,212; girls, 5,867.....	10,079	443	.....
Average daily attendance.....	8,296	237	.....
Percentage of average attendance to total enrolment..	82.16	.....	1.32
Number of teachers: men, 153; women, 301.....	454	32	.....
Number of University graduates.....	58	1	.....
Percentage of University graduates.....	12.77	.....	.74
Number of specialists.....	43	15	.....
Percentage of specialists.....	9.45	2.81	.....
Average annual salary:			
Principals.....	\$1,768	.....	\$1
Assistants.....	\$1,325	.....	\$7
All teachers.....	\$1,537	.....	\$11
Highest salary.....	\$3,550	.....	.....
Total amount received in Legislative Grants.....	\$199,388	\$1,213	.....
Total amount expended by Trustee Boards:			
Teachers' salaries.....	\$653,770	.....	.....
Sites and buildings.....	\$142,593	.....	.....
Other purposes.....	\$325,641	.....	.....
Total.....	\$1,122,004	\$18,356	.....

### d. Vocational Schools

Number of Day schools.....	42	4	.....
Total full-time enrolment: boys, 9,591; girls, 10,558....	20,149	2,820	.....
Average daily full-time attendance.....	15,414	1,901	.....
Total part-time enrolment: boys, 1,337; girls, 1,572....	2,909	180	.....
Total special enrolment: boys, 413; girls, 1,042.....	1,455	.....	171
Number of full-time Day school teachers: men, 407; women, 253.....	660	55	.....
Number of part-time or occasional Day school teachers	171	21	.....
Number of Evening schools.....	61	1	.....

	1927 Figure	Increase for the year	Decrease for the year
Total Evening enrolment .....	39,096	1,662	.....
Number of Evening teachers: men, 766; women, 510..	1,276	.....	21
Total amount received in Legislative Grants (Day and Evening schools) .....	\$849,564	\$25,982	.....
Total amount expended (Day and Evening schools) by Trustee Boards:			
Teachers' salaries .....	\$1,982,571	.....	.....
Sites and buildings .....	\$553,476	.....	.....
Other purposes .....	\$1,252,688	.....	.....
Total .....	\$3,788,735	\$289,355	.....

### III.—GENERAL

#### Elementary and Secondary Schools

	1927 Figure	Increase for the year
Total number of schools: Day, 7,606; Evening, 96 .....	7,702	54
Total number of Day full-time teachers: men, 3,692; women, 15,642	19,335	492
Number of vocational part time or occasional teachers (96 teach also in High School) .....	171	.....
Total number of Day teachers .....	19,410	417
Total enrolment of schools:		
Elementary (January-December, 1927):		
Day .....	634,592	
Evening .....	3,171	
Secondary (September, 1927-June, 1928):		
(1) Academic:		
Day .....	65,884	
Evening .....	3,887	
(2) Vocational:		
Day (full-time, part-time, special) .....	24,513	
Evening .....	39,096	
	771,143	20,346
*Number of students in Elementary and Secondary Day Schools for the calendar year 1927 .....	692,482	
Number of students in Elementary and Secondary Day and Evening Schools .....	738,636	
Percentage of Ontario's population in attendance at Day and Evening School .....	25	
Number of Day school pupils: boys, 366,479; girls, 358,510 .....	724,989	17,020
Total amount received in Legislative Grants .....	\$4,938,577	163,947
Total amount expended by Trustee Boards in teachers' salaries .....	\$25,972,736	807,965
Total amount expended by Trustee Boards for all purposes .....	\$48,510,215	2,014,975

\*This figure is less than 724,989 (the total enrolment of Elementary and Secondary Day Schools) by 32,507, those who obtained High School Entrance Standing at midsummer, and entered Secondary School in September.

## Comparative School Statistics, 1912-1927

### I. PUBLIC AND SEPARATE SCHOOLS

These elementary summaries, 1, 2, 3, and 5, for the purpose of comparison with previous years in which the Separate Schools were included with Public Schools, include Roman Catholic and Protestant Separate Schools. Summary 4 refers to Public Schools only. The detailed statistical tables 1, 2, 3, 4, and 5 give the statistics of the Public Schools, including Protestant Separate Schools; the statistics of the R.C. Separate Schools are given in Tables 6, 7, 8, and 9; those of the Protestant Separate Schools appear in Table 25; and the Night Schools in Table 26.

#### 1. Day School Attendance

Year	Total Enrolment	Boys	Girls	Average Daily Attendance	Percentage of Average Attendance to Total Enrolment	Percentage of Aggregate to Possible Aggregate, i.e., Percentage of Actual to possible Attendance
1912.....	467,022	239,187	227,835	291,210	62.35	.....
1917.....	527,664	266,255	261,409	342,571	64.92	.....
1922.....	601,485	306,225	295,260	425,018	70.66	86.80
1926.....	623,231	318,224	305,007	444,236	71.28	88.01
1927.....	634,592	324,138	310,354	456,978	72.01	88.49

In all these elementary schools the total possible aggregate attendance for the year 1927 was 100,392,767 and the actual aggregate was 88,833,736, or 88.49 per cent. of the possible. In arriving at the possible aggregate, all the school days for the term of a pupil of non-compulsory age, and all the school days of a child of compulsory age, are counted, except in case of illness, properly certified, or of exemptions allowed by law, so long as he is a resident of the school section or until he is registered in a secondary school.

Duplications of enrolment in elementary schools owing to removals from one elementary school to another during the year, or owing to transfer to secondary schools, are carefully avoided in this calculation.

The percentage of average attendance to total enrolment, viz., 72.01, is low owing to the fact that a pupil once entered on the roll, if only for a few days, is counted in the enrolment for the year. The percentage of actual to possible aggregate attendance (88.49) as given above, represents correctly the situation as regards regularity of attendance in the elementary schools.

## 2. Classification of Pupils

## (A) RURAL

Year	Kindergarten	Kindergarten-Primary	Form I, Junior Grade (Primer)	Form I, Senior Grade	Form II	Form III	Form IV	Form V *	Total	Percentage of total Enrolment
1912			62,712	30,293	43,775	42,450	44,049	3,984	227,263	48.67

## 3. Teachers' Certificates

Year	*Teachers	Male	Female	1st Class Certificates	2nd Class	3rd Class	Kindergarten-Primary	Kindergarten Director	Manual Training	Household Science	District	Permanent Ungraded	Temporary	Normal School Graduates	Nor. Coll., Faculty or College of Education Grads.	Univ. Graduates
1912	11,128	1,511	9,617	674	6,419	1,804	...	371	...	317	220	1,323	6,705	614	83	
1917	12,762	1,317	11,445	1,106	8,784	1,317	66	310	33	38	292	213	603	9,203	1,053	140
1922	14,872	1,740	13,132	1,273	10,825	1,190	213	258	63	78	407	156	409	11,437	1,188	182
1926	16,016	2,158	13,858	2,132	12,104	646	364	214	73	76	57	132	329	13,589	1,000	233
1927	16,346	2,266	14,080	2,587	12,120	600	314	177	75	79	43	54	297	14,285	1,066	252

\*Exclusive of Continuation School Teachers.

The K.P., K., M.T., and Ho. Sc. columns refer only to teachers devoting whole time to the work.

Percentage of teachers, 1927: Male, 13.85; female, 86.15.

The number of teachers and the class of certificates, in the Public Schools alone, in each County and District of the Province, will be found in Table 3.

**Classification of teachers and certificates as to rural and urban schools:**

Rural	Teachers *			Certificates		
	Total	Male	Female	1st Class	2nd Class	3rd Class
1912.....	6,143	894	5,249	165	3,002	1,463
1917.....	6,455	655	5,800	343	4,232	1,129
1922.....	7,034	777	6,257	257	5,180	909
1926.....	7,486	965	6,521	779	6,147	414
1927.....	7,588	996	6,592	1,055	6,046	373
Urban						
1912.....	4,985	617	4,368	509	3,417	341
1917.....	6,307	662	5,645	763	4,552	188
1922.....	7,838	963	6,875	1,016	5,645	281
1926.....	8,530	1,193	7,337	1,353	5,957	232
1927.....	8,758	1,270	7,488	1,532	6,074	227

\*Exclusive of Continuation School Teachers.

Percentage of teachers, 1927: rural, 46.74; urban, 53.26.

**4. Teachers' Salaries and Experience  
(Public Schools Only)**

**(A) Salaries**

Year	Male							Female						
	High-est	Average						High-est	Average					
		Pro- vince	City	Town	Vill- age	Ur- ban	Rural		Pro- vince	City	Town	Vill- age	Ur- ban	Rural
	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$	\$
1912....	2,200	788	1,320	977	779	1,141	566	2,000	543	703	519	492	618	493
1917....	2,500	1,038	1,637	1,166	908	1,425	686	2,200	650	795	628	573	731	580
1922....	3,500	1,644	2,269	1,767	1,393	2,082	1,144	3,325	1,117	1,363	1,047	986	1,253	987
1926....	3,600	1,644	2,287	1,775	1,373	2,097	1,136	3,500	1,203	1,470	1,094	1,006	1,340	963
1927....	3,875	1,667	2,310	1,749	1,407	2,107	1,147	3,500	1,152	1,465	1,095	1,012	1,336	970

The above is a general average without regard to certificate or experience. See Table 3 for averages, including these important factors.

**(B) Average Experience (in Years)**

Year	Male	Female	All	Rural (Male and Female)	Urban (Male and Female)
1912.....	11.81	7.41	8.06	.....	.....
1917.....	14.7	7.67	8.44	.....	.....
1922.....	12.9	8.2	8.6	.....	.....
1923.....	12.1	8.2	8.7	5.1	12.3
1924.....	11.4	8.6	9	5.1	12.8

III. PROTESTANT SEPARATE SCHOOLS

The following is a complete list of the Protestant Separate Schools of the Province:—No. 1 Grattan, No. 2 Hagarty, L'Original, and Penetanguishene (two schools).

They were attended by 343 pupils in 1927. The whole amount expended for their maintenance and permanent improvements was \$15,831.48. Ten teachers held Second Class certificates.

More complete statistics for these schools will be found in Table 24.

IV. COLLEGIATE INSTITUTES AND HIGH SCHOOLS

(A) Schools, Teachers and Salaries (from 1920)

Year	Schools			Teachers										
	Collegiate Institutes	High Schools	Total	Collegiate Institutes	High Schools	Total	University Graduates	Specialists	Percentage		Men	Women	Percentage	
									University Graduates	Specialists			Men	Women

\*Registered attendance of members.

XI. SUPERANNUATED TEACHERS

(Ryerson Superannuation Scheme)

Summary for Years 1912-1928

Year	Teachers on List	Expenditure for the Year	Gross Contributions to the Fund	Amount Refunded to Teachers or to the Estates of Teachers	
				\$	c.
1912.....	297	\$ 52,696	90	\$ 443	01
1917.....	245	\$ 48,232	00	\$ 810	92
1922.....	159	\$ 55,799	75	\$ 73	80
1927.....	91	\$ 31,334	50		
1928.....	82	\$ 29,977	00		

The annual allowance to each Superannuated Teacher was increased by the Legislature in 1920. Payments are at the rate of \$11 per year of service instead of at \$6 as formerly.

†For fiscal year ending 31st October.

XII. HIGH SCHOOL ENTRANCE EXAMINATION RESULTS

Year	Sr. IV Enrolment	Candidates		Successful Candidates						Number who attempted the written test

Swimming.....	577
Music.....	210
Lip Reading.....	10
II. INDUSTRIAL AND TECHNICAL COURSE	
General:	
Shop Mathematics.....	782
Mechanical Drawing.....	1,213
Applied Mechanics.....	111
Industrial Chemistry.....	238
Drafting and Design.....	269
Metal Trades:	
Sheet Metal Drawing.....	69
Sheet Metal Work.....	37
Foundry Work.....	21
Structural Steel Design.....	52
Oxy-Acetylene Welding.....	434
Pattern Making.....	28
Automobile Mechanics.....	1,901
Machine Shop Work.....	1,175
Tool Making.....	15
Building Trades:	
Architectural Drawing.....	431
General Woodworking.....	682
Bricklaying.....	46
Painting and Decorating.....	41
Paper Hanging.....	23
Plumbing.....	305
Estimating.....	25
Carpentry and Building Con- struction.....	263
Cabinet Making and Joinery.....	308
Printing Trades:	
Printing and Bookbinding.....	312
Photography, Photo-engraving and Lithography.....	44
Pulp and Paper Making.....	14
Electrical Work:	
Electricity, Theory.....	770
Electricity, Applied.....	1,133
Radio.....	299
Miscellaneous:	
Air Brakes.....	21
Telegraphy.....	108
Horology.....	30
Stationary Engineering.....	247
Steam and Gas Engines, and Power Plants.....	524
Textile Working.....	27
Real Estate.....	8
Chemistry for Nurses.....	70
III. COMMERCIAL COURSE:	
Advertising.....	181
Bookkeeping.....	2,814
Business Law.....	221
Penmanship.....	1,376
Stenography.....	4,427
Salesmanship.....	207
Typewriting.....	5,565
Business Practice.....	58
IV. HOUSEHOLD ECONOMICS COURSE:	
Cooking.....	2,764
Housekeeping.....	36
Home Economics.....	685
Home Nursing.....	938
Hygiene and Dietetics.....	401
Sewing and Dressmaking.....	6,162
Power Machine Operating.....	203
Millinery.....	1,096
Embroidery and Lace-Making..	466
V. Art COURSE:	
Elementary Drawing.....	560
Colour Study.....	324
Lettering.....	353
Show Card Writing.....	587
Industrial Design.....	193
Illustrating.....	145
Drawing and Painting from the Antique.....	219
Drawing and Painting from Still Life.....	197
Drawing and Painting from Life.....	141
Modelling.....	63
Wood Carving.....	75
Basketry.....	134
Pottery.....	64

XVIII	Chas. Latour, B.A., B.L.	Ottawa, 67 Osgoode St.
XIX	F. Choquette, B.A.	Hawkesbury.

## B—Secondary Schools

## 1. High Schools and Collegiate Institutes:

I. M. Levan, B.A.  
G. F. Rogers, B.A.  
R. W. Anglin, M.A.  
A. J. Husband, B.A.

## 2. Continuation Schools:

G. K. Mills, B.A.  
J. P. Hoag, B.A.  
J. P. Cowles, B.A.

## 3. Technical Schools:

D. A. Campbell, B.A.  
F. S. Rutherford, B.A.Sc.  
Miss A. M. Hamill, B.A.

Address:—Toronto, Parliament Buildings.

TABLE 21

## SUMMARY OF HIGH SCHOOL ENTRANCE EXAMINATION RESULTS, 1928

Enrolment, Senior Fourth Grade, December, 1927.....	57,847
Number of High School Entrance Candidates:	
Recommended by Principal on Group 11.....	13,828
Taking written test on Group 11.....	32,219
	46,047
(Of this 46,047, there were 524 who took Group 1 for French-speaking Pupils.)	
High School Entrance candidate percentage of December Senior Fourth enrolment...	79.60
Number of candidates successful on written test on Group 11—	
By Regulation 11—(1) and (2).....	23,282
—(3) and (4).....	958
—(5).....	248
—(6).....	251
	24,739
Total number of successful candidates.....	38,567

Percentage of all candidates who were successful, 83.75 (30.03 by Principals' recommendation and 53.72 by passing the written test.)

TABLE 22—DEPARTMENTAL EXAMINATION RESULTS, 1928

## (a) Lower School

Subjects	Total number of candidates	Candidates writing Departmental Examination	Number Granted Standing						Per cent.	
			On Departmental Examination	On teachers' report	Appeals		Total successful	1928	1927

TABLE 29  
LIST OF APPROVED CADET CORPS, 1928

**Collegiate Institutes, High, Public and Separate Schools having Cadet Corps with at least twenty members at least twelve years of age and not over eighteen in the case of Public and Separate Schools, and at least fifteen years of age and not over eighteen in other cases.**

COLLEGIATE INSTITUTES:—Brantford, Chatham, Collingwood, Clinton, Cobourg, Cornwall, Fort William, Galt, Goderich, Guelph, Hamilton, Ingersoll, Lindsay, Morrisburg, Napanee, Niagara Falls, North Bay, Oshawa, Ottawa (2), Owen Sound, Pembroke, Perth, Picton, Port Arthur, Renfrew, Sarnia, Sault Ste. Marie, Seaforth, Smith's Falls, Stratford, Strathroy, St. Catharines, St. Mary's, Toronto (9), Vankleek Hill, Walkerville, Windsor, Woodstock. Total, 47.

HIGH SCHOOLS:—Athens, Aurora, Brampton, Caledonia, Carleton Place, Campbellford, Essex, Leamington, Listowel, Milton, Midland, Mitchell, Newmarket, Orangeville, Parry Sound, Petrolia, Port Hope, Port Perry, Ridgetown, Scarboro, Stirling, Tillsonburg, Uxbridge, Weston, Whitby, Vaughan Road. Total, 26.

VOCATIONAL SCHOOLS:—Ottawa, St. Thomas, Windsor. Total, 3.

CONTINUATION SCHOOLS:—Carp, Fenelon Falls, Little Britain, Russell. Total, 4.

PUBLIC SCHOOLS:—URBAN—Arthur, Aylmer, Barrie, Belleville (4), Bowmanville, Brampton (2), Brockville (3), Campbellford, Chatham (3), Cobourg, Cornwall, Dryden, Dundas, Fort Frances, Guelph, Hallville, Hamilton (24), Iroquois Falls, Keewatin, Kenora, Kingston (6), London (18), Millbrook, Mimico, Niagara Falls (5), Orangeville, Ottawa (12), Paris, Parry Sound, Peterborough (6), Port Arthur (4), Port Hope, St. Catharines (7), St. Mary's, St. Thomas (6), Stratford (5), Timmins, Toronto (74), Trenton (2), Walkerton, Walkerville (2), Waubaushene, Westboro (3), Weston, Woodbridge. Total, 213.

RURAL:—S.S. 5, Thurlow (South Hastings); S.S. 3, Barton (Lloyd George School, Wentworth County); S.S. 25, York (York County); U. 7, York East and North (York County). Total, 4.

SEPARATE SCHOOLS:—Hamilton (11), Toronto (27). Total, 38.

Total number of Cadet Corps, 335. Provincial Government grant (at \$50 each), \$16,750.00.

**TABLE 30**  
**BOARDS OF EDUCATION<sup>7</sup>**

CITIES:—Belleville, Brantford, Chatham, Fort William, Galt, Guelph, Hamilton, Kingston, London, Niagara Falls, Oshawa, Owen Sound, Peterborough, Port Arthur, St. Catharines, St. Thomas, Sarnia, Stratford, Toronto, Windsor, Woodstock.

TOWNS:—Almonte, Arnprior, Barrie, Bracebridge, Brockville, Bridgeburg, Campbellford, Carleton Place, Collingwood, Dundas, Dunnville, Essex, Fort Frances, Gananoque, Gravenhurst, Grimsby, Harriston, Hawkesbury, Huntsville, Ingersoll, Kenora, Kincardine, Lindsay, Listowel, Midland, Mount Forest, Napanee, Niagara, Oakville, Orillia, Paris, Parkhill, Parry Sound, Perth, Petrolia, Port Colborne, Prescott, Renfrew, Simcoe, Smith's Falls, Thessalon, Uxbridge, Walkerville, Wallaceburg, Weston, Whitby, Wiarton.

VILLAGES:—Bradford, Brighton, Caledonia, Cayuga, Colborne, Elora, Exeter, Fergus, Kemptville, Morrisburgh, Newburgh, Newcastle, Norwood, Omemee, Port Credit, Port Dover, Port Perry, Port Rowan, Richmond Hill, Shelburne, Stirling, Vienna, Wardsville, Watford.

## FOREWORD

"In 1669 much progress was made in exploration and discovery. The interests of Church and State were officially combined. The king's dominions and the mission field were to be expanded simultaneously and by united action. The copper mine was to be exploited, the Great River to be explored, the route to the South Sea to be discovered, the English and Spaniards to be confined to a narrow strip of the Atlantic coast, and the rest of North America to become a French preserve. At the same time the Gospel was to be preached by Jesuit and Sulpician and Recollet to numberless tribes which had never been privileged to hear it, but which should now be enrolled under the banner of the Cross.

Courcelles and Talon took up the question of the copper mine. The Nipissing trade-route from Lake Superior was difficult, laborious and costly. Was there not a cheaper and more practicable way? Explorers were sent out to solve the problem. Peré followed the portage route from Gandatseteiagon (probably near Bowmanville) to Georgian Bay. Jolliet descended the chain of lakes to Lake Erie in a sailing canoe, and proved that there was uninterrupted water communication from Lake Superior to Montreal. There was the Niagara portage, to be sure, and hostile Andastes infested the eastern shores of Lake Erie, but a great commercial and geographical fact was established."

Galinée.

## INDIAN MEDICINE AND MEDICINE MEN

By ARTHUR C. PARKER, M.S.

*Director of the Rochester Municipal Museum*

It is through our sense of feeling, chiefly, that we realize our dependence. We *feel* hungry, cold, warm, thirsty, tired, fearful and ill. The man who feels hungry seeks food, the tired man seeks rest, the fearful man seeks a lucky charm or the good spirits, and the sick man seeks medicine. With primitive peoples there is much confusion about all the unpleasant things that are felt or which may be felt. Thus with them magic, religion and medicine have equal status and are frequently identified. This is not strange, for welfare, safety, power and health are things greatly desired, and magic, religion and medicine are the means by which primitive mankind seeks to attain these ends.

So far as ethnologists have made any inquiry or comparative study the conclusion seems to be that native peoples the world over have a firm conviction that misery of any kind is caused by evil spirits. With the primitive races, sickness, failure, misery and death are caused by seen or unseen demons. The idea of wellbeing as affected by spirits is, therefore, the point of convergence of all medical folk-lore.

In making a diagnosis the medicine man or shaman based it upon the folk-beliefs of the group, supplemented by his own subjective determinations. Medicine was simply the magic necessary to secure certain results; first, to bring back to the patient the departed spirits of health; second, to propitiate it for neglect; third, to drive out and placate the evil spirit that had come to cause the trouble. Indeed, there are those who might say that this is but a symbolic forecast of what modern physicians endeavour to do.

To the native, medicine, whether substance or magic, was merely formula. The illness existed, there could be no question. It remained for the medicine man to discover the formula necessary to overcome it. Whether a dose of herbs, a dried heart of a toad, an uncouth dance, the waving or laying on of hands, the singing of a scared song or an appeal by prayer to some spirit, did not matter; it was the formula that counted for success.

With many of the Indian tribes of America disembodied spirits of human beings, of animals or of plants were supposed to cause disease. The spirit entered through one of the openings of the body and crept to the point where the pain was afterward felt. Indeed, the pain was supposed to be the result of being literally eaten by the spirit. The Iroquois Indian, when ill, went to his favourite shaman to find out what was *biting* him.

Wizards and sorcerers were believed to be capable of sending evil spirits into the body and were therefore greatly feared. To overcome these there was a special class of shamans known as witch doctors. One of the best witch doctors of whom I ever heard was a graduate physician and a white man, who knew that it was of little use to argue with his patients. "I will drive out the witch poison," he would say. "I'll fix you up in a jiffy." Then with his own brand of mysterious passes, his own mumbling and waving of hands he would prepare the patient to take his bitter nostrums. In most cases, as the Indians testified, he effected a recovery, which goes to show that a real physician must reckon with the patient's beliefs and not run counter to them.

Aside from his shamanism the medical knowledge of the American Indians was not entirely contemptible. Long experience in the forest taught the native American the uses and efficacy of numerous curative herbs. It was the tea made from hemlock needles that cured Cartier's crew of scurvy. It was prepared in so mysterious a manner, no doubt, that Cartier did not know what it was, and later he laments that he did not have it. He left, as a clue, however, the Iroquois word *onetda*, which enables the linguist to make a translation and establish its identity. Hemlock tea was the common table tea of the Iroquois people, especially in winter when the diet was largely restricted to dried foods.

The scarcity of competent physicians in colonial times compelled the settlers to resort to Indian remedies, and frequently amazing cures were effected. At any rate, if the Indian's nostrum cured, well and good; if not, "it was the Lord's will."

This alternation of success and failure led to much diversity of opinion among early writers. Zeisberger said that all Indian doctors were charlatans, but he admitted that they were good at treating wounds. The wound, if external, was a thing that could be seen and the treatment had to yield quick results or be discarded. Heckewelder distinguishes between what he calls good and bad doctors among the tribes, and testified that the good doctor cured his felon. "I once for two days," writes the missionary, "suffered the most excruciating pain from a felon or whitlow on one of my fingers, which deprived me entirely of sleep. I had recourse to an Indian woman who in less than half an hour relieved me entirely by the simple application of a poultice made of the root of the common blue violet."

Heckewelder had such faith in Indian medicine of the "good sort" that he wrote:

"Indeed, it is in the cure of external wounds that they particularly excel. Not only their professional men and women, but every warrior is more or less acquainted with the healing properties of roots and plants, which is, in a manner, indispensable to them, as they are so often in danger of being wounded in their engagements with the enemy. Hence this branch of knowledge is carried to a great degree of perfection among them. I firmly believe that there is no wound, unless it be absolutely mortal, or beyond the skill of our own good practitioners, which an Indian surgeon (I mean the best of them) will not succeed in healing."\*

So thoroughly impressed were the colonists with the virtue of Indian remedies that Benjamin Rush made a study of the herbs used by Indian doctors. Some of his observations are included in his address before the American Philosophical Association on February 4th, 1774. Rush was perhaps the first physician to attempt a real study in Indian health, diseases, and medicine.

It is certain that many remedies once common among the Indians were passed on to the settlers and found to be potent. Among these we may mention golden seal (*hydrastis*), podophyllum, boneset (*Eupatorium perfoliatum*, L.), cherry bark (*Prunus Pennsylvanica*), senega root (*Polygala Senega*), lobelia (*Lobelia inflata*), prickly ash (*Zanthoxylum Americanum*), cohosh (*Cimicifuga racemosa*, L.), wild ginger (*Asarum Canadensis*), stone root (*Collinsonia Canadensis*).

---

\*Heckewelder, Indian Nations, p. 229 (Mem. Hist. Soc. Penn., XII).

## MATERIA MEDICA

A personal experience with the herb doctors of the Seneca Indians and the Abenaki of Canada led to a compilation of the following list of medicines:

*Tonics:* Smartweed, boneset, hepatica, arbutus, wild apple root, yellow dock, prickly ash, ginseng, golden seal.

*Diuretics:* Pipsissewa, milkweed, blue beech, hickory, tag alder, late elder, stone root.

*Astringent:* Pussywillow root, blackberry, strawberry root, oak bark, goldthread.

*Laxative:* May apple, wahoo, sassafras leaves, dock, maple sap.

*Carminative:* Sassafras, spice bush, spikenard, calamus, wintergreen, birch, wild ginger.

*Sedative:* Iris, poplar bark, witch hazel.

*Febrifuge:* Hardhack, goldenrod, chamomile, hemlock.

*Emetics:* Tobacco, lobelia, burnt pelts with hair, skunk oil.

*Vermifuge:* Wood ashes, squash seeds.

*Expectorant:* Wild cherry bark, slippery elm.

The gathering of medical plants is more or less a magical process. Plants whose roots are used are gathered in the autumn, among the Iroquois and other eastern Indians. When the plant has seeds these are either scattered over the ground or placed in the cavity from which the root was pulled or dug. For each class of plants or each different locality from which they were gathered a sacrifice of tobacco incense is made and often several beads or other valuable trinkets are offered. This is accompanied by a prayer of thanks, together with an invocation that the medicine may be potent.

Once gathered, the roots, leaves, flowers and bark, as the case may be, are dried on splint baskets or in bundles suspended from a lodge pole. Herbs are left tied in bunches exposed to the air, generally speaking. Medicines, when pulverized, are wrapped in rawhide folders or placed in dried bladders. Care is exercised to keep the medicine away from the influence of evil spirits, unclean persons, menstruating women, and from animals. I have frequently seen medicine bundles wrapped in coloured cloths and decorated with ribbons, as an indication of respect.

While a medicine may be more or less rational, its prescription is often arbitrary. Often a good medicine is given but once, a cure being expected. At other times, when it is well known that a continued treatment is necessary, the dose is doubled or quadrupled in the hope of speeding up the recovery. This frequently results in poisoning and sometimes death.

Treatments which I have recorded I will take promiscuously from my notes:

*Childbirth:* Use sanguinaria. Wash uterus with water with a slight amount of lye (wood ashes). To contract womb, use a decoction of maple leaves, a mild astringent.

*Croup:* Cause child to breath vapour from crushed peppermint. Use skunk oil, twenty drops at a time, internally.

*Whooping cough:* Chestnut leaf tea, ragweed tea, chamomile tea.

*Coryza*: Mint treatment, drink sassafras tea, use cathartic, use smartweed tea with salt in copious quantities.

*Tuberculosis*: Use rattlesnake fat as a food, make a tonic of plantain, laceweed, wild apple root, strawberry runners.

*Dysentery*: Use blackberry root astringent. Give plenty of slippery elm solution.

*Coughs*: Use wild cherry bark, use lobelia, wild ginger.

*Cancer*: Treat with a salve made by boiling sheep sorel (oxalis) in bear grease.

*Dyspepsia*: Use wood ashes, spikenard, sassafras, charcoal, sand, clay.

*Malaria*: Boneset and wild apple root. Arbutus flowers and leaves.

*Septic throat*: Use pussy willow root gargle.

*Nervousness*: Rattlesnake plantain, may apple cathartic, spikenard.

*Hair tonic*: Sap of wild grape in springtime, bear oil, always washing out the oil before another application with warm water and white wood ashes.

*Bruises*: Apply juice of the snap dragon, application of swamp mud, witch hazel wash, iris wash.

*Dropsy*: Give a treatment of milkweed juice alternated with plantain leaf decoction. Give pipsissewa tea, water beech bark.

*Body deodorant*: Tea of sweet fern.

From these prescriptions it will be seen that our own pioneer fathers either followed the identical remedies of the Indians or learned of them from native herbalists.

It is not an easy matter to get the real remedies of the Indians, for their herb doctors are cautious about imparting much information, carefully keeping secret their remedies and giving the formulæ only when death or retirement from practise is imminent.

I once asked an old medicine woman what means the Indian women used for birth control and was assured that they had a remedy called "cuts-it-off." The theory was that every woman had an allotted number of children who should be born to her, and that the eggs of these were fastened like tubercules on a running root. The "cuts-it-off-root" would nip the root at the base and prevent the birth of further children. In substantiation I found a note to this effect in a book used by Dr. Asher Wright, an early physician and missionary who lived with the Seneca Indians. In response to my inquiry as to what this root was the medicine woman took me to a meadow and pointed out a plant which looked like the tall meadow rue. I secured the plant, but when I asked her directly if this was the medicine she refused to say a word. The use of the root of the cotton plant seems recent as an abortive, but it may have been known in earlier times from contact with the southern Indians. A common medicine of this sort with some of the Iroquois was the dung of the deer mixed with an herb, presumably a strong cathartic.

It is a common belief that certain Indian tribes knew of an antidote for rattlesnake venom. There is much evidence to indicate this, but it was one of the deepest secrets of the red practitioner. An old Indian who exhibited rattlesnakes at the county fairs in the late '70's and early '80's is said to have been bitten repeatedly and to have used a fibrous root which he chewed and

took internally and also applied to the wound, which he opened and allowed to bleed profusely. He did not use a tourniquet. The Pueblo Indians who hold snake dances are sometimes bitten and are said to use *Aplopapus spinulosus*.

In general, it may be said that the pharmaceutical plants employed by the eastern, and perhaps many other Indians, fall into three classes: First, those with rapid results, such as peppermint, alum, salt, lobelia, mandrake and smartweed; second, those that suggested a cure by appearances, this being the old doctrine of signatures. A rattlesnake plantain seemed to be a nerve remedy because of its branching veins, and bloodroot for bleeding because of the red juice that it oozed; third, mere charms that had no particular therapeutic value, such as powdered rock, lichens, dried worms, etc.

The eastern Indians, at least, knew of the value of certain mineral waters, as those at Saratoga, and recommended them to the whites. It was Sir William Johnson's experience at the old Congress spring, perhaps, that popularized the water as a cure for rheumatism and gout. The Iroquois drank from springs that yielded salt, iron and sulphur, and esteemed them as medicines.

One of the most common Indian treatments was that of sweating. They used purges and emetics in abundance, always resorting to them in case of illness. The sweat, however, was thought to be the great remedy for all ills, and the sweat-lodge, therefore, was a tribal institution. After the sweat came a massage with bear oil, then a bath in cold water and a few hours sleep, rolled up in several warm pelts. Historical records are replete with descriptions of sweat-baths and instances of fatal results from over-indulgence. It will be seen, however, that most Indians well understood the virtue of free elimination.

But the herb doctor had his riva's, even organized rivals, that held him a heretic that interfered with the dictates of the spirit world. Most Indian tribes had several medicine societies. These assumed to preserve the formulæ, the rituals, the methods of treating diseases caused by certain spirits. The Bear Society of the Iroquois, for example, assumed to have the power that could control fevers. The shaman of the Bears would determine by incantation just what animal spirit caused the illness, and then overcome its machinations by ordering a Bear ceremony in which certain songs would be sung and a certain ritual performed. The patient paid by providing the feast and the gifts.

Other shamans ordered the patient to underwrite a great game, such as lacrosse or hockey. As excitement ran high, the patient was believed to be benefited. Still others believed that the guardian spirits of certain fraternities must be invoked, and to this end ordered the patient to witness a full ceremonial, the feast of which he paid for. One of the most powerful societies of this kind was the Iroquois False Face Company. Each member wore a grotesque mask which was believed to be possessed by a certain spirit or geni. This geni drove out disease by absorption. The mask was then scraped to throw off the poison.

So powerful was the false face that any scoffer who made fun of it was apt to be stricken with paralysis of the face. The Indians cite instances where this occurred, and where relief was afforded when the victim propitiated the mask and gave a feast. Christian Indians in their zeal have been known to repudiate the False Face Company only to suffer ill luck and accident. When they returned to the ways of their fathers, and again put their minds and hearts in rhythm to the chugging of the medicine rattles and the seductive chants, they are said to have recovered.

And I wish to say that any man who has known the lure of the medicine lodges in their more pleasant aspects and has witnessed their strange perform-

ances has something creep into his bones that is hard to eradicate. Educated and Christianized though he may be, when the mysterious songs of the shamans are chanted and the water drum sounds its hypnotic notes, his heart seems to stop beating, there is a stifled feeling, and then the sense of having the pulse start throbbing anew to the time of the medicine drum, with its DUM, dum, DUM, dum, DUM, dum, DUM, dum. It is then that the geni in the marrow seems most happy, and the deculturated redskin feels himself once again aboriginal. The student of mental therapeutics can readily analyze this and see how suggestion may work its desired end. It is thought that Indians make good subjects for hypnosis and that they readily succumb to the suggestions of the shaman when in this condition.

In the Ghost Dance the shaman induces the hypnotic condition by an exhausting dance accompanied by excitement and a steady flow of suggestion. When he is ready to bring about immobility he fixes his eyes on his patient, points his fingers at him and then flashes a small mirror, at the same time commanding the patient to enter the dream-world of his fathers. With a wave of an eagle's wing the patient becomes rigid and is laid on the ground in an apparently comatose condition.

In modern times this condition is induced by means of a drug, commonly known in the southwest as peyote, a narcotic cactus, containing *anhalonium*. Certain tribes of the Mississippi valley use it to-day and there is much discussion as to whether the government has the right to interfere. To prevent any prohibition, the Indians organized a Christian church and used the drug as a sacrament. I wish that I had time to describe its effects from personal experience. In passing, however, it may be said that it retards respiration, causes heart irregularity that brings about a choking feeling, and then induces the hallucination of revolving rainbows that finally pass and lead the drug-taker into a strange world of exaggerated dreams. From this comes a feeling of personal humility and a conviction of great sinfulness, leading the patient to cry out his infamy and desire to become forgiven. Out of this state grows a feeling of great personal importance and power, and then again the dreams.

The peyote cult ten years ago was rich and powerful. It has snuffed out many of the earlier native religions and the drug itself had been used as a cure-all. Just what its status is now, I am not able to state. Some westerners call peyote "dry whiskey," but the Indians themselves say it cures alcoholism.

Among certain tribes the native mental-suggestion physician occupies a peculiar status. Some regard him as a clairvoyant. One told me that he could scold away a sickness, providing it was of the kind he treated. "What do you say?" I asked.

"This is what I say to the spirit that is in the bones of my patient," said Cornplanter, my informant:

"You have no right to trouble me,  
Depart, I am becoming stronger;  
Thou art now departing from me,  
Thou who wouldst devour me;  
I am becoming stronger, stronger.  
Mighty medicine is now within me,  
You cannot now subdue me—  
I am becoming stronger,  
I am stronger, stronger, stronger."

If this pagan prayer had been broadcasted a few years ago it might have saved Monsieur Coué a long ocean voyage. But then, we of the paler race, have our own ghostly afflictions and need our own transcendent shamans to treat them.

#### MEDICAL OBSERVATIONS ON INDIAN SKELETONS

An examination of the skeletons of the American Indian, so far as these have fallen under my observation, show traces of a number of diseases, chiefly rheumatic in character. Arthritis occurred. I have seen spines almost completely anklyosed, and femora with exostosis. One specimen of a tibia seems to indicate an acute case of periostitis, caused no doubt, however, by crushing or deep bruising. Arthritis seems mostly of the senile type.

So far as I have been able to determine none of the skeletons which I have examined from purely pre-contact sites shows any indications of syphilis. Some from post-contact sites give evidence that may indicate the malady. It is possible that certain malformed bones, particularly those of the joints, and especially those of the femur, show tubercular conditions. From our knowledge of the early Indians, we are warranted, I think, in stating that they were afflicted with both tuberculosis and rheumatism, with all its ramifications and complications. This lends some weight to an interpretation of bones showing pathological conditions.

Some skulls recently recovered show traces of what we believe to be pus ducts, and one or two seem to indicate cancer.

In certain localities the dentition of the skulls is almost perfect, the teeth being without cavities, though worn short by the mastication of gritty food. Skulls of this type were found at Vine Valley on Canandaigua Lake, N.Y., and some on the Markham site near Avon, N.Y. In our Lamoka station,\* however, nearly every skull revealed dental caries. Indeed, the teeth were in a shocking condition, and showed traces even in the mandible of pus ducts.

Of the two divergent peoples that occupied Lamoka, the brachycephalic, heavy-skulled invaders who came last had the worst teeth. Their dolichocephalic predecessors with thin skulls had a better dentition. The round heads in almost every instance had supernumerary teeth, and were prognathous. They seem to have come from the south, perhaps from the lower Chesapeake, judging from the implements with them. The period, of course, is remote, perhaps more than 2,000 years.

The subject of osseous lesions leads us at once to the question of traces of syphilis. What are the evidences of its presence in America before the Columbian discovery? It is stated in certain quarters that the malady originated in America and hence its proposed name, *Moribus Americanus*. Humboldt seems to have first considered this, suggesting that the Carib women developed it by masturbating with nettles. At any rate it seems to have spread with amazing rapidity about the time that Columbus' sailors returned to Europe. Certain skeletons from the Ohio mound area are said by some archaeologists to show syphilitic lesions, but others say that the conclusion is by no means correct. Some Peruvian skulls and other bones are said to have surer indications. The whole question needs further enlightenment and an examination of more European skeletons prior to the late fifteenth century.

---

\*Rochester Municipal Museum Expedition at Tyrone (Lamoka Lake), N.Y.

America at the time of the Columbian discovery had few or no fatal epidemics. Scarlet fever, measles, smallpox, typhus, cholera and the like were unknown. The race was comparatively healthy. With the advent of the European, however, the natives fell an easy prey to every germ-born disease that the colonist and explorer brought. Bacteria that the European normally resisted, but which he carried with him on his skin or in his secretions, played havoc with the tribes visited. The visit of a priest or a trapper often caused great decimation. The Pilgrim fathers, for example, found much of the New England coast without population and scores of unburied bodies lying in the woods. An Englishman had been there some time before. Samoset knew this and how he ever lived to say "Welcome Englishmen" to the good fathers, some expert on antibodies will have to tell us.

The experiences of Captain Cook in the Pacific gave the same results. His sailors would camp on the shore for a few hours, and within three weeks the islands would be visited with a holocaust. This is the story of many western tribes, and it is quite possible that the easy conquest of Mexico and Peru, and the ruin of civilizations of unique form, was due to the spread of epidemics that caused widespread illness and enervation. The white man was immune; the native was a rich culture bed for the germ and it found no resistance to its hunger.

Since those early days, and the coming of civilized blessings, the naturally healthy red man has become the victim of all the diseases to which human flesh is supposed to be heir. The native was a rich heir. Tuberculosis, syphilis, gonorrhoea, smallpox, scarlet fever, measles, and, lately, trachoma, play havoc with him. Denied the old custom of rearing the strong and letting the weak and malformed die, the race has undergone a change for the worse so far as stamina is concerned. Reservations herd the red man in unnatural conditions. Taught that the old wigwam was the habitat of a savage, he was lured into a tight log hut or board shack with sealed windows. Tuberculosis had afflicted nearly the whole race before physicians supplemented the civiliziers and said that the old airy cabin was best. Meanwhile, rachitis, venereal diseases, trachoma and insanity had become common ailments. Bacteria and undernourishment brought the wild Indian to his knees when bullets could not do it. He is indeed now, "Lo, the poor Indian." In the United States the present medical service with underpaid physicians can scarcely cope with the situation, though it is much better than it was ten years ago.

#### PRESENT STATUS OF INDIAN MEDICINE

Among certain classes of our population there will always be the lure of Indian remedies. Whether justified or not, there will long remain a belief that the Indians knew of marvellous cures which they handed down through long lines of medicine men, occasionally to leak out and find their way to the knowledge of white men. As every physician knows, however, where the use of one simple herb proves really useful, there are scores that were the mere guesses of charlatans who pretend to have the deep secret of the Indian wise men, and who foist their cure-alls upon a credulous public as Pawnee powders or Sioux soothing syrup and similar nostrums.

Seneca oil, which was nothing but petroleum, was used for many ills both internal and external and had a ready market for many years, but this same product was gathered in bark or clay dishes by persons who knew nothing of sanitation, and strained with an old blanket. To-day we prefer Russian oil

or some other similar brand of this same product. We use the quinine of the South American Inca and extract cocaine from the leaves which the coca chewers once esteemed. Far from being deep secrets, most of the valuable Indian medicines, but perhaps not all, are well known to modern materia medica. A few may have escaped, like the remedy for blood poison recently used by a western New York empiric, but in general we not only know but have advanced far beyond. This is certainly true for the purity of the extract and the accuracy of dosage.

In his day, however, the native herbalist or the Indian doctor was probably as well adapted to his profession as most European physicians of two centuries ago. The Indian may have used dried toad skins and powdered rock, assumed to be thunderbolts, but he never trafficked in dried mummy meat as the nostrum par excellence or pulverized rubies as a blood elixir. Medical folk-lore of a century and a half ago will furnish other instances in which European medicine was more dangerous than good, but which was assumed to bring about marvellous cures.

And, as for modern medicine, more accurate diagnosis due to chemistry, surgery, a knowledge of the ductless glands, and of bacteria and serums and antibodies, blood types and agglutinins and of the x-ray, has wrought a great change, a change in no wise due to any factor but modern science.

It is interesting to note, in conclusion, that many Indian men and women of modern times have taken to medicine and surgery as a profession. They enter our medical schools and make progress with the rest of us. When last I compiled figures relative to the occupations of the United States Indians, I found that there were ninety-seven graduate physicians and surgeons among them. That is to say ninety-seven were enumerated out of 265,873 persons, a larger proportion than any other part of our population, perhaps. Among these was Dr. Henry B. Faville, president of the Cook County Medical Association; Dr. Charles A. Eastman, the well-known writer, Dr. Carlos Montezuma, the Apache, a stomach specialist and surgeon, and many others including several women. To-day the number is even greater, which indicates that the medicine man of old has laid aside his rattle and his pouch of herbs and sent forth his son and daughter to the profession, which more than any other requires a knowledge of the nature of mind and body.

As for his inheritance, however, the old-time red man has left us his preventive medicine—pure air, sunshine, water from the healing springs, the virtues of bathing and of a skin much exposed to the air and sun, and a life in harmony with nature. Perhaps, too, he has left us a noble example of a calm, sure reliance that the Great Spirit knows what is best for man, and has placed that best in the keeping of wise men for the prevention and the relief of suffering.

## INDIAN CONTRIBUTIONS TO MODERN CIVILIZATION

By WM. B. NEWELL,

*Ta-io-wah-ron-hah-gai—Caughnawaga-Mohawk*

It may sound strange to one who is not familiar with the early tradition and history of the American Indian to hear the statement made that the American people are gradually becoming more and more like the Indian of the first half of the seventeenth century. But if one will but read the early writers of that period one cannot but admit that the statement has a great deal of truth in it and that many of the modern ideas, which we call modern, were once peculiar to the early American Indian.

The Indian had a civilization which was new to the European races and hence was little understood by those who first came in contact with him. It will be noticed that in most instances where the American people have developed a system similar to that of the Indian, they are either in a process of developing that system or have not yet been able to develop it to the same extent the Indian had done.

Contrary to popular belief the Indian was not a wild uncivilized race living a wild unorganized animal existence without social or political codes. In fact, we have come to learn that the Iroquois excelled in their political and social life.

In dealing with this subject the writer will use that great group of Indians whose power was felt not only by the early European powers who first came to this continent but by every tribe living east of the Mississippi River—the Five Nations, or as designated by the early Jesuit missionaries the Iroquois, in demonstrating how modern civilization has been influenced by the Indian.

It must be also remembered that the Indian of whom we speak is not the Indian of to-day but of that period when white men first came in contact with the red race. The Indian of to-day has long since lost most of those virtues which he possessed before contact with European civilization. His political and social life has been entirely upset and his code of morals, with few exceptions, has been replaced by the white man's moral and ethical code. That school that holds that the policy of "civilizing" the Indians is wrong because it introduces the white man's vices and diseases and leads to extermination is bunk, for white man's diseases were introduced by the white man when the first white men came to this continent, and his vices, such as lying, cheating and deceiving, were introduced with the first treaty and practically every treaty ever made between the Indian and the white man. These people point out the difficulties of adjusting a primitive people to a "highly complex modern civilization." The trouble is that these people do not seem to realize that the Indian looks upon ninety-nine out of a hundred white men as liars and deceivers. The average Indian takes everything the white man offers him with a grain of salt—his religion, his education, and his modern institutions. This accounts for the apparent lack of appreciation for the many things the social worker and missionary does for the reservation Indian. The truth of the matter is the Indian thinks he understands the white man better than the white man understands the Indian and neither are right. The white man does not give the Indian any credit for knowing anything and the Indian knows this and allows the white man to wander

on and on with his ideas. It is safe to say that the Indian has a better understanding of most of the white men with whom he deals than the white man has of the Indian.

The other school is for breaking up the reservations and making white men out of the Indian. This school resorts to any means to "civilize" the Indian, even resorting to methods which have been outlawed by modern civilized countries.

While the Indian is combating these two forces he is at a standstill and his estimation of the white man and white man's civilization grows lower and lower; he sees no good in either.

Meanwhile the white man overlooks the fact that many of our modern customs which have been attributed to other nations and races were in vogue among the Indians of Eastern United States and Canada when the white man first met him; that his moral and ethical code was far superior to the white man's.

It must be admitted that the original Indian ideas have been expanded and enlarged, but this is to be expected with the many modern facilities which make it easy to do this.

Dr. Camille Von Klenze, who now resides in Munich, Germany, read a paper at Columbia University in the year 1914 in which he clearly traced the origin of the first ideal democracy to the Indian, that the idea was brought to Europe by the Spaniards and circulated throughout Europe and later brought back to America and used by the founders of the American Government.

The Iroquois Confederacy or League of Nations was the first democracy of the modern age. From its principles of equality, liberty, and fraternity has developed our great republics. The tradition of the first effective All-American League of Nations is sinking before the rising tide of civilization and is being lost sight of by the vast majority of people. The Iroquois Confederacy was a genuine league to enforce peace, but by force of circumstances developed into the most effective fighting body on the North American continent. All the Indian nations that did not participate in the confederacy were naturally followed until subdued. The Iroquois, moreover, started and enforced the original Americanization scheme. Every nation that resisted its power was segregated and led to new homes and taught how to behave. On the other hand, all nations that consented to join the confederacy or who were adopted into the confederacy were given equal voting powers with them in all transactions of the government. The date of the origin of this League of Nations is unknown, but our most reliable historians place it about the year 1,500, so we know that it survived 300 years of effective activity. The sole reason for this long period of effective co-operation is due entirely to the fact that the various representatives always met with clean open minds. Greed for power and possessions, jealousy, envy, lying, deceit, race hatred and secret alliances were totally absent from their minds. Their's was a league for peace and all these things that caused war were absent from their councils.

Unanimous consent of the representatives of each nation was necessary for the adoption of any proposition brought before the league. One opposing vote meant the defeat of any piece of legislation and when this happened the matter was settled and nothing further was ever said about it. Unlike the representatives of our governments, no bitterness was felt, no harsh words were exchanged, no fist fighting was ever entered into between the nations' representatives, and each man was heard through his argument without inter-

ruption and was never asked "to yield" during the course of his speech. No better description of their assemblies has been given than that by Governor De Witt Clinton in his discourse on the Iroquois when he said: "All their proceedings were conducted with great deliberation, and were distinguished for order, decorum, and solemnity. In eloquence, in dignity, and in all the characteristics of profound policy, they surpassed an assembly of feudal barons, and were perhaps not far inferior to the great Amphycyonic Council of Greece."

The true principle of democracy existed in the minds of these people. To them all men were born equal and were treated as equals. They knew no king or lord, and their highest chief was no better than the poorest member of the tribe. Leaders were given their position on merit alone and they were not rewarded by large salaries or rich donations. Governor Cadwallader Colden, in his "History of the Five Nations," written in 1727, says, "Their great men, both Sachems and Captains, are generally poorer than the common people; for they affect to give away and distribute all the presents or plunder they get in their treaties or in their wars, so as to leave nothing to themselves." He further states, "There is not the least salary or any sort of profit, annexed to any office, to tempt the covetous or sordid; but on the contrary every unworthy action is unavoidably attended with the forfeiture of their commission; for their authority is only the esteem of the people, and ceases the moment that esteem is lost." Here we see the natural source of all power and authority among a free people. "The Five Nations have such absolute notions of liberty, that they allow of no kind of superiority of one over another and banish all servitude from their territories."

That the individual members of the confederacy loved and respected the league and its leaders is illustrated in the journals of Zeisberger, who was commissioned to present a petition before the Grand Council at Onondaga, the seat of the league, in 1750. He had to pass through the villages of several different nations on his journey and he states that every Indian he met looked upon him and his party with suspicion and distrust, but as soon as he made known to them the fact that he was on his way to Onondaga on official business their attitude immediately changed and they showered him with gifts and offers of genuine hospitality. "Onondaga is a greater place in their eyes than is commonly supposed," he states, and, "It is a certain thing that great men enjoy more respect and authority among the Indians than is commonly supposed. They look upon an acquaintance with them as a great honour."

Strange as it may seem the present League of Nations is faced with the same problem that the founders of the league of old were. If we are to believe the tradition handed down to us by the Indians the league was first proposed by a member of the Onondaga Nation but was rejected by the leaders of that nation. The peace plan was then taken to the country of the Mohawks where in time it was accepted and in turn was accepted by the other nations. Still the Onondagas, who were ruled by a militaristic individual known as Atotarho, refused to have any part in the league. It was not until the four united nations had solemnly pledged themselves to stand by their new pact, and a delegation headed by Hiawatha had paid a visit to the Onondaga Government that the Onondagas decided to join them. To make it a real peace pact the head of the Onondaga Nation was made the leader of the newly formed League of Nations. History is repeating itself in that Woodrow Wilson, an American, gave the world a peace plan which his own people would not sanction. He took his plan to other parts and fifty nations have adopted it. Will the Americans in time adopt it like the Onondagas did of old? In order that it will be enduring

and lasting will it be necessary for its members to have the same thought and spirit regarding it as the Indians did of their league? Will their minds be open, free from the thoughts of greed for power and possessions, free from jealousy, envy, and race hatred? Will all their councils be free from lying, deceit, and secret alliances?

A great German scientist recently stated that America was becoming a matriarchate and that this condition was largely influenced by the American Indian. The Indian woman had an important place, and the council of the women had the power of nominating all the civil chiefs. Women being mothers were regarded as more valuable than men and their ransom price. The high regard for women has never lost its place in the minds of Indian men. Where chiefs still rule on Indian reservations among the Six Nations it is the mothers of the clans that elect the new chiefs. This high regard for womanhood explains why no woman, either white or red, is ever molested in any way by Indian men. It is a well-known fact that the sanctity of womanhood was never desecrated in times past and even to-day such a thing is unheard of. In all the Indian wars between the Indians and the whites there is no record of female captives ever being mistreated by their captors. Women who teach on Indian reservations to-day have often stated that they never have any fear when in the presence of Indian men and in fact have a feeling of safety. We see here where the equality of woman was first recognized and that Indian women were first to enjoy equal rights with man.

That Indian men thought a great deal of their women and would fight for them is clearly shown in Pierre Biard's "Relation of 1616." He states that, "once when a certain madcap took some liberties they (the Indian men) came and told their captain that he should look out for his men, informing him that any one who attempted to do that again would not stand much of a chance, that they would kill him on the spot."

La Hontan tells us that the Indian wife was "master" of the home and if the husband did not toe the mark when he was at home he was often thrown out of doors until he did.

"To be engaged for one's lifetime to another without any hopes of being able to untie or break the knot was a source of wonder to the Indian. They say that we Europeans are born in slavery and deserve no other condition than that of servitude." He further states, "though they are at liberty to change, yet many of them live together a lifetime. They are altogether strangers to that blind fury which we call love. They content themselves with a tender friendship, that is not liable to all the extravagancies that the passion of love raises in such breasts that harbour it; in a word they live with such tranquility that one may call their love simple goodwill, and their discretion upon that head is unimaginable. Their friendship is firm, but free from transport, for they are very careful in preserving the liberty and freedom of their heart, which they look upon as the most valuable treasure on earth." In other words they were not passionate and had complete control over their emotions and will power. Divorce was practised very frequently and still is among the "Long House People" of New York State. But the American to-day is out-doing the Indian in this respect.

The Indian woman was not a slave to the Indian man but on the contrary was free, equal and independent. To-day the white woman enjoys that same freedom, and is equal in political and social life. Divorce has increased in leaps and bounds because of this independence. Woman is no longer the slave to

man that she was a hundred years ago. She knows that she is independent and she asserts herself more and more as she feels this new power. But we are told that present-day divorce is an evil because of the position the children are placed in. What did the Indian woman do in this predicament? How did the children suffer through Indian divorce? Due to two strong Indian characteristics the children did not suffer. Indian hospitality and Indian parental love took care of the situation. No race had as keen a sense of hospitality as the Indian did. Whether you were a stranger or a friend you were always welcome to their bed and board, and even to-day to refuse to eat upon the invitation of an Indian is almost certain to give offence. To come to an Indian in distress meant immediate relief, for they would deprive themselves to relieve the one who sought help of them. There was no need for orphan asylums or old people's homes. There was always a place in some Indian home for the orphan or old person.

Love, honour and respect was always shown the parents by the children. An Indian child would never think of contradicting his parents and he did not do this because of any fear that he might have of the consequences, but because of the love and reverence he held for his parents. It is a well-known fact that Indian parents never used the rod on their children and even to-day Indian children are seldom whipped. This love lasted through a lifetime and the older a person got to be the more respect and attention he was shown by the young. And when a young wife separated from her husband through divorce she always had a home waiting for her with her parents.

While on the question of beating children I recall a situation where the Indians of an entire community refused to allow their children to attend a district school because the teacher had struck an Indian pupil with a ruler. Is it not true that a modern civilization is having more patience with its young and that love rather than the rod is the method being used by the more civilized parents? We even have societies for the prevention of cruelty to children. The Indian was in no need of such an institution.

Faithfulness of the marriage vows is something that the Indian excelled in. La Hontan says, "A young woman, say they, is master over herself and by her natural right of liberty is free to do as she pleases, but on the other hand the married woman, being allowed the privilege of quitting their husbands when they please, had as good be dead as be guilty of adultery. In like manner, the husbands, being entitled to the same privilege, would look upon themselves as infamous if they were faithless to their wives, and during the whole course of their married lives they maintain an inviolable fidelity to one another."

Young white people to-day enjoy a freedom of choice in love that was unknown in past generations. La Hontan says, "Unlike the Europeans, the girl married the man of her choice and Indian parents never forced their children to marry the man or girl of their choice." Recent reports tell us that France is only beginning to do this and in fact even Turkey is beginning to take some notice of this social practice. This Indian idea is gradually becoming a reality in all civilized countries.

The modern trend to companionate marriage or "Till the death of love do you part" type of marriage was an Indian idea, but there were certain principles of honour connected with this type of marriage, held between the contracting parties, that made it a life-time partnership. Jesuit Relations tell us that a young man would stay in the home of the bride for a period of time up to a year and that during all this time they would not consummate the marriage vow. If at the end of their trial marriage they were certain that they were

perfectly suited one to the other, then and only then would they actually live as man and wife. During this trial marriage they lived a pure, simple, friendly brother-and-sister companionship. How different from our modern trial marriage where the marriage vow is considered so lightly and where birth control would be resorted to.

Birth control has been a very debateable question within recent years in modern civilization and it is interesting to note that the American Indian did practice birth control and, according to our early historians, there were never more than two and three children in the family.

Besides a love of liberty and freedom and recognition of women's rights the Indian has contributed a great many ideas which make for happiness, health and peace. Only a few of the numerous contributions that might be mentioned besides the league of nations, democracy and woman suffrage are a love of Nature and the great outdoors, forest preservation and game preservation, fresh air and scanty clothing, bathing in winter and the Turkish bath, prohibition, woodcraft, highway systems, modern hotel system, and apartment houses. And then they have given us over sixty fruits and vegetables, including potatoes, beans, squash, pumpkins, and the greatest of all, corn. Of course, tobacco could never be gotten along without now. Indian scouting duty was employed almost entirely in the Gallipoli campaign by the British, and Pershing's Scouts, an Indian regiment, introduced camouflage during the recent war.

Nowadays fresh air and the great outdoors is the order of the day and annually we see all America hiking to the forests, streams and lakes to breathe the wonderful breath of Nature. We all become Indians. It was not so many years ago that it was considered dangerous and courting pneumonia to sleep with an open window.

We are all becoming lovers of Nature and Nature's lore. Still there are some people who as yet have not become "civilized" and think that the flowers and fruits and trees along the highways are to be plucked and trampled upon. To cut or destroy Nature's beauty was, in the eyes of an Indian, a crime. To fell the tree was a stab in the heart of the Indian. We are beginning to look at these things like the Indian and nowadays millions are spent annually on forest preservation.

Clothing, or the lack of clothing, worn by the Indian was another matter that the European marvelled at. How could the Indian stand the severe cold winter weather without being bundled up from head to foot in clothing. Nowadays we wonder how some of our modern young women can do it in three ounces of clothing. Young high school and college students go hatless and coatless on the coldest days. The Indians wore no hats, very little clothing, and were always rugged and healthy. They slept in houses that had plenty of fresh air, which unfortunately is not true to-day.

Regular baths were not in vogue among the white people in America, and we are informed that the first bathtub was introduced in 1842 when the city of Cincinnati, Ohio, startled the country by putting the first bathtub into use in that year. Physicians criticized it. Newspapers printed editorials for and against it. Medical men said the shock of taking regular baths would be dangerous. Virginia legislators tried to stop the devilish idea by sticking a \$30 tax on each bathtub. Boston prohibited baths except upon medical advice. Down in Philadelphia there were a sufficient number of radicals to defeat by two votes an ordinance that would have made baths illegal between November and March.

How the Indian must have laughed at these people back in the days when every Indian village had its public baths which were used the year round. Webster's dictionary states that the Turkish bath originated in the East, but we know that this type of bath was an Indian idea and all Indian villages had their sweat ovens or "Turkish baths" where once or twice a week every member of the tribe would perspire and by doing so clean the impurities out of their systems. La Hontan says that every Indian, on coming from the baths, would throw himself into the river, no matter how cold the water was, and thereby close up the pores of the body, and if the river happened to be frozen over they would throw themselves in the snow.

Nowadays our best society clubs are having winter bathing parties. Swimming pools are being cut in our lakes and rivers and on the coldest day, in fact the colder the better, they enjoy a cold plunge.

Prohibition was not necessary to the Indian because he never indulged in the drinking of liquors or beverages that brought on a sense of intoxication. That the Indian was farsighted enough to see the evils of the white man's "fire water" and that the wise men of the tribe objected to its being brought into their villages, is illustrated in the speech of the great Huron chief, Adario, who says, "As for the maple-water that we drink, 'tis sweet, well tasted, healthy, and friendly to the stomach, whereas your wine and brandy destroy the natural heat, pall the stomach, inflame the blood, intoxicate, and create a thousand disorders. A man in drink loses his reason before he is aware, or at least his reason is so drowned that he is not capable of distinguishing what he ought to do. The father sells his children, husbands expose their wives, wives betray their husbands, friends are false, and all this proceeds from your liquors." This speech, spoken by an American Indian nearly 250 years ago, was probably the first ever given on the subject of prohibition in this country, and by an Indian.

The whole world smokes tobacco. Indians always smoked their pipes in their homes and in all their meetings. They never chewed or snuffed the weed and the women never smoked until they were past fifty years of age. On this point the modern woman has broken down the tradition. Indian girls of this ultra-modern period have not as yet begun to smoke. The reason the Indian woman did not smoke is perhaps due to the fact that she worked hard in the fields, did not keep late hours, and had few worries, and consequently did not develop a case of nerves and was never in need of a nerve stimulant.

The Indian was a great lover of social get-togethers, and Father Pierre Biard, in his Relation of 1616, tells us that the Indians would spend hours together banquetting, smoking and dancing. "All their talks, treaties, welcomes and endearments are made under the fumes of tobacco." He also says, "Certain Frenchmen are so bewitched with it that, to inhale its fumes, they would sell their shirts." Nowadays some people will walk a mile for a cigarette, and if tobacco were taken away from the world, if we are to believe the tobacco advertisements we read on our highways, our great singers, athletes, scientists and nationally known characters would all have to give up their business. We all have to admit that while there is tobacco, old man Gloom does not stand a show. During the late war it has been stated that the majority of soldiers who were shell shocked during the war were men who did not smoke. Evidently tobacco was a deciding factor in the war. I can, in a way, vouch for this desire for tobacco on the part of the troops, as I was one of them and at one time we were without smokes for a whole month. It was nothing for six men to form

a circle and, after a much-sought-for cigarette had been unearthed from some unknown source, would be lighted and passed around from mouth to mouth until it was entirely consumed.

The Indian has shown the world how to wage war and in the recent World War all the artifices of camouflage were taught the warring nations by Pershing's Scouts. Trench warfare and scout duty is a typical Indian method of waging war. The British during the war employed Indian scouting methods in their eastern campaigns against the Turks. The ability of the Indian in this respect has been often demonstrated in past wars. During the American Civil War General Grant's aid and secretary, General Ely S. Parker, was a full-blooded Seneca Indian. In the late war many Indians received the highest honours awarded for deeds of valour. One instance might be mentioned of Private Joseph Oklahombi, a Choctaw of Company D, 14th Infantry, described in Marshall Petain's citation as follows: "Under a violent barrage, dashes to the attack of an enemy position, covering about 210 yards through barbed wire entanglements. He rushed on machine gun position, capturing 171 prisoners. He stormed a strongly held position, containing more than fifty machine guns and a number of trench mortars. Turned the captured guns on the enemy, and held the position for four days in spite of a constant barrage of large projectiles and gas shells."

The Indian responded to the number of 13,000 in the United States alone, a number in ratio to population unsurpassed, if equalled, by any other race or nation. There are about 350,000 Indians in the United States. In Canada, of the 104,894 Indians 4,000 served under British and Canadian colours in France.

At a recent American hotel managers' convention held in an American city one of the speakers brought out the fact that the modern hotel system is founded on the Indians' "Long House." The Indian has been given the credit for having the first apartment house. That the Indians of eastern United States and Canada lived in long frame buildings sectioned off into apartments is a well-known fact, and some of our early historians tell us these houses were sometimes over a hundred feet long and some even 700 feet long have been seen.

That the Indian laid the foundation for the greatest highway system in the world cannot be disputed and that he knew the shortest route between any two given points in eastern America has long since been proven. Practically every highway in the United States and Canada is laid over some old Indian trail.

That the Indian has something to give the world is indicated by the numerous societies, lodges and clubs that are springing up all over the country. It is sufficient to mention the Woodcraft League, Boy Scouts, Girl Scouts, Society of Red Men and others. All these organizations emulate the Indian.

In concluding this brief paper on the Indians' contribution to modern civilization I wish to speak of the Indian's Thanksgiving Day and our own Thanksgiving Day.

After searching through all the Documents of Colonial History I find that the first mention of Thanksgiving Day being officially observed was in 1643 (Holland Documents, Vol. I, p. 188). At that time the people of New England were at war with the Pequots and during this year 700 men, women and children, members of this tribe, had gathered together to observe one of their annual Thanksgiving feasts. While they were in their long house celebrating they were surrounded by some New England soldiers who, arriving unexpectedly,

trapped them all inside the house. As fast as they came out they were shot down and those who remained inside were all burnt alive, for the house was set on fire when it was seen that the Indians would not venture outside. This was the occasion of the first official Thanksgiving Day proclamation in America.

From that first proclamation of a Thanksgiving Day all through the colonial period official Thanksgiving Days have been over some bloody victory in war.

Where, now the white man has a real Indian Thanksgiving Day once a year, the Indian has many such days throughout the course of the year. To him these days are times when he is filled with a deep, sincere feeling of thankfulness to the Great Spirit for the things of life. The Indian is a more thankful creature to God for the things that are God's than we imagine. There is not a real Indian who does not say "Niaweh" (I am thankful) upon arising from his meal. It is a sort of second nature with him to think of the One who gives him all these things. Just as regular as the moons come and go the Indians on the reservations of the Six Nations hold their green corn dance, strawberry festival, maple sap festival and other festivals, all ceremonies of thanksgiving to the Great Spirit. These feasts have been observed by the Indian from the time the first white man landed on this continent down to the present day and as long as there are Indians they will continue to be held.

The following prayer offered by the Indian religious leader is printed to illustrate the thought of the Indian when he offers thanks to the Great Spirit:

Now is the season of growing things. Now we give thanks to our Creator.  
 Now we sprinkle tobacco on fire. Now smoke arises, it lifts our words to him.  
 Now we speak to Hahwenniyu, the great ruler, the great life, one great spirit.  
 Now he listens to the words of the people here assembled.

We thank Him for return of planting season.  
 We thank Him that he has again permitted us to see it.  
 We thank Him that we again take part in ceremony.  
 We thank Him that he has given us the earth, our mother, from whose breast all things grow.  
 We thank Him that he has given us seed to give back to our mother.  
 We thank Him for rivers and waters that flow.  
 For herbs and plants, and all fruit-bearing trees and bushes that grow.  
 We thank Him that our supporters of life—corn, beans, squash—fail us not.  
 That famine is not permitted to enter our lodge doors.

Continue to listen, Hahwenniyu: Again we speak.  
 We thank Him that our old men and our old women,  
 Our young men and our young women and children are here.  
 We thank Him that the eyes of the people are turned to Hahwenniyu.  
 We thank Him that the minds of the people remember the great wisdom, the one Great Creator, who makes all things to grow.  
 Now smoke rises, He has seen it.  
 Now we have spoken, He has heard it.  
 It is done, Naho.

## REPRESENTATIONS OF THE THUNDERBIRD IN INDIAN ART

BY W. J. WINTEMBERG

Although the belief in the thunderbird is widely spread in North America<sup>1</sup>, there are comparatively few representations of the bird, especially in the eastern part of the continent. The most common belief is that this mythic creature produces the thunder by the flapping of its wings and the lightning by flashing its eyes<sup>2</sup>.

The thunderbird designs described in this article are from the Arctic, North Pacific Coast, the Plains, Eastern Woodlands, and Southwestern Culture Areas, those from the Plains and Eastern Woodlands forming one group and those from the North Pacific coast another; there is a single example from the Arctic and another from the Southwest. The writer has not seen any thunderbird designs from the Plateaus Culture Area.

### DESIGNS FROM THE PLAINS AND EASTERN WOODLANDS

The representations of thunderbirds from these culture areas are engraved or carved on stone and pottery; drawn on birch bark, or painted on skins and other materials; woven on bags; worked in porcupine quills or glass beads; and embossed on sheet copper. Only the engraved designs and embossed figures are prehistoric.

#### *Engraved or Carved Representations*

The crude design in Fig. 1,<sup>3</sup> which Mallery considered a representation of the Micmac thunderbird, is carved on a flat rock on the east shore of Kejimikoojik lake, Nova Scotia. The body is formed by two opposing triangular figures filled with lines, and the head is crudely shown. The design in Fig. 2,<sup>4</sup> engraved on a fragment of pottery from Shinnecock Hills, Long Island, New York, is of nearly the same shape as the one in Fig. 1, but has the wings delineated. There are similar designs on a fragment of red shale, from a site on Staten Island, and on a stone pipe mentioned by Skinner.<sup>5</sup> In the design in Fig. 3,<sup>6</sup> carved on the wall of a cave, near St. Paul, Minn., the body is composed of two triangular figures, and the wings and what appear to be the feet are crudely shown. The descending lines on the wings probably represent feathers, although they may also "symbolize the falling of rain," as Peet thinks.<sup>7</sup> The long, zigzag line, forked at the end, which issues from the head, probably represents lightning. The birds seen in Figs. 4<sup>8</sup> and 5<sup>9</sup>, the first being engraved on the side of a stone pipe from a Neutral

<sup>1</sup>See article on "Thunderbird" in Handbook of American Indians.

<sup>2</sup>The Haida, on the contrary, according to Swanton (p. 14), believe that it "produces thunder by the rustling of its feathers."

<sup>3</sup>After Mallery, Fig. 683.

<sup>4</sup>After Skinner (*a.*).

<sup>5</sup>See Skinner (*c.*), p. 262.

<sup>6</sup>After Peet, Fig. 6.

<sup>7</sup>Peet, p. 368.

<sup>8</sup>After Wintemberg (*b.*), Plate IV, fig. 2. This specimen is Cat. No. 17821, Provincial Museum.

<sup>9</sup>After Wintemberg (*b.*), Plate IV, fig. 7.

site in Blenheim township, Oxford county, and the other on a pipe of similar material from Windham township, Norfolk county, Ontario, are more realistic than those just described. Both of them are shown full-face, which probably accounts for them having human heads, although it is possible that they were purposely so represented, because among some Indian tribes, including the Iroquois, the thunderbird was believed to be half human.<sup>1</sup> Both figures have angular bodies and rounded heads, with the eyes represented by small circular depressions and the mouth by a short, incised line; both have the wings similarly represented; and each has three tail feathers, but the markings on these differ. The feet of the one in Fig. 4 have curved talons, whereas those on the bird in Fig. 5 have straight digits. The significance of the markings on the breast of both birds is unknown, but the zigzag lines on each side of the head of the one in Fig. 4, probably represent lightning.

*Designs Drawn on Birch Bark or Painted on Other Materials*

The most simple representations are those in Figs. 6<sup>2</sup> and 7,<sup>3</sup> which are painted on the sides of box-like, wooden "Hollow-trees"<sup>4</sup> of the Wahpeton Dakota. The outline of the one in Fig. 6 is more like that of a fish than a bird; the other figure is like the conventionalized figures of birds in Plains Indian pictography. Three thunderbirds, as represented in the mnemonic drawings or characters of Ojibwa ceremonial songs, are shown in Figs. 8-10. The head of the bird in Fig. 8<sup>5</sup> is in profile, the body is triangular, and the wings are extensions of the curved line forming the upper part of the body<sup>6</sup>. The body of the bird in Fig. 9<sup>7</sup> is diamond-shaped<sup>8</sup>, the tail is shown, and the treatment of the wings is like that on the designs in Figs 4 and 5. It is not apparent what the short projections on the body signify, unless they represent feathers; the bar across the neck represents part of the circular line usually employed to designate the imaginary vault of the sky.<sup>9</sup> The bird in Fig. 10<sup>10</sup>, which is unusual in having four heads, has a triangular body. The wings look like arms, the one at the right grasping some object, and the legs are shown, but lack claws<sup>11</sup>. Figs. 11<sup>12</sup> and 13<sup>13</sup> show designs painted on a robe of a Menomini war bundle, the two in Fig. 11 having wavy lines, representing lightning, issuing from the head<sup>14</sup>. Fig. 12<sup>15</sup> shows a thunderbird with the triangular body characteristic of so many bird figures of Plains Indians, painted on the side of a Cree tipi in Saskatchewan. The zigzag lines at the left of the bird represent lightning, but it is not certain

<sup>1</sup>See Wintemberg (*b*), pp. 39-40.

<sup>2</sup>After Skinner (*d*), Fig. 39 *b*.

<sup>3</sup>After Skinner (*d*), Fig. 40.

<sup>4</sup>See Skinner (*d*) for description of these objects.

<sup>6</sup>Compare this with Mallery, Plate XVII, character at extreme right in *B*.

<sup>7</sup>After Mallery, Plate XVIII, seventh character from left in *A*.

<sup>8</sup>Compare this with other Ojibwa drawings given by Mallery, viz.: Fig. 165, *d*, *e*, and Fig. 166, *d*.

<sup>9</sup>Mallery, p. 237.

<sup>10</sup>After Mallery, Fig. 1284*n*.

<sup>11</sup>Menomini thunderbird designs, drawn on birch bark, which could not be reproduced in time for inclusion in this article, are shown in Skinner (*b*), Figs. 6 and 7. Three figures in Fig. 6 are in profile (*b*, *e*, *f*), and the one in *k* is a full-face figure of the hour-glass type, with the head, wings and forked tail shown. Fig. 7 shows three profile views (*l*, *m*, *n*) like those in Fig. 6, and a full-face design is shown in *p*, also of an hour-glass form, with double legs, a triangular design on the breast, and a forked tail.

<sup>12</sup>After Skinner (*b*), part of the design in lower part of Fig. 15.

<sup>13</sup>After Skinner (*b*), part of upper design in Fig. 16.

<sup>14</sup>Birds with similar zigzag lines on their heads are seen in Skinner (*b*), Figs. 11, 12, 13, and 17.

<sup>15</sup>After Cadzow, Fig. 12, 2.

Fig. 14.

Fig. 15.

Fig. 16.

what the curved lines rising from the shoulders signify. Figures 14-16<sup>1</sup> show Dakota drawings of thunderbirds. The one in Fig. 14 lacks the head and wings, and those in Figs. 15 and 16 have waving lines issuing from the head, signifying lightning. The thunderbird above the human head in Fig. 17<sup>2</sup>, taken from Red Cloud's Census<sup>3</sup>, has wavy lines issuing from the mouth, which look like lightning symbols, but "may mean many voices or loud sound<sup>4</sup>."

### *Designs Woven on Textiles*

According to Skinner, thunderbirds are commonly seen on woven bags of the Menomini Indians of Wisconsin<sup>5</sup>, and they are seen on similar bags of the Winnebago and Ojibwa. Figs 18-21<sup>6</sup> show some of the Menomini designs, their more or less geometrical shape being in part due to the technique. The birds in Fig. 18 are shown with the figure of a woman in the centre. Those in Fig. 19 represent young thunderbirds and are like those on Winnebago bags<sup>7</sup>. Figs. 20 and 21 show two more elaborate designs, the double zigzag lines above the one in Fig. 21 representing lightning. A similar design is seen on another Menomini bag, but there is only one lightning symbol<sup>8</sup>. Another design, resembling that in Fig. 20, except that the lower part of the tail is scalloped and filled in solid, is seen on a twined wallet of the Ojibwa<sup>9</sup>.

### *Porcupine Quillwork*

The most simple representations of the thunderbird, worked in porcupine quills on birch bark, are those seen in Fig. 22<sup>10</sup> *a-d*; the one in *a* showing a form with wings, but lacking the head and feet; *b*, similar, but wingless; *c*, showing one with head, wings and feet; and *d*, a much abbreviated form consisting of head and wings only. An outline of a Dakota design done in porcupine quills is given in Fig. 24<sup>11</sup>. In this the head, neck (which is off the centre), and wings are shown, but their form is only a little more than suggested. Fig. 23<sup>12</sup> shows another design on a piece of porcupine quillwork, obtained from an Algonkin Indian of Baptiste lake, Hastings county, Ontario, in which the head, neck and body are nearly of the same shape as that of the Dakota example, but the wings are of better proportions, although not realistically represented.<sup>13</sup>

<sup>1</sup>After Mallery, Figs. 673, 674, and 675.

Fig. 23.

Fig. 24.

Fig. 25.

Fig. 26.

*Representations in Beadwork*

The thunderbird is also represented in beadwork designs, which superseded the earlier porcupine quillwork among the Indians. The body and the head of the bird in Fig. 25<sup>1</sup> resemble those of the figures done in porcupine quillwork, but the neck is longer. There is a row of thunderbirds on the beaded Menomini garter in Fig. 26<sup>2</sup>, which resemble some of those on woven bags.

Fig. 27.

Although only the head, tips of the wings and the edges are beaded, the Arapaho thunderbird, cut from rawhide, seen in Fig. 27<sup>3</sup>, is included under this heading. The design is unusual in having the associated zigzag lightning symbols issue from the heart, instead of from the head or mouth as in the other examples described. It will be noted that the ends of two of the symbols are forked like that on the rock carving in Fig. 3.

*Sheet Copper Designs*

Several figures of birds embossed on thin sheet copper have been found in two different localities in the United States. The one in Fig. 28<sup>4</sup>, from a mound near Peoria, Illinois, has a zigzag lightning symbol issuing from the eye, which

<sup>1</sup>After Mallery, Fig. 676.

<sup>2</sup>After Skinner (*c.*), Plate XXXIII, fig. *b.*

<sup>3</sup>After Mooney, Fig. 92.

<sup>4</sup>After Thomas, Fig. 48.

suggests that the bird is a thunderbird. Another figure, found with several others near Malden, Dunklin county, Missouri, has a similar lightning symbol issuing from between the points of a double-pointed eye design<sup>1</sup>; the other figures, although lacking this feature, may also represent thunderbirds<sup>2</sup>.

#### DESIGNS FROM THE NORTH PACIFIC COAST

The thunderbird designs from this area are carved on rock, painted on wood and tattooed on the human body; the painted designs being in some cases less conventionalized than the tattooed designs. In comparison with those from the Plains and Eastern Woodlands most of the representations from this area are of a higher type, in spite of the conventionalization to which most of them have been subjected. They all have the curved, hooked beak characteristic of the eagle, the tip of which is mostly turned back toward the face instead of downward, and in most cases it is difficult to distinguish the thunderbird designs from those representing eagles. Most of them have the head turned sideways whereas the body, wings and tail are in many cases shown in front view. The tail feathers are usually three in number, but some have four and others five feathers; the number of wing feathers varies from two to seven. In some cases the upper part of the design represents the thunderbird and the lower part some other mythological creature; others have conventionalized eyes, animal forms, or other markings on the body. None of the designs from this area depict the lightning, associated with some of the thunderbird designs from the eastern part of the continent. The Haida seem to have had the greatest variety of designs.

#### *Designs Carved on Rock*

The thunderbird design in Fig. 29<sup>3</sup> consists of the eyes and beak only. It is carved on a rock near Eneti, Washington.

#### *Painted and Tattooed Designs*

The long, narrow figures of the Haida thunderbirds seen in Figs. 31-33<sup>4</sup> were made to conform to the width of the arms on which they are tattooed, and it is for this reason, also, that the wings are incomplete. The heads of those seen in Figs. 31 and 33 bear the cap-like ornament seen on other thunderbird designs<sup>5</sup> and on other bird and animal figures<sup>6</sup>. The eye takes up a disproportionately large space in the head of each, and the nostrils are indicated. The row of circles and vertical lines on the body of the bird in Fig. 31 and the row of similar circles, between two vertical lines and rows of short diagonal lines on the bird in Fig. 32, probably represent the vertebral column and ribs, or may be merely ornamental. Figs. 32 and 33 represent composite forms, the lower part of the body consisting of a conventionalized animal head<sup>7</sup> resembling that of the bear figure in Mallery's Fig. 520, except that there are three projections instead of two, and that they

<sup>1</sup>See Fowke, Plate 15, and Wintenberg (*a*), Plate II, fig. 11, the latter showing the head.

<sup>2</sup>For illustrations of these see Fowke, Plates 17-19.

<sup>3</sup>After Mallery, Fig. 679.

<sup>4</sup>After Mallery, Figs. 518 and 519.

<sup>5</sup>See Figs. 30, 34, 35, 41, and 42.

<sup>6</sup>See Swan, Plate 3, fig. 8 (eagle), Plate 4, fig. 5 (whale), and Plate 6, fig. 11 (crow); Mallery Fig. 523 (raven) and Fig. 531 (wolf); Boas (*b*), Figs. 48 and 63, and (*c*), Fig. 35; and Swanton, Plate XX, fig. 13 (whale monster) and 14 (raven), Plate XXI, figs. 6 (eagle), 8 (sea-lion), and 9 (raven).

<sup>7</sup>See also Boas (*c*), Fig. 35.

Fig. 28.

Fig. 29.

Fig. 32.

Fig. 33.

Fig. 34.

Fig. 35.

Fig. 36.

probably represent the tail feathers of the bird instead of the ears of the animal head. The birds in Figs. 31 and 32 lack the legs and those on the one in Fig. 33, being upside down, may belong to the animal head which forms the bottom of the design. The wavy line through the middle of the body and the curving diagonal lines running from it to the sides, on the Haida representation of the Skamsom or thunderbird, tattooed on a man's back, in Fig. 30<sup>1</sup>, probably represent the backbone and ribs<sup>2</sup>. Another tattooed design is seen in Fig. 34<sup>3</sup>. The head and body are in profile and the design differs from others in having the tongue indicated. The curved lines on the body probably represent the ribs. A tattooed design of the *Oolala*, a half human thunderbird of the Haida, is seen in Fig. 35<sup>4</sup>. The design in Fig. 36<sup>5</sup>, which is painted on a Tarkoo medicine man's buckskin cape, from Sitka, Alaska, is unusual in having a whale's head on each wing, and on the tail portion are heads of the "lightning fish," which produces the lightning by darting out its tongue<sup>6</sup>. Except that the feet are not indicated, the thunderbird in the lower left corner of Fig. 37<sup>7</sup>, painted on the front of a Kwakiutl bedroom, is more naturally represented than most examples from the Pacific coast. It is shown with a number of other birds attacking the *si'siul*, a fabulous double-headed snake<sup>8</sup>. The pose of the bird in Fig. 38<sup>9</sup>, which is painted on a wooden screen used in the puberty ceremonies of the Nootka Indians of Vancouver Island, is also natural; the serpent-like figures below it are regarded as whales<sup>10</sup>. The head of the thunderbird, shown full face in Fig. 39<sup>11</sup>, lacks the cap-like head ornament so commonly seen on other designs, and is also unusual in having human hands projecting from the top of the wings, which suggests that the design is intended to represent a half-human thunderbird. The treatment of the tail feathers is somewhat like that on the bird in Fig. 41, but is not so elaborate. The significance of the face on the body and the oval figures on the wings is not apparent. This design is painted above the door of a Kwakiutl house. According to some of the myths the thunderbirds sometimes carried off whales and the bird in Fig. 40<sup>12</sup>, painted on a Kwakiutl housefront, is shown "lifting a whale, which is its food, from out of the water."<sup>13</sup> The head of the bird, however, looks more like that of a horned owl than that of an eagle-like bird. The beak was carved out of wood and fastened to the housefront. There are rows of human faces and symbolic designs across the top of the wings. An elaborate full-face design of a thunderbird, with spread wings, painted on the front of a Kwakiutl house, is seen in Fig. 41<sup>14</sup>. On each wing is a pair of eyes<sup>15</sup>, which are an almost constant feature of West Coast art. Other unusual features are the wing-like designs on each side of the head. Two of the designs are

<sup>1</sup>After Swan, Plate 7, fig. 14.

<sup>2</sup>This design is like that in Lang's Fig. 11, showing a female thunderbird, married by "Qual-teht, the Adam of Vancouver's island" (p. 302).

<sup>3</sup>After Swanton, Plate XX, fig. 9.

<sup>4</sup>After Swan, Plate 4, fig. 2.

<sup>5</sup>After Swan, Plate 2, fig. 8 (at left).

<sup>6</sup>Swan, p. 7.

<sup>7</sup>After Boas (*c*), Plate 41.

<sup>8</sup>See Boas (*c*), pp. 371-372, for description of this fabulous creature.

<sup>9</sup>After Boas (*a*), Fig. 16.

<sup>10</sup>There is another Nootka screen, bearing similar designs, in the National Museum of Canada.

<sup>11</sup>After Boas (*c*), Fig. 16.

<sup>12</sup>After Boas (*c*), Fig. 18.

<sup>13</sup>Boas (*c*), p. 376.

<sup>14</sup>After Boas (*b*), Fig. 65.

<sup>15</sup>Boas (*b*), p. 175, says: "I will add a remark in regard to the frequent occurrence of the eye ornament on all these designs. An examination of our figures will show that in most cases it is used to indicate a joint."

Fig. 37.

Fig. 38.

Fig 41.

Fig. 42

double<sup>1</sup>, the two halves being in profile. The body, legs and claws of the bird in Fig. 42<sup>2</sup>, a Haida design tattooed on a man's arm, are linear, and the wings are separated from the body entirely. The double thunderbird in Fig. 43<sup>3</sup>, also Haida, is painted on wood. It is most elaborate and differs from others in being painted in colours that could not be employed in tattooing.

#### DESIGNS FROM THE ARCTIC

What probably represent thunderbirds, two of which have whales in their talons, are engraved on both sides of the ivory seal-line guide from Cape Prince of Wales, Alaska<sup>4</sup>, seen in Figs. 44 and 45. If these designs represent thunderbirds it is an interesting evidence of the influence of Indian traditions on Eskimo art.

#### DESIGN FROM THE SOUTHWEST

A highly conventionalized bird design, painted on the inside of an earthenware bowl from the ruins of Sikyatki, Arizona, which is regarded by Fewkes as a thunderbird<sup>5</sup>, is seen in Fig. 46<sup>6</sup>. It has a round head, to which is attached an elaborate headdress, reminding one of that on the head of the Kwakiutl thunderbird in Fig. 41. There are two wing feathers, ending in arrow points, on each wing, which possibly are lightning symbols<sup>7</sup>. The tail is composed of three large feathers and projects beyond the two triangular extensions that represent the end of the body. The two curved claws are shown at each upper corner of the body.

---

<sup>1</sup>Thunderbirds are not the only birds thus represented (See Mallery's Fig. 523, representing a double raven).

## A SHORT SKETCH OF CHIEF G. H. M. JOHNSON OF THE SIX NATIONS INDIANS

By R. R. WHALE

*Curator, Brantford Historical Society, Brantford.*

George Henry Martin Johnson, a hereditary chief, was born October 7th, 1816, to the east of Cainsville, a part of the Grand River Reserve, where his parents resided.

Of his father, John Smoke Johnson, an eminent Mohawk chief and orator of the Six Nations Indians, who bore a notable part as military leader in the war of 1812. On his mother's side the boy's lineage was, according to Indian notions, still more distinguished. Her family had taken the name of Martin and had some strain of European blood, derived from the marriage of an Indian chief in former days with a captive white girl of Dutch descent adopted into the Mohawk household. None the less it is known as one of the Fifty Noble Families of the Iroquois Confederacy and descended from the Fifty Great Chiefs who, about the middle of the fifteenth century under the leadership of "Hiawatha," framed that confederacy and thus founded an Indian state which was for a long time the dominant power on our continent north of Mexico.

During the American War of Independence this confederacy, in the clash of stronger forces, was for a time broken up. At the close of that war Captain Joseph Brant and his followers, comprising the greater portion of the Iroquois people, left their ancient abodes on the Mohawk River and withdrew to Upper Canada.

The government for which they had long fought for gave them lands along the Grand River, or "Ouse" as it was anciently called, some six miles on each side, from its source to its mouth. And here just 144 years ago, to date, they re-established their league and rekindled their council fires.

The laws and policy framed by "Hiawatha" and his associates more than 400 years ago were still in force among their descendants in this district.

Chief John Smoke Johnson was an educated man in his way, as he had learned to read and write, but only in the Mohawk language, as it was written by the missionaries, yet he was determined that his son should have better advantages than he had enjoyed and accordingly sent him for a time to the then small village of Brantford. Here he showed intelligence and great aptitude for learning, which fortunately attracted the attention of the newly arrived missionary, the late Rev. Adam Elliot, a clergyman of the Church of England, who for many years devoted himself with untiring zeal to the religious instruction of the Iroquois converts. He found their language, which is a particularly complex speech and is broken up into several different dialects, not easy to master. As the Mohawk (or Canienga) idiom was spoken by the largest number of the people and was generally understood by the others, it occurred to him that his best course would be to train up an intelligent youth of that nation to interpret his exhortations to his hearers. Young George Johnson was recommended for this office and to find himself installed in the Rev. Elliot's family as at once his pupil and assistant. He was still but a lad. He had also spent several years under the tutelage of the Rev. Abraham Nelles, one of the early missionaries, and this instruction and practice qualified him to translate readily

the recondite reasonings of an English sermon into a language of such a different type as the Iroquois was a task of no small difficulty. That he finally mastered his art and was able to convey to an Indian audience, promptly and accurately, the meaning of the most complicated passage of an English speech was admitted by all among his hearers who were acquainted with both languages. In translating rapidly from Iroquois into English he was not always so happy. In his childhood he had spoken and thought only in Mohawk. English had always remained to him, in a measure, a foreign speech, and a certain hesitation was sometimes apparent in finding the right word, which, however, came at last. But in his own language he was always ready and could, when his feelings were stirred, rise into the eloquence proper to his race.

In 1840 young Johnson was formally appointed to the office of interpreter for the English Church missions on the reserve, an office which brought with it a small salary, and of no little toil and exposure. He was the constant companion of the missionaries in his rides and drives through the reserve over roads which were bogs in the spring and autumn and full of snow drifts in winter. He had often to make long trips by himself on horseback and on foot at night, as well as day, to carry announcements, to read the services, and to visit the sick when the missionaries were otherwise engaged. His affection for his people amounted to a passion, his religious feelings were fervent, and his attachment to the English Church was sincere.

Many of the Indians were pagans or deists, some unfortunately still remain, and young Johnson saw or thought he saw no hope for these, in this world or the next, except in becoming Christians, and on one occasion his zeal for their conversion led him beyond the bounds of prudence, though happily with no ill results.

Among the Indians on the reserve was a small band of Delawares, an intelligent but highly conservative race, who for the most part still adhered to their heathen belief. They had formerly been conquered by the Iroquois, but had lately been elevated by them to the position of members of the confederacy. The Indians of the United States and Canada, as is well known, had in general no "idols," but the Delawares had advanced, as some ethnologists would say, to the status of idolaters. They had carved a post into the rude image of the human form and around it performed their religious dances. When the young Johnson and his great friend, John Wampum, who was a Delaware, heard of these awful rites, the fire burned in his heart. He seizing an axe, they made their way through the forest to the distant outskirts which had been allotted to the Delawares, and he suddenly appeared before them, and after haranguing them on the monstrous nature of their religion and its ceremonies, demanded to be allowed to destroy their image, which he did, and not long afterwards the conversion of all the Delawares was announced, and at this day they are amongst the steady attendance upon the mission services on the reserve.

He was married on the 27th of August, 1853, to Miss Emily Susanna Howells, a sister of the wife of his missionary patron and teacher, the Rev. Mr. Elliott, coming of a good family in the ancient city of Bristol, England. Miss Howells had many near relatives in distinguished professional and political positions both in Canada and the United States, including the late able and eloquent American Consul in Toronto, the Honourable Wm. C. Howells.

While engaged in his duties as church interpreter he was called to take part in the civil government of his people.

One of the associates of "Hiawatha" was a Mohawk chief who bore the designation of "Teyonpehkon," or "double life," a "fern" in meaning, which has leaves on each side of its stem. He was, as has been said, one of the Fifty Great Chiefs who composed the first Federal Council of the Five Nations. His name descended to his successors, like the title in English peerage, and it had last been borne by George's maternal uncle, whose English name was Jacob Martin. On the death of a chief the duty of nominating his successor, who must be one of his kinsmen on his mother's side, devolved by Iroquois law upon the oldest matron of the family, who is commonly known as their "chief matron." This position in the family of the deceased chief was held by George's mother, who after due consideration and consultation named her son for the place, and such a nomination to be valid must be approved and confirmed by the tribe to which the candidate belongs, and by the Great Council of which he is to be a member. In the present case this confirmation was speedily given, and the young chief took his place as one of the legislators of his people.

His great ability as interpreter and his character for energy and probity attracted the attention of the newly appointed Superintendent, as the officer is styled who represents the Canadian Government on the reserve, through the nomination of Colonel Jasper T. Gilkison, who for more than twenty years filled the position of responsibility to the satisfaction of the Government.

Chief George Johnson was appointed to the post of Government Interpreter for the Six Nations. This post was chiefly prized by him for the large opportunities which it offered him of benefiting his people. The humble title of the office gave no idea of the duties and powers attached to it, or rather it should be said, which quickly annexed themselves to it when held by the new incumbent. In strictness perhaps he had only to interpret between the Superintendent and the Council, and also in courts of justice when Indian witnesses were called, and to attend to the semi-annual distribution of the annuities which accrued to the Indians from the sale of their lands and timber.

But as the interpreter was the chief assistant to the Superintendent, it was not long before he found himself the chief executive officer on the reserve, charged with the duty of carrying into execution both the laws enacted by the Council and the regulations framed by the protecting government, and he became, in fact, the "Warden of the Reserve."

The Indians on the reserve lived on their scattered farms in small log cabins, which had replaced their earlier bark built habitations. A few attempts at better style of residence had been made, but that the Indian should compete with the whites in this was not expected.

Chief Johnson had a natural taste for architecture. He erected on his farm one of the finest dwellings in the county, known as "Chiefswood." It was a white stuccoed building of two storeys and a half. A spacious and imposing front rose upon a terraced eminence overlooking the Grand River, in the midst of a park-like grove of every variety of native woods. American tourists who visited Brantford eagerly sought an invitation to "Chiefswood" and sometimes gave to the public, through the journals of the Southern and Eastern cities, an account of their agreeable experiences—the elegant and tasteful Indian home in the tree-embowered mansion overlooking the wide and winding river, the cordial and dignified chief and gentle matron.

They were blessed with four children—two boys and two girls. The eldest son, Mr. Henry Beverley Johnson, deceased; the second son, Mr. Allen W.

---

Johnson, deceased; Miss E. Pauline Johnson, the Indian poetess, deceased; Miss Evelyn H. C. Johnson, now living.

The death of Chief George Henry Martin Johnson occurred on the 19th of February, 1884, at his residence, "Chiefswood," on the Grand River Reserve in the province of Ontario, a few miles from the city of Brantford. Though he attained the age of sixty-seven, his death must be deemed premature, as he belonged to a long-lived race.

The remains of this noble Mohawk chief and Christian gentleman rest beside the graves of his forefathers in the ancient Mohawk churchyard near Brantford. The church was built by John Smith and sons, who came over with "Brant."

-----

## GRANDFATHER AND FATHER OF E. PAULINE JOHNSON

BY EVELYN H. C. JOHNSON

On August 7, 1928, the Canadian Government quietly and without display of any kind removed the remains of Chief John S. Johnson from the family plot of his son's, Chief G. H. M. Johnson, at the old Mohawk churchyard and interred them beside his wife, a short distance away, and who predeceased him twenty years, and where the remains should have been buried but for the inadvertence of a misunderstanding. His youngest daughter, Mrs. Richard Davis, was heard at her father's funeral to protest and say: "That her father's remains must be removed to beside his wife, her mother, and the sooner it is done, the better," she ended; but it was never done. John Sakayanwaraton Johnson was born December 2, 1792, and died August 26, 1886, on the Six Nations Indians Grand River Reserve. After his marriage to Helen Martin (she was also called Nellie), who lived with her parents, George and Catharine Martin, on the bank of the Grand River, he lived, as is the Indian custom, with his wife's family until the first child was born, when he built a home of his own, a field or two away to the north, also on the bank of the Grand River, overlooking what is called "The Ox-Bow Bend," to which home he moved his little family, and where the other children were born.

A piece of the Six Nations Indians Reserve, near Cainsville, was surrendered in the very early 70's and these two homes went with it. In 1873 Chief John S. Johnson bought land across the river from Onondaga, but never occupied it as there was some controversy over it. He bought more land and moved nearer to the heart of the reserve as his daughter wished. This was near Kenyengeh or Sour Springs as it is now mostly called, where he lived and died at his daughter's, Mrs. Richard Davis.

### LIVED TO GREAT AGE

It had been his custom, when he lived near Cainsville, to attend the old Mohawk Church, where he sometimes interpreted and always read the Ten Commandments to the congregation. When he removed down the river a mile and a half from Kenyengeh he continued every Sunday to read to the congregation the Ten Commandments, sometimes walking to and from the church to attend to his duty. He died in his 94th year, and as usual read in the church the week of his death. He was busy in his garden when he felt ill and going into the house asked for water. His daughter sent out for colder water and urged him to lie down, but the hot sun and his great age had caused him to succumb and he lived but two days.

Mr. William C. Bryant came from Buffalo to be present at the obsequies. He was a great admirer of the handsome old man. So great was the admiration for the aged chief of the missionary at Kenyengeh, Rev. Mr. Caswell, that he hoped and wanted to raise a monument to the memory of this grand old man. On the coffin (it was a coffin in those days) was laid his tomahawk and Bible and a wreath of flowers from Hamilton. Two bars of each colour across the latter were in red and black—the colours of the Mohawks—the red meaning blood and the black death.

In 1886 when in Victoria Park, the corner stone was laid of the monument to Brant and the Six Nations, Chief John S. Johnson was asked to lay the said stone, but he being a Mohawk, the Indian Council would not permit it, as the Mohawks being the leading nation, are not allowed to touch the dead. However, he was present at the laying of the corner stone of the memorial, and afterwards a space was cleared and he sat on a high dais and his photograph was taken, he then being the only living man who had known the great American Revolutionary leader, Captain Joseph Brant, and he also remembered once travelling with others to Montreal in company with Brant. John S. Johnson's large framed photograph was presented to the Six Nations Indians Council when the Ontario Historical Society met in Brantford, in 1911, and were present at the Indian Council House, Ohsweken.

#### NOTED ORATOR

John S. Johnson had been speaker of the council for forty years. He was named John but his Mohawk name was Sakayangwaraton, the meaning of which is "Disappearing of the Indian summer mist." (See the Iroquois Book of Rites, Horatio Hale.) Indians always called this "Smoke." Therefore John S. Johnson became "Smoke" and his descendants are known throughout the reserve as "The Smoke Johnsons." The beauty of his language, even among "a race of orators," as Indians are known to be, was proverbial. (Hale compares the Indians and the Greeks as orators) and for years before he knew it, he was called by them "The Mohawk Warbler." It was said that when he spoke in council "he used to sing," his language was so exquisite. That is one reason why his granddaughter, E. Pauline Johnson always claimed she inherited her language of poetry from her grandfather, "The Mohawk Warbler." One other of his descendants, a cousin of E. Pauline Johnson, Chief John W. Elliott, must have inherited his oratorical gift from his maternal grandfather, "The Mohawk Warbler."

There is much of history attached to Old Chief John S. Johnson. He was one of the Indians who fought under General Sir Isaac Brock in the war of 1812. He fought at Queenston Heights, Lundy's Lane, Stoney Creek, etc.—all far-famed battles. Pauline Johnson, when a little child, leaned on the gentle old man's knee and asked him: "Have you killed many men, grandfather?" and he replied, "Not many, my child, not many, only four or five." Pauline Johnson while ill in Vancouver once said, "I shall never forgive myself for letting grandfather die, with his wealth of knowledge, without trying to find out something of what he knew."

#### WAR REMINISCENCES

John S. Johnson in the War of 1812, was a young man of about 20 or 21. He and another Indian jumped into a canoe and swiftly paddled across the Niagara River, and Johnson with his own hands set fire to Buffalo and burned it. It was war! He was heard to tell this story to Mr. William C. Bryant, a lawyer of Buffalo. John S. Johnson lived with his younger daughter, Mrs. Richard Davis near Kenyengeh and old John Fraser, Jr., went occasionally in the evening to John S. Johnson's where the two old men fought over again and told stories of the battles of 1812. The family would retire at the usual hour leaving the old men to their old-time talk, which they kept up until 12 or 1 o'clock. John S. Johnson's granddaughter then living at home, now Mrs. William Jacket Hill, had heard them tell of the story of the burning of Buffalo. During

the war, one of the battles was slated to take place at night, under cover of darkness. The Indians decided on some kind of ruse, so they tied white cloths around their heads to distinguish themselves. The American Indians decided upon the same course and all went into battle. So great was the resulting confusion, that both sides had to be withdrawn and await daylight. This was one of the tales told by John S. Johnson. The old man also told the following story of the battle of Queenston Heights: John S. Johnson was looking over the ground and turning a ledge he found a Kentucky soldier. The man evidently had his arm wounded—perhaps broken—as he rested the muzzle of his gun in the crotch of his arm and followed and turned it upon his Indian adversary wherever he moved. Johnson said he knew one of them must die—so he shot the Kentuckian and took from the body his shot bag. Johnson carried it throughout the remainder of the war. When he married and had a son of his own, he gave it to him—the first born, and the father of E. Pauline Johnson. The shot bag is on an ordinary leather strap. The bag has a brown horn button to which a flap was fastened and the bag being of leather is fringed with a short fringe of the leather—perhaps an inch long.

He used to say that he was so agile and swift, that he believed he could dodge a bullet!

So greatly did the British Government admire this man, that they requested the Six Nations Indians to create him a Chief. (Iroquois Book of Rites, Horatio Hale.)

John S. Johnson was not in line for Chieftainship, but as he had attended the Council regularly and taken a keen interest in his people, the Council took into consideration the request of the British Government and created Johnson a Chief—of course he was a Pine Tree Chief, but he was different from the others. He was greatly beloved by the people, and became speaker of the Council, remaining so for forty years.

#### MOTHER TOOK ACTION

When G. H. M. Johnson, the eldest son of Chief John S. Johnson and the father of E. Pauline Johnson, succeeded his Uncle Jacob as Chief, he was in line. The Chief is never the son of the Chief, as these sagacious old councillors, when their constitution was organized, contended that a son is liable to vote the way his father had voted before him, and to insure the independence of their parliament (Iroquois Book of Rites, Horatio Hale) the son is never by any means appointed, but nephews or cousins. The Council had before them a problem, as not only were father and son in Council, which had never before been heard of, but G. H. M. Johnson was Government interpreter. For many days and nights, the Council took the matter under advisement, when finally it agreed that G. H. M. Johnson, the new Chief at the next meeting of the Council would be deposed from his post. When his mother learned of the indignity that was about to be done to the Chief of her choice (the chieftainship is always on the female side) she was very wrath and presenting herself before the Council (as the constitution provides for women to speak when they think it necessary) she soundly berated the Councillors for their unconstitutional act. They had every right, she said, to depose him for something he had done but they were about to depose her son and the Chief of her choice for something they were afraid he would do. She ended by declaring that so long as she lived (she was the chief woman to appoint a chief) she would never appoint another chief to fill his place. This threat startled the assemblage. If it were carried

out, the Mohawks, who had nine representatives, would be one short. The matter was recognized and a decision arrived at that satisfied all scruples. Chief G. H. M. Johnson was to keep his seat, but so long as he remained a salaried official of the Government—anything that came up in Council should be valid without his vote—so jealously did these free-born sons of the forest guard the independence of their Parliament. (Horatio Hale.)

Much of this controversy over the chieftainship is in the Iroquois Book of Rites—Horatio Hale, but it is all known. Had the father, Chief John S. Johnson, not been appointed chief, therefore later making father and son chiefs in the council, this would not have happened. There was no precedent for the council, as it had never before been done. But the Mohawk Warbler was a marvel, and the British Government had honoured him, and the council of his people had conferred upon him the appointing of chief.

#### HONOUR TO PRINCE

When Prince Arthur was in Canada in 1869, he was inaugurated a chief of the Six Nations Indians. Chief John S. Johnson, a Mohawk, and Chief George Buck of the Onondagas, who were leading Indians, and Chief G. H. M. Johnson, the interpreter, installed their Queen's Son as one of their chiefs. Many years later, when Prince Arthur, who was Duke of Connaught, became Governor-General of Canada, he visited the reserve and took part in the deliberations of the council of the Six Nations as a Mohawk chief.

#### FOR EMERGENCIES

It had been the custom for John S. Johnson always to carry his knife on his person. He depended upon it for protection in those early days against, not only evil Indians of his own nation, but many Indians of other tribes; then, too, he carried it for protection against wild animals or for the purpose of killing wild beasts, of which there were then many. As civilization progressed, Johnson continued to carry his knife; he never seemed to overcome the habit, and every morning when he had finished dressing he fastened his knife to the leather strap about his waist under his coat. This he did up to the very day of his death, when he was in his ninety-fourth year. Yet for fifty years, perhaps, he never used it, but it was always ready.

The Union Jack, for which he fought, flies over his grave in the Old Mohawk church yard.

The glories of the Niagara River, the canoes, and the Indians who fought in the battles of the War of 1812 are gone—1812 itself is but a memory—and the boundary in the east between the sister countries is now a great Peace bridge.

## WHAT IS WAMPUM?

EXPLAINED BY CHIEF JOHN BUCK,

*Firekeeper, July 20, 1887*

The great wampum records of the Iroquois nation are the only ones now remaining. It is all in one little bag. Chief Buck, on whom devolved the highest office in the gift of the Iroquois, that of firekeeper, had it as his duty never to let them out of his sight, night or day. Dr. David Boyle and an Englishman was met by Chief Smith, in a covered carriage and a lively pair of horses. They had come to see the wampum. There was some doubt whether Chief Buck would let them see the wampum, but when Chief Smith explained to Chief Buck what they wanted, he smiled and said yes. If they will sit down on the grass under the trees he'll bring them out. The firekeeper returned with a little old buckskin bag under his arm. He was accompanied by two other Indians and they carried a white table cloth. The white cloth was spread on the grass. The bag was very old and covered with patches. The firekeeper drew forth five belts of beaded work tied together at one end. The beads seemed to be made of some kind of shell. They were cylindrical in shape and strung on leather, the strings being woven into the belt in parallel strips. They were two colours, a bone colour white and a dark agate coloured purple. Wampum is made out of shells ground down and bored. There are two shapes, round and cylindrical. The white wampum came only from the Gulf of Mexico, the purple from mussel shell. The firekeeper told the first belt, all white except a round purple patch in the centre. This represents all Indians on the continent. They have entered into one great league and contract that they will be all one and have one heart. The pot in the centre is a dish of beaver, indicating that they will have one dish and what belongs to one will belong to all. The second strip was a long, narrow one of white. This strip was made in token of peace that was then made between tribes on the continent. The third was to confirm the peace that was established. The great Iroquois league's emissaries were sent from almost all the tribes on the continent. The fourth was a small belt and were of a milky white glass. They were of French make. "This," said the firekeeper, "was given as a token of peace." The Shawnees revolted from the league but afterwards gave the belt as a token of submission. (Tecumseh was a Shawnee, fought for the British with Sir Isaac Brock in 1812.) The fifth was also a token of confirmation from one of the tribes of the league. The five belts were laid to one side and the firekeeper drew out a belt two feet long, three inches wide, containing nine rows of white wampum. At the end was woven in purple a rude figure, intended to represent a man, while at the other end was a similar figure, differing only in having a white spot on his breast and face.

The two figures were joined by a long, narrow strip of purple running from one end of the belt to the other. This belt represents the great treaty between the white man and the Indians. The long blue streak between them is to indicate that the road of communication is to be kept clear and open. If either side have any grievance the road is open for them to come and explain it to the other, and have the trouble remedied. These were brought from New York State after the War of Independence, by the loyal Indians. These wampum records were in existence long before this; however, the next belt was the most extensive, being on groundwork of blue wampum and over seven inches wide. On it was worked in white, five figures, representing men hand in hand and standing with their

SIX NATIONS INDIAN CHIEFS OF CANADA READING THE WAMPUM BELTS.

1—Joseph Snow, Onondaga chief.  
 2—George H. M. Johnson, Mohawk chief, son of No. 4.  
 3—John Buck, Onondaga chief and wampum keeper.  
 4—John Smoke Johnson, Mohawk chief and speaker of council.  
 5—Isaac Hill, Mohawk chief and fire keeper.  
 6—Seneca Johnson, Seneca chief.

elbows crooked. This represented the great Iroquois league. The idea originated with a chief, Pa-ka-na-wi-dak, that it would be well to form different Indian tribes into a confederation for mutual protection, for before they were at war among themselves and were consequently diminishing in numbers. That was during the settlement of New York State by the English, Dutch and French. This belt represents the tribes standing in a ring joined hand-in-hand, and the compact was to be so strong that even though a tree might fall it could not break the chain of unity. The understanding was that if any one went out from this circle of protection he would have to go out for good and could never be received. Their elbows being crooked indicated that if a deer were to try to break through the chain his horns would catch on them; or, in other words, if a chief should leave the confederacy he must leave his chieftainship or authority behind him. The emblems of chieftainship are the antlers of a deer. The other half of the belt was left in New York State. They would not let it go. The next lot consisted of four belts tied together. This represents the four branches of the Algonquin races, who afterwards came into the confederation and gave these belts as tokens. Notice there are blue strips running obliquely across them. These represent braces, signifying that Algonquins would be the prop and support of the confederacy. These two single strips indicate that the council fire was always to be in the country of the Onondagas. Why? One of the greatest stumbling blocks was a chief of the Onondaga named At-o-to-hara. And to pacify him and get him into the confederacy they agreed to always have the council fire in his country, and these strips were given in token of it. "It was only right anyway," for his country was in the centre of the confederacy. The remaining belts bring us down to modern times. A long strip was explained to have been given by a son of Capt. Joseph Brant (Thay-en'-da-né-gea). Young Capt. John Brant (fourth son) wanted to change the customs of the Indian, said the firekeeper, he wanted to reform it, and gave this strip to indicate that he would abide by the old customs. There were two strips of round wampum, signifying the acceptance of the Tutelas into the confederacy. The last of all was the largest and most showy, but least significant in its design. It was fully three feet and a half long and five inches wide and contained a groundwork of purple wampum with white worked in, forming a zig-zag pattern. This was given by Col. Claus on behalf of the Canadian Government, after he had studied the wampum records, at which he must have been looking and understood their significance. It was given as a token that the government would never force the Indians to change their customs. The precious records were placed once more into the buckskin bag. Thus are we indebted to Chief John Smoke Johnson, Mohawk (Pauline Johnson's grandfather), Six Nations Indians, for the true explanation of wampum. The tribes of the Iroquois are Mohawks, Cayugas, Senecas, Onondagas, Oneidas, and Tuscaroras. The first four were called "Uncles" because they were first in the confederacy, said the firekeeper. John Buck was keeper of the wampum after Chief John Smoke Johnson, and explained the wampum belts at a joint council meeting held at the Ojilway Council House, or Credit Indians, near Hagersville, in about the year 1854. He was in the battle of Queenston Heights, 1812, warrior, with Sir Isaac Brock and Capt. John Brant.

The late Chief Joseph Sawyer of the New Credit or Mississauga band of Chippeways, near Hagersville, married Mary, daughter of Christina Brant, and granddaughter of Capt. Joseph Brant (Thay-en'-da-né-gea).

Go-ih-wih-saas,

Mohawk and Cayuga, adopted, Nov., 1913

(meaning "One who makes a research.")

AUGUSTA I. GRANT GILKISON,

## AN IMPLEMENT OF PREHISTORIC MAN

BY CHARLES N. BELL, LL.D., F.R.G.S.

Over forty years ago, or to be precise, in August, 1884, I received from Mr. H. W. D. Armstrong, C.E., divisional engineer, in charge of construction on a section of the Canadian Pacific Railway on the north shore of Lake Superior, and in the immediate vicinity of the Pic River (which is one mile east of the present Peron Bay Station), a most interesting and valuable relic of pre-historic man in the form of a hook-shaped implement of native beaten copper, which was found by him in a cutting being made for the main line of the Canadian Pacific Railway, on the east side of the Pic River. This was accompanied by a ground plan and cross section, drawn to scale of the cutting.

This copper hook was uncovered by a navvy, one of a gang engaged in excavating a clay deposit, in a deep natural cavity of Laurentian rock which lay directly in the projected line of the railroad. It was found at the bottom of the cavity, eighteen feet under a deposit of glacial clay topped by drift gravel, and with the hook was found some pieces of charcoal and charred wood. The article was immediately drawn to the attention of Mr. Armstrong, who, after a critical examination of the location, made a ground plan and cross section, recorded them and forwarded the whole to me. The navvy, however, was very curious as to the material of which the hook was composed and unfortunately, to satisfy his curiosity, broke off about four inches at the upper end, the total original length being 17 inches.

The implement is well rounded, smooth and even in its taper, while showing clearly the laminated form resulting from its being hammered out of a piece of almost pure copper ore. Tapering gradually from one-quarter inch in diameter to a sharp point it has at the lower end two bends, fairly

turned, one being four inches from the point with an angle about 40 degrees, and the other at the extreme sharp end, which latter seems to have been made either to prevent a suspended utensil from slipping off if drawn back from the fire when used as a pot hook, but more probably the implement was used as a gaff or large fish hook. Toward the sharp end a number of tiny pitted holes appear as if in the hammering process small pieces of rock combined with the almost pure copper ore had been beaten out, leaving the appearance of small corroded cavities. The upper and larger stem of the hook, however, does not show these cavities to the same extent, but the lamination is more pronounced. In the inside angle of the first bend there is an apparently worn spot having the appearance of being caused by the friction of articles hung upon it. The whole stem or shank has been polished till round and smooth and is not chemically corroded.

The hook, of copper, hammered out of natural ore, 13 inches in length.

Such a large number of copper implements and ornaments have been found about the south shore of Lake Superior and in the Indian mound districts of the Ohio and Mississippi Rivers, as indeed in the mounds of our own Rainy River country, that this particular article would not have any exceptional interest or significance, were it not for the most peculiar situation in which it was discovered and the circumstances under which it was brought to light after having been buried, certainly for geological ages under many feet of water-deposited clay, topped by the characteristic drift gravel of the North Lake Superior country. The railroad cutting which revealed the presence of the implement was made directly through a roll of rock which is raised above the level of the immediate surrounding uninhabited country and was situated on the east bank of the Pic River and about 600 feet distant therefrom. On the centre top of this rock a deep cavity existed and this being filled up with clay and gravel it was first supposed by the engineers that the summit or top was a solid mass with a gravel surface imposed thereon, but the stripping of the gravel at once revealed that in fact a deep hollow or depression was in position between four walls or sloping sides. This is clearly shown in the plan and cross section which Mr. Armstrong made for me. The hook was found at the bottom of the cavity on the sloping rock side under about twenty-five feet of drift clay, topped by a layer of gravel. The elevation of the spot by actual measurement was about one hundred feet above the present normal surface of Lake Superior.

It may be interesting to here state the mean level of Lake Superior above the sea is 602 feet, while its greatest measured depth is 1,008 feet, or 406 feet below sea level. The railroad crossing of the Pic River is about five and a half miles from Lake Superior. It seems apparent that there would necessarily be a depth of water over the adjacent country before the surface could flow over the surrounding rock walls and fill the enclosed pocket or basin with the drift clay and gravel deposit which actually was found there covering the copper implement, for the Pic River being within such a short distance, 600 feet in fact, and as it runs in a deep rock valley it seems practically impossible that the clay deposit could have been washed into the pocket.

The hook was found, as stated, amidst a number of fragments of charcoal and charred wood, some pieces of which were one and one-half inches in diameter, but the deposit covering this old camp fire of some prehistoric man did not show any layers of vegetable mould or remains, the strata being entirely of clay with a topping of drift gravel characteristic of the neighbourhood. No human remains were found. The bottom of the pocket was fairly level and there is no elevation in the immediate vicinity so situated as would cause a local flood to wash the clay and gravel into it from an opening. Any local flood would pour its waters around the base of the rocks directly into the deep valley of the Pic. Indeed, the cross section drawn to scale by Mr. Armstrong shows a ravine of about twenty-five or thirty feet in depth on the eastern side of the mound or rock wall. The slope of the Pic Valley is immediately from the west side of the mound into the Pic River. A few hundred feet to the side of the rocky mound enclosing the pocket and below near to the railway bridge over the Pic are some sandy flats where construction camp was pitched. The whole district is not, and never was, certainly for hundreds of years "inhabited," being a barren waste.

The general contour of the country here south from the Canadian Pacific line follows a series of irregular steps, evidently of old lake beaches, down to Lake Superior. The question of paramount interest naturally arises, at what time or geologic age did a human being place this copper implement in the situation where it was found, and where it lay buried so long? There can be no doubt

but that it was left behind by the person who used the fire, the remains of which were around it. The spot was well sheltered from wind and was a secure camping ground on account of the high rocky walls which surrounded it, preventing the lighted fire from being seen even at a short distance. It is well known that modern Indians seek such places to prevent their enemies from detecting their presence.

Is it not a fair conjecture that the human being who left his cherished possession there was one of a people living within a measureable distance of the great northern glacial face, which, under some extraordinary circumstances sent down a vast volume of water and drift thus covering to a great depth the district of country where this copper article lay securely in its pocket in a high rock? After local denudation might leave the sheltered deposit undisturbed while carrying off much material from the lower levels below the rocky mound. Obviously one becomes quite lost when an attempt is made to reduce to the measure of years, centuries, or even geologic ages what time has passed since the clay and drift settled down over this old camping spot.

It is impossible to arrive at the age of such an implement by its appearance or the degree of its workmanlike finish, it being readily understood that different individuals of a tribe, or different tribes inhabiting a country adjacent to each other would at a parallel date manufacture articles from the same material and with the same tools, and which would show good or bad workmanship according to the skill of the individual artificer. An unskilful worker of recent age would not make a better implement than a good worker of a ruder age. This hook was evidently made by a skilful and experienced aboriginal workman who well knew how to hammer it out from pure native copper, but in what age he lived it is impossible to say from any data furnished by its appearance or state of preservation.

The pure copper deposits of the Lake Superior region are so well known that the fact need not be enlarged upon.

Over half a century ago the Smithsonian Institution at Washington published a full description of an aboriginal copper mine on the south shore of Lake Superior, which had evidently been worked for ages, the pure native copper being extracted from its rocky matrix by the application of fire followed by sudden douches of cold water, this process decomposing the rock surrounding the copper veins. This mine, which was discovered by accident, extended some forty feet downward and a drift at that level was run in a horizontal direction and there was found in it a mass of broken stone mauls (hard stone boulders having an artificial groove running around them, which could be attached by strips of hide or withes to a wooden handle), estimated as having a total weight of over two tons, strewn about the bottom. The wide distribution of implements and ornaments of copper from the Lake Superior region, even within historic time, is well known, as the characteristic copper ore of Lake Superior is manifest in the articles found in Indian mounds and more modern burial places throughout Canada and the United States.

Arthur Keith, ex-president of the Royal Anthropological Institute of Great Britain and Ireland, has recently stated:

"The investigations of Dr. Wright and of the American geologists who have studied the physical condition of North America during the Pleistocene period, are of the greatest service to anyone in search of the remains of ancient man. They have shown us that the variations of climate were very similar to those of Europe. They were the same southward extensions of the ice sheet in the colder phases; the same northward retreats in the interglacial or milder intervals."

Certainly the presence of this implement manufactured by a human being of some intelligence, in such a situation and under such circumstances, must

prove deeply interesting to anthropologists, archaeologists and geologists, as it directly raises the question of the antiquity of man on the North American continent, as well as the scientific subject of great geological changes in the north shore of Lake Superior, and indeed of Lake Superior itself.

### Hook or Gaff

This hook, in the collection of Mr. Van Winckel, Toronto, was picked up off Pie Island in Lake Superior. Captain Chisholm, who operates a fish tug for the Dominion Fish Company, found the same. This hook was brought up in a net while they were fishing during a storm and was attached to the same. Hooks of a large size, such as this one, are only found in Lake Superior district. This one is similar to the one illustrated in the article by Mr. Bell on page 51. These hooks are probably very old and show evidence of being well made. From the methods used in their manufacture they were evidently made by the hands of men expert in the work.

NEW ACCESSIONS TO MUSEUM

BIRD STONES.

The undefined class of prehistoric ornaments or charms which we have been calling "ceremonials," represent stone-age art of no mean degree. On page 55 we represent three bird stones, very much alike but found in different parts of the Province. No. 1 was presented to the museum by Mr. C. W. Marshall of Nanton, Alta. He procured it a number of years ago in Kent County. It is composed of dark greenstone and the lighter material is feldspar. We find that there are two others in the museum nearly alike and are composed of much the same material as the one presented by Mr. Marshall. These ceremonial stones stand for a type of similar specimens of which we have 147. They are all slightly distinctive and beautifully finished. The rubbing, cutting, and scraping must have been carefully applied toward the completion of the object. Doubtless the final rubbing and polishing and finishing touches were given with wood and lastly with buckskin. The perforations at each end may have been drilled just before it was completed. The perforations in these three specimens are so much alike they are scarcely distinguishable.

No. 2 came from Richmond Township, Lennox County, and was presented by Mr. Walter B. Clark of Odessa, Ontario.

No. 3 came in the Chadd Collection from Trenton, Ontario, and is very similar to No. 1, both in material and in form. They are all composed of similar stone material and very hard and would require considerable work to manufacture them.

No. 43791

No. 43791. A vase-shaped pipe-bowl with rounded base, of somewhat translucent material resembling soapstone.

## MONITOR PIPES

The monitor pipe is one upon which more care has been expended in boring its bowl and stem and in grinding and polishing the surface than upon any other type of pipe. There is no pipe more striking or better marked in its characteristics, and the delicacy of its finish, as well as its outline, is surpassed by no other. This type does not appear to be found having upon it representations of animal life in any form, and is rarely ornamented. The material from which the monitor pipe was usually made is chlorite or steatite, being usually highly polished. Pipes of this class have been found most commonly amongst the remains of the "moundbuilder" Indians of the Ohio Valley and adjacent parts, and were formerly attributed exclusively to those people, but examples of the same type have been coming to light in a wider range of territory than was at one time known. They have so often been found in mounds and other primitive burial places that they are entitled to be classed among the mound types.

No. 39197.  
No. 56.

No. 39197 illustrates a very fine specimen from Wellington in Prince Edward County. It is made from a gray stone. The long, slender platform, which is perfectly straight, is four and one-fourth inches long, one inch wide at

the rear end, gradually tapering to the front, where the stem is less than one-half inch wide. The stem end is convex on top to accommodate the stem hole. Abrasion marks are observed at the exterior base of the bowl where it joins the stem; They also appear under the thin flaring top of the bowl with great distinctness. The bowl cavity appears to have been enlarged by gouging, and is remarkably thin. One of the most striking things concerning this platform or monitor pipe, the latter name having been given to it from its resemblance to the turret warship "Monitor," is the high state of polish to which the surface has been brought. This specimen is in the Chadd Collection.

Figure No. 56 represents a unique pipe. It is made of steatite or soapstone, a material that was plentifully found and easily wrought. Two stem holes lead to the bowl of the pipe. The workmanship is very rude and the pipe is by no means symmetrical, for not only does the bowl slope backwards but it inclines considerably to one side. Compared with No. 39197 it would seem to complete the series from the rudest to the most elegant forms in this class. It was found under a pine stump in the Township of Pittsburg, County of Frontenac, and was presented to the museum by Mr. W. G. Kidd of the City of Kingston.

No. 12430 is that of an unfinished pipe found in a field near the Brant House, Nelson Township, Halton County, by Mr. Richard G. Lewis, Toronto. The material of this pipe is exceedingly hard, probably of quartzite, and it would require an extraordinary amount of labour to bring it to its present shape. Very little polishing has been done and the marks of pecking are still visible. Boring to form the hole has been begun but the cavity formed is less than three-eighths of an inch in depth and scarcely one-half inch in diameter. It was probably the intention to widen the boring by other means after the completion of the drilling as the diameter of the intended bowl averages one and three-fourth inches. The work of boring appears to have been performed by means of wood and sand, for not only is the bottom of the hole nicely rounded, but the entire surface is free from the stria left by stone drills. No doubt the process by which it was possible to make a hole in this stone must have been an exceedingly slow one. A wooden drill revolved by means of a bow and aided by sand and water would seem to have been the only method. The merest beginning of a stem hole may be seen at one end of the projecting base and in this specimen the shorter and thicker end has been chosen, which is unusual in pipes of this kind. The length of this fine specimen along the base is five inches and is concavo-convex.

No. 39331 illustrates a well-finished pipe made of buff-coloured granite, mottled with light gray, bold and symmetrical in outline. The platform of this specimen is six inches long and two and one-half inches wide, flat on the bottom and greatly convex on top. The bowl is cylindrical in form and the circumference is the same from the narrow rim on the top, which is decorated with notches around the edge, to near the base where it gradually tapers to each end of the pipe. The hollow of the bowl measures three inches in depth and is remarkably well bored; where it joins the stem hole the diameter is practically the same as at the opening. This pipe is also in the Chadd Collection.

No. 12430.  
No. 39331.

No. 27262 shows another interesting pipe of remarkable beauty and symmetry. The material from which it is made is a fine-grained stone, probably a steatite, and is well polished. It is the largest stone pipe of its type in our cases and was procured from Mr. John Bay, Anglesea Township, Addington County, Ontario. The platform is exceptionally long, measuring exactly eleven inches, and is convex top and bottom. The stem-hole, which is perfectly straight, measures one-eighth of an inch in diameter and is bored with remarkable accuracy. It is slightly smaller in size at the entrance to the bowl, and there is but little doubt that this pipe was smoked without a stem other than that comprised in the stone itself.

The bowl is one and one-half inches in height and is practically of the same circumference throughout its length although the cavity is considerably smaller where it joins the stem-hole than at the opening. Boring has apparently been done by means of a flint drill as the striae are quite irregular. The cavity appears to have been enlarged subsequently by gouging with a sharp-pointed tool which has left longitudinal marks.

No. 5451 shows an interesting specimen found on Lot 36, Concession 5, Township of Camden, by Mr. Joseph Lucas. The stone itself is steatite of a very soft quality, and the surface appears to have been stained black. It was the practice of the Indians to "block out" the various articles of stone as nearly as possible to the required size before boring any holes that were necessary. That this is an unfinished pipe is undoubted, and the possibilities are that it was procured in its present condition by barter or plunder from some southern source and was lost before the boring operations could be performed. It is a valuable specimen for museum purposes as the size is somewhat unusual. The platform is flat, seven and one-fourth inches long and two and one-half inches wide and square at the ends, while the bowl portion stands one and seven-eighths inches above the upper side of the base. The end intended for the stem is slightly convex, being a little more than one-half inch thick, the other end being only one-fourth of an inch.

No. 5451

## EFFIGY PIPES

The pipes figured here belong mostly to the type to which the late Dr. David Boyle gave the name of the "pinch-faced type" on account of the face being formed by pinching with the thumb and finger. (Fourth Archaeological Report, Ontario, 1891, p. 32, and "Primitive Man in Ontario," 1895, p. 37.) This type was common on sites of the Tobacco Nation, as well as on those of Hurons. In every case it seems to represent a person in a crouching position with a bundle on the back, probably a squaw with papoose. The face of the effigy is always looking toward the smoker. The limbs are always crudely represented—legs much bent and arms reaching to the face—but the grouping of the limbs and co-ordinating them with the design is always so grotesque that they seem at least partly conventionalized.

No. 43794. The person has a larger burden than usual on the back, or has its "back up" more than the others have.

No. 43797. This bird form is a common pattern, but it is difficult to make an identification of the species, although a waterfowl (such as a duck) seems to be intended. Similar shapes also represent birds of prey.

No. 43795. This is a well-made pipe, the plastic material of which it is made being somewhat finer than that in the others, and it is lighter in colour.

No. 43792. Notwithstanding that the head of the effigy has disappeared the limbs have the same conventional formation and show the same pattern as the others.

No. 43835. This pipe stem is longer than usual and possibly belongs to the preceding pipe which it resembles in material and colour. All the foregoing pipes belong to the Mrs. Geo. B. Burnfield Collection from Medonte Township, and represent Huron types.

No. 43793. The human form is complete in this one, but the large size of the head is exaggerated in proportion to the limbs.

No. 43794.  
No. 43797.

### BONE AWLS AND NEEDLES

Those illustrated here are all thin, flat and slightly bowed except the first named. Bone implements were numerous on Huron sites and as a rule were well made. These are in the Mrs. Geo. B. Burnfield Collection from Medonte Township.

No. 43873. This has a length of  $2\frac{3}{4}$  inches, with a thread hole perforation. It is straight and flat.

No. 43876. This specimen, made from a marrow bone, has a length of 4 inches.

No. 43874. This specimen, made from a marrow bone, has a length of  $3\frac{3}{4}$  inches, and is bowed slightly, with marks of abrasion received in the making of it.

No. 43875. This specimen, made from a large bone, has a fractured end. In its present condition it has a length over all of  $4\frac{1}{2}$  inches.

No. 43877. This is a fine specimen with a perforation, and both ends are pointed. It has a length of  $5\frac{1}{8}$  inches.

No. 43866.  
No. 43850.  
No. 43856.

HURON POTTERY

No. 43836.  
No. 43867.  
No. 43843.

### HURON POTTERY

The ears of the Huron pottery were usually made thicker than the other parts of the vessel. The ornamentation of the ears was more elaborate and they show a multitude of designs, many of them unique. They also sometimes exhibit taste in the ornamentation. In every case represented here the material is coarse in texture. They are in the Mrs. Geo. B. Burnfield Collection from Medonte Township.

No. 43866. This one has a row of pyramidal knobs similar in pattern to the second in this list, but the diagonal scores are not present above the knobs, which are slightly different from the others.

No. 43836. This is an ear raised above the line of the rim, and has longer lines than usual in the ornamentation.

No. 43850. The raised, or erect, knob has a triangular cavity in its top (not seen in the picture) and the ornamentation is different from that of the others.

No. 43867. This is a fragment of pot lip with a row of pyramidal knobs (four of them on the fragment). It has an unusual ornamentation as there are diagonal scores above the row of protuberances.

No. 43856. This fragment has two rows of deeply impressed dots or punch marks.

No. 43843. This ear has a thickness of slightly more than an inch at its thickest part. It has a highly projecting erect knob.

No. 26088.

No. 43227.

No. 26088. This is a large pipe-bowl—unusually large, with many lines of ornamentation—and belongs to the George E. Laidlaw Collection.

No. 43227. This is a piece of conch shell presented by J. Allan Blair and was worn as a gorget. The original etched design is mostly worn off by much use on the part of the wearer.

## E. Y. CONNELL COLLECTION, BRITISH WEST INDIES.

No. 43785.  
 No. 43787.  
 No. 43786.

No. 43789.

No. 43788.

No. 43781.  
 No. 43783.  
 No. 43790.

On page 68 we illustrate an interesting collection presented by E. Y. Connell of St. Kitts, British West Indies. Mr. Connell has a very large collection composed mostly of shell material gathered in the West Indies, as the Indians of that district were experts in the manufacturing of shell ornaments.

No. 43781. A gouge of the shoehorn type from Barbadoes. It is from the shell of the great conch, *strombus gigas*, and although this particular shape is common in Barbadoes it is rare in St. Kitts and Nevis.

No. 43783. A narrow chisel from St. Kitts made from the shell of the queen conch, *cassis tuberosa*. The projecting pieces on the side looking like teeth are natural to the shell.

Nos. 43785 and 43786. Two perforated shell ornaments from Two Mile Hill, St. Kitts. They are artificially perforated through the dorsal portion of the body whorl, a little distance from the anterior mouth; apparently for the purpose of being strung to form a necklace or amulet. At the place of the perforation the shell has been made thinner by grinding with a convex implement, and an irregular hole varying in size has been made at the thinner, weaker place. In no example has the perforation been made by drilling.

No. 43789. A stone petaloid celt from St. Kitts known by all the natives of the different islands as "thunder bolts."

No. 43787. Two nicely bored and well-polished beads from Montserrat.

No. 43788. A small stone forehead ornament. The St. Vincent Caribs of to-day have a legend that when going to war the chiefs wore an ornament on the forehead attached with a piece of red cotton.

No. 43790. A fragment of pottery, probably part of the rim of a pot. It is nicely glazed and the ornamented portion is a brick red colour.

FLINT DRILLS FOUND IN VARIOUS PARTS OF THE PROVINCE OF ONTARIO.

FLINT CHIPS FROM WORKSHOP  
Found near Chatham, Ontario, by James Jordan.

## SELECTIONS

### DANCING

“Dancing is a favourite exercise among the Indians; they never meet on any public occasion but this makes a part of the entertainment. And when they are not engaged in war or hunting, the youth of both sexes amuse themselves in this manner every evening.

They always dance, as I have just observed, at their feasts. In these as well as all their other dances, every man rises in his turn, and moves about with great freedom and boldness, singing as he does so, the exploits of his ancestors. During this the company, who are seated on the ground in a circle around the dancer, join with him in making the cadence, by an odd tone, which they utter all together, and which sounds “Heh, heh, heh.” These notes, if they might be so termed, are articulated with a harsh accent, and strained out with the utmost force of their lungs; so that one would imagine their strength must be soon exhausted by it; instead of which they repeat it with the same violence during the whole of their entertainment.

The women, particularly those of the western nations, dance very gracefully. They carry themselves erect, and with their arms hanging down close to their sides, move first a few yards to the right, and then back again to the left. This movement they perform without taking any steps as an European would do, but with their feet conjoined, moving by turns their toes and heels. In this manner they glide with great agility to a certain distance, and then return; and let those who join in the dance be ever so numerous, they keep time so exactly with each other that no interruption ensues. During this, at stated periods, they mingle their shrill voices with the hoarser ones of the men, who sit around (for it is to be observed that the sexes never intermix in the same dance) which, with the music of the drums and chickicoes, make an agreeable harmony.

The Indians have several kinds of dances, which they use on different occasions, as the Pipe or Calumet dance, the War dance, the Marriage dance, and the dance of the Sacrifice. The movements in every one of these are dissimilar; but it is almost impossible to convey any idea of the points in which they are unlike.”

\* \* \* \*

### GAMES.

“The Indians are greatly addicted to gaming, and will even stake and lose with composure all the valuables they are possessed of. They amuse themselves at several sorts of games, but the principal and most esteemed among them is that of the ball, which is not unlike the European game of tennis.

The balls they use are rather larger than those made use of at tennis, and are formed of a piece of deerskin, which, being moistened to render it supple, is stuffed hard with the hair of the same creature, and sewed with its sinews. The ball-sticks are about three feet long, at the end of which there is fixed a kind of racket, resembling the palm of the hand, and fashioned of thongs cut from a deer-skin. In these they catch the ball, and throw it to a great distance, if they are not prevented by some of the opposite party, who fly to intercept it.

This game is generally played by large companies, that sometimes consist of more than three hundred; and it is not uncommon for different bands to play against each other.

They begin by fixing two poles in the ground at about six hundred yards apart, and one of these goals belong to each party of the combatants. The ball is thrown up high in the centre of the ground, and in a direct line between the goals, towards which each party endeavours to strike it, and whichever side first causes it to reach their own goal, reckons towards the game.

They are so exceedingly dexterous in this manly exercise that the ball is usually kept flying in different directions by the force of the rackets, without touching the ground during the whole contention; for they are not allowed to catch it with their hands. They run with amazing velocity in pursuit of each other, and when one is on the point of hurling it to a great distance, an antagonist overtakes him and by a sudden stroke dashes down the ball.

They play with so much vehemence that they frequently wound each other, and sometimes a bone is broken; but notwithstanding these accidents there never appears to be any spite or wanton exertions of strength to affect them, nor do any disputes ever happen between the parties."

#### THE CALUMET

"From Charlevoix (1721) it is learned that the calumet is strictly the stem or shaft of what is commonly called the calumet pipe; that in those designed for public ceremonial purposes this shaft is very long, and "is of light wood, painted with different colours, and adorned with the heads, tails, wings, and feathers of the most beautiful birds," which he believed were "only for ornament" rather than for symbolic expression; that among those nations among which the calumet is in use it is as sacred as are the wampum belts and strands among the nations among whom these things are in use; that Pawnee tradition asserts that the calumet is a gift from the sun; that the calumet is in use more among the southern and western nations than among the eastern and northern, and it is more frequently employed for peace than for war. He says that if the calumet is offered and accepted it is the custom to smoke in the calumet, and the engagements contracted are held sacred and inviolable, in just so far as such human things are inviolable. Perrot also says that the Indians believe that the sun gave the calumet to the Pawnee. The Indians profess that the violation of such an engagement never escapes just punishment. In the heat of battle, if an adversary offer the calumet to his opponent and he accepts it, the weapons on both sides are at once laid down; but to accept or to refuse the offer of the calumet is optional. There are calumets for various kinds of public engagements, and when such bargains are made an exchange of calumets is usual, in this manner rendering the contract or bargain sacred.

When war is contemplated, not only the shaft but the feathers with which it is dressed are coloured red, but the feathers only on one side may be red, and it is claimed that from the disposition of the feathers in some instances it is possible to know to what nation the calumet is to be presented. By smoking together in the calumet the contracting parties intend to invoke the sun and the other gods as witnesses to the mutual obligations assumed by the parties, and as a guarantee the one to the other that they shall be fulfilled. This is accomplished by blowing the smoke toward the sky, the four world-quarters, and the earth, with a suitable invocation. The size and ornaments of the calumets which are presented to persons of distinction on occasions of moment are suited to the requirements of the case. When the calumet is designed to be employed

in a treaty of alliance against a third tribe, a serpent may be painted on the shaft, and perhaps some other device indicating the motive of the alliance.

There were calumets for commerce and trade and for other social and political purposes; but the most important were those designed for war and those for peace and brotherhood. It was vitally necessary, however, that they should be distinguishable at once, lest through ignorance and inattention one should become the victim of treachery. The Indians in general chose not or dared not to violate openly the faith attested by the calumet, and sought to deceive an intended victim by the use of a false calumet of peace in an endeavour to make the victim in some measure responsible for the consequences. On one occasion a band of Sioux, seeking to destroy some Indians and their protectors, a French officer and his men, presented, in the guise of friendship, twelve calumets, apparently of peace; but the officer, who was versed in such matters and whose suspicion was aroused by the number offered, consulted an astute Indian attached to his force, who caused him to see that among the twelve, one of the calumet shafts was not matted with hair like the others, and that on the shaft was graven the figure of a viper, coiled around it. The officer was made to understand that this was the sign of covert treachery, thus frustrating the intended Sioux plot."

\* \* \* \*

#### CRADLES

"In North American ethnology, the device in which the infant was bound during the first months of life. It served for both cradle and baby's carriage, more especially the latter. In the Arctic region, where the extreme cold would have been fatal, cradles were not used, the infant being carried about in the hood of the mother's fur parka; the Mackenzie River tribes put the baby in a bag of moss. In the warmer regions also, from the boundary of Mexico southward, frames were not universal, but the child, wearing little clothing, was in some way attached to the mother and borne on her hip, where it partly rode and partly clung, or rested in hammock-like swings. The territory between these extremes was the home of the cradle, which is found in great variety. The parts of the cradle are the body, the bed and covering, the pillow and other appliances for the head, including those for head flattening, the lashing, the foot-rest, the bow, the awning, the devices for suspension, and the trinkets and amulets, such as dewclaws, serving for rattles and moving attractions as well as for keeping away evil spirits. Cradles differ in form, technic and decoration. Materials and designs were often selected with great care and much ceremony, the former being those best adapted for the purposes that nature provided in each culture area, and they, quite as much as the wish of the maker, decided the form and decoration."

\* \* \* \*

#### CLOTHING

"The tribes of northern America belong in general to the wholly-clothed peoples, the exceptions being those inhabiting the warmer regions of Southern United States and the Pacific Coast, who were semi-clothed. Tanned skin of the deer family was generally the material for clothing throughout the greater portion of the country, and dressed fur skins and pelts of birds sewed together were invariably used by the Eskimo. The hide of the buffalo was worn for robes by tribes of the plains, and even for dresses and leggings by older people, but the leather was too harsh for clothing generally, while elk or moose

skin, although soft, was too thick. Fabrics of bark, hair, fur, mountain-sheep wool, and feathers were made in the North Pacific, Pueblo, and southern regions, and cotton has been woven by the Hopi from ancient times. Climate, environment, elevation, and oceanic currents determined the materials used for clothing as well as the demand for clothing. Sinew from the tendons of the larger animals was the usual sewing material, but fibres of plants, especially the agave, were also employed. Bone awls were used in sewing; bone needles were rarely employed and were too large for fine work. The older needlework is of exceptionally good character and shows great skill with the awl. Unlike many other arts, sewing was practised by both sexes, and each sex usually made its own clothing. The typical and more familiar costume of the Indian man was of tanned buckskin and consisted of a shirt, breechcloth, leggings tied to a belt or waist-strap, and low moccasins. The shirt, which hung free over the hips, was provided with sleeves and was designed to be drawn over the head. The woman's costume differed from that of the man in the length of the shirt, which had short sleeves hanging loosely over the upper arm, and in the absence of the breechcloth. Women also wore the belt to confine the garment at the waist. Robes of skin, woven fabrics, or of feathers were also worn, but blankets were substituted for these later. The costume presented tribal differences in cut, colour, and ornamentation. The free edges were generally fringed, and quill embroidery and beadwork, painting, scalp-locks, tails of animals, feathers, claws, hoofs, shells, etc., were applied as ornaments or charms. The typical dress of the Pueblo Indians is generally similar to that of the Plains tribes, except that it is made largely of woven fabrics."

\* \* \* \*

#### Bows

"The bows of the North Americans are quite as interesting as their arrows. The varied environments quickened the inventive faculty and produced several varieties. They are distinguished by the materials and the parts, which are known as back, belly, wings, grip, nocks, and strings. The varieties are as follows: (1) Self-bow, made of one piece; (2) compound bow, of several pieces of wood, bone, or horn lashed together; (3) sinew-backed bow, a bow of driftwood or other brittle wood, reinforced with cord of sinew wrapped many times about it lengthwise, from wing to wing; (4) sinew-lined bow, a self-bow, the back of which is further strengthened with sinew glued on. In some cases bows were decorated in colours.

The bows east of the Rockies have little distinction of parts, but the west, Eskimo and Pacific slope varieties have flat wings, and the former shows connection with Asia. The nocks are in some tribes alike, but among the Plains Indians the lower nock is cut in at one side only. Bow-strings are of sinew cord tied at one end and looped at the other."

\* \* \* \*

#### AXES

"The grooved axe takes a prominent place among the stone implements used by the northern tribes. The normal form is that of a thick wedge, with rounded angles and an encircling groove near the top for securing the handle; but there is great variation from the average. Usually the implement is made of some hard, tough stone, as trap, granite, syenite, greenstone, or hematite, where such can be procured; but when these are not available softer

material is utilized, as sandstone or slate. Copper axes are of rare occurrence. Among the stone specimens there is a very wide range in size, the largest weighing upward of thirty pounds and the smallest scarcely an ounce. As these extreme sizes could serve no economic purpose, they were probably for ceremonial use; the smaller may have been amulets or talismans. The majority range from one pound to six pounds, which mark close to the limits of utility. As a rule the groove is at a right angle to the longer axis, though sometimes it is oblique, and it may extend entirely or only partially around the axe. In the latter case it is always one of the narrow sides that is left without a groove, and this is frequently flattened or hollowed to accommodate the handle better. Ordinarily the complete or entire groove is pecked in a ridge encircling the axe, leaving a protuberance above and below, while the partial groove is sunken in the body of the implement. Axes with two or more grooves are rare excepting in the Pueblo country, where multiple grooves are common. The haft was placed parallel with the blade and was usually a withe doubled around the groove and fastened securely with cords or rawhide, but heavier T-shaped sticks were sometimes used, the top of the T being set against the flattened or hollow side of the implement and firmly lashed. Axes with holes drilled for the insertion of a handle are common in Europe, but this method of hafting was of very rare occurrence among the American aborigines. When not made from boulders closely approximating in shape the desired implement, the axe was roughed out by chipping and was reduced to the desired shape by pecking with a hard stone and by grinding. Axes of rude shape, made by flaking a flattish boulder along one end and breaking notches in the sides for hafting, are found in some sections. Axes are well distributed over the country wherever good material is readily available, excepting in the Pacific States, British Columbia and Alaska, where specimens are exceedingly rare. Few are found in Florida, and although plentiful in the mound region are seldom found in mounds. The shapes vary with the different regions, examples from the Atlantic slope, for example, being quite unlike those of the Pueblo country.

It is probable that the axe served various purposes in the arts, and especially in war and in the chase. Numerous badly fractured specimens are found in the soapstone quarries of Eastern United States, where they were used for cutting out masses of this rock. The grooved axe is said to have been used in felling trees and in cutting them up, but it is manifestly not well suited for such work; it would serve, however, to assist in cutting wood in conjunction with charring. The hafted stone axe passed immediately out of use on the introduction by Europeans of the iron axe, which was the first and most obviously useful tool that the Indians saw in the hands of the white man."

\* \* \* \*

#### CANNIBALISM

"In one form or another cannibalism has been practised among probably all peoples at some period of their tribal life. In America there are numerous recorded references to its occurrence within historic times among the Brazilians, Carib of northern South America, the Aztec and other Mexican tribes, and among many of the Indians north of Mexico. The word itself, now more commonly used than the older term anthropophagy, is derived from *Carib* through Spanish corruption. Restricting treatment of the subject to the tribes north of Mexico, many evidences of cannibalism in some form are found—from the ingestion, perhaps obligatory, of small quantities of human flesh, blood,

brain, or marrow, as a matter of ceremony, to the consumption of such parts for food under stress of hunger, or even as a matter of taste. Among the tribes which practised it, in one or another of these forms, may be mentioned the Montagnais, and some of the tribes of Maine; the Algonkin, Arrouchiquois, Micmac, and Iroquois; farther west the Assiniboin, Cree, Foxes, Miami, Ottawa, Chippewa, Illinois, Kickapoo, Sioux, and Winnebago; in the south the people who built the mounds in Florida, and the Tonkawa, Attacapa, Karankawa, Kiowa, Caddo, and Comanche; the northwest and western portions of the continent, the Thlingchadinneh and other Athapascan tribes, the Tlingit, Heiltsuk, Kwakiutl, Tsimshian, Nootka, Siksika, some of the Californian tribes, and the Ute. There is also a tradition of the practice among the Hopi, and allusions to the custom among other tribes of Arizona and New Mexico. The Mohawk and the Attacapa, Tonkawa, and other Texas tribes were known to their neighbours as "man-eaters."

Among the Iroquois, according to one of the Jesuit fathers, the eating of captives was considered a religious duty. Among the Heiltsuk, and recently among the Tsimshian and Kwakiutl, cannibalism formed a part of one of their ceremonies. Several instances are recorded in which cannibalism was indulged in by individuals while in a frenzied state. Finally, it seems that among a few tribes, as the Tonkawa, Iroquois, and others, man-eating, though still with captives as the victims, was practised on a larger scale, and with the acquired taste for human flesh as one, if not the chief, incentive, yet the Tonkawa, as well as some men long associated with them, declared that the eating of human flesh by them was only ceremonial.

---

## ACCESSIONS TO THE ARCHÆOLOGICAL COLLECTIONS

PROCURED FROM THE ESTATE OF W. H. G. COLLES, PER HIS DAUGHTER,  
MRS. M. E. SCHLENKER, CHATHAM, ONTARIO.

- 43584-43602—Axes or adzes.  
43603-43604—Hammer stones.  
43605-43606—Clay pipe-bowls.  
43607—Fragment of clay pipe-stem.  
43608—Fragment of gorget.  
43609—Fragment of stone tube.  
43610—Stone bead.  
43611—Round stone with hole.  
43612—Stone pendant.  
43613—Head feather.  
43614—String of wampum.  
43615-43632—Spearheads.  
43633-43718—Arrow-points.  
43719-43721—Scrapers.  
43722-43731—Round stones.  
43732-43733—Spearheads.  
43734-43736—Arrow-heads.  
43737—Chert knife.  
43738-43742—Arrow-heads.  
43743-43747—Chert arrow-heads.  
43748-43750—Chert scrapers.  
43751-43756—Chert arrow-heads.  
43757-43766—Chert arrow-heads.  
43767-43771—Chert arrow-heads.

GIFT OF WM. MILES, INGERSOLL, ONTARIO.

- 43772—Chert drill found on Lot 13, Con. 3, W. Oxford Tp.

GIFT OF L. D. BROWN, ST. MARY'S, ONTARIO.

- 43773—Ship's axe.

GIFT OF DR. EMMERSON BULL, LAMBTON MILLS, ONTARIO.

- 43774—Skull and skeleton found at Islington, Ontario.

GIFT OF CHAS. RUSSELL, PORT ROWAN, ONTARIO.

- 43775—Arrow-head, found on Lot 13, Con. 8, Walsingham Tp.  
43776—Stone bead—no record.

PROCURED FROM S. WENROTH, TORONTO.

- 43777—Beaded belt.  
43778—Beaded tobacco pouch.

GIFT OF S. WENROTH, TORONTO.

- 43779—Axe or adze.

GIFT OF E. Y. CONNELL, ST. KITTS, BRITISH WEST INDIES.

- 43780—Shell chisel.
- 43781—Shell gouge.
- 43782—Shell axe.
- 43783—Shell chisel.
- 43784—Shell disc.
- 43785-6—Shell beads.
- 43787—Two stone beads.
- 43788—Stone ornament.
- 43789—Stone celt.
- 43790—Fragment of pottery.

PROCURED FROM MRS. GEO. B. BURNFIELD, MOUNT ST. LOUIS, ONTARIO,  
 FOUND IN MEDONTE TP., ONTARIO.

- 43791—Stone pipe.
- 43792-43806—Clay pipes.
- 43807-43817—Fragments of clay pipes.
- 43818-43831—Clay pipe stems.
- 43832-43871—Fragments of pottery.
- 43872—Bone awl.
- 43873-43877—Bone needles.
- 43878-43879—Axes or adzes.
- 43880—Gambling stone.
- 43881—Stone bead.
- 43882—Seventeen beads (Catlinite and wampum).
- 43883-43885—Copper lugs.
- 43886-43890—Fragments of copper pots.

BY EXCHANGE WITH H. A. VAN WINCKEL, TORONTO, ONTARIO.

- 43891—Beaded fire-bag, Lethbridge, Alta.

ON LOAN FROM W. A. CAMPBELL, NORTH BATTLEFORD, SASK.,  
 FOUND IN SIMCOE COUNTY, ONTARIO.

- 43892—Stone pipe.
- 43893-43894—Clay pipes.
- 43895-43898—Fragments of clay pipes.
- 43899—Shell gorget.
- 43900-43906—Bone awls.
- 43907—Bone spear.
- 43908-43911—Pieces of worked shell.
- 43912-43919—Strings of Catlinite and wampum beads.
- 43920—Six copper rings and bangles.
- 43921-43922—Stone axes or adzes.
- 43923-43930—Arrow-heads.

## ACCESSIONS TO THE BIOLOGICAL COLLECTIONS

GIFT OF SAM WALLER, MOOSE FACTORY, ONTARIO.

- 1 Belted Kingfisher.
- 2 Bonaparte Gulls.
- 2 Sparrow Hawks.
- 1 Sharp-shinned Hawk.
- 1 Bronzed Grackle.
- 4 Robins.
- 3 Canada Jays.
- 1 Rusty Blackbird.
- 3 Redwinged Blackbirds.
- 2 Yellow-bellied Woodpeckers.
- 7 Prairie Horned Lark.
- 1 Pine Grosbeak.
- 2 Lapland Longspurs.
- 3 White-throated Sparrows.
- 1 White-winged Crossbill.
- 1 Tree Sparrow.
- 1 Palm Warbler.
- 1 Ruby-crowned Kinglet.
- 1 Red-breasted Nuthatch.
- 5 Purple Finches.
- 1 Mocking Bird.
- 1 Long-tailed Duck.
- 1 Hornbell Grebe.
- 1 Black Tern.
- 1 Caspian Tern.
- 3 Common Tern.
- 1 Flicker.
- 3 Turnstones.
- 1 Killdeer.
- 1 Pectoral Sandpiper.
- 1 Meadow Lark.
- 2 Cedar Waxwings.
- 2 Snow Buntings.
- 1 Gray-cheeked Thrush.
- 1 Tree Swallow.
- 1 Black and White Warbler.
- 2 Yellow Warblers.
- 1 Bay-breasted Warbler.
- 1 Redstart.
- 2 Magnolia Warblers.
- 1 Kingbird.
- 1 Yellow-bellied Flycatcher.
- 2 Savanna Sparrows.
- 2 Song Sparrows—western type.
- 1 Lincoln Sparrow.
- 1 Flying Squirrel.
- 1 Red Squirrel.
- 2 Meadow Mice.
- 1 Vole.
- 2 Jumping Mice.

GIFT OF C. HOLT, PICKERING, ONTARIO.

- 4 Great-horned Owls.
- 1 Red-tailed Hawk.
- 1 Saw-whet Owl.

## GIFT OF LLOYD JOHNSON, TORONTO, ONTARIO.

1 Great-horned Owl.

## GIFT OF JACK MINER, KINGSVILLE, ONTARIO.

6 Common Crows.

## GIFT OF THE GAME AND FISHERIES DEPARTMENT OF ONTARIO.

2 Mute Swans.

## GIFT OF ROBT. E. VIRTUE, TORONTO, ONTARIO.

3 Flickers.

4 House Sparrows.

1 Kingfisher, Belted.

1 Blue Jay.

2 Olive-backed Thrushes.

2 Yellow-bellied Woodpeckers.

3 Chicadees.

1 Wood Thrush.

1 Flicker's nest.

1 Robin.

1 Junco.

## PROCURED FROM CHAS. HOLT, PICKERING, ONTARIO.

1 Great Grey Owl.

1 Screech Owl.

1 Saw-whet Owl.

1 Goshawk.

1 Night Hawk.

1 Meadow Lark.

1 Flicker.

1 Yellow Warbler.

1 Scarlet Tanager.

1 Brown Thrasher.

1 Humming Bird.

1 Blue Jay.

2 Mourning Doves.

2 Pine Grosbeaks.

1 Star-nosed Mole.

1 Shrew.

2 Weasles

LAIDLAW ARCHÆOLOGICAL COLLECTION.

LAIDLAW ETHNOLOGICAL COLLECTION.

## GEORGE EDWARD LAIDLAW

George Edward Laidlaw, so well-known for his work in Canadian Indian archæology and Indian folk-lore, passed away on January 15, 1927, at his late residence near Balsam Lake, at "The Fort," Victoria Road. He was born in Toronto, November, 1860, the eldest son of George Laidlaw, the well-known promoter and builder of pioneer railways, and his wife, Anne Laidlaw. He received his education at the following schools, which he attended: Dr. Oliver's (College Street), the Model School, and Upper Canada College, all three being in Toronto; Dr. Tassie's Grammar School, Galt; and he was a graduate of the Royal Military College, Kingston. During the Riel Rebellion, in 1885, he served as a lieutenant in the Midland Battalion, becoming severely wounded at the battle of Batoche. Afterward, he received the North-West medal and Bar, Sask., and also the Gold Star and Bar (Batoche). When the South African Boer War broke out, he enlisted in the Strathcona Horse, and was soon gazetted lieutenant and attached to the Pom Pom Machine Gun Battery, before leaving Canada. For his services in this commission he received Queen Victoria's medal with three bars,—Belfast, Orange Free State and Natal—from King Edward VII on the return of the Strathcona Horse from South Africa, via England, (silver and bronze medals, Strathcona Horse.) Canada medal (silver). On his return to Canada he was presented with a sword of honour by the citizens of Kirkfield. When the outbreak of the Great War occurred in 1914 he was one of the first to offer his services to the King, but was deemed to be physically unequal to overseas service, and was appointed an honorary lieutenant-colonel of the Cadet Corps. For several years he served as reeve of Bexley and in the Victoria County Council. He was unmarried; in his religious affiliation he was a Presbyterian, and in politics a Conservative. For many years he was a partner of Laidlaw & Macdonald, "The Fort Ranch," Balsam Lake, where they carried on an extensive business as cattle dealers and grazers. He was survived by two brothers: James W., of Lindsay, Ont., and Charles Shedden R., of Toronto; and by two sisters: Mrs. Lyman Dwight, Montreal, and Mrs. A. A. Macdonald, Toronto.

He collected an extensive quantity of Indian relics, especially in the Balsam Lake region, which he presented some years ago to the Provincial Museum of Ontario, becoming in this line of research a recognized authority on the industrial arts of the North American Indian. He wrote a large number of articles on the subject, a majority of which have appeared in former numbers of this annual report. The first Indian relics which he found were near Galt and Puslinch, and from this beginning his extensive work had a start. His contributions to the subject have been so numerous, beginning with the Fourth Archæological Report (1890) and continuing down to shortly before his final illness, that the slightest attempt at enumeration would be impossible in this brief sketch. His place in the archæological research of Ontario will be a difficult one to fill, so valuable has his work proved to be for workers in the same field.—A. F. H.

UNIVERSITY OF TORONTO  
REPORT  
OF THE  
BOARD OF GOVERNORS  
FOR THE  
YEAR ENDING 30th JUNE  
1928

(Sessional Paper No. 12, 1929)

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO:  
Printed and Published by the Printer to the King's Most Excellent Majesty  
1929

# UNIVERSITY OF TORONTO

---

## REPORT OF THE BOARD OF GOVERNORS

FOR THE YEAR ENDED 30TH JUNE, 1928.

---

*To His Honour the Lieutenant-Governor-in-Council:*

The Governors of the University of Toronto have the honour to submit their twenty-second annual report, accompanied by the President's report upon the academic work of the University and its Colleges for the Session 1927-28, and the reports of various officers and departments. There are also included the usual detailed statements of the receipts and expenditures of the Board for the fiscal year which closed on 30th June, 1928, with the certificate of audit by Mr. G. T. Clarkson attached.

In furtherance of the policy of acquiring properties on the east side of St. George Street the Board purchased during the past year another house and lot at an outlay of \$30,054, and the building is now occupied by the office of the Alumni Federation and some members of the staff in Political Economy. Subsequently arrangements were made for a further purchase. This will exhaust the funds at the Board's command for this purpose.

Payments were completed during the year upon the construction accounts of the new Hygiene and Public Health Building and of the Arena. The cost of the former was \$417,642, towards which the Rockefeller Foundation contributed a grant of \$400,000; of the latter \$223,070, which amount will be repaid from the earnings of the Athletic Association over the next few years. Both of these buildings have proved to be of value to the work of the University and their erection has been fully justified. The Arena, in particular, was most happily utilized in connection with the celebrations attending the centenary of the granting of the Royal Charter to King's College. These functions took place in the beginning of October, and their net cost, including the Memorial Volume printed for the occasion, was \$26,483.

The ordinary revenue of the year was \$1,284,927, from which sum there has to be deducted \$27,768 for interest written to Scholarship and other trust funds, leaving a net revenue of \$1,257,159. In addition to this there was received the special Legislative grant of \$1,188,151, making a total available income of \$2,445,310.

The expenditure under the appropriations for salaries and maintenance failing to be met out of general revenue (exclusive of the Ontario College of Education, which is supported by a separate vote) was \$2,336,575, leaving a

balance of \$108,735 which has been added to and carried forward in the Special Contingent Fund to meet future needs in connection with the new Pathological building and other purposes.

All of which is respectfully submitted.

H. J. CODY,  
*Chairman.*

Toronto, 30th November, 1928.

# PRESIDENT'S REPORT

1927-1928

*To the Governors of the University of Toronto:*

GENTLEMEN:

I beg to submit the following report on the academic work of the University and University College during the twelve months ended June 30th, 1928.

The total staff of the University and University College numbered 689, of whom 101 were professors, 71 associate professors, 62 assistant professors, 133 lecturers, associates (in medicine) and instructors in the College of Education, 1 director, 1 director of field work, 320 demonstrators, fellows and instructors with sessional appointments. They were distributed as follows:

	Professors	Associate Professors	Assistant Professors	Associates	Lecturers	Directors	Assistant Directors	Instructors	Other Sessional Appointments
University (Faculty of Arts).....	36	16	24	—	21	—	—	—	78

In Trinity College there were:

Professors.....	10
Lecturers.....	4

In St. Michael's College there were:

Professors.....	16
Lecturers.....	12

I regret to report the death of Professor John Squair, on February 15th, 1928, and of Professor John Thomas Crawford, on July 17th, 1928. Since his retirement from the chair of French in 1916 Professor Squair had worked constantly and published much valuable work in connection with the study of French and the history of various phases of the life of the Province of Ontario. His genial presence will be much missed by the older members of the University staff, and the sympathy of the University goes out to Mrs. Squair and his daughter. The many friends of Professor J. T. Crawford were greatly shocked when the news came in July of his sudden death at Innsbruck while he was travelling during the summer through Europe with his wife and family. He was one of the best teachers of mathematics in the province, and filled the chair of methods in mathematics in the Ontario College of Education with great satisfaction to his students and the University. His colleagues will long cherish his memory as a warm friend and their sympathy goes out to his wife and family.

The following retired:

Maurice Hutton, M.A., Oxon., LL.D., Professor of Greek and Principal of University College; George McKinnon Wrong, M.A., LL.D., McGill, Professor of History; Samuel Walter Perry, B.A., Lecturer in Art and Commercial Work, Ontario College of Education.

At the close of the academic year Maurice Hutton retired from his active duties as Principal of and Professor of Greek in University College, having held the latter position since 1880, and the former since 1901. One of the most distinguished figures in the history of the University now enters the ranks of the *emeriti*, but we hope that for many years he will be spared as a beloved member of the University society and continue to delight and instruct audiences of the province by his lectures. This is not the place to estimate his contribution to the life of the University, suffice it to say that he has been the most powerful single influence in bringing the classical standards of the University to the eminent position which they admittedly occupy. His distinction of mind and character has set forth the ideals of Greek thought which he interpreted in his own original way to many generations of admiring students, some of whom are among the leaders of Canada.

George MacKinnon Wrong has retired from the department of history in the University in which he has occupied with high distinction, first the position of lecturer from 1892-1895, and since then of professor and head of the department. An excellent teacher, devoted to the welfare of his students, he was held in great respect by successive classes. He brought the study of history to an outstanding place in the University, and by his many publications and his encouragement of younger scholars he became an acknowledged authority in his subject in this country and abroad. His colleagues much regret his retirement.

Samuel Walter Perry was one of the first members of the staff of the Faculty of Education and during the twenty-one years in which he occupied his position as instructor in the methods of teaching art he won the highest regard of his students, and his work was greatly appreciated by the Dean of the Faculty and the Department of Education. Retiring on account of having reached the age limit he carries with him the warm esteem of his colleagues.

The following resigned their positions:

Leslie Charles Coleman, B.A., professor of plant pathology; Joseph Horace Faull, B.A., Ph.D., Harvard, Professor of Botany; James Wesley Ingram, D.D.S., Professor of Dental Anatomy; John James Rickard Macleod, M.B., Ch.B.,

Aberdeen, D.P.H., Cantab., D.Sc., Professor of Physiology: David Duff, M.A., B.D., Edin., Associate Professor of Latin; William Goldie, M.B., Associate Professor of Clinical Medicine; Frederick Adam Cleland, B.A., M.B., Assistant Professor of Obstetrics and Gynaecology; David King Smith, M.B., Assistant Professor of Medicine and Clinical Medicine; John Gordon Gallie, B.A., M.B., Associate, Obstetrics and Gynaecology; Healey Willan, Mus. Doc., Lecturer, Theory of Music.

The resignations of these gentlemen have been received with regret by the University but with gratitude for the services they have rendered.

Professor J. J. R. Macleod resigned the Chair of Physiology to accept the same chair, at the call of his *alma mater*, in the University of Aberdeen. He has left amid the deep regret of this University to which for ten years he devoted his conspicuous abilities with increasing energy and brought much prestige, having been one of the leaders in the development of medical education and research so manifest in recent years. He takes with him our gratitude and best wishes.

Harvard University having offered Dr. Faull a Chair of Research with less burdensome duties than in Toronto, to our great regret he left us after twenty-six years here of excellent and enduring work. He was appointed lecturer in 1902, and Professor and Head of the Department in 1918.

Professor David Duff resigned his position in order to return to Edinburgh. For the fourteen years in which he has been on the staff of University College he has done valuable work as a teacher, and has won the regard of his colleagues for his high qualities as a scholar and a gentleman.

Leave of absence was granted to the following:

James Alfred Dale, M.A., Oxon., Professor and Director of the Department of Social Service, on account of illness; William Jackman, M.A., Professor of Rural Economics, on account of illness; Herbert Sutherland McKellar, B.A., Associate Professor of French, for the Easter Term to study abroad; Robert Boyd Thomson, B.A., Professor of Phanerogamic Botany, for the Michaelmas Term, to attend the International Scientific Council of Agriculture in Rome; Humphrey Hume Wrong, B.A., Tor., (Oxon.), B.Litt. Oxon., Assistant Professor of History, to perform the duties of first secretary of the Canadian Legation at Washington.

The following new appointments and promotions were made during the year:

In the Faculty of Arts—Appointments: Frank Hawkins Underhill, B.A., Professor of History; Edward Johns Urwick, M.A., (Oxon.), Professor of Political Economy; William Stewart Wallace, M.A., Professor History; Dixon Lloyd Bailey, B.A., (Queen's), M.S., Ph.D., (Minn.), Associate Professor of Plant Pathology; Henry Reid MacCallum, B.A. (Queen's) (Oxon.), Assistant Professor of Philosophy; Francis Gordon Bennett, B.A., Cantab., Lecturer in Latin; Miss Ruth Cary, B.A. (Lond.), Lecturer in Latin; Donald Grant Creighton, B.A. (Tor.), (Oxon.), Lecturer in History; William Kenneth Gibb, B.Com., Lecturer in Political Economy; John Henry Iliffe, M.A., Cantab., Lecturer in Archaeology; Frederick Reginald Lorriman, M.A., Ph.D., Lecturer in Chemistry; Miss Adelaide Helen Grant Macodnald, M.A., Lecturer in Law and Political Institutions; Miss Marion Squair, M.A., Lecturer in French; Miss Helen Maud Wickware, B.A., Lecturer in Italian and Spanish.

Promotions: Ralph Flenley, M.A. (Liverpool, B.Litt. (Oxon.)), from an associate-professorship to a professorship in History; George Malcolm Smith, B.A. (Tor.), M.A. (Oxon.), from an associate-professorship to a professorship in

History; Archibald Gowanlock Huntsman, B.A., M.B., from an associate-professorship to a professorship in Marine Biology; Gilbert Edward Jackson, B.A. (Cantab.), from an associate-professorship to a professorship in Political Economy; Wilhelm Ernst Blatz, M.A., M.B., Ph.D. (Chicago), from an assistant-professorship to an associate-professorship in Psychology; Earle Douglas MacPhee, M.A., B.Ed. (Edin.), from an assistant-professorship to an associate-professorship in Psychology; Herbert Sutherland McKellar, B.A., from an assistant-professorship to an associate-professorship in French; Vincent Wheeler Bladen, M.A. (Oxon.), from a lectureship to an assistant-professorship in Political Economy; Alexander Brady, B.A. (Oxon.), M.A., Ph.D. (Tor.), from a lectureship to an assistant-professorship in Political Economy; George Williams Brown, M.A., Ph.D. (Chicago), from a lectureship to an assistant-professorship in History; Lester Bowles Pearson, B.A. (Tor.), (Oxon.), from a lectureship to an assistant-professorship in History; Arthur Francis Chesterfield Stevenson, B.A. (Cantab.), from a lectureship to an assistant-professorship in Mathematics.

In the Faculty of Medicine—Appointments: Lawrence Irving, A.B. (Bowdoin), A.M. (Harvard), Ph.D. (Stanford), associate professorship of Physiology; Emerson James Trow, M.B., assistant professor of Medicine and Clinical Medicine; Roscoe Reid Graham, M.B., associate in Surgery and Clinical Surgery; Malcolm McLachlan Crawford, M.B., associate in Medical Jurisprudence.

Promotions: Donald Thomas Fraser, B.A., M.B., D.P.H., from an assistant-professorship to an associate-professorship in Hygiene and Preventive Medicine; Julian Derwent Loudon, B.A., M.B., from an associateship to an assistant-professorship in Medicine and Clinical Medicine; George Ewart Wilson, M.B., F.R.C.S., from an associateship to an assistant-professorship in Surgery and Clinical Surgery.

In the Faculty of Applied Science—Appointment: Victor George Smith, B.A.Sc., lecturer in Electrical Engineering.

Promotions: Eric Ross Arthur, M.A., B.Arch., (Liverpool), from an assistant-professorship to an associate-professorship in Architecture; Henry Harrison Madill, B.A.Sc., from an assistant-professorship to an associate-professorship in Architecture; Frederick Charles Dyer, B.A.Sc., from an assistant-professorship to an associate-professorship in Mining Engineering; James Thomas King, B.A.Sc., from an assistant-professorship to an associate-professorship in Mining Engineering; William James Smither, B.A.Sc., from an assistant-professorship to an associate-professorship in Structural Engineering; Walter Scott Guest, B.A.Sc., from a lectureship to an assistant-professorship in Electrical Engineering; John Waller Melson, B.A.Sc., from a lectureship to an assistant-professorship in Surveying and Geodesy.

In the Faculty of Household Science—Appointment: Miss Edna Wilhelmine Park, M.A., lecturer in Household Science.

In the Faculty of Forestry—Appointment: Robert Christie Hosie, B.Sc.F., lecturer in Forestry.

Promotion: James Herbert White, M.A., B.Sc.F., Ph.D., from an associate-professorship to a professorship in Forestry.

In the Faculty of Music—Appointments: Ernest MacMillan, B.A. (Tor.) Mus. Doc. (Oxon.), dean; Leo Smith, Mus. Bac., lecturer in Theory of Music.

In the Faculty of Dentistry—Promotions: Stanley Stuart Crouch, D.D.S., from an associateship to a professorship in Dental Anatomy; Charles Alvin

Snell, D.D.S., from an associateship to an associate-professorship in Periodontology.

In the Ontario College of Education—Appointment: Miss Winnifred Glen Barnstead, B.A. (Dalhousie), director, Library School.

Promotions: John Thomas Crawford, B.A., from an associate-professorship to a professorship in Methods in Mathematics; John Oliver Carlisle, M.A., from an assistant-professorship to an associate-professorship in Methods in Classics; Walter Ernest Macpherson, B.A., LL.B. (Queen's), from an assistant-professorship to an associate-professorship in Education; Miss Laura Lavinia Ockley, B.A., from an assistant-professorship to an associate-professorship in Household Science; Miss Alicia Enid Robertson from an instructorship to a lectureship in Household Science.

The total number of students registered in the University in 1927-1928 was 5,986, distributed as follows:

The number of regular students in attendance at the University was 5,511, as compared with 5,025 last year. This is an increase of 486 over the preceding year.

In addition to the students in the regular courses at least 3,160 have been receiving instruction provided by the University through its extension department in evening classes held in Toronto, Hamilton, St. Catharines, Fort William, Windsor, and Brantford.

The progress of the teaching and research departments of the University is outlined in the appended reports. I am happy to be able to say that they indicate that the work of the year has been most satisfactory. Attention may be called to a very few of the features of the reports which I have received from the staff.

The Department of Psychology under Dr. Bott and his associates has been during the last few years attracting the attention of psychologists in the United States, and has been greatly widening its interests through the help of the Laura Spelman Rockefeller Memorial for Child Research, and of Canadian institutions

which have come to realize the aid that psychology may render to them in the choice of personnel.

The Faculty of Applied Science has arranged for a course in Aeronautics under the direction of Professor Parkin, whose researches in the problems of this field have been favourably received. In the immediate future the number of students may not be large, but Canada is bound to offer opportunity in this department of activity, and young men will turn to this branch of engineering who in former years would have entered other courses.

The call for foresters in government employment is increasing, especially for men to investigate the possibilities for pulpwood in the northern burnt-over tracts, and in the pulp and paper industries.

In the Faculty of Dentistry the standards of entrance have been raised to conform to those of McGill and the leading American universities. This has been one material cause in the reduction of the numbers of the first year, but another major cause is the widespread opinion in the profession of the Province that there is a superabundance of practising dentists by reason of the large classes which completed their course in the years after the war. In order, however, to meet the needs of the Province there should be on the average an incoming class of sixty.

The rapid growth of the school of graduate studies is most gratifying. There were 121 students in attendance holding degrees from other universities of Canada, and 10 from other parts of the Empire. The wide area from which students come is a proof that the school is meeting a real need in this country at a time when our national development is calling loudly for more well-trained scientists.

The establishment through the leadership of the Honourable G. H. Ferguson of the Research Foundation for Ontario has awakened much interest in the University. Already for some years the research activities of the staff have been developing with vigour, and as shown in this annual report even during the past year excellent results have been obtained. Therefore those who direct the new Research Foundation may be assured of the heartiest co-operation that the University can give in contributing to its success. Its establishment holds forth the promise of retaining many of our well-trained graduates to build up our own country, and the rapid growth of our post-graduate school indicates that there should be no lack of persons ready to devote their talents to the field of research.

The extension work of the University has grown with great rapidity in all its branches, and under this department the effort is made to test out emerging educational needs, so that without undue loss such as may require permanent provision will be carefully selected in process of time.

In the Department of Public Health Nursing the first year of a new course was begun whereby nurses who look forward to work of this character will take a year at the University, and thereafter two years of practical work at a hospital, concluding with a final year at the University. Also arrangements have been completed for beginning in the session 1928-1929 a new course, to be conducted under the Extension Department, for preparing graduate nurses for teaching and administrative posts in their profession.

The continued ill-health of Professor J. A. Dale is greatly to be regretted, but I wish to express my thanks to Professor E. J. Urwick for the generous way in which he undertook the extra burden of supervising the Department of Social Service in the absence of the director.

The physical health of the students has been excellent, as is evident from the reports of Dr. Porter and Dr. Edith Gordon. Also, the record of sport is

one of successful activities such as might be expected from students in the best of condition. Fortunately we have been able to provide better temporary quarters for the Women's Health Department, and it is to be hoped that some of the oppressive difficulties under which Dr. Gordon has done her work hitherto will be lessened. The building for the Physical Training of Women which has been so long needed is still urgently required.

Each year Hart House under the direction of Mr. Bickersteth and his faithful staff has become a greater boon to the men students of the University. The preceding summer was a particularly heavy one because of the large number of visiting bodies, with more or less academic affinity, which came to Toronto and were entertained at Hart House by their hosts. Such a burden is thrown upon the staff of the house during the summer by these visiting societies, that it may be necessary for the Governors to limit the number which may be granted the privileges of entertainment in any one year.

The cultivation of music in Hart House has been developing so successfully, chiefly because of the generous co-operation of many of the leading artists of the city, that those interested in music are strongly of opinion that a permanent Director of Music would be able to discover and develop a great deal of latent power in the undergraduate body of men and women, and give music a place in the University which would mean much for the cultural life of this country.

Among other important developments which should be made in the University in addition to the Chair of Fine Arts to which reference was made in my last report, is the assignment of a definite place to the teaching of and research in geography. This vast country has been the scene of historic explorations and of important movements of peoples. The Geological Survey of Ottawa has done scientific work of the first order, and the commercial connections of the Dominion with almost every part of the world are being made with remarkable rapidity. In the Universities of Great Britain and Europe the importance of geography has long been recognized, but on this continent it is only recently that provision has been made for it in leading institutions. In Canada no such department on any sufficient scale has yet been created. It is hoped that it will be found possible to take steps in this direction before long.

The question has often been raised why many of those who receive standing at the end of their first year in Arts do not enter upon the work of the second year. It is at this stage that most leave the University because of evidence insufficient preparation for their courses has then become manifest. Of those qualified to return after the examinations of May, 1927, thirty-eight did not register in the session 1927-28. I find in response to a circular which I sent to each asking for information, that about half of those who answered did not complete their courses for financial reasons, but that several hope to resume their studies. One did not return because of an accident, a few changed their residence, others went to permanent occupations, a very small number expressed disappointment with what they got from their courses. It is evident that the time-honoured struggle to secure an education still exists, and that in spite of our per capita wealth in Canada many a student, as in the past, finds himself handicapped through lack of funds. In all the faculties the majority of students contribute something to their own support, and many struggle hard to get an education. This spirit means much for the welfare of the University as a whole. Any university is glad to help worthy students as far as it is within its power, and welcomes benefactions which make grants and loans possible. Many a good student loses valuable time in winter and in summer by the drudgery which he finds it necessary to undergo in order to earn his livelihood. It is

therefore gratifying that in the past few years friends of the University recognizing this need have contributed for new scholarships and fellowships, which almost certainly will bear good returns through the greater freedom that they will make possible for intellectual work. Occasionally fears have been expressed usually, perhaps, by the well-to-do who are able to support their own sons and daughters, that loss of self-respect may result through the distribution of free scholarships. It is interesting, therefore, to read in a recent report of the Carnegie Trust, which has now for many years been paying the fees of needy students in the Scottish Universities, that last year there were 836 men and 568 women beneficiaries in Edinburgh University. Further the report states that "the utmost care is taken to prevent abuse by applicants of the Funds of the Trust. Each case is considered on its merits. The parent or guardian is required to furnish a confidential statement giving full details of the financial circumstances of the family. The Chairman of the Trustees, Lord Sands, in presenting the Report stated that out of every 100 matriculated students in the Scottish Universities forty-four are eligible for Carnegie grants, that only 7.5 per cent. of the new beneficiaries last year were the children of parents who have an income exceeding the equivalent of £250 on a pre-war standard, and that fifty-five per cent. of the parents have incomes of less than the equivalent of £130 on the same standard. . . . The figures show that repayments are greatly increasing."

The Registrar has furnished the following report on the occupation of the parents of students who entered the University in 1927:

An analysis of these figures has been made for me by Professor H. R. Kemp with a view to comparing numbers with the totals of each occupational class in Ontario. His results, however, have been less satisfactory than they might have been had the Dominion statistics of 1921 been available, and on the publication of the classification of the last census more accurate information will be obtainable on the basis of an average of the last five years. Meantime, it is obvious that far more students proportionately come to the University from professional homes than from those whose heads are in business or the industries including agriculture. The professions also stand remarkably close to one another in the ratio of their sons and daughters who are in attendance. The University reflects the changing social conditions of the Province, and the relative position of agriculture and other industries, as compared with what it used to be, is very evident from these statistics. As a result the development of the University shows itself not so much in an increase of numbers, as in the provision for new courses of instruction arising out of the more complicated structure of modern society. Specialized functions in the older professions and newer vocations make incessant demands which account for the rising costs of education.

Reference was made in my last report to the preparations undertaken for the celebration of the centenary of the granting of the Royal Charter to King's College in 1827. The proceedings began on October 6th, and continued to the 10th, and were by common consent highly successful. By delegate, address, or message more than 250 universities and learned societies were represented, over 2,000 graduates were present, the students of the University co-operated enthusiastically, and throughout there was manifest a feeling of great goodwill. The underlying affection of alumni and students for their *alma mater* was shown as probably never before. Fortunately, the weather was excellent on the occasions when sunshine was needed for processions, receptions and games. The variety of the programme added to the interest, the presence of outstanding figures in the public life of the Dominion, and of distinguished scholars and scientists from abroad, and the warmth of the congratulations received from the universities of the world were most gratifying. The University, having been accorded this sincere recognition, has addressed herself with renewed confidence to her work for this Province and the people of Canada.

Concurrently with the celebration of the general centenary the fiftieth anniversary of the creation of the School of Practical Science was emphasized by various proceedings participated in chiefly by graduates of the Faculty of Applied Science, who returned for the occasion in large numbers, evincing as usual their loyalty for and interest in the old "school."

A most successful conference of persons interested in the investigation of colloids met at the University in the middle of June. Doubtless the attendance was augmented by the announcement that Sir iWilliam Hardy of Cambridge would be present.

After very careful consideration it was decided, in order to meet the plans of the Toronto General Hospital, to remove the Pathological building of the University to a site on the north side of College Street opposite the hospital. In this building there will be included beside Pathology and Pathological Chemistry, research laboratories for the Clinical Departments, and accommodation for Dr. Banting and his work in medical research. The new position is the best that could have been chosen, and the grouping of these related departments in one building means much for the medical development of the University.

During the session the following special lectures were delivered:

By visitors to the Centenary celebrations as follows: Dr. R. W. Livingstone, Vice-Chancellor of the Queen's University of Belfast: "The Place of Poetry in Education and Life," "What Poetry is," "On Judging Poetry," "The Poet as Moralist" (Virgil), "The Poet as Artist" (Virgil), "Poetry for Poetry's Sake" (Sophocles); Dr. J. C. Smith, Chief Superintendent of Education for Scotland, at the Ontario College of Education, "Education in Scotland."

A course of twelve lectures on "The Ethnological Background of Asiatic History," by Sir Bertram Windle, F.R.S., special lecturer in Ethnology in the University of Toronto; two lectures on "Czechoslovakia" and "Karst Phenomena," by Dr. Jiri V. Danes, professor of Geography at Charles University, Prague; two lectures on "Atoms, Molecules and Chemical Combination" and "Atomic and Molecular Physics," by Professor J. Franck, director of the Physical Laboratory, University of Göttingen; two lectures on "The Natural Chemical Stimuli Affecting the Motility of the Alimentary Canal" and "The Innervation of the Salivary Glands," by Dr. Boris Babkin, research professor of Experimental Medicine, McGill University; a lecture on "Causality in Modern Science," by Professor H. A. Kramers, of Rijks-University, Utrecht; two lectures on "The Mystery Religions," by Professor S. Angus of St. Andrew's College, Sydney, Australia; a lecture on "Charles Dickens," by Professor Wilhelm Debelius of the University of Berlin; a lecture on "Unity of Mediaeval Civilization," by Professor T. F. Tout of the University of Manchester; a lecture on "The Government of a British Colony," by Sir Gordon Guggisberg, Governor of the Gold Coast Colony.

Nine stimulating lectures with discussions were given in connection with the Department of Physics, by the distinguished head of the physical laboratory of the University of Utrecht, Holland, from April 23rd to May 9th. Professor Kramers dealt with general physical and mathematical ideas arising out of the most recent developments of physics.

Again I am glad to state that Dr. F. A. Mouré's fortnightly recitals on the organ in Convocation Hall have been most successful.

During the past year the University has received the following benefactions:

From the Rockefeller Foundation for the School of Hygiene, \$250,000; Eaton Endowment (annual payment), \$25,000; Alexaner Lectureship Committee, \$14,368.53; Mrs. Jessie M. Stewart, for John A. Stewart Research Fund; \$10,000; Laura Spelman Rockefeller Memorial for Child Research, \$10,000; Graduate Fellowships: Imperial Oil Limited, \$500; Sir Edward Kemp, \$500; Robert Simpson Company, Limited, \$500; Colonel R. W. Leonard, \$500; Canadian Pacific Railway, \$1,500; Canadian National Clay Products, for Ceramics Lectureship, \$3,000; George H. Armstrong, Scholarship in History, \$2,250; E. R. Peacock, Esq., and Sir Joseph Flavelle, Bart., for Flavelle-Peacock Lectureship, \$1,250 each; Maurice Cody Memorial Scholarships, \$1,000; Scholarship in Mathematics, anonymous, \$800; Robert Bruce Scholarship, \$461.21; Sir Edmund Walker Scholarship, \$450; for Faculty of Dentistry, Joseph Errington, Esq., \$1,000; Canadian Dental Research Foundation, \$300; Ontario Dental Association, \$250; Ash-Temple Company, Limited, \$250; F. J. Ross, Esq., \$150; Boiler Inspection and Insurance Company Scholarships, \$1,950; Toronto Brick Company Scholarship, \$150; for University of Toronto Schools Scholarships, The T. Eaton Company, \$120, Hon. N. W. Rowell, \$100; Darling and Pearson Prize in Architecture, \$100; T. H. Barton, Esq., for Jardine Memorial Prize, English Verse, \$100; Delta Phi Epsilon Scholarship, \$100; McCaul Scholarship in Classics: Principal M. Hutton, \$25, George H. Fraser, Esq., \$25, A. M. Stewart, Esq., K.C., \$25; Squair French Library Fund, \$276.15;

Dr. R. A. Reeve Prize, \$50; British Association Advancement Science Fund, \$34; Professor F. Tracy, Prize in Ethics, \$20; University College Alumnae, Prize in English, \$10; Coleman Portrait Fund Committee, \$7.06.

Sir R. Leicester Harmsworth, Bart., of London, England, presented to the University a valuable portrait of John Burrige Chadwick, Archdeacon Andrew and General John Graves Simcoe, together with a collection of books from General Simcoe's library. This gift is of great historical interest to this University. The portrait now hangs in Simcoe Hall.

I take much pleasure in commending the faithful and efficient work, so essential to the well-being of this immense and complicated institution, that is being done by the staffs of the offices throughout the University.

All of which is respectfully submitted.

R. A. FALCONER,  
*President.*

October 25th, 1928.

---

REPORT OF THE PRINCIPAL OF UNIVERSITY COLLEGE  
PROFESSOR MAURICE HUTTON

This is presumably the last report I shall make on the fortunes of University College during the session.

It is a happy omen for my successor, and not perhaps wholly accidental, that this last report should also be unperturbed and unperturbing. Twelve generations of students have shown to me great forbearance and consideration during the last forty-eight years: it was only to be expected perhaps that the last of the twelve should seek to preserve the *bonne entente*, and to take an amicable leave of me, a disappearing generation of a superannuated professor.

However that may be, the only occasion I can recollect during the past session when we have not precisely seen eye-to-eye was an incident of slight account. On the occasion of the election of the Literary and Athletic Society it was suggested to me that it might have an auspicious and academic propriety, if an organ-grinder and a monkey patrolled our corridors for a few minutes between lectures: the monkey would have a scientific significance and contribute a link at present missing between the large body of our students who do not take the bulk of their lectures in University College, and the humanists who do; the organ-grinder's melodies would appeal to the human instincts of all alike, without regard to the gulf between the natural sciences and humanism. I could not measure academic propriety by the same broad standards, and in consequence the monkey-man and monkey—the missing link—did not parade.

But the disappointment was borne stoically, or better, in a Christian spirit, by the student body, and a final record added to the long list of their achievements of self-conquest, in respect of student high spirits, and of forbearance towards Victorian scruples.

This same session, it so happens, has also synchronized with an improvement in the classical standards of the classical honour classes,—although the lamentable policy of the School Board of Toronto, which still excludes Greek from all the Institutes of this metropolitan city except two, one of which is now losing its classical principal, Mr. Hagerty, to whom this College is much indebted, has not yet been withdrawn.

That the classical standard has thus arisen must be ascribed in part—and here I come to the chief disappointment and regret which mars the otherwise unalloyed peace and satisfaction with which I contemplate the long tenure of office which I have enjoyed, a tenure which added to that of my predecessor covers the unexampled period of well nigh a century, eighty-six years to be precise—to the faithful work of my colleague and friend, Professor David Duff, now, alas! returning to his native Edinburgh. Professor Duff has been far more than a faithful and unremitting teacher of the most disciplinary subject of the Arts' course, Latin. He has been, what no teaching, however faithful and unremitting, necessarily guarantees, a professor inspiring and most popular: one able to develop a subject of first-rate mental discipline, till it also became most interesting, most entertaining and most welcome. For nearly twenty years, thanks to the insight and rare judgment of men exhibited by my deeply regretted colleague, John Fletcher, University College has enjoyed the advantage of Professor Duff's vivacity, vitality and scholarship. His students, no less than his colleagues, and his colleagues no less than his students, will miss him sorely, and join with me in hoping that he will remember happily in his new, which is also his old, home, the score of years which he passed with great advantage to us in Canada.

A University is a small Republic of Letters, and gains enormously—even as the whole world of to-day is gaining—by the admixture of men of all countries and origins, by the disappearance of narrow nationalisms, and the reconciliation of conflicting prejudices and of limited points of view. Scotland has added too much to the life of this college, whether through Scotsmen directly, or through Scotch-Canadians, through Sir Daniel Wilson, George Paxton Young, Ramsay Wright and David Duff, or through men like James Loudon and John Fletcher, for it to be necessary for me or any one to harp upon this familiar theme. Our President himself is an illustration sufficient.

### GEOGRAPHICAL DISTRIBUTION OF STUDENTS

The geographical distribution of students is as follows:

## AUDITOR'S REPORT

Toronto, 31st October, 1928.

*To the Governors of the University of Toronto:*

GENTLEMEN:—

I have verified the attached Balance Sheet of the University, dated 30th June, 1928, and Schedules 1 to 10, and report that all the transactions of the year upon Revenue and Capital Accounts have been duly audited and found correct.

Yours faithfully,

G. T. CLARKSON,  
*Auditor.*

## FINANCIAL STATEMENT

*Balance Sheet, 30th June, 1928*

*Note.*—This statement does not include any assets or liabilities of the Toronto Conservatory of Music.

## SCHEDULE 1

## GENERAL ENDOWMENTS FUND

Additions for 1927-28:

Convocation Hall advance:

Restoration from proceeds of Wild Lands Sales, twenty-second instalment.....	\$377 35
--	----------

Annuity debentures:

Portion of 1927-28 instalments reducing principal:

Nineteenth instalment, issue of July, 1909.....	\$10,658 60
Seventeenth instalment, issue of January, 1911.....	2,561 00
Seventeenth instalment, issue of January, 1911.....	5,911 00
Thirteenth instalment, issue of April, 1915.....	1,742 12
Fourth instalment, issue of July, 1924.....	4,363 00
	<u>25,235 72</u>

Hygiene and Public Health building, entered at cost.....	417,642 61
Arena building, entered at cost.....	223,070 40
Land and building No. 43 St. George Street, purchased for.....	30,054 25
Building No. 6, Queen's Park, final payment upon purchase....	458 26
Building No. 100, Queen's Park, final payment upon purchase..	720 00

Increased valuation of lease upon renewal:		
Caradoc Farm, Starr Bequest .....	\$300 00	
Frontage Licenses, University Avenue:		
Oxford University Press .....	\$2,473 33	
University Club .....	1,300 00	
	<u>3,773 33</u>	
Lot 26, Concession 1, Seymour, received for quit claim .....	400 00	
Library proper:		
Additions for year less depreciation (Schedule 7) .....	22,415 61	
	<u>724,447 53</u>	
<i>Contra</i>		
Valuations written off:		
Site of old Pathological building deeded back to Toronto General Hospital (31,252 square feet at original entry) .....	38,500 00	
Properties transferred to the Provincial Government as per Ontario Statutes 1928, Cap. 55:		
(a) From Site Lands (Schedule 7):		
	Sq. feet	
Easterly portion of Lot 13 .....	4,873	
North half, Lot 16 .....	18,073	
South half, Lot 17 .....	17,500	
Lot 18 .....	15,681	
Lot 20 .....	20,908	
Lot 25 .....	20,908	
Lots 26 and 27 .....	65,076	
	<u>163,019</u>	at 40 cents 65,207 60
(b) From Leased Properties (Schedule 9):		
South half, Lot 16, at valuation hitherto carried in books .....	20,000 00	
North half, Lot 17 .....	20,000 00	
Lot 19 .....	5,000 00	
East half of south part, Lot 21 .....	13,000 00	
West half of south part, Lot 21 .....	13,000 00	
	<u>74,000 00</u>	174,707 60
		<u>\$549,739 93</u>
Return of 30th June, 1927 .....	9,020,111 05	
Return of 30th June, 1928 .....	\$9,569,850 98	

## SCHEDULE 2

## SPECIFIC ENDOWMENT FUNDS

(Scholarships, Prizes, etc.)

A. A. A. S. Scholarship (Physics, etc.) .....	\$2,350 00
Aggett, Harvey, Memorial (Applied Science) .....	1,616 03
Aikins (English Literature) .....	5,031 63
Alexander Lectureship (English Literature) .....	14,471 87
All Souls' Historical Essay Prize .....	2,642 14
Armstrong, George H. (History) .....	2,266 43
B. A. A. S. Medals, etc. ....	19 00
Balfour Lectureship (Surgery) .....	4,302 20
Balmer, Jean (Science) .....	1,185 37
Bankers' (Political Science) .....	1,200 00
Baptie, Margaret W. (Medicine and Science) .....	4,047 47
Blake (Matriculation) .....	31,231 72
Blake (Science and Moderns) .....	3,750 00
Boiler Inspection and Insurance Company (Applied Science) .....	150 00
Booth (University Schools) .....	1,000 42
Brickner, Rabbi (Social Service) .....	1,034 11
Brown, George, Memorial (Medical Science) .....	10,299 55
Brown, George (Modern Languages) .....	1,128 34
Bruce, Robert (Arts and Medicine) .....	839 11
Chappell, Walter F., Prize (Medicine or Surgery) .....	553 74
Cockburn, G. R. R. (Greek) .....	1,050 00
Cody, Maurice, Memorial (Modern History) .....	801 83
Cody, Maurice, Memorial (University Schools) .....	200 61
Coleman Medal (Geology) .....	535 96

Crawford, Allan Rudyard (University Schools).....	\$500 00	
Darling & Pearson Prize (Architecture).....	100 00	
Delta Phi Epsilon (Arts).....	100 00	
Dickenson, Marion E. (Household Science).....	5,265 91	
Fulton, Alexander T. (Mathematics and Science).....	3,351 30	
Gibson (Matriculation).....	3,215 19	
Gibson (Pass Matriculation).....	4,733 54	
Graduate Fellowships (Sundry).....	2,125 00	
Hardie, William (Matriculation).....	2,100 00	
Irwin, Herbert W., Memorial (Modern Languages).....	1,057 82	
Jenkins (Engineering).....	200 00	
Khaki University Memorial.....	2,243 65	
Laurier, Sir Wilfrid, Memorial.....	2,322 61	
Lyle Medal (Orientals).....	497 26	
McCaul Medal (Classics).....	508 07	
McCaul Scholarship (Classics).....	4 24	
McCharles, Aeneas, Bequest.....	14,996 61	
McCrae, John (Matriculation).....	11,003 10	
Macdonald, John (Philosophy).....	2,080 00	
Mackenzie, Alexander, Memorial (Political Science).....	16,792 60	
Mackenzie, J. J., Fellowship (Pathology).....	5,369 42	
McPhedran, Alexander, Research Fellowship (Medicine).....	25,156 46	
Marfleet, Pearson Kirkman, Lectureship.....	6,668 06	
Mickle, Charles, Fellowship.....	28,721 89	
Mickle, Ellen, Fellowship.....	28,731 83	
Moss (Classics).....	2,000 00	
Mulock, Mary (Classics).....	2,838 74	
Mulock, William (Classics and Mathematics).....	2,000 00	
Nesbitt, Wallace, Medals (University Schools).....	537 12	
Nipissing Research Fellowship (Mining).....	21,697 26	
Ontario Hockey Association, War Memorial (Matriculation).....	2,100 00	
Peters, George A. (Surgery).....	3,400 00	
Porter, T. M. (University Schools).....	5,090 82	
Prince of Wales (Matriculation).....	950 00	
Quebec Bonne Entente Prize (French).....	1,050 00	
Ramsay, William (Physics).....	1,038 60	
Ramsay, William (Political Economy).....	1,009 42	
Reading Camp Association Prize.....	50 00

43 St. George Street, house and land.....	30,054 25	
45 St. George Street, house and land.....	39,079 67	
81 St. George Street, house and land.....	30,323 93	
83 St. George Street, house and land.....	25,287 58	
		\$6,238,270 67
Library.....	\$372,786 79	
General Museum Specimens.....	1 00	
Convocation Hall Organ.....	19,603 11	
		\$392,390 90
Departmental Equipment:		
Anatomy.....	\$1,340 00	
Architecture and Drawing.....	10,830 00	
Astronomy.....	1,635 00	
Biology.....	6,131 25	
Botany.....	5,500 00	
Chemical Engineering and Applied Chemistry.....	10,114 00	
Chemistry.....	14,040 00	
Civil Engineering; Municipal and Structural.....	10,075 00	
Civil Engineering; Surveying and Geodesy.....	12,980 00	
Dentistry.....	85,000 00	
Electrical Engineering.....	30,923 00	
Engineering Physics and Photography.....	4,127 00	
Geology.....	7,505 00	
Household Science.....	19,000 00	
Mathematics.....	500 00	
Mechanical Engineering.....	10,000 00	
Mechanics.....	750 00	
Mineralogy.....	10,145 00	
Mining.....	16,270 00	
Ontario College of Education.....	45,042 44	
Pathology.....	18,440 56	
Pathological Chemistry.....	7,925 74	
Pharmacology.....	2,430 00	
Physics.....	29,250 00	
Physiology.....	12,500 00	
Psychology.....	2,700 00	
		\$375,153 99
Furniture and Furnishings:		
Men's Residences.....	\$18,715 89	
Women's Residences.....	4,199 90	
University College Women's Union.....	10,950 00	
University College and other buildings—general furniture.....	11,938 00	
		45,803 79
Arena.....		223,070 40
Athletic Field Stadium and equipment.....		11,817 88
Gymnasium equipment.....		7,620 19
Dining Hall equipment.....		1 00

Printing Plant.....	\$1 00
Connaught Laboratories (Farm, buildings and equipment).....	80,000 00
Connaught Laboratories (Medical building plant).....	1 00
Central Power Plant.....	72,474 93
Surveying Practice Camp, Lutterworth Township (land, \$1,250; buildings, etc., \$10,000).....	11,250 00
Aura Lee Grounds and equipment (Ontario College of Education).....	17,276 27
<b>Total valuation.....</b>	<b>\$8,978,085 15</b>

Return of 30th June, 1927.....	\$8,381,703 60
Additions thereto:	
Hygiene and Public Health building.....	417,642 61
Arena.....	223,070 40
Property No. 6 Queen's Park, formerly leased to Mrs. Beatty, transferred to this account from Schedule 9.....	26,394 28
43 St. George Street, purchased for.....	30,054 25
Final instalment of purchase of Argyll House (Women's Residence).....	720 00
Library proper:	
Value of additions for 1927-28 as reported by the Librarian.....	\$33,945 10
Less depreciation at 3 per cent. on \$384,316.28.....	11,529 49
	22,415 61
	<u>\$9,102,000 75</u>

*Contra*

Central Power Plant:	
Repayment from Revenue for 1927-28.....	\$20,208 00
Valuations written off General Endowments Fund as per Schedule 1:	
Site of old Pathological building.....	38,500 00
Lands transferred to Provincial Government formerly included in this Schedule.....	65,207 60
	<u>123,915 60</u>
Return of 30th June, 1928.....	<u>\$8,978,085 15</u>

## SCHEDULE 8

## UNPRODUCTIVE LANDS

Vacant land in Port Hope.....	\$8,045 00
Endowment lands unsold in various townships.....	152 00
U.C.C. block on King Street.....	50,308 63
	<u>\$58,505 63</u>

## TRANSACTIONS, 1927-28

Local Improvement taxes, U.C.C. block.....	\$26 71
Return of 30th June, 1927.....	58,478 92
	<u>\$58,505 63</u>
Return of 30th June, 1928.....	<u>\$58,505 63</u>

## SCHEDULE 9

## LEASED PROPERTIES

Land leased to City of Toronto.....	\$120,000 00
Park lots leased.....	264,055 40
Toronto business properties.....	310,000 00
Caradoc Farm.....	3,000 00
	<u>\$697,055 40</u>
House and land, No. 47 St. George Street.....	10,172 95
Building, No. 719 Spadina Avenue.....	4,000 00
Building, No. 721 Spadina Avenue.....	4,023 51
	<u>18,196 46</u>
Rentals and City of Toronto payment accrued.....	8,638 29
Rentals past due.....	2,130 00
	<u>\$726,020 15</u>
Return of 30th June, 1927.....	\$824,332 33
Further payment upon purchase of No. 6 Queen's Park.....	458 26
Increase in capitalized value of Caradoc Farm property upon renewal of lease.....	300 00
	<u>\$825,090 59</u>

*Contra*

## Items transferred to Schedule 7:

Property No. 6 Queen's Park (being Lots 12, 13 and 14, University Park) formerly leased to Mrs. Beatty (47,915 square feet at 40 cents).....	\$19,166 00	
Building thereon at amount paid therefor.....	7,228 28	
Valuations of leased lots transferred to Provincial Government (Schedule 1).....	71,000 00	
Decrease in rentals, etc., outstanding.....	1,676 16	
		<u>\$99,070 44</u>
Return of 30th June, 1928.....		<u>\$726,020 15</u>

## SCHEDULE 10

## INVESTMENTS, CASH AND ACCOUNTS RECEIVABLE

Municipal and other debentures.....	\$87,761 79	
Interest accrued.....	614 53	
		<u>\$88,376 32</u>
